Figures are AA estimates **Eggert-DYR** 40% owned by DYR **Scholz & Friends** majority-owned by Ted Bates Worldwide **Ted Bates Werbeagentur** includes majority-owned Cerca **Serviceplan, Bessere Werbung, Lueders, Spiess & Ermisch, Acon, Ernst & Partner, Borsch, Stengel & Partner,** and **Hakuhodo** figures are AA estimates **Lowe Marschalk Luerzer** 75% owned by Lowe Marschalk Worldwide **Von Mannstein Gruppe** includes offices in Duesseldorf, Munich and Paris **Hildmann Simon Rempen & Schmitz/SMS** 63.4% owned by Scali, McCabe, Sloves **RSCG, Butter, Rang** 51% owned by RSC&G, Paris **Consell** majority owned by Grey Advertising **Handley, Smith & Partners** majority owned by Bozell, Jacobs, Kenyon & Eckhardt

GREECE

Spot/Thompson 44% owned by J. Walter Thompson Co. **Bold Advertising** affiliated with Ogilvy & Mather Worldwide **BBDO Advertising** formerly Ikon/DD/BBDO **Olympic/DDB Needham** affiliated with DDB Needham Worldwide **Gnomi/FCB** 40% owned by FCB Communications **Lamda Alpha Advertising** affiliated with N W Ayer **Grafis Advertising** 26% owned by BBDO Worldwide **Interpress** began operation in May 1985

GUATEMALA

APCU Thompson Asociados J. Walter Thompson Co. holds 40% equity in offices in Panama, Costa Rica, El Salvador and Honduras **Concepto**

(Continued on Page 77)

Only one business news magazine delivers the world every week.

Your most important target is the world, because business today is global.

And only Business Week International gives you the world every week.

Every issue delivers an international audience of top-level decision-makers in Europe, Asia and Latin America.

87% of our subscribers are native citizens—*not* American expatriates.

96% are in business, finance, government, industry or the professions; of these:

54% have policy or operational responsibility for the international business of their companies.

53% are in top management. In fact, Business Week International leads all other international business magazines in cost-efficiency in reaching Senior and Chief Executives in Europe and Asia. Five world-respected independent surveys confirm it.*

So reach key international decision-makers every week. In the business-magazine they read every week.

Business Week International. The world's only international newsweekly of business.

*E.B.R.S.; P.E.S.; A.B.R.S.; International Financial Managers in Europe Readership Survey; C.E.O.'s in Europe Readership Survey.

INTERNATIONAL BusinessWeek

The world's only international newsweekly of business.

Nissan's tough road

(Continued from Page 4)
agency review for Nissan (*see story below*). The consulting company is known as much for squeezing agencies' compensation arrangements as it is for thoroughness in ad agency reviews.

Canter, Achenbaum (then known as Canter, Achenbaum, Heekin) handled the Nissan search 10 years ago, when Esty was selected to replace Parker.

Esty has handled the account on a fee basis, rather than a straight commission based on billings, and the new agency will undoubtedly be asked to negotiate similar terms.

Following Toyota Motor Sales' lead, Nissan will insist the account be handled on the West Coast.

Although Toyota's agency, DFS Dorland Worldwide, at first resisted the move, it completed the relocation of the creative work from New York to its Torrance, Calif., office earlier this year.

Ogilvy & Mather, with its full-service Los Angeles office, remains a front-runner in the race for the account, according to industry executives. But several West Coast agency sources are putting money behind dark horses, including Fallon McElligott, Minneapolis.

"Nissan is looking for a creative solution, and Fallon is a hot shop right now," said one source.

Nissan's Mr. King said he is entering the review with an open mind. "We're going in with wide parameters," he said. "We have no predetermined ideas about the size of our next agency."

Commenting on the possibility of splitting the account, Mr. King said he would prefer to have one agency service the entire account, "but I'm open-minded . . . and will consider any new wrinkles."

If the truck account were to be broken out, that could make Chiat/Day a candidate for that business. Agency sources say the agency won't jeopardize its Porsche North America account by pitching the entire Nissan business.

As for Nissan's declining market share, Mr. King attributed sales slippage to the rapid introduction of new vehicles last year.

Nissan brought out six all-new vehicles—out of its lineup of nine lines—in 1986, leaving it with the challenge of moving from one introduction to the next, without a chance for any sustaining campaigns.

He added that the U.S. car market absorbed 300,000 vehicles last year from new players in the market, such as Hyundai Motor America and Yugo America.

Several other automobile ad accounts broke loose recently in the white-hot competitive environment. The battle for a share of sluggish overall sales is putting additional pressure on agencies to produce breakthrough advertising.

Nissan's firing of Esty could affect the $120 million American Motors Corp. account now handled by another Saatchi & Saatchi Co. agency, Saatchi & Saatchi Compton Worldwide, New York.

The AMC account is up in the air because of the bid by Chrysler Corp. to acquire the ailing automaker. While Compton would like to retain the business, it probably would relinquish it if Saatchi & Saatchi goes through with a plan to merge Compton with sister agency DFS Dorland Worldwide, which handles Toyota.

Austin Rover Cars of North America, Miami, last week took one hot creative shop out of the running for Nissan: It selected Hal Riney & Partners, San Francisco, for its $20 million account.

That change comes shortly after the February launch of its $20,000 Sterling sports luxury sedan, which indicates that auto marketers don't feel they can wait long to solve sales problems. Beber Silverstein & Partners, Miami, previously handled.

Riney will handle all creative, and print media buying, while broadcast placement will stay with RMR Advertising, New York.

Lotus Performance Cars' $2 million account recently changed hands, too, going from Durfee & Solow to McCann-Erickson, both New York.

Lotus was acquired last year by General Motors Corp.#

Raymond Serafin in Detroit contributed to this story.

Canter, Achenbaum surfaces when big advertisers jettison

By JENNIFER PENDLETON and CLEVELAND HORTON

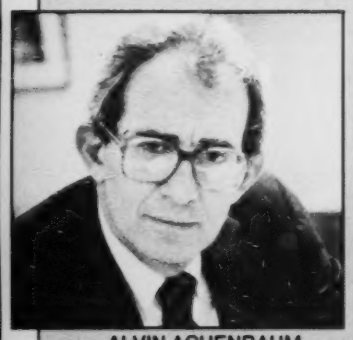
Ten years ago, when Nissan Motor Corp. fired Parker Advertising, it hired New York marketing consultant Canter, Achenbaum, Heekin—now Canter, Achenbaum, Associates—to take charge of its agency search.

Last week, when Nissan fired the agency that emerged from that review process, William Esty Co., Canter, Achenbaum was again on the scene.

The 14-year-old company offers a range of marketing-related services, but it is best known for helping match advertisers with agencies. Recently, it handled two new Asian entrants to the U.S. automotive marketplace—American Honda Motor Co.'s Acura division and Hyundai Motor America, the Korean automaker.

It also helped match Toyota Motor Sales with DFS Dorland Worldwide (then Dancer Fitzgerald Sample).

Chairman Alvin Achenbaum, a veteran of J. Walter Thompson Co. and Grey Advertising, emphasizes that Canter, Achenbaum does more than just handle agency reviews.



ALVIN ACHENBAUM

"If that's all we did, we'd starve," he says. But, he concedes, "probably 85% of our notoriety comes from this area" of business.

With partners Stanley Canter, a veteran of Ogilvy & Mather and McCann-Erickson, and Richard S. Lessler, a former vice chairman of Interpublic Group of Cos., Mr. Achenbaum has developed a reputation for negotiating tough compensation deals for clients.

This skill hasn't made Canter, Achenbaum popular among ad agencies, but Mr. Achenbaum says the company is misunderstood. "We're not tough, we're fair," he says. "And reasonable."

Gerrold Rubin, president of Rubin Postaer & Associates, Los Angeles, agency for Honda's general-market advertising, uses a baseball analogy to describe his feelings: "It's like the pitcher who throws a high, hard one at your head. He may be a good pitcher, but you don't invite him to dinner."

Canter, Achenbaum provides a systematic approach to agency selection tailored to the specific needs of individual clients, says Mr. Achenbaum. "We talk to our clients in great detail."

Critics contend Canter, Achenbaum's system is inflexible and tends to favor larger, established agencies.

Advertisers and agencies alike agree that Canter, Achenbaum is "thorough." Jim Agnew, exec VP, J. Walter Thompson USA/West, says of the Nissan review: "I expect it will be extremely deliberate, long and they'll be very involved, right through the compensation [negotiations]."

Says Cy Schneider, chairman/Pacific, Bozell, Jacobs, Kenyon & Eckhardt: "Canter, Achenbaum knows advertising backward and forward. Anyone intending to compete should be ready to meet stringent requirements."

Mr. Achenbaum says Canter, Achenbaum executives know the right questions to ask agencies. "We have the skill to be able to expose agencies, warts and all . . . to get beyond the facade of the initial sales pitch," he asserts.

One of the more interesting sidelights to Canter, Achenbaum is that it has been able to work for direct competitors without facing conflict-of-interest charges.

While it hasn't worked for Toyota and Nissan at the same time, the company has been privy to sensitive marketing information from both marketers. But Mr. Achenbaum insists any information learned while working for a client remains top secret. Only a few senior people on Canter, Achenbaum's 20-person staff are allowed access to proprietary information.

The consultant's integrity was questioned in 1977, when it was involved in Nissan's last agency hunt. Grey Advertising, which was one of six agencies pitching, resigned, claiming Canter, Achenbaum was biased toward Wells, Rich, Greene (AA, April 11, 1977).

Esty, however, went on to win the account.#

For the Record

FOOTE, CONE & BELDING COMMUNICATIONS, Chicago, reported "higher than expected" earnings for the first quarter, but results were lower than in 1986. FCB posted net income of $2 million, down 2.2% from first quarter 1986, on revenues of nearly $71.1 million, off 6.4% from a record high in '86. A 3.1% increase in foreign revenue partially offset a 9.5% decline in U.S. operations. Separately, **Omnicom Group**, New York, reported a 17% decline in net income to $6.3 million in the first quarter and a 5% increase in commission and fee income to $177.2 million.

SCALI, McCABE, SLOVES, New York, which agreed to buy back 20% of its shares from parent Ogilvy Group and a rights option to acquire another 10% nine months ago (AA, Aug. 25, 1986), cannot turn around and go public with those shares and also has no plans to be spun off as a separate public company from Ogilvy, despite published reports. "Those shares that we sold to the Scali management group and profit-sharing fund have long-term restrictions well into the 1990s," said Ogilvy Treasurer John Gill. He noted the shares were sold at book value and Ogilvy shareholders would object if Scali management in turn profited in the stock market from that. Both Mr. Gill and Scali CEO Marvin Sloves said there were no discussions at present about a spinoff.

RUBIN REID NOTO & EHRENTHAL, New York, opened with $24 million in billings as the successor agency to Shaller Rubin. Chairman Mel Rubin, Exec VP-Creative Director Michael Reid and Senior VP-Associate Creative Director Peter Noto all were principals in Shaller Rubin, while Herb Ehrenthal, exec VP-chief operating officer, was a senior VP-senior management representative at Needham Harper Worldwide. Milt Shaller, another principal, has left the agency "to pursue other interests." The new agency is at 122 E. 25th St., 10010.

NEWSPAPER AD VOLUME in 1986 jumped 7.2% to about $27 billion and accounted for more than 26% of total U.S. ad spending, said the American Newspaper Publishers Association, Washington. Daily circulation last year for morning and afternoon papers fell about 0.4% to 62.5 million, while Sunday circulation increased about 5% to 61.5 million.

RETAIL SALES for the four weeks ended May 2 registered double-digit gains for some leaders. K mart Corp., Troy, Mich., posted an 11.9% increase to $1.95 billion; May Department Stores Co., St. Louis, was up 15.5% to $758.8 million; and Montgomery Ward & Co., Chicago, was up 14.2% to $326.16 million. J.C. Penney Co., New York, was up 7.6% to $972 million.

ESPN, Bristol, Conn., last week signed its first agreement with a cable TV system to carry its package of National Football League games this fall. Cable TV Co., Berwick, Pa., serves a total of 50,000 subscribers.

ALFIN FRAGRANCES, New York, was advised by the New York State Attorney General's office that it is investigating Alfin's Glycel skincare anti-aging claims. The letter follows the Food & Drug Administration's actions against Alfin, Estee Lauder Inc. and Avon Products (AA, April 27). The FDA also has since informed Cosmair, Shiseido Cosmetics and Christian Dior Perfumes that they, too, must seek new-drug status for their products if they wish to keep making certain claims.

GENERAL MOTORS CORP.'S GMC Truck division, Pontiac, Mich., will launch its new full-size Sierra pickup with a pool of one 60-second and two 30-second TV spots June 1 and with ads in a broad cross section of June magazines. McCann-Erickson, Troy, handles.

PROCTER & GAMBLE CO., Cincinnati, last week filed a petition with the Food & Drug Administration to use olestra (formerly called sucrose polyester) as a calorie-free, cholesterol-free fat replacement in shortenings, oils and salted snacks. Sources said approval of the food additive could come within a year. P&G has been testing olestra for more than 20 years.

HILL & KNOWLTON, New York, and the Wirthlin Group, McLean, Va., a national research and polling company, announced a joint marketing agreement in which they will provide public relations and research services to clients. The two companies, while remaining separate, will promote the services of the other to clients.

FIRESTONE TIRE & RUBBER CO. this year will start moving its corporate headquarters to Chicago from Akron, Ohio, to put its retail business in "a more retail and finance-oriented community," a spokesman said. Firestone hasn't decided whether its $20 million ad account will be handled by the Chicago office of Bozell, Jacobs, Kenyon & Eckhardt. The agency now handles the business out of its Birmingham, Mich., office.

DOW CHEMICAL CO.'S Merrell Dow Pharmaceuticals, Cincinnati, is offering $840 million in cash for seven brands owned by the A.H. Robins Co., Richmond, Va. The brands include Chap Stick, Dimetapp and Robitussin. A Robins spokesman said the company, now under Chapter 11 bankruptcy protection due to litigation over the Dalkon Shield, has "no interest in selling major portions" of its business.

ACCOUNT ACTIVITY: **Panasonic Industrial Co. Communications**, Secaucus, N.J., to **Lewis, Gilman & Kynett**, Philadelphia, for its $10 million account. Cunningham & Walsh, New York, resigned when it was acquired by N W Ayer, agency for the Toshiba Business Products Group. . . . **MainStreet**, Bannockburn, Ill., a division of Federated Department Stores, to **Bayer Bess Vanderwarker & Flynn**, Chicago, from W.B. Doner & Co., Detroit, for its $3 million broadcast account. . . . **Hardee's Area VII** co-op, Livonia, Mich., to **Baker, Abbs, Cunningham & Klepinger**, Birmingham, from Handley Miller, Indianapolis, for its $2 million Midwest regional account. . . . **National Pork Producers Council**, Des Moines, Iowa, to **Campbell-Mithun**, Chicago, from in-house for its estimated $1 million food-service account.

WORTH NOTING: **Leo Burnett Co.**, Chicago, entered Turkey through a partnership with Markom Reklam Hizmetleri, Istanbul, now known as Markom/Leo Burnett. . . . **Kraft Inc.**, Glenview, Ill., last week began a $3.5 million spot TV campaign for its Lender's Bagel Bakery unit. P&G, Clorox lead Florida ad rebellion

By STEVEN W. COLFORD

Procter & Gamble last week directed its agencies to stop spot media buys in Florida after June 30 because of the state's 5% sales tax on advertising.

Robert Goldstein, P&G VP-advertising, said the billion-dollar advertiser will not place media ads in Florida until it weighs the impact of the tax and the needs of its brands. P&G's fiscal year begins July 1, the day the tax becomes law.

But a P&G agency source said the advertising halt, which does not include national media buys, will remain in effect until the tax is repealed.

P&G's move echoed Clorox Co.'s decision earlier last week to cancel spot buys in Florida, and other advertisers are expected to follow suit as pressure for an advertiser boycott picks up steam.

The Florida tax has drawn the wrath of the ad industry because it would be applied to all advertising coming into the state. Even national advertising placed outside the state would be affected if it runs in Florida. Other states tax advertising, or are considering a tax, but nothing as broad-based as Florida's law. *(See related story on Page 57.)*

Its constitutionality will be reviewed by the Florida Supreme Court at the request of Gov. Bob Martinez. Industry groups plan to file comments with the court, which is expected to render an advisory opinion in June.

Spot TV for Clorox liquid bleach will end the day the 5% tax on advertising and other services goes into effect, said David Goodman, Clorox VP-advertising. Clorox will resume buys in Florida upon "indication that the tax will be rescinded in the next legislative session," he added.

Clorox, which spent more than $107 million on advertising in 1986, also is reviewing advertising in Florida for brands other than its liquid bleach, said Mr. Goodman, who serves on the boards of directors of the American Advertising Federation and the Association of National Advertisers.

Other major marketers also were considering ad boycotts. At Pet Inc., St. Louis, a senior executive said the marketer was considering discontinuing media buys in Florida, as did a spokesman for Kellogg Co., Battle Creek, Mich. "We are reviewing the Florida tax situation and its relationship to Kellogg," said the Kellogg spokesman. "We have not taken any action yet and hope the ad-tax law is repealed before we have to stop our advertising in the state."

A Bristol-Myers spokesman said the New York-based marketer of toiletries and over-the-counter medicines was "considering the situation" but no decision had yet been made. He denied reports the $350 million-a-year advertiser already had ordered a reduction in Florida buys.

Leo Burnett USA, Chicago, last week heard boycott talk from some major clients. Jack Kraft, agency vice chairman, said "at least two clients" asked it to terminate spot

Massive summer push

Nabisco sets new products

By JUDANN DAGNOLI

Nabisco Brands appears to be girding for a summer marketing assault that would divert the bulk of its $70 million ad budget for cookies and crackers into as many as 16 new products.

Nabisco sales representatives are telling grocery buyers the introductions will include line extensions for the company's Ritz cracker and Almost Home and Newton cookie lines, as well as at least two specialty products targeted at competitor Pepperidge Farm.

The new-product push is scheduled to start June 22, when the East Hanover, N.J.-based unit of RJR Nabisco begins its next upcoming promotional period.

Nabisco executives could not be reached for comment.

Grocery sources said Nabisco is still in early discussions with retail buyers, and has not detailed its promotional or

Last Minute News

Esty to cut staff by nearly 50%

NEW YORK—William Esty Co. will dismiss about 180 of its total 400 employees by the end of July. The cutbacks include closing the agency's 40 to 50-person Los Angeles office. The moves follow the loss of the $150 million Nissan account (AA, May 4, *et seq.*) and its resignation of the $40 million MasterCard International account. Esty now is a $150 million agency, down 70% from last year *(see related story on Page 34)*.

Analysts slam Saatchi report

LONDON—U.K. analysts complained that Saatchi & Saatchi Co. Chairman Maurice Saatchi and other top Saatchi executives refused to give a breakdown of Ted Bates Worldwide's financial results and ducked questions about possible mergers of Saatchi-owned agencies when Saatchi's half-year results were announced May 14. For the half-year ended March 31, Saatchi announced pretax profits of $93.85 million, slightly higher than analysts' predictions. Sales increased by 130% to $3.06 billion. Despite the earnings gains, Alan Gottesman, an analyst at L.F. Rothschild, Unterberg, Towbin, New York, lowered his rating of S&S' stock to "hold" from "accumulate," saying "investor perceptions may deteriorate" because of account losses and agency mergers. Saatchi's two stalled merger discus-

Shops line up to bag $200M burger bundle

Blame it on Herb.

Executive changes, franchisee discontent, stagnant sales and a tough climate in the fast-food industry all contributed to Burger King Corp.'s decision to review ad agencies for its $200 million account, currently held by J. Walter Thompson USA, New York.

But many observers conclude it really was a nerd named Herb who caused this whopper of an agency/client relationship to come undone.

Burger King "didn't fire J. Walter Thompson after Herb, but it was clearly a strike against them," said John McMillin, food-industry analyst for Prudential-Bache Securities. "After that, they tried 'Burger King Town' and now 'The best food for fast times' theme.

"Burger King gave them a chance, but three strikes and

Highlights

Shortening the mini 4
TV miniseries are becoming more mini and less serial as networks cut costs and audiences turn to shorter programs.

Bloom's new president 6
The Bloom Agency, the third-largest ad agency in Dallas and 48th-largest nationwide, is changing character—in more ways then one. Last week, the agency named Seth Werner, 32, president-executive creative director of the Dallas office, filling a post that had been vacant since December.

PTL marketing plan sinks 12
When the Rev. Jim Bakker fell from grace, he took an ambitious marketing plan with him. After his banishment, the PTL's plans for wooing national sponsors were put on hold, and Larry Sims, a former General Foods brand manager serving as the network's marketing maven, was fired.

Wendy's without Welter 22
William Welter's resignation last week from Wendy's International continued the shake-up of top management and raised questions about internal support for the troubled chain's turnaround strategy.

Chevy dealers unconvinced 26
While General Motors Corps.' Chevrolet division and Procter & Gamble remain optimistic about their 750-vehicle-giveaway promotion, Chevrolet dealers are returning mixed reviews.

Trolling for tourists 30
New England is attacking British TV; the South's bombarding German magazines. The U.S. invasion of overseas tourism markets has just begun. Prodded by the U.S. Travel and Tourism Administration, states are banding together to sell their regional attractions abroad.

Esty's independence day 34
William Esty Co. has received commitments from parent Saatchi & Saatchi Co. that the New York-based agency will be allowed to rebuild and remain independent, rather than be forced to merge with other Saatchi shops.

Battered Beber 36
Trouble is mounting at Beber Silverstein & Partners—one of the biggest agencies in the Southeast and, once, one of the hottest. The beleaguered shop this month lost its largest account, the $20 million in business for Austin Rover Cars' Sterling luxury auto.

Juice for adults 52
Del Monte USA is putting new punch behind its efforts to attract adults with $38 million in support for its new Fruit Blends line of blended fruit juices.

INTERNATIONAL

Nestle retrenches 60
Nestle, hard hit by the falling U.S. dollar and the collapse of world coffee prices last year, is hunkering down and planning no major acquisitions this year, says Managing Director Helmut Maucher. Although the company's profits increased 2.2% last year, sales were down 9.9% because of the falling dollar.

Canadian best seller 61
The proposed law banning all promotion of tobacco products in Canada has become a "best seller" for Health Minister Jake Epp. "We've had more demand for [copies of] this bill than any other that has come out of this ministry," said a spokesman for Mr. Epp.

OTHER NEWS

Ketchum Communications' triple play in the acquisition arena this month may not be its last. Page 34.

Ice cream, fruit and healthful foods dominated the news from the Food Marketing Institute's annual convention, where major food companies showcase new products. Page 41.

Wilkinson Sword USA's new owners are committed to expanding the company's personal-care lines, beginning with an entry in the $250 million U.S. shave-cream market. Page 52.

While Florida moves toward implementing a unique 5% sales tax on national advertising, nearby Louisiana appears to be the first state to consider taxing advertising as if it were personal property. Page 57.

Minnetonka Corp.'s decision to divest its Softsoap and other mass-market brands accelerates its transformation into a prestige-products marketer. Page 75.

American Greetings Corp. is making its long-expected entry into the "alternative" greeting-card market. Introduction of its 78th Street line, expected on shelves by mid-June, will coincide with a $10 million corporate image campaign. Page 100.

CBS will replace eight hours of prime-time programming with nine series and will drop movies on Tuesday and Saturday in the 1987-88 ratings battle. Page 101.

Joan Rivers won't be the flag-waving symbol of Fox Broadcasting Co. anymore. Starting this week, a rotating group will host "The Late Show" and carry on Fox's quest to become the fourth network.

Guest hosts will replace Rivers at Fox

By WAYNE WALLEY

LOS ANGELES—Joan Rivers' departure last week as the host of Fox Broadcasting Co.'s "The Late Show" so far is not stalling the fledgling fourth network.

"People have been skeptical of Joan from the beginning, but she proved the show is viable and good counter-programming to local news," said Arnie Semsky, exec VP-media and programming services, BBDO Worldwide, New York. "In the long run, Fox may be better off with the new format, but they couldn't have launched this without her. Joan is a known quantity."

Fox intends to keep "The Late Show" on the air, most likely using guest hosts on a weekly or nightly basis.

"Media buyers will be antsy now, because they won't know who the host will be," said one agency executive. "With Joan, there was a track record.

"But if Fox will gamble and guarantee demographics, it could work. All I know is the Fox sales staff has to be reeling from this," the executive said.

Ms. Rivers and Fox are negotiating a settlement of her original three-year deal, which may include stints as one of the guest hosts. Fox hopes the rotating hosts will help improve national household ratings, which dropped to 2.1 for the week of April 27, according to A.C. Nielsen Co.

The turmoil comes just a year after Fox outlined its ambitious plans to create a new programming service to rival the Big 3 networks, but most observers believe the move will not harm Fox's image in the ad community as a fourth network.

With three hours of prime-time programming in place on Sunday and two hours set to premiere July 11 (not May 30 as previously planned), media buyers say they will continue to use Fox as a bargaining chip and possible alternative to the Big 3 for upfront buys in both prime time and late night.

"We'll have a very small impact on the marketplace," admits Fox Broadcasting Co. President-Chief Operating Officer Jamie Kellner. "But we're positioned underneath the other networks to be a more efficient buy for the advertiser."

Three weeks ago Fox quietly pulled its episodic tune-in advertising in-house from Chiat/Day, Los Angeles.

Fox expects to use Chiat/Day for special projects and program launches in the future. But Fox officials say they probably will hire a different media buyer and may consider either Independent Media Services, New York, which handles some media buying for Rupert Murdoch's News America, or JWT Entertainment, Los Angeles, the agency of record for 20th Century Fox Film Corp.#

On the acquisition trail

BBDO/West shops

SAN FRANCISCO—BBDO/West President Don Mitchum confirmed the agency is negotiating to purchase "one or two" undisclosed agencies here in the next few weeks.

"Our goal is to be one of the top 10 agencies in San Francisco," he said. The San Francisco office bills $15 million.

Vittel America will end its two-year relationship with the BBDO office Aug. 1, when it moves its $1.7 million account to Lewis & Partners. Vittel President Philippe Lecas said the move reflects the company's shift away from consumer media and toward sales promotion and trade advertising.

BBDO already has replaced a portion of the billings loss, picking up Sunnyvale-based Bonsu, a software marketer.

West Coast News

A-Plus Products, Beverly Hills, Calif., has named DDB Needham Worldwide, Los Angeles, first agency for Epilady, a new personal appliance designed to remove hair from women's legs. Budget estimated at $1 million.#

Werner joins Bloom

Dancin' raisin creator gets tall order

By SUSAN GARLAND

DALLAS—The Bloom Agency, the city's third-largest ad agency and 48th-largest nationwide, is changing character—in more ways then one.

Last week, the agency named Seth Werner, 32, president-executive creative director of the Dallas office, filling a post that had been vacant since December. Formerly a vice president with Foote, Cone & Belding, San Francisco, Mr. Werner on June 1 becomes the youngest person ever to head the shop's Dallas office.

While at FCB, Mr. Werner created the California Raisin Advisory Board's "I Heard It Through the Grapevine" TV campaign, one of the best-known and best-liked in the country, according to industry surveys.

He also created a campaign for Dial Corp.'s Imperial Leather soap, a test-market product, that was selected along with the animated (or claymation) raisins spots by ADVERTISING AGE as one of the "best" commercials of 1986 (AA, March 23).

Before joining FCB, Mr. Werner spent six years with Marschalk Co. (now Lowe Marschalk) in New York.

While there, he created the award-winning TV commercial for Stroh Brewery Co.'s Stroh's beer that featured Alex the Dog.

Mr. Werner has his work cut out for him in Dallas.

When Zale Corp., the nation's largest jewelry retailer, fired Bloom earlier this month (AA, May 11), it not only ended Bloom's more than 30 years as Zale Jeweler's ad agency but also marked a pivotal point in Bloom's evolution.

The Zale loss—to Saffer Advertising, Toronto—eliminated 15% to 20% of Bloom's billings here and effectively boosted the agency's New York operation to a more dominant position.

Staff photo by Arnold Adler

ROBERT BLOOM

Photo by Ken Vaughan

SETH WERNER

Bloom bills approximately $200 million; the New York office handles $60 million; and the Dallas office $140 (after the Zale loss).

Bloom has made no bones about wanting to avoid the "regional agency" designation. "We are not in any way a regional agency. We are national and we want to be perceived that way," said Robert Bloom, chairman of the agency's parent, Bloom Cos.

Zale generated about $25 million in billings in 1986.

Earlier this year, though, Zale cut its ad budget by more than one-third, prompting cutbacks and layoffs at the agency.

Zale is only the latest in a series of account losses for the Dallas office.

In 1986, Bloom in Dallas didn't win a major account that it was able to keep.

The $7 million Frontier Airlines account, landed in May, took off a short three months later when Frontier was acquired by People Express.

Both airlines now have been acquired by and merged into Continental Airlines.

St. Louis-based Anheuser-Busch awarded its Dewey Stevens Premium wine cooler in June, and then—apparently unhappy with the creative approach and its poor results—moved it to D'Arcy Masius Benton & Bowles in November.

Just a few weeks before Zale's departure, Schering-Plough's Memphis-based Maybelline division moved approximately $6 million to $10 million of its business to DDB Needham Worldwide, Chicago (AA, April 13).

Although it lost Moisture Whip

Mail, phone sell business-to-business

By Kevin Brown

I believe you can sell jet airplanes over the telephone," says Howard Berg, director of continuing product development & Data General/Direct at Westborough, Mass.-based Data General Corp.

Whether selling airplanes, computers, financial services or advertising, most business-to-business marketers strongly rely on direct marketing. "Mail is the primary medium to stimulate responses, whether that response is a phone call or a sale," Mr. Berg says.

Direct mail, telemarketing and direct selling through print ads all help businesses generate leads and build sales. To maintain existing accounts, direct marketers can home in on a client's needs for services, add-on equipment and even big-ticket items.

"We can sell a $30,000 disc drive in that environment," Mr. Berg says. A phone call and sometimes a sales call often close the sale.

"Without telemarketing, it just doesn't work," says Pam Lockard, president of Houston-based InterAct Communications. Telemarketing represents the lion's share of business-to-business direct-marketing expenditures.

Research	2,190,200
Total	**$93,637,642**

*Estimates represent annual advertising expenditures. Survey conducted during 1984-85. Source: *Business Marketing*, a Crain Communications publication

Of $93.64 billion spent on total business-to-business advertising and marketing, 32.9%, or $30.85 billion, went to direct marketing, according to a 1984-1985 study by Chicago-based *Business Marketing*, a Crain Communications Inc. publication. Nearly 90%, or $27.75 billion, was spent on telemarketing, the study found.

With that kind of money being spent, Ms. Lockard and Phyllis Libowsky, VP, found ample reason to establish InterAct in July 1986, during what Ms. Lockard calls "the bottom of Houston's economy for all time."

She thinks it was a good time to start a direct-marketing company because businesses in a declining market are more willing to fight for survival by trying areas like direct mail that they may have ignored when times were rosier.

Business-to-business

(Continued from Page S-1)

"The hardest people to convince are the ones who don't understand direct selling and have never really been in it," Ms. Lockard says.

To build clientele and convert marketers, InterAct spent about $15,000 on a campaign to reach potential direct-marketing spenders in Houston, particularly among financial services companies. The mailing, to 3,000 prospective clients, 400 of whom received kaleidocycles (spiffy hand-held cardboard toys comparable to worry beads, but designed to capture attention), achieved a 15% response rate. To date the company has billed $200,000, and the campaign is continuing.

Many response cards were returned by someone other than the addressee, indicating a successful campaign because "the mailing got noticed and didn't get thrown away," Ms. Lockard says.

"I made an impression in the beginning. I call them six months later and say, 'I'm the one who sent you the gadget,' and they talk to me."

InterAct's campaign illustrated lead generation to potential clients. "I used my pieces as part of an educational process to make local marketers understand what lead generation is and does," she says.

Lead generation through business-to-business direct marketing helps solve a problem faced by all marketers with heavy sales-force orientation: The cost of a cold sales call is approaching a hefty $300 a shot. But generating the lead is only the first step.

"In business to business you have a long time close," Ms. Lockard says. "The campaign's not over by a long shot. I have several more steps before I'll give up on potential clients."

Business people are conditioned not to buy on the first sales pitch, Ms. Lockard says. She says that unlike consumer direct marketing, where a single piece is expected to reach the decision maker and make the sale, business-to-business campaigns are more complex. The *BM* study confirms this, explaining that 83% of businesses "use direct-response media with some degree of sophistication as part of their marketing mix."

"A lot of the same principles are at work as with consumer direct response," says Bob Dinsea, general manager at Chicago-based Kobs & Brady. "It's not a different discipline, it's just applied in a different way."

One difference is in the mailing lists, which the *BM* study says number more than 10,000. Business-to-business direct marketers must contend with turnover and varying job descriptions and responsibilities.

Even with a good business mailing list—which in many industries is hard to find—a direct-mail piece will have to pass through a secretary and maybe another layer before reaching the decision maker.

Secretaries open mail for 58% of top managers and 49% of middle managers, according to a 1985 study, "There's No Business Like Business to Business," conducted by New York-based Ogilvy & Mather Direct. And of those, half also have their secretaries screen mail.

"To hit a CEO you may have to use four color to really make

(Continued on Page S-4)

"WHAT A DIFFERENCE ONE CALL CAN MAKE!"

"It's frightening to think how much can depend on one phone call. Just one phone call, for example, can put you in touch with Floridata, Inc., the one-source, full service direct mail advertising company. I wish / had called them when the boss told me I was going to be in charge of the next mailing. I must have called a hundred different service companies, and wound up having to work with six of them. In six different states. Just imagine what a nightmare it was trying to coordinate all that and you'll understand what happened to my hair. Copywriting here, laser printing there, typesetting somewhere else, printers, list brokers, letter shop–why didn't someone *tell* me Floridata handles all of that for you. And a lot more–computer processing, color printing, full creative services. And as a result of Florida's lower labor costs, Floridata can maintain its commitment to the very highest professional quality in each of its specialty areas. I could have enjoyed savings unprecedented in the industry. I could still have my job! *And* my hair. But you're lucky. You found this ad. You can do what I should have done, and what hundreds of smart direct marketers across the country do–send for Floridata's **FREE** catalog. Or just give Floridata a call today."

Business

(Continued from Page S-2)

it pop," says Mr. Dinsea.

InterAct's kaleidocycles cost about $5 apiece and had to be assembled by hand, but Ms. Lockard notes: "What dictates how much you can spend ... is how much that customer will be worth in the long run."

Whether using four-color, black & white or three-dimensional objects like the kaleidocycle, the trick is to involve the reader with comprehensive and relevant information, says James Graves, account supervisor at O&M Direct.

"Each situation has its own set of economics," he says. "3D is a quality direct marketing can have over over print or broadcast. It's something you can hold in your hand and spend time with."

To get small businesses involved with a direct-mail piece on financial services, O&M Direct used humor, enclosed a poster and offered recipients a free incentive. The mailing, created for Minneapolis-based IDS Financial Services, a unit of American Express Co., was sent to 900,000 small business executives who hold American Express Corporate Cards to generate leads for IDS Financial Planning Services.

O&M Direct conducted research through focus groups and discovered small businesses were drastically underserved by the financial services market.

Two lead generation and two fulfillment mailings were sent out. Although the companies won't release the response rate, Mr. Graves says it was double the expectations in the campaign.

An O&M Direct mailing for IDS included an insert called "A Bagful Of Gripes."

The mailing's hook was an insert called "A Bagful Of Gripes" —a bag of 4½-inch by 2¾-inch cards featuring *The New Yorker*-style illustrations of employee complaints such as, "Management treats us like children" and "They don't care about us."

"Reading all the cards is involving," says Mr. Graves. "We hoped the entertainment value would lead to higher readership of the whole package."

The mailing also had the advantage of coming from a respected company. "We were marketing to American Express Corporate Card members," says Mr. Graves. "Some were enthusiastically happy. These are people happy with American Express."

The image, not only of the mailing but of the company sending the mailing, is a factor in response. According to the O&M study, 90% of respondents said they would respond to more offers from companies they could trust and 80% said they would be more likely to repond to offers from well-known companies.

"The credibility of the company offering the service is important to the client," says Mr. Graves. But he adds, "Experience is the thing you want to sell."

Indeed, Ms. Lockard says a client told her: "I wouldn't have to be as impressed by O&M as I was by InterAct to be sold." They can ride a bit on their reputation, she says.

Only One Printer Does All This For Direct Marketers

☐ Printing:
Single and multi-color printing on our Heidelberg and Komori sheet-fed offset presses. Quality second to none. Personal service. Competitive prices.

☐ Audio Cassettes:
High-speed duplication in large quantities. Your choice of labeling and packaging. Send for your free "Cassette Talk," complete with specs and prices.

☐ Soundsheets:
Low-cost high-quality flexible phonograph discs let you put sound in direct mail, magazines, annual reports, sales literature and employee communications. Send for samples.

☐ Poly Wrap:
Protect direct mail packages, catalogs and magazines and save money over paper and pre-formed poly envelopes. Ask for a copy of our latest job.

☐ Mailing:
We collate, insert, label, sort and mail for companies all over America. One recent million-piece job included a letter, testimonials, order form, reply envelope – plus an audio cassette – all in a number-ten envelope. Let us send you a sample.

Three direct sellers run the office party

By Len Strazewski

Pens, paper, desks, chairs and wastebaskets remain the flotsam and jetsam of business operations.

Compared with gleaming office towers, sprawling industrial parks and multimillion-dollar mainframe computer centers, office products seem practically inconsequential, yet, according to the Alexandria, Va.-based National Office Products Assn., office products are a more than $60 billion industry, expected to top $87 billion by 1989.

Len Strazewski is a Chicago-based free-lance writer.

Though most office products are marketed by dealers as part of the traditional manufacturer-wholesaler-retailer chain of distribution, a growing portion of these items is being sold by aggressive direct mail, using the latest in catalog marketing and mailing-list manipulation, and targeting America's fastest-growing business niche—small and medium-size businesses.

In 1984, the most recent year statistics are available, about 8% of office supplies, 6% of office furniture, 8% of office machines and 4% of office microcomputers were sold via direct-mail, according to NOPA. By 1989, the association predicts 11% of office supplies, 7% of office furniture, 8% of office machines and 4% of microcomputers will be sold by direct mail. Microcomputer sales by office products companies remain flat because of the growing number of computer specialists.

Though some of the direct-mail portion of the business is conducted by small entrepreneurs taking advantage of bulk buys and overstock sales, three large companies dominate the regular catalog-based direct mail business: Quill Corp., Reliable Office Supplies and Viking Office Products.

The largest of the group is Lincolnshire, Ill.-based Quill, a 30-year-old family business started in 1956 by President Jack Miller in the back of his father's chicken store on the North Side of Chicago and moved a year later to a 500 square foot coal bin in the basement of an uncle's two-flat apartment building.

Mr. Miller and his two brothers (one of whom joined the company during the move into the coal bin location) have since seen the company outgrow several locations until it moved into its present location—377,000 square feet of office and warehouse space, believed by the company to be the largest independent office-products distribution center in the country.

As the space has grown, so has the company's direct marketing.

(Continued on Page S-20)

TeleCable

(Continued from Page S-14)

cable or VCR hookup—worth up to $20 for the consumer—with each TV or VCR purchased at the shop.

Some 363 retailers, or 77% of those targeted, agreed to participate in the program. "Participation" mostly involved placing POP materials on their counters; "This is the kind of deal that didn't really cost the retailer anything, but he comes out looking like a great guy," Mr. Barker says.

TeleCable ads involved tie-ins with electronics retailers.

Participating retailers were listed in radio and newspaper ads run by TeleCable in December and January in the company's 22 markets.

In stores "that would let us," Mr. Delatte says—or about one-third of the retailers—TeleCable also conducted in-store workshops to teach employees the basics of hooking up cable descrambler boxes with VCRs and TV sets. In addition, the company provided booklets for retailers to give to consumers.

Mr. Delatte says TeleCable doesn't know how many cable or VCR hookups were provided as a result of the offer, which was available from Dec. 1 through Jan. 31.

"The installation numbers were not key for us—the key was placing those pieces at retail level," Mr. Delatte says. "And on that level, the program was a smash.

"Retailers were happy because it not only helped to sell VCRs and TVs, but it helped to sell faster," he says.

TeleCable plans to make further use of its new connection with local retailers. Mr. Delatte says another campaign, again directed at retailers, is in the works and probably will break in about six to eight weeks.

"This time, we'll be promoting our investment in MTS stereo sound, to consumers with or considering buying stereo TV sets," he says.

Terry C. Gillette,
President and Founder of
The Company Store

Terry C. Gillette On Catalog Marketing

I wasn't asked to write this endorsement— I volunteered the idea. It's my way of saying thank you to a closely-knit group of people doing business under the name of Ovation Marketing.

Ovation is an advertising and marketing agency that works with me, within my budget and schedule requirements, to produce a catalog that conveys my company's image and message. If you're searching for a close client/agency relationship, this is the company to team up with.

When you enter their office, you are greeted by three simple thoughts. Superior Service. Superior Quality. Constant Innovation. Ovation Marketing redefines the meaning of a full service agency. They have over forty experienced direct mail specialists that make valuable contributions in many different areas. They are constantly analyzing, presenting and innovating new designs, new presentations and new strategies, in an attempt to improve upon past success, or past failures. They are never satisfied with yesterday's results.

The direct marketing professionals at Ovation have an exceptional understanding of direct mail. They know the strengths of my company, its products, its people. They take the time to find out exactly who my customers are, and why they buy from The Company Store. Then they create a catalog that's successful not because it wins awards for art directors, but because it sells my products. . . lots of products.

The creative team at Ovation also develops space advertising that sells products right off the page and generates high-quality catalog requests that out perform most rental lists. With Ovation's help, we've built a house list of over one million people that ranks among the finest in the industry (all in just five years).

So there you have it. A description of how Ovation Marketing contributed to the success of The Company Store— and how they have won my loyalty. Give Ovation a call at **1-800-722-1002, Ext. 20** . . . and let them win yours.

Office party

(Continued from Page S-19)

Mr. Miller recalls that his first mailing was a simple postal card on which he listed five "specials," and the first full catalog wasn't mailed until 1963. Today, Quill mails more than 45 million catalogs and flyers to a customer base of more than 600,000 businesses and organizations, listing about 9,500 office products.

Quill has grown to more than 850 employees, generating annual sales of more than $185 million, according to estimates from outside the company.

"Our creative presentation has improved and changed a lot over the years, but the message is still the same," Mr. Miller explains. "Price, service and quality.

"Quill is still very much a price house. Our marketing depends upon keeping prices low, and we are willing to go into battle with competitors to maintain price leadership," he says.

Discounts from retail pricing range from 15% to 60%, depending upon the season and competition. Quill mails a semi-annual comprehensive catalog in which prices dominate the presentation, but regular Quill customers know that if they can wait awhile, the products will show up more heavily discounted in one of the regular monthly flyers—priced as "barnburners" or other excitement-generating "hot" items.

Mr. Miller says that the frequent discounting is essential to keeping customers that generally have little loyalty to suppliers. "You've just got to keep mailing," he says.

However, while price may be what attracts customers, the quickest way to repel customers is by offering poor service or low-quality merchandise, he adds.

"There's plenty of ways to lose customers, and service and quality are two very quick ways to lose them. You've got to deliver exactly what people order and you've got to deliver it quickly. Most of Quill's customers are small to medium-sized businesses that order supplies when they need them, so it is essential that they receive their order immediately.

"If you want to succeed in this business, you've got to show up on time," he says.

A director of the Washington-based Direct Marketing Assn., Mr. Miller has become one of the business-to-business marketing industry's chief representatives and is implementing some of the state-of-the art marketing tools discussed in seminars. Quill is experimenting with telemarketing for some specialty products (such as microcomputer equipment) and is developing database marketing capabilities to enhance its use of the "hundreds of thousands of dollars" of prospect lists the company acquires every year.

"By using sophisticated database information, it is possible to allow customers to see exactly what they want to see in products—to practically tailor a catalog or a mailing to an individual. With tools like these, the potential for growth is huge," he says.

Though NOPA predicts small but steady growth in direct marketing, Mr. Miller notes that Quill has grown at 15% to 20% a year for the last five years and expects the pace to continue. To boost that growth, Quill also is experimenting with selected advertising in such business publications as the *Wall Street Journal*. Kobs & Brady manages an undisclosed media budget. Direct-mail creative advertising is

We helped The Boston Company customers cash in on a new card.

Roberta G. Sydney
Vice President
Boston Safe Deposit and Trust Company

"To promote our new Boston Cash Card, we contacted preferred customers by mail and followed up the mailing with telephone solicitation.

"We decided to use WATS MARKETING Outbound to make the sales calls. After looking at several telemarketing firms, I chose WATS because of their size, professionalism and capabilities.

"After the first 200-hour test, we gave them the go ahead. Within 10 days they contacted thousands of people for a 35% response rate.

"I'd use WATS MARKETING Outbound again because I know if we needed 100,000 phone calls tomorrow, they could do it."

Helping clients reach marketing objectives. That's our goal at WATS MARKETING Outbound. No one has more experience and no one gets results like we do.

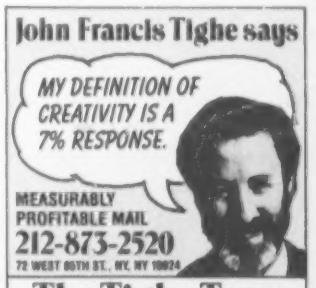
An American Express company

John Francis Tighe says



The Tighe Team

Three run the office party

(Continued from Page S-20)
handled in-house.

Quill's strongest competitor in the Midwest is Chicago-based Reliable Office Products, but unlike Quill, Reliable did not jump right into direct marketing. The company started as a traditional contract-sales supplier with a large sales staff that made the rounds from customer to customer. In the 1960s, the company started mailing a catalog to its smaller customers and in 10 years saw the mix of its business change from mostly sales staff-based to 75% direct mail.

In 1983, the company moved into direct mail full time and sold the remainder of its contract business to Publix Office Supplies, a local contract dealer.

Reliable sends more than 30 million mailings a year to more than 400,000 customers, with catalog updates and sales flyers going out monthly to both regular customers and prospects generated by regularly updated rented lists. The catalog features more than 5,000 products.

Reliable estimates 1987 sales at $100 million, a 30% increase from 1986. The office is in a 350,000 square foot complex in Chicago's West Loop; there are about 400 employees.

The key to Reliable's fast growth (34% each year for the past two years) hasn't been fancy marketing techniques, just steady development, according to President John Quinton.

"You can't be a mail-order success overnight," he explains. "It's a long road and not an easy job. Repeat. Repeat. Repeat. That's the only way to get the attention of the customer."

Unlike Quill's Mr. Miller, Mr. Quinton believes that business-to-business direct-mail customers do develop certain loyalties to suppliers, but he agrees that price and service are what builds that loyalty.

"In the business-to-business marketing area, service is very important, and by service, I mean turnaround time," he says. "Our customers are smaller and medium-sized businesses and don't have the huge resources of larger firms. When they are out of copier paper, they can't use the copier. It's that simple. So we have to process orders fast. Most orders are shipped within eight hours."

Although Reliable has done little media advertising to promote its catalogs, the company is researching the possibility of using advertising to expand its customer base. Direct Marketing Specialties, Chicago, is handing the research.

"The problem is what media is appropriate?" Mr. Quinton says. "Most publications are not aimed at our marketplace and

Direct-mail catalogs are the life blood for Reliable Office Supplies, Viking Office Products and Quill Corp.

A list of top that don't us

There are a lot of companies and agencies you *won't* find on this list. Companies like Lever Brothers, Christian Dior, Revlon, Chrysler, Mc Donald's, Sears & Roebuck and hundreds more. And agencies like Grey, Jaffee Young & Rubicam, Mc Cann-Erickson, and hundreds more.

In fact, you may be surprised to see the array of Webcraft clients. It may well represent the cognoscenti (and the up-and-coming) marketers in the U.S. today. And there are very good reasons why these leading advertisers depend upon Webcraft Technologies.

INNOVATION. CREATIVITY.
SERVICE. REPUTATION.
LEADERSHIP.

But perhaps more than any of these is Webcraft's involvement and commitment to its clients' businesses.

Webcraft's 16 years of experience in direct marketing, insert advertising and fragrance and cosmetic sampling has made it a premier specialty printer. It is a company that works *with* its clients in achieving their individual marketing goals and understands those goals, unlike traditional suppliers. Because Webcraft is at the forefront of its industry, the kinds of problems we solve (and the services we provide) aren't standardized. They are designed to our clients' individual needs.

That's why the list of companies that *don't* rely upon Webcraft grows smaller every year.

Indeed, if you're one of them, give Bill Williamson a call at 1-201-297-5100. When you've talked with us and have seen our facilities *and our work*, you'll want off the list, too.

the people who actually purchase office products in their companies."

Reliable, however, is looking to move beyond the business-to-business base and in February mailed its first consumer-oriented catalog, called "Home-Office," to 250,000 rented names. The 36-page four-color catalog had a response rate of 1.5% in tests with an average order of $40 to $50.

Though the consumer catalog features many of the same products as the business-to-business catalog, many products are different and offered in more colors or more modern styles.

"When people come home, they want to leave their offices behind," Mr. Quinton says. "They may be working, but they want a more fashionable, colorful environment, so we are offering products that have a little more color and style."

Mr. Quinton says results were good enough to order a new consumer catalog for a fall mailing.

Reliable estimates that more than 27 million people conduct some business from their home and need office products, a fertile market that has been relatively untapped by office-product direct marketers.

On the West Coast, Los Angeles-based Viking Office Products commands a strong presence in the direct-mail business-to-business market for office supplies. Though most of the 27-year-old company's tactics are similar to its two major competitors—more than 20 million mailings annually to more than 300,000 customers—Viking takes a more personal approach to its presentation. Each mailer features President Irwin Helford demonstrating products and commenting directly to customers on price and quality.

The personal touch has been effective, says Mr. Helford, who joined Viking in 1984 after a 23-year career at Reliable.

"The concept is very simple. Customers prefer to buy from a person and though it wasn't originally my idea, I'm that person. It's been very effective and I get calls and letters from customers all the time and when they require an answer, I do answer them personally," he says.

Viking, however, is far from the small company that might be expected to maintain such a personal touch. Mr. Helford would not disclose annual sales, but the company has more than 400 employees and branch distribution centers in Dallas and Cincinnati.

However, Mr. Helford sees as his mandate the job of providing his small-to-medium-size business customers the pricing advantages usually garnered by bigger buyers with the attention of a smaller business.

He agrees with executives from both Quill and Reliable that service and price remain paramount and that speed and efficiency count for much in the business-to-business market.

"You need to sell good quality products and ship exactly what you offer—no substitutions and no shorting of orders. And you've got to keep a steady flow of new products available, things that match the changing needs of your customers," he says.

Marketing must remain steady, with regular mailings and sales, Mr. Helford says. Though Viking does no media advertising, the company continues to experiment with other direct-marketing techniques, including mail-response card decks, telemarketing, package inserts and trying new lists on a regular basis.

With effective marketing, Mr. Helford expects the direct-mail portion of the office-products business to grow significantly—probably more than the few percentage points predicted by NOPA.

"For companies like Quill, Reliable and ourselves, people who market professionally and know what they are doing in the office-products business, I see growth being very substantial. It's a question of knowing what the users want and delivering it in a professional manner," he says.

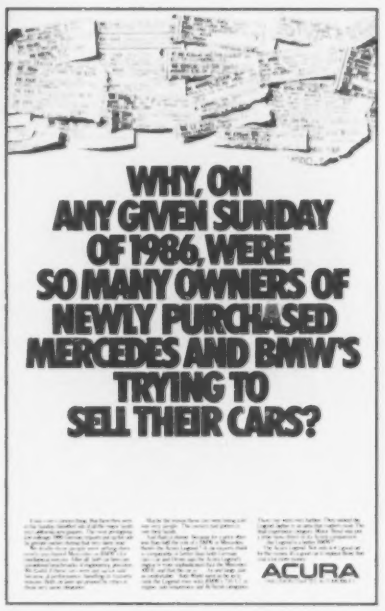
BEST OF PRESS

The front and back pages of this Procter & Gamble Co. four-page special ad section in *USA Today* are excellent examples of creating a message to fit the medium. While the format of the section works well with the newspaper's format, it's not a direct rip-off, like oh-so-many other special ad sections that try to palm themselves off as news copy. This section was done by Wolf Blumberg Krody, Cincinnati, in association with Saatchi & Saatchi Compton, New York, the agency of record. Creative director: Ron Harley; copywriter: Judy Benson Findsen; art directors: Keith Bollmer, Willie Hillenbrand; illustrators: Willie Hillenbrand, David Sheldon.

A unique illustration gets the point across with a minimum of copy in this ad for First Federal of La Crosse (Wis.), via Clarity Coverdale Rueff, Minneapolis. Creative director: Jac Coverdale; art director: David Fox; copywriter: Jerry Fury; photographer: Rick Dublin.



A good headline and a good illustration make this ad for Acura, from Mendelsohn/Zien Advertising, Los Angeles, a standout. The use of the newspaper classified ads as an illustrative device is another example of tailoring the ad to fit the medium. Creative director and art director: Jordin Mendelsohn; copywriter: Perrin Lam; photographer: Jay Ahrend.

Best of Press selections are made by a committee of three: Hank Simons, VP-creative director at the Newspaper Advertising Bureau; James Dunaway, VP-information, Newspaper Advertising Bureau; and William F. Gloede, Advertising Age's newspaper industry reporter. National System Inc., St. Louis, provides tear sheets to the NAB for much of this work. Advertising agencies, clients and newspapers are invited to submit newspaper ads for review. Submissions should be sent to Mr. Gloede in AA's New York bureau.

This Flash Report of newspaper advertiser investments, compiled for Advertising Age by Media Records, is derived from tabulations that cover 29 dailies and 23 Sunday editions in 15 cities: Atlanta, Baltimore, Boston, Cincinnati, Chicago, Cleveland, Dallas, Denver, Detroit, Los Angeles, New York, Philadelphia, San Francisco, Washington and Youngstown.#

Source: Media Records Inc.

Ad spending gain nears 9%

New York—Advertising investments in February in major-market daily newspapers in 16 key categories increased 8.7% over year-ago levels to a total of $272.3 million, according to the Advertising Age Flash Report prepared by Media Records Inc.

The new-car and general-merchandise advertising categories posted the biggest gains, with the former jumping 32.3% to $23.6 million and general-merchandise stores up 20.2% to $34.4 million. Airlines advertising also was up a strong 26.4% to $17 million.

Other gainers included amusements, up 10% to $31.7 million, food stores, up 14.6% to $31 million; banks and trust companies, up 10.1% to $8.4 million; computer stores and supplies, up 13.2% to $4.6 million; and stock, bond and investment houses, up 38.8% to $2.5 million.

The department stores category, the largest in terms of dollar volume, was essentially flat, posting a 0.2% gain to $78.6 million, as was the radio-TV-phonographs-records category, with a 0.2% gain to $19.2 million.

Losing categories included publishing and media, down 12.9% to $13.5 million; public service utilities and commissions, down 4.8% to $4.3 million; cigarettes, down 27.3% to $2.1 million; alcoholic beverages, down 32.5% to $915,670; computers, equipment and services, down 67.4% to $451,522; and cameras, photo supplies and services, down 67.5% to $58,071. The Flash Report is based on Standard Advertising Unit inch measurements in 27 daily and 23 Sunday newspapers in 15 top markets.#

Merit beats the tar out of Kent.
MERIT
Filter
KENT
In actual taste tests, Merit tasted just as good as Kent, but with less tar.
In fact, we've got 33% less tar than they do.
If you're smoking Kent, why not switch to Merit. The only thing you'll be giving up is a third of the tar.
LOW TAR. ENRICHED FLAVOR
Merit. We've got flavor down to a science.

This ad for Philip Morris USA's Merit cigarettes, via Leo Burnett USA, Chicago, uses a good competitive headline and a dominant illustration to make the point that Merit has a lower tar rating than Lorillard's Kent Kings. Creative director and copywriter: Martin Dawson; art director: Guerin Rife; copywriter: Steve Allen; photographer: Carl Corey.

Best, 'Barr' none

ANDY tosses praise to Chiat for Pizza Hut

NEW YORK—Chiat/Day led the pack of winners this month at the Advertising Club of New York's ANDY Awards.

The agency grabbed seven awards of excellence and the "Best of Show" (AA, May 11).

At the 23rd annual awards presentation at the Marriott Marquis, Chiat/Day took "Best of Show" for a Pizza Hut TV spot entitled "Salad Bar."

The TV spot featured Roseanne Barr, a housewife-turned-comedian.

The commercial, which was created by the agency's Los Angeles office, also won four "distinction" honors.

Chiat/Day's Los Angeles shop also won three "excellence" prizes (for Apple Computer, Pizza Hut and Mitsubishi Electric Sales America); its New York branch collected three (two for Ricoh and one for an ad for the agency itself); and San Francisco added one (Brown-Forman's California Cooler).

The agency also won a total of 16 "distinction" prizes.

A panel of 160 judges picked winners for a total of 68 awards of excellence and 334 awards of distinction.

Foote, Cone & Belding amassed four "excellence" awards through its Los Angeles, San Francisco and Toronto branches, and FCB/Leber Katz Partners, New York.

Other big winners, landing three "excellence" awards each, were BBDO Worldwide, New York; Hal Riney & Partners, San Francisco; Hill, Holliday, Connors, Cosmopulos, Boston; Levine, Huntley, Schmidt & Beaver, New York; Lowe Marschalk, New York; and Ogilvy & Mather, New York.

Pepsi-Cola accounted for two of BBDO's awards, E&J Gallo Winery for two of Riney's, California Raisin Advisory Board for two of FCB/San Francisco's and Gillette Co. for two of Lowe Marschalk's.

Chiat/Day's award-winning spot promoted Pizza Hut's salad bar with irreverent input from Roseanne Barr, a housewife-turned-comedian.

The more than 500 attendees saw not only winning commercials but also five original musical numbers, created and produced by Jed and Douglas Bernstein. The former is VP-management supervisor on the Seagram account at O&M; the latter is a composer, author and actor.

Their tunes included "Like a Merger," a tribute to the biggest news story of 1986, and "Nothing But the Blame," dubbed "a creative lament."

Looking ahead a year, Steve Frankfurt, vice chairman-chief creative officer at Bozell, Jacobs, Kenyon & Eckhardt, was named honorary chairman of the 1988 ANDY Awards competition, succeeding Norman Berry, chairman-ceo at O&M.#

U.S. advertising volume

The McCann-Erickson U.S. advertising volume reports represent all expenditures by U.S. advertisers—national, local, private individuals, etc. The expenditures, by medium, include all commissions as well as the art, mechanical and production expenses which are part of advertisers' budgets for each medium. *Source:* Prepared for Advertising Age by Robert J. Coen, McCann-Erickson

"He's from the old school. He still thinks that the important people in Orange County read Los Angeles newspapers"

The Register reaches more people in Orange County households earning over $50,000 than any other newspaper. More than half read no other newspaper. (Source: Simmons Scarborough)

THE ORANGE COUNTY Register METROGROUP

The leading medium in Southern California's richest market. Represented by CWO&O

Holiday Inns salutes the "daily triumphs" of travelers in its new campaign breaking June 1. Frank Sinatra (inset) provides the voiceover with a specially recorded version of the song "Here's to the Winners."

Holiday Inns books Sinatra

By GARY LEVIN

Caught in a squeeze between upscale and budget hotel chains, Holiday Inns is turning to Frank Sinatra for help.

The Memphis-based "innkeeper" that took its name from a Bing Crosby movie will try to position itself as a "winner" in an estimated $15 million TV and print ad campaign breaking June 1.

It will be Holiday Inns' first image effort since early 1986.

Ol' Blue Eyes won't appear in the ads, but has re-recorded his classic "Here's to the Winners" for TV spots featuring emotional, vignette-style scenes captured by cinematographer Gordon Willis.

Bozell, Jacobs, Kenyon & Eckhardt, New York, handles the effort, themed "You're a winner, we're on your way."

The campaign is part of a newly aggressive marketing stance from the "world's largest innkeeper," which last year hired Andrew Lien as its senior VP-worldwide marketing, from Kentucky Fried Chicken Corp.

David McConnaughey, VP-management supervisor, BJK&E, said the campaign "celebrates our users and the positiveness of their travel experience." It escapes what he calls the Oedipus complex of smiling hotel employees and service claims, and instead seeks a unique brand personality.

Research findings led Holiday Inns to develop a campaign based on "personal achievement," using scenes to dramatize

Last Minute News

Trintex lines up 42 advertisers

White Plains, N.Y.—Trintex, the $450 million videotex joint venture between IBM and Sears, has signed 42 advertisers. They include: Aetna, Buick, Carnation, Dean Witter Reynolds, Field Publications, Florsheim, Ford, Nestle, NEC Home Electronics, Showtime/The Movie Channel and Volkswagen of America/Audi of America. Also, the service has contracted with Dow Jones & Co., *USA Today* and "Consumer Reports," as well as a dozen syndicated columnists, to supply editorial information. After Trintex kicks off next year, it will start a campaign, via J. Walter Thompson USA, New York, to promote the service to potential subscribers.

Compton-DFS merger talks progress

New York—Merger talks between Saatchi & Saatchi Compton and DFS Dorland Worldwide (AA, April 13, *et seq*.) are progressing well with the possibility that internal details could be worked out this week, sources say. They add there were "no real stumbling blocks" left internally, though the plan still would have to face client approval.

P&G, Kodak join forces

Cincinnati—Procter & Gamble on Aug. 2 starts an estimated $15 million network TV and newspaper campaign for a back-to-school cross-promotion with Eastman Kodak. Six P&G personal-care brands will be tied to a giveaway of 60,000 VR35 Kodak cameras. Leo Burnett USA, Chicago,

Global group attacks ad tax

Florida shakes world

By LAUREL WENTZ

Killarney, Ireland—The World Federation of Advertisers denounced Florida's 5% sales tax on advertising last week, and will petition the state to repeal the tax.

Worldwide advertisers are concerned that Florida's move might trigger similar taxes by cash-strapped governments outside the U.S.

"Whatever happens in one country is susceptible to happening in others" said Paul de Win, the WFA's Brussels-based director general. "It's a domino theory. There is a danger that every government that needs money could contemplate it."

The WFA is the worldwide counterpart of the U.S.' Association of National Advertisers. Members include major marketers such as Procter & Gamble Co. and Bristol-Myers Co.

"We got skunked in Florida," said Robert Goldstein, P&G's VP-advertising. Mr. Goldstein is an outspoken critic of the Florida tax and part of the U.S. delegation to the WFA meeting.

"The real story is that national advertisers feel we need to be organized in a more effective manner to provide support for the state organizations that are already there," he said.

Kraft, Frigidaire pull out of Florida, see story Page 68.

The greatest concern is in Canada, which often "borrows" regulatory ideas from the U.S.

John Foss, president of the Association of Canadian Advertisers, said the province of Quebec has a 2% tax on broadcasting and Newfoundland a 4% tax on all media advertising. Such taxes might spread in Canada if other U.S. states follow Florida's example, he warned.

In the WFA petition requesting the repeal of the Florida tax, the group said consumers' freedom of choice is aided by truthful adver-

Suncare marketers raise their screens

By PAT SLOAN

The deep, dark tan—still associated with an image of health and wealth despite an awareness that the sun can damage skin—may lose some of its glamor this summer.

Fewer suncare marketers are glorifying tanning, while more are introducing bold talk about skin cancer in advertising as they market high-powered sunblocks to consumers.

One company, Eclipse Laboratories of Greenwich, Conn., has gone so far as to introduce a product with the word "cancer" in its name (AA, March 16).

Called Skin Cancer Garde, the ultra-protection sunblock is shown in print ads created by I. Goldberg & Partners, New York, that are dramatically themed: "The Sun. A matter of life and death."

The spread carries an oversize Surgeon General-type warning from the Skin Cancer Foundation, stressing that repeated overexposure of unprotected skin to the sun can cause premature aging and skin cancer, including malignant melanoma.

The suncare industry, with $400 million in retail sales last year, has taken note of Eclipse's dire message and its uniquely named product. But the com-

(Continued on Page 66)

Eclipse Laboratories and agency I. Goldberg & Partners, New York, are trying to deglamorize suntans with dramatic ads that paint a dark picture of the sun to sell protective products.

Controls asked for airline ads

By STEVEN W. COLFORD

WASHINGTON—The Transportation Department, under sharp attack in Congress for not moving more aggressively against airline marketing and performance problems, last week warned Continental Airlines—and all other major carriers—they face fines and other enforcement actions.

The Houston-based Texas Air Corp. carrier has been the subject of more complaints to the Transportation Department than any other airline this year.

In an appearance before a hostile House subcommittee, Continental VP-Marketing Services Jim O'Donnell said his company would not object to new federal controls, provided they took the form of industrywide rules that applied equally to all airlines.

Any likely rule would include requirements that airlines disclose on-time performance records and other service-related data. Consumer complaints also have focused on the availability of discount fares and sudden changes in frequent-flier programs.

Continental's Mr. O'Donnell warned against requiring lengthy disclosures in advertising, however. "Continental has seven fare compartments in its computer, ranging from regular fares to our advance purchase MaxSaver," he said. "The advertisement—just to provide a consumer with fare availability to and from New York City [covering all . . . destinations]—would take 50 pages."

Transportation Department critics, meanwhile, pressed legislation to shift responsibility for airline advertising and marketing to the Federal Trade Commission. Legislation to do so has been introduced in both the Senate and House.

However, one senior Democrat on the House energy and commerce committee, Rep. James Florio (D., N.J.), complained FTC "hasn't got any interest in what it's supposed to deal with under its existing authority, much less in taking on jurisdiction over the airlines."

Rep. Florio suggested policing of airline advertising be turned over to state attorneys general, some of whom have been increasingly active in challenging national advertisers.

Some congressional sources also contend the uproar over airline advertising may jeopardize ad-industry legislative objectives.

Among these is the passage of legislation amending the Federal Trade Commission Act to end the commission's authority to write industrywide rules against "unfair" ads.#

'Time,' others pare back int'l sales units

By JULIE SKUR HILL

Fortune, *Newsweek* and *Time* are backpedaling on the international front.

The magazines are restructuring international sales departments to cope with the declining value of the U.S. dollar. As the dollar falls, production costs overseas rise.

Newsweek International closed its two-person Chicago international sales office.

In New York, staff members have left the newsweekly or have been reassigned to the domestic sales staff.

A source close to the magazine said five members of New York's international staff were affected.

In 1985, Newsweek International started a Japanese-language edition of *Newsweek* and paid a royalty to American Express Co. to gain publishing rights for *Travel & Leisure Asia*.

"It's been a hell of a financial drain on them," the source added.

However, a Newsweek International spokeswoman said, "The two new magazines are very successful. Having more magazines to work on is only helping *Newsweek*."

Time Inc., which has been reducing its work force, has cut into the international sales departments of *Time* and *Fortune*.

At *Time*, two leaders of the international sales department are "pending reassignment," a spokesman said. Also, staff responsibilities have been shuffled.

William Kupper Jr., previously associate ad sales director at Time Inc.'s *Sports Illustrated*, is replacing Edward McCarrick as international ad sales director at *Time*.

Jack Crowley, associate publisher and international publishing director, also will be reassigned. His duties will be consolidated into other positions.

Previously, the international staff strictly sold space for international editions and domestic staff members only sold for the U.S. editions. Now, all salespeople will sell for all editions.

"This will maximize the presences of U.S. companies overseas," the *Time* spokesman said.

R. Timothy Leedy, *Fortune's* international publishing director, has left to pursue other opportunities, and his post will not be filled.

"*Fortune* was not having that much difficulty, compared to the newsweeklies," he said.

In fact, last week it announced a joint project with Hachette Filipacchi, Paris, to introduce a French edition of *Fortune* in 1988.

"Newsweeklies compete with the indigenous magazines, but people around the world still want to know the U.S. perspective on business," Mr. Leedy said.

May figures show combined year-to-date linage for Time's international editions down 22.6%, while combined Newsweek International figures fell 8.6% (AA, May 18). *Fortune* figures are not available.#

Highlights

What's cooking at Wendy's? 6

Wendy's International is expected to end a brief flirtation with its past this week when its new marketing team decides the beleaguered restaurant chain's future. The likely decision will be to initiate a formal review of its $50 million national ad account.

Murdoch goes to the movies 12

Murdoch Magazines and France's Hachette Publications again are teaming to translate a French magazine concept for an American audience. *Premiere* is the latest in a string of major magazines out to attract American moviegoers.

Southland calls out the troops 26

Southland Corp. is supplementing its new national ad campaign with an aggressive, price-oriented local campaign from W.B. Doner & Co., marking the first time Southland's 7-Eleven chain has brought in a second agency. Its job labeled "tactical," and for specific markets only, Doner is being referred to internally as the company's "S.W.A.T." team.

INTERNATIONAL

Havas' privatization will not affect accounts 48

Even though the French government is selling its 40.3% share of the Havas communications giant, the president of Havas' Eurocom division says the sale will have no effect on clients, accounts or international partnerships.

Mexican Televisa to modify ad tactics 49

Latin America's largest TV and entertainment conglomerate will modify its controversial "French plan"—which allows companies to pay for a year's advertising in advance—within three years, according to President Miguel Aleman.

Bay's agency list shrinks

Evans splices Frisco shops

By ALICE Z. CUNEO

SAN FRANCISCO—The agency scene continues to shrink here, with Salt Lake City-based Evans Communications acquiring Busse & Cummins and merging it into Evans/Lynch Rockey.

The merged agency, which will have about $20 million in billings, will continue under the Evans/-Lynch Rockey name. Busse & Cummins' billings were about $7 million.

The move forced E/LR to resign the $1 million Chilean Winter Fruit account because of a conflict with the $5 million California Tree Fruit Agreement business at Busse & Cummins.

Evans says the acquisition brings its total billings to more than $160 million. Evans hopes the San Francisco merger will give it an opportunity to focus on consumer business, moving away from its dependence on business-to-business accounts.

The San Francisco market over the past 18 months has been hard hit by a series of major account departures, primarily stemming from mergers and business consolidations (AA, Aug. 18, 1986). Dole Food Co., after the acquisition of its parent, Castle & Cooke, took its $30 million account to New York (to William Esty Co. and then to Ted Bates Advertising). RJR Nabisco transferred an estimated $25 million in Del Monte USA billings to Lowe Marschalk, New York, from that agency's San Francisco office. Several other smaller accounts have moved their business to Los Angeles agencies.

West Coast News

At present, the market seems to have stabilized. But sources expect further consolidation of offices unless some major areas of new business arise.

Ketchum Communications, Pittsburgh, recently purchased the Oakland, Calif., office of Chicago-based Mandabach & Simms, and BBDO/West is expected to announce soon the acquisition of two shops in the Bay Area. Oakland-based Lewis, Browand & Associates is rumored to be one target.

Busse & Cummins received an undisclosed amount of Evans stock and cash in the transaction.#

Jaguar Cars broke print ads for its new $40,500 XJ6 May 15. Ads—via Geer, DuBois—are running in newsweeklies, business magazines, auto buff books and various upscale publications.

Domestic cars race to challenge European luxury

By PATRICIA STRNAD

DETROIT—The ultraluxury-car segment, long dominated by foreign nameplates, is becoming a marketing battlefield as more players—including U.S. automakers—try to lure affluent baby-boomers.

Many automakers are starting to court the growing number of young, affluent buyers of high-price, high-performance luxury cars, whose annual household incomes are swelling beyond the $50,000 mark.

One industry analyst predicts that sales of ultraluxury automo-

Philly ignored?

National sponsorship effort flags

By PHYLLIS FURMAN

National advertisers have expressed little brotherly love for We, the People 200, Philadelphia's tribute to the Constitution which begins today.

Feuding between Philadelphia-based We, the People 200 and former Chief Justice Warren Burger's federally funded Constitution bicentennial commission has left Philadelphia's tribute without a single national corporate sponsor.

The state of Pennsylvania promised this month to kick in $2.5 million to help bail out organizers of the six-month celebration. The state also said it would double the amount if We, the People 200 can come up with $2.5 million in sponsor fees of its own.

Encouraged by the $100 million in corporate sponsorships generated by last year's successful Statue of Liberty centennial celebration, We, the People 200 had set a goal of raising $20 million from national sponsors.

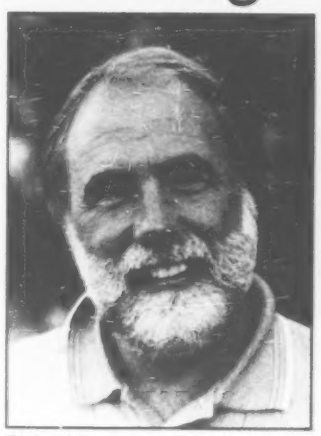
But the effort never got off the ground, and chief fund-raiser Richard Rovsek quit the project earlier this month.

Mr. Rovsek, president of Santa Barbara, Calif.-based American Marketing & Communications, charges that competition from Mr. Burger's commission undermined We, the People 200's corporate sponsorship efforts.

Mr. Rovsek, who handled marketing and sponsorships for Sail America, the U.S. entry in last winter's America's Cup, also is credited with conceiving the Statue of Liberty Foundation's corporate sponsorship effort.

Mr. Burger's Washington-based Foundation for the Commemoration of the U.S. Constitution, which publicly has voiced opposi-

(Continued on Page 65)



Richard Rovsek, president of American Marketing & Communications and chief fund-raiser for the constitutional celebration, quit the project this month.

Ratings race is on

'Family Ties' shift sets up key fall fight

By JAMES P. FORKAN

NEW YORK—NBC's shift this fall of "Family Ties" to Sunday opposite CBS' "Murder, She Wrote" will hurt both top 10 series, many agency executives believe, and may enable CBS and ABC to erode NBC's blockbuster Thursday lead.

Most agency sources saw "Family Ties" (No. 2 last season) versus "Murder, She Wrote" (No. 4) as this fall's clash of the series titans, much as the "Miami Vice" vs. "Dallas" battle was billed a year ago. That contest resulted in both programs dropping out of the seasonlong top 10, though "Dallas'" 11th place '86-87

(Continued on Page 68)

'M*A*S*H' is smash in ad awareness

IBM's new 'reunion' TV spots put Apple's action in traction

By SCOTT HUME

Who needs Alan Alda?

The last original episode of "M*A*S*H" aired on Feb. 28, 1983, a two-hour farewell episode that set viewership records.

Four years later, the cast of "M*A*S*H" still has the power to set records.

Seeking to revive sales of its personal computers, IBM Corp. last month unveiled its new Personal System/2 line. Shelving the Chaplin-esque "Little Tramp" character who had represented its PCs for the past six years, IBM enlisted most of the "M*A*S*H" cast to appear in the estimated $50 million introductory ad campaign (AA, April 6).

One of the stars missing from the campaign was Mr. Alda, who has been an ad spokesman for Atari Corp., an IBM competitor.

The "M*A*S*H" "reunion" concept, developed by Lord, Geller, Federico, Einstein, New York, has been an immediate hit, even without the popular Mr. Alda.

When the 1,000 respondents to ADVERTISING AGE's adWatch survey were asked last month to name the computer advertising that first came to mind, 23.7% named IBM.

In the March survey, before the new advertising's April 2 debut, IBM's advertising had been named first by only 13.8% of the national sample.

IBM's jump of nearly 10 percentage points not only is the largest single change in top-of-mind awareness ever registered in the computer category, but also displaced Apple Computer from the No. 1 spot for only the second time in the three years that the survey has tracked awareness of computer advertising.

Apple's share of first mentions last month dropped 4.8 points to 21.1%, the lowest score its advertising ever has registered.

Tandy Corp.'s Radio Shack held the No. 3 spot with a 2.3% share of first mentions.

Computers are hardly a mass-market product, which is one reason IBM supplemented the TV advertising with a heavy introductory print schedule, including 24-page inserts in a variety of news and computer magazines.

But IBM's campaign appears to be making the strongest impact on the most desirable demographics.

Top-of-mind recall for IBM ads was heaviest among respondents with the highest incomes.

Better than 15% of respondents

(Continued on Page 70)

Wine industry stays cool

Domestic market shows strength against imports

By JOHN C. MAXWELL JR.

Overall wine consumption increased about 3% in 1986, mainly due to the continued strong growth of wine coolers.

Wine cooler volume was up by more than 60% in '86, and dollar sales up by 73% to $1.3 billion.

This spectacular growth helped domestic wine gallonage increase by 10.3% and offset the decline of imported wines. We estimate that, excluding coolers, the domestic wine industry would have declined about 3% to 4%.

Wine coolers currently account for more than 30% of the domestic wine market and more than 25% of the total industry.

As the wine industry has been shaken by wine coolers, the wine cooler market has been shaken up by major players competing for their share in the market.

This shakeout began to take effect in 1985, when four coolers (E&J Gallo Winery's Bartles & Jaymes, Brown-Forman's California Cooler, Canandaigua's Sun Country and Seagram) accounted for almost 75% of the market.

These four brands continued to dominate the market in '86 but still were not able to shake off some smaller players. Joseph Victori Wines' Calvin Cooler, for instance, with a 6.4% share in '85, grew approximately 120% to an 8.3% share last year.

Similarly, Sun Country, Seagram and Bartles & Jaymes also grew by more than 100% and increased share.

Faced with these major growth rates, Brown-Forman's relatively small 10% growth caused California Cooler to lose 9.4 share points and the No. 1 position. Bartles & Jaymes quickly picked up the lead in '86, with 26.2% of the market.

We expect 1987 to be another year of stiff, relentless competition, supported by huge ad budgets and innovative marketing tactics.

In addition, we expect the enormous growth of the past few years to begin to slow and new flavors to emerge in the continuing race for market share in the wine cooler industry.

Although wine cooler growth has leveraged the wine industry, it also has affected table wine growth. While wine coolers have hurt domestic wines, it appears they benefited from the declining demand for imported wines.

In 1986 we saw a greater than 20% decline in imports, with more than 30% declines in both Italian and German wines. Although some of this may be a residual effect of the fear from last year's contamination in Italian wines, more likely it is a result of the declining dollar, which puts imports at a greater price disadvantage.

All five major importing countries posted declines in '86. With the improved quality and value of domestic wines, we believe that this situation will continue. Of course, the magnitude of this trend depends on the currency situation.

Again, E&J Gallo Winery increased market share to approximately 28%, maintaining the No. 1 position in the domestic wine market. Most of Gallo's 9.4% growth was attributable to the strong performance of its Bartles & Jaymes wine cooler.

Also due to the strength of its wine cooler business, Seagram Wine Co. showed a gain of almost 9%. Canandaigua Wine Co. posted a strong increase from its Sun Country cooler.

As for the rest of the wine industry, we expect to see a continuing trend of buyouts in 1987.

California wineries' margins have been lowered severely due to the diversion of marketing dollars to coolers, the decreased shelf space available for wine (also due to coolers) and increasing packaging and wine costs.

We believe these conditions will continue to be the force behind the sale of many top brands.

Already this year, Grand Metropolitan acquired Heublein, which included Heublein's recent acquisition of Almaden Vineyards, while Vintners International acquired Seagram and Wine World acquired Soverain.#

Mr. Maxwell is with Furman Selz Mager Dietz & Birney, New York.

FDA may take nip at toothpaste claims

By LAURIE FREEMAN and NANCY GIGES

The battle for superiority among the top three U.S. toothpaste marketers is heating up on the regulatory front as Procter & Gamble Co., Colgate-Palmolive Co. and Lever Bros. push their ad claims to new limits.

By this summer, the Food & Drug Administration is expected to decide whether to change the classification of tartar and plaque-removal toothpastes—and their accompanying claims—from cosmetic to therapeutic.

If the FDA reclassifies the tartar-control and anti-plaque toothpastes, the companies would have to seek new-drug status for their products to continue making certain therapeutic claims in labeling and advertising. And to win new-drug approval, a product has to be tested and found to be safe and effective.

The FDA is said to be "intent on exploring" the dentifrices and their plaque-removal claims, because "plaque is considered to be the forerunner of serious periodontal disease."

At the same time, the three marketers have stepped up their negotiations with the American Dental Association on using its coveted Seal of Acceptance, not only for cavity prevention but also for gum-related diseases.

The ADA's Council on Dental Therapeutics, independently of the FDA, reviews products—and their claims and advertising—that apply for the seal (AA, March 19, 1984, *et seq.*).

The Big 3 dentifrice marketers are clawing to gain market share in the hotly competitive $1 billion market and especially in the growing $250 million plaque/tartar segment.

Cincinnati-based P&G's Crest, the long-time front-runner in the category, has regained its 39% market share (after dropping to the low 30s) with the tartar-control line extension it introduced a little more than a year ago.

> FDA staffers expressed dismay when references to tartar and plaque began appearing in ad claims, but the issue was given low priority because the claims were not considered to cause any health damage.

New York-based Colgate, the No. 2 brand with a 23% share, has counterattacked with an ad campaign claiming that new research shows Colgate Tartar-Control toothpaste is better than Crest's.

CBS-TV earlier this month rejected P&G's objection to the ad claims that Colgate made in its new TV commercials.

Lever, also New York, is aiming to improve the 7% share of the No. 4 brand, Aim, by introducing Extra-Strength Aim and claiming superiority over both Crest and Colgate in cavity-fighting (AA, May 4).

Last week Lever broke two new hard-hitting TV spots for Aim, claiming fluoride superiority.

Lever also is gearing up to launch tartar-control companions to Aim and Close-Up toothpastes.

D'Arcy Masius Benton & Bowles, New York, handles Crest; Young & Rubicam is Colgate Tartar-Control's agency; and SSC&B handles Aim.

While the Big 3 fight for consumers' attention, the FDA is becoming more concerned about these ever-bolder therapeutic claims regarding tartar and plaque removal when the products themselves are classified by the FDA as having cosmetic benefit only.

According to one measurement service, tartar-control toothpastes now account for almost one-third of the toothpaste market.

FDA staffers expressed dismay when references to tartar and plaque began appearing in ad claims, but the issue was given low priority because the claims were not considered to cause any health damage.

Toothpaste marketers have been striving to avoid FDA scrutiny by limiting their claims to removal or reduction of plaque and tartar *above the gum line*, where the relationship to gum disease is not well documented.

Now, having been pushed too far, the FDA within weeks is expected to "open a call for data" on the role of tartar, plaque and gingivitis and their relationship to gum disease.

"Plaque is not [simply] a cosmetic problem, like tartar," said an executive for a major toothpaste company.

Despite the prospect of more stringent federal regulations, marketers in the $830 million mouthwash market also have been airing stronger comparative ads.

Warner-Lambert Co., Morris Plains, N.J., now marketing Listerine mouth rinse as a cosmetic plaque-removal agent, is seeking to strengthen its therapeutic claims.

While still pursuing the ADA's Seal of Acceptance for plaque removal, Warner-Lambert places more hope in winning the FDA's approval to market Listerine as effective against gingivitis, a form of gum disease.

In addition, Oral Research Laboratories, New York, is seeking ADA and/or FDA approval for its Plax product as an anti-gingivitis agent. Plax is described as a pre-brushing dental rinse.

Vipont Pharmaceutical, also jockeying for ADA approval, nearly doubled in size this year based on sales of its Viadent anti-plaque toothpaste and mouthwash products, which help remove the sticky bacteria that builds up on teeth.

Until now, the tiny, Fort Collins, Colo.-based company has been the most aggressive

Company sells invent-ory

Gottlieb's got gadgets galore

Inventors got their reputation as oddballs thanks to people like Mark Gottlieb, inventor of a violin that can be played under water, as well as the more prosaic electronic Car Finder.

By LENORE SKENAZY

There are basically two kinds of inventors: the serious scientists at places like Bell Labs and the copy-worthy wackos whose scrapbooks bulge with newspaper stories beginning "There are basically two kinds of inventors. . . ." Mark Gottlieb, complete with scrapbook, is one of the latter.

The 30-year-old's first invention? Aquapods: plastic foam shoes that make it possible to walk on water without the help of higher authorities.

Naturally, he went on to create the Aqualin—a violin that can be played under water.

But after earning two master's degrees from Stanford University, the inventor decided to address more prosaic needs, like helping folks find their cars in a dark, crowded parking lot.

Press the button on his pocket-size Car Finder ($99.50) and your horn and headlights start to honk and flash, respectively.

His pricier Car Starter ($319) goes one step further and starts the engine.

A West Coast native, Mr. Gottlieb now works in the nation's capital, where he runs his six-person company, Design Tech, California-style. Thursday nights from 6:30 till midnight he and his colleagues "eat pizza, drink Diet Coke, go through all the projects and solve all the problems."

Most of the resulting products are sold through catalogs. They aren't advertised, Mr. Gottlieb says, "because we can't afford it."

These items include:

- The Caretaker, a device that allows absentee landlords to ring the phone in their second homes, which in turn electronically checks whether the pipes have frozen.
- The Sound Wedge, a $29.95 marvel that automatically lowers stereo volume when the phone rings. "No more 'Wait a sec, I have to turn the music down,' " as Mr. Gottlieb points out.
- The Postronic, one of Design Tech's newest gadgets, which sends a signal to the house when the mail has arrived.

Now just because the young man seems to be selling legitimate goods to responsible adults, that doesn't mean he has joined their ranks.

For instance, Mr. Gottlieb most enjoys activating his Car Starter not when his car is lost but when he sees it in plain view—and other people are walking in front of it.

"First they hear the horn and turn around to see where it came from," the inventor says. "Then they see the lights flash and the motor start. And then—they walk around and peer into the windows!"

At this point, Mr. Gottlieb likes to saunter up, unlock the haunted car and drive away.

Those left behind shake their heads: There goes a wacky scientist.#

IBM's ads do monster 'M*A*S*H'

(Continued from Page 3)

who said IBM ads came to mind first are in households with incomes of $60,000 or more, and more than 50% of those naming IBM were between the ages of 25 and 44.

Apple's advertising had better recall among less affluent respondents.

IBM's recall also is fairly evenly divided between male and female respondents (51% male), while those for whom Apple had better top-of-mind awareness were more likely (59%) to be female.

AdWatch is a joint project of Advertising Age and SRI Research Center, Lincoln, Neb.

Ad awareness is measured by asking a nationally projectable sample to name the advertising that first comes to mind of all seen, heard or read in the previous 30 days.

Consumers are queried on the first ad they remember overall, as well as in a variety of product areas.

During April, 1,000 consumers were polled by telephone.

Those changes in advertising awareness that are deemed statistically significant by adWatch researchers can be attributed to more than sample variation.

The overall Top 10 for April—when respondents were asked to name the first advertising that came to mind without regard to product category—contains some familiar names and two new entries *(see chart on Page 3)*.

Pepsi-Cola emerged as the best-recalled advertising, surpassing the popularity and memorability of those dancing California raisins. April was the first time since July 1986 that Pepsi-Cola has held the top spot.

Earlier this year, Pepsi-Cola unleashed new commercials featuring TV and film star Michael J. Fox (AA, Jan. 19, *et seq.*). Its recall score also may have been buoyed by the popularity of the "Top Gun" tie-in commercial for its Diet Pepsi brand.

Coca-Cola had the third-best overall recall score (behind the California raisins). Coca-Cola on March 5 broke its "You can't beat the feeling" multibrand campaign and continues to use Max Headroom in commercials for brand Coke.

Surprisingly, Pepsi-Cola's advertising registers most strongly with women: 75% of those who named Pepsi as the most memorable were female. The opposite is true for Coca-Cola: 62% of those who named Coca-Cola first were male.

Not surprisingly, both advertisers had their best recall among younger respondents: 25% of Pepsi namers were aged 18 to 24; 38% who said Coca-Cola were members of that "new generation."

When the sample was specifically asked to recall the first soft-drink advertising that came to mind, the memorability battle was very, very close: 31.1% named Pepsi-Cola, 30.3% named Coca-Cola.

Making a rare appearance among the top 10 in April was AT&T Co.

Although the company has several agencies doing creative for a variety of products and services, it's probably safe to guess that Ogilvy & Mather's controversial TV commercials for AT&T's business phone systems account for its recall increase, which earned it the No. 10 spot.

O&M's spots clearly have registered with consumers. The commercials use wandering camera work while frustrated phone users mumble their desperate complaints about the systems they have to deal with.

But whether that's because consumers find these spots interesting or annoying is impossible to discern from adWatch figures.

Last month's survey also provides glimmers of hope for two embattled agencies in the fast-food industry.

As J. Walter Thompson USA, New York, prepares for the struggle to retain Burger King Corp.'s account, it should note that its "Best food for fast times" campaign may be catching on. BK's share of first mentions in the fast-food category rose 4.2 points to 14.2% in April.

McDonald's, meanwhile, lost 4.2 points, sliding to a still-commanding 41.5% of first mentions.

Dick Rich Inc.s' "Give a little nibble" campaign for Wendy's International also moved the awareness needle a bit. The campaign made its debut April 6. Wendy's share was 9% in April, up from 7.1% the previous month.#

JWT plots BK defense

(Continued from Page 6)

would involve, in effect, having BK's Mid-Atlantic Region being handled by JWT's New York office as a separate account from the national business. (Currently, JWT fulfills BK's local needs through an overlay of 60 or so field contacts who do local media planning.)

The second key related component is to establish a sales-promotion capability that would integrate point-of-purchase, couponing and merchandising into the ad program. This has been a reported weakness in BK's marketing.

Since JWT does not now have a sales-promotion operation, fulfilling this plan might require purchasing or affiliating with a major sales-promotion shop.

The regional "prototype" idea is expected to be refined and developed further and become the heart of JWT's attempts to retain the account in further presentations, especially since it plays into JWT's particular strength of having more strong offices around the U.S. than many other major agencies.

Several sources noted that even the infamous "Herb" campaign, which was intended as a promotional vehicle, failed in part because there was no coordinated tie-in promotional support.

Sales went "through the roof," sources said, when franchisees on their own initiative developed tie-ins, such as Herb-burgers.

There appear to be two reasons why regional support that can integrate sales promotion is more relevant today, whereas in the past BK and JWT were better able to get more mileage by duplicating ad plans on a region-by-region basis.

One reason is the softness generally in the fast-food industry. Slower sales growth requires more promotional stimulation to sales.

Secondly, BK's rapid growth in recent years has given it more potential resources at the regional level.

There are regions with enough strong franchisees who, in addition to kicking in 2% of gross sales for national ad campaigns and 2% for local ad campaigns, can afford another 1% toward sales promotion.

JWT also is facing problems with Burger King business outside the U.S.

BK announced last week it is reviewing its $300,000 radio and print account in the U.K. JWT will not participate in that review, making the U.K. business the fifth piece of international BK work the agency has lost in the last year. Earlier JWT lost accounts in Hong Kong, West Germany, Korea and Spain (AA, Sept. 29). All those accounts combined are worth less than $4 million in billings.

One ray of hope for JWT was BK Canada's announcement last week that it will not review its $6 million account, now with the agency's Toronto office.#

Dale Lang, publisher of *McCall's*, says the open rate card is "the only fair way to treat the situation."

'McCall's' opens war on rate card

By STUART J. ELLIOTT

NEW YORK—*McCall's* move to an "open," TV-style negotiable rate card is accelerating a shift to selling magazine ad pages like broadcast commercial time, and bringing an outcry from opponents of the trend.

Kenneth Caffrey, exec VP-director, media and broadcast operations, Ogilvy & Mather, said it is "conceivable *McCall's* may have signed its own death warrant in terms of negotiations ... when a magazine like *McCall's* announces it's negotiable, how will anyone know how far is down?"

"*McCall's* has thrown down the gauntlet," said Mike Drexler, exec VP-national media director at Bozell, Jacobs, Kenyon & Eckhardt. "It's going to spread, no question about it."

Effective with *McCall's* September issue, the decision by the women's-service monthly to abandon the traditional rate card is striking because it is co-owned by Time Inc., which is known for its

Saatchi plots to keep Jeep

Spinoff or Esty union considered

By RAYMOND SERAFIN

Saatchi & Saatchi Co. will try to save the $120 million Renault/Jeep account by either spinning off the Detroit-area office of Saatchi & Saatchi Compton Worldwide into a new agency, or by merging the office into sister agency William Esty Co.

The restructuring would take place as Saatchi merges DFS Dorland Worldwide and Saatchi & Saatchi Compton, posing a conflict with the $200 million Toyota Motor Sales USA account held by DFS Dorland.

The changes could be announced as early as this week, sources said.

Other sources, however, contend both the Esty and spinoff plans are only proposals, and there is still much infighting within the Saatchi organization over the merger and conflict fallout.

The efforts to save the American Motors Corp. account have been complicated by the pending acquisition of Southfield, Mich.-based AMC by Chrysler Corp. The acquisition, already approved by the boards of directors of Chrysler, AMC and AMC's French parent, Renault, is expected to be completed by mid-August.

Under one agency restructuring scenario, Compton's 80-person office in Southfield will become autonomous, in effect creating a new agency reporting directly to Saatchi & Saatchi in London.

The principals in the new shop would likely be the five-man executive committee at the Southfield shop, headed by David Welch, an Englishman who was director of Compton-Europe before becoming president of the Detroit-area office.

Mr. Welch would likely become president-ceo. The other principals would be four management directors: Dick Johnson, creative; Rick Paschke, media; Mike

Big Mac, NBA court Soviets

By BRIAN MORAN

McDonald's Corp. plans to tip off a marketing push into the Soviet Union this fall by sponsoring the first-ever basketball game between a team from the National Basketball Association and the Soviet national team.

The fast-food giant is in final discussions with the NBA to become title sponsor of the first World Basketball Open, a round-robin tournament involving a team from the NBA, the Italian professional champions and the Soviets.

The event is set for late October in an as-yet-unannounced U.S. city and will be carried by ABC-TV and

Shulton adds Scali, splits $47M account

By PAT SLOAN

American Cyanamid Co.'s Shulton USA division has rearranged its agency roster, splitting $47 million in spending between Carrafiello, Diehl & Associates and Scali, McCabe, Sloves and avoiding any mega-agencies that might result in conflicts now or in the future.

Under the new setup, Carrafiello, Diehl & Associates, Irvington, N.Y., gets $22 million by retaining the Combat line of insecticides and picking up Pine-Sol household cleaners and Lady's Choice antiperspirant.

New York-based Scali wins $25 million in billings, including the Old Spice line of men's fragrances and deodorants,

Last Minute News

JWT buyout effort suspected

NEW YORK—JWT Group, in unusually heavy trading of more than 450,000 shares May 29, rose 2 points to 35¼ and had been as high as 36¼ earlier in the day, as rumors circulated of an accumulation of shares. JWT started the week at 31⅛ and usually less than 50,000 shares trade daily. Trading was heavy all week, and JWT itself had no idea who was buying. Various reports pointed toward a buyer familiar with the ad agency business. Some buy orders were coming from London, and Martin Sorrell's WPP Group emerged as one credible potential buyer. Another rumor focused on London-based WCRS Group. But WCRS sources indicated it had explored internally, and rejected, an offer for JWT.

Levine shops for Calif. agency

LOS ANGELES—Levine, Huntley, Schmidt & Beaver Chairman-CEO Harold Levine confirms he is in "serious discussions" about acquiring a Southern California agency. The New York-based subsidiary of Grey Ad-

Will market new luxury cars

Toyota to join upscale drive

By CLEVELAND HORTON

Toyota Motor Sales USA is creating a new division to sell automobiles at the fast-growing upper end of the automotive market.

The new division, designed to compete grille-to-grille against European luxury/performance cars, joins the growing list of companies vying for a piece of the 22.5 million-vehicle U.S. car market. Within the past year, five new importers have entered—or announced plans to enter—the market.

Toyota's new division will place the leading Japanese importer in a segment of the market it hasn't approached head-on in its 29-year history of selling cars in the U.S.

Insiders said Toyota hasn't decided when it will go public

(Continued on Page 86)

Highlights

P&G prescribes medical endorsement 6

Procter & Gamble Co. will use a medical endorsement in ads for Citrus Hill Plus Calcium beverages to help increase its share of the fruit-juice market. According to sources, that advertising will be closely tied to the beverage's recent endorsement from the American Medical Women's Association, the third such independent "seal of approval" granted to the company.

Krafting growth through purchase 6

Kraft Inc. improved its position in the salad dressing and margarine categories last week by buying Anderson Clayton Foods from Quaker Oats Co. The purchase gives Kraft Seven Seas salad dressings and Chiffon margarine. Although the additional brand names improve Kraft's position in both markets, its overall ranking in those businesses remains unchanged.

As the megamerger dust clears 37

When Gerry Rubin walked away from the high-stakes world of ad agency megamergers to head his own spinoff shop, client-conflict headaches gave way to problems regional agencies have had adjusting to the megamerger fallout. Independent agencies now have a chance to grow from the resulting client-conflict fallout of merged shops. Big national agencies have begun to re-evaluate the value of a branch-office network.

Mickey Mouse leaves the parks 80

Walt Disney Co. is opening its first retail outlets outside its theme parks and may develop a national chain. Disney's consumer products division will open its second store in July; its first outlet has been open since March. The Disney Store stocks everything from $2.50 wind-up toys to $30 Mickey Mouse watches to a $2,700 porcelain scene from "Cinderella."

How the Duke was won 80

Primerica's $3.5 million print campaign introducing its new name began with an ad featuring a photo of John Wayne. The campaign only came together after months of negotiations with the late actor's heirs.

Justice in the 'Twilight Zone' 80

Commercial producers and ad agency executives are casting a wary eye toward the "Twilight Zone" trial, which saw film director John Landis acquitted of charges. The adverse publicity and lengthy court battle led to more caution in movie production and an increased awareness among those involved in making TV commercials.

Bright idea for outdoor ads 84

Gannett Outdoor Group flexed its marketing muscle last week with the national introduction of Superflex, a vinyl-coated fabric for outdoor boards that could revolutionize outdoor advertising. The material allows magazine-quality reproductions that will not fade for as long as two years, giving longer life to outdoor campaigns.

INTERNATIONAL

Advertisers side with consumers' rights 56

The World Federation of Advertisers has called on the Canadian government to reject its proposed ban on all promotion of tobacco products. The advertisers based their case on consumers' rights to information rather than the advertisers' own right to self-expression.

Big Mac lists ingredients in U.K., Germany 56

McDonald's nutrition-information print campaign, which has stirred controversy in the U.S., is being exported to Europe. Print ads extolling the quality and outlining the nutritional makeup of the chain's foods are running in West Germany and the U.K.

CBS may say nix to Nielsen

Meter squabble continues

By VERNE GAY and JAMES P. FORKAN

NEW YORK—CBS-TV's top research official says there is "a real possibility" the network will not renew its ratings contract with A.C. Nielsen Co. and instead rely on other sources to get national ratings for its programs.

VP-Research David Poltrack, citing the network's "despondence" over Nielsen's people-meter data, said CBS could get data from AGB Television Research, which, like Nielsen, will start a national people-meter service Aug. 31.

CBS also could use syndicated local-market research services, such as Arbitron or Nielsen's, he added.

Mr. Poltrack and other network executives have hinted for months that CBS may defect, but few industry observers believed it would follow ABC, which canceled its Nielsen contract last February.

ABC, however, is expected to resign.

"It would be very difficult to operate without a national rating service," said Marvin Mord, VP-marketing and research services, ABC. Mr. Mord said it would be difficult to use AGB because it does not have a year of tracking data.

CBS, the only network to date to have signed with AGB, and Nielsen plan to discuss their future relations in meetings this week.

The networks will establish prices for their prime-time inventory for upfront sales next week, while actual negotiations will begin June 15.

Because virtually the entire ad agency buying community intends to buy upfront time based on people-meter data, this is a critical juncture for CBS.

Agencies would be hard-pressed to establish separate pricing estimates for one network using AGB audience estimates and for the other networks using Nielsen estimates.

Mr. Poltrack, at a briefing last week on the May sweeps, alluded to CBS' disagreement with Nielsen over the composition of its people-meter sample and the current sample's cooperation rate.

The TV networks and major syndicators have been hurt under the people-meter system and have been especially critical of the way Nielsen's audience numbers have varied with each new people-meter test-rating book.

Each network has various theories about the causes of these problems, and each is haggling with Nielsen about how the problems should be solved.

The networks have delayed signing new contracts until these "problems" have been addressed by Nielsen.

Both ABC and NBC have continued future contract negotiations with Nielsen.

Nielsen had hoped all three networks would take advantage of a $300,000 incentive for early sign-up in May; all three declined because of their concerns over the people meter.

Now Nielsen says there is a "possibility" that one or all of the networks could still be in negotiation by September, when Nielsen's new people-meter service is scheduled to kick off.

Meanwhile, the confusion grows as the ratings change with each new People Meter Evaluation Report, which comes out every other week.#

Seven shops vying for Invest America

MILL VALLEY, CALIF.—Invest America, a newly formed network of independent financial planners, reportedly named seven agencies as finalists for a $14 million-to-$20 million account. They are: Chiat/Day, Doremus & Co. and McCann-Erickson, all San Francisco; Financial Marketing Services, Santa Monica; and New York-based Angotti, Thomas, Hedge; Homer & Durham, and SSC&B:Lintas Worldwide.

West Coast News

International Food Marketing, Plainview, N.Y., hired Ketchum Advertising, Los Angeles, to handle the launch of a new line of frozen dinners and entrees based on recipes served at the Marie Callender's restaurant chain.

IFM is planning to introduce the Marie Callender's branded items on the West Coast in the fall, but plans to expand the line nationally in 1988.

Suissa Advertising, Santa Monica, Calif., is the agency for Marie Callender's restaurants.

Sea World of California, San Diego, narrowed the review for its $5 million account to nine southern California agencies.

They are: San Diego-based Chapman/Warwick and Franklin & Associates; Los Angeles-based BBDO/West, Campbell & Wagman, DYR, and Gumpertz, Bentley, Fried Advertising; Cochrane Chase, Livingston & Co., Newport Beach; Reiser Williams DeYong, Irvine; and Salvati Montgomery Sakoda, Santa Ana.

A decision is expected by June 30. DDB Needham Worldwide, Los Angeles, previously handled all six Sea World theme parks.

MGM Grand Air, El Segundo, Calif., will introduce its scheduled service between Los Angeles and New York with a TV, radio and print campaign breaking June 15 in those cities. Ads for the luxury carrier startup, which plans to begin service by early July, use the tag line "Everything else is second class." Admarketing, Los Angeles, handles the $3 million account.#

Extensions leave brand in new areas

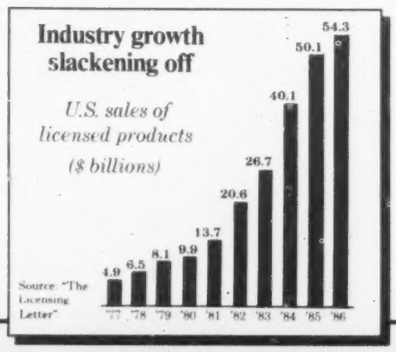
By Lori Kesler

When shoppers find themselves face to face with a shiny new Simplicity sewing machine, they sometimes wax nostalgic. "I remember my mom had a Simplicity machine way back in 1935," one woman was overheard saying.

Simplicity didn't make sewing machines in 1935. It doesn't even make them today. But New York-based Simplicity Pattern Co.'s name commands such power in the home sewing and crafts field that, through licensing, the company can bring consumers Simplicity brand sewing machines, scissors, craft kits and about 1,200 other related products.

Armed with research suggesting its "mother, God and apple pie" image could attract today's neotraditionalist parents, the company also has licensed a line of children's learning activities.

Lori Kesler, ADVERTISING AGE's St. Louis correspondent, examined the marketing of the Louisville Slugger name in the June 9, 1986, Licensing Special Report.



Jim Bell, director of new ventures, says Simplicity also may put its name on home-decorating products, small appliances and publications.

A growing number of companies like Simplicity are tapping into new product areas via licensing. This kind of brand extension represents the licensing industry's greatest growth opportunity.

Observers note that in the past, most companies put their logos on licensed products primarily to boost brand awareness—a trend which gave rise to Budweiser drinking glasses, Burger King erasers and Coca-Cola telephones.

Although this kind of promotional licensing probably will continue, most insiders say the industry's real future belongs to companies using licensing to reach beyond their core business into related product categories.

"Brand extension licensing has taken this

(Continued on Page S-2)

Branding new areas

(Continued from Page S-2)

tired, old-fashioned industry into whole new areas," says Wes Anson, president of Marketing/-Trademark Consultants, licensing consultants based in La Jolla, Calif., and New York.

"Five years ago, most corporate-licensing efforts fell into pretty traditional patterns. Today we're getting into territories we never dreamed of before."

Licensing agents point to successful current examples of brand-extension licensing: Astroturf sport shoes designed for playing on Astroturf playing fields; Louisville Slugger batting gloves and baseball uniforms; Old Spice shaving mugs and safety razors; Sunkist fruit snacks and Sunkist vitamin C tablets; Winnebago camping equipment; and bridal gowns and wedding invitations licensed by After Six, marketer of men's formalwear.

"Brand extension is where corporate licensers can begin to realize real advantages," says Nancy Bailey, president of Nancy Bailey Associates, a licensing agent based in New York and Miami. "They can enter new markets without the usual research and development costs, because the licensee takes on the function of making, selling, marketing and advertising the product."

In an era when large corporations are gobbling up each others' brand-name lineups, brand-extension licensing provides "a quick, low-cost, low-risk way to take a corporate brand into specific new product areas," Mr. Anson says.

He notes that licensed brand extensions can reinforce sales of core products by moving the brand name into wider distribution. For example, when Winnebago licensed a line of tents and camping accessories, its name—previously found only in recreational vehicle showrooms—suddenly appeared in thousands of department stores.

Brand-extension licensing also can open up new ad channels. When a distilled spirit, for example, is licensed to an ice cream company, its name then can be advertised in broadcast media that otherwise are shut to its primary product.

Glen Konkle, president of Equity Management, Palatine, Ill.-based licensing consultants, says brand-extension licensing generally yields greater financial benefits than promotional licensing, but companies tend to be more reluctant to enter into it. "It's a big deal to let somebody else use your name," he says. "It's a decision that can't be taken lightly."

The brand-extension arrangement has serious ramifications for the licensee as well. "In most cases, it means the company making the product surrenders its own identity and becomes, in effect, the brand it bought a license for," says Murray Altchuler, executive director of the Licensing Industry Merchandisers' Association, New York.

Despite the risks, many insiders see the general category of corporate licensing—renting out trademarks or brand logos in return for royalty fees—as the salvation of a young industry that's trying to break its dependence on short-lived, oversold character licenses.

Annual sales of corporate licensed products already have eclipsed those of cartoon-character products, according to "The Licensing Letter," a Scottsdale, Ariz.-based trade publication.

Tom Herzberg

Last year consumers spent about $15.2 billion, or 28% of the licensing industry's $54.3 billion in retail sales, on products with trademark or brand-name licenses, says Arnold Bolka, "The Licensing Letter" publisher. Cartoon characters, on the other hand, brought in $12.5 billion, or 23% of licensing sales. Sports properties, a distant third, rang up $6.5 billion, with the remaining sales divided between eight different property types ranging from celebrities to movies.

Mr. Bolka says industry sales grew about 8% in 1986, "the most modest gain by far since we started these measurements a decade ago." In a survey conducted by his newsletter, licensing executives blamed the slowdown on economic conditions, an overabundance of licensed properties and an absence of any sensational new properties.

Ironically, those factors could bode well for licensing's mainstays—"the Disneys and corporate symbols and celebrities who are known and loved," Mr. Bolka says. He sees the industry returning to "the fundamental precept that something first gains public acceptance—and *then* gets licensed."

He says corporate licensing best reflects licensing's *raison d'etre* "because a brand name has to prove its popularity before it becomes a desirable property."

Toy and greeting card companies turned that idea upside down in the late 1970s, when they started creating entities specifically for licensing. The trend was led by American Greetings Corp.'s Strawberry Shortcake, who appeared in 1979. Observers say the create-a-character formula worked well for a while, but by last year hordes of licensed characters had glutted the market for children's products—cereals and toys in particular.

"Now, in many product categories, retailers just don't want any more characters because they've been overloaded with properties that didn't meet expectations. They ended up with excess inventory, and it left a tremendously bad taste in their mouths," Ms. Bailey says.

Not that retailers are likely to swear off characters for good. "Of course, eveybody's always waiting for the next Cabbage Patch phenomenon," she says. "But these days, retailers won't risk buying a lot of characters in hopes of having the right one. Now they figure if they see some movement, they'll still have time to jump in. They're much more cautious."

Although Mr. Altchuler says, "There's been more linage written about corporate licensing than real accomplishments," insiders take it for granted that corporate licensing is the industry's future.

"Character properties have driven this business until now," Ms. Bailey says. "But I think as the industry gets more sophisticated and companies find licensing an effective marketing tool, corporate licensing will become an even more important part of the picture."

However, Michael Sisson, president of Sisson Group, a New York-based licensing agent, says history could repeat itself if corporate licensers rush headlong into the market.

"Suddenly everybody who has a well-advertised logo is saying, 'Gee, I've got to do something.' But I wonder how much of this activity is justified," says Mr. Sisson, who detects a "lack of discretion" in choosing licensing relationships.

He says licensing industry growth, which mushroomed in the late 1970s and early 1980s, now is leveling off. "I've got to believe we're approaching some limits in the market," he says, "and when we reach those limits, licensers will gain share only by taking it away from somebody else."

Mr. Sisson warns corporations to develop a game plan before jumping into licensing. As a marketing tool, licensing can accomplish several goals: expanding a brand's product lineup, increasing name exposure, creating a secondary income source and protecting a trademark. A company needs to determine which of those benefits it needs.

Another consultant, Craig Kalter, president of Marathon Projects, a Forest Hills, N.Y.-based licensing agent, says 80% of all corporate licensing programs fail to meet their goals, often because of a mismatch between the licensed trademark and product.

Bad timing, poor design or the wrong choice of distribution channels also can sink a project, he says. A surprising number of corporations are caught up in licensing "me-too" products simply because "an executive sees his competitor doing something and decides he has to follow suit," he says.

Although corporate licensing can be profitable, experts say most companies aren't in it primarily for the money. "They're doing it for other reasons—such as the added awareness, placement into new distribution systems, a chance to reach new demographics, to reinforce trade relationships or get greater penetration in retail," Ms. Bailey says.

"Money is important to some, but it's generally not the focus of the program."

This means corporations may have more to gain from licensing than other kinds of licensers—but they also have more to lose, Mr. Bolka says. "They, least of all, can afford a failure because any misuse of their trademark jeopardizes its value in the company's core business."

Branded apparel racks up sales

Wider market awareness a tempting enticement

It's a sweet deal. Making virtually no investment itself, a corporate licenser may find licensees willing to pay royalties ranging from 4% to 8.5% of wholesale sales.

But for a company to make the most of it, licensing needs to be integrated into overall marketing strategy and used to support specific marketing goals.

"Our mission is to return maximum revenues on the fruit grown by our 6,000 members," says Michael Loudon, senior manager of licensed products marketing and administration for Sunkist Growers, Sherman Oaks, Calif., a federated farmers' cooperative.

"Licensing supports the core branded fresh-fruit business by allowing us to take the Sunkist message to the consumer all year round," Mr. Loudon says. "And it provides economies of scale in marketing."

Sunkist's first licenses, in the early 1960s, were non-royalty agreements signed with foreign concerns that could use the trademark if they could guarantee there would be retail outlets for the product.

Today Sunkist has a more sophisticated and profitable worldwide licensing progam. Its licensing revenues topped $13 million last year.

Sunkist Vitamin C tablets, produced by Ceiba Consumer Pharmceuticals, Edison, N.J., met with such success that Sunkist hopes to license additional "wellness products," Mr. Louden says.

He says he's not talking about medicinal or clinical products. Those things wouldn't fit the Sunkist image. He's talking about the promotion of good health. In fact, Sunkist limits

(Continued on Page S-4)

Wider market awareness

(Continued from Page S-2)
the use of its 75-year-old trademark to just three categories: food-related products, beverages and health products.

Sunkist Orange Soda, one of the cooperative's primary licensed products—now owned by Cadbury Schweppes USA, Stamford, Conn.—recently has been squeezed by PepsiCo's Slice, Procter & Gamble Co.'s Orange Crush and Coca-Cola USA's Minute Maid soda.

However, Thomas J. Lipton Inc., Englewood, N.J., holds licenses for Sunkist Fun Fruits, a five-flavor line of fruit snacks, and Sunkist juices, juice drinks, juice bars, institutional foodservice products and frozen dessert confections.

"While the soft-drink business is important for awareness, the Lipton franchises are important because of their close alignment with our core business," Mr. Loudon says. "We have a number of new products on the drawing board that would combine a health positioning with current interest in frozen desserts and snacks."

Although New York-based Simplicity Pattern Co.'s brand extension licensing ultimately may increase sales of Simplicity patterns, unlike Sunkist "we didn't go into it with that in mind," says Jim Bell, the company's director of new ventures.

> ***"[A trademark] is the one thing your competition can't knock off."***
> **Jim Bell**
> **Simplicity Pattern Co.**

Instead, the company is trying to establish the Simplicity trademark on products that are consistent with its original image, but offer wider distribution. "We want the consumer to see the trademark and become comfortable with it in other product areas," he says.

Mr. Bell says a trademark can be a very valuable asset—"and it's also the one thing your competition can't knock off," he says. Yet he believes few companies really know what their trademarks mean to consumers.

He discovered, for example, that the Simplicity name struck a familiar chord with baby-boom families. He adds that consumers associate the name not only with sewing, but also with such general characteristics as "learning, tradition, saving time and getting good value."

That's why Simplicity, already a licenser of home sewing products, this year is taking on toys. Simplicity knitting, weaving, yarn and needlework kits are part of the line of 15 toy products that will reach retail this month. Meanwhile, Simplicity continues to expand its presence in sewing notions and craft-related products, and it is looking into home-decorating products, gardening products and small appliances, where research indicates the Simplicity name could add value.

Like Simplicity, Winnebago Industries has used licensing to bring its name to younger consumers. But the Forest City, Iowa-based company also sought trademark protection and profits from its licensing program.

"When Johnny Carson tells a story about a motor home, he's likely to say, 'There goes a Winnebago.' We were concerned about our name becoming generic," says Dwayne Brecht, director of licensing.

In 1982, Winnebago licensed a line of camping products including tents, sleeping bags, air mattresses, propane lanterns, stoves and portable toilets. Its trademark helped licensees gain access to mass-merchandise outlets because, as company research shows, 98% of all Americans know the Winnebago name.

He says the licensing program builds name awareness among younger consumers. That's important because "when people are 20, they buy sleeping bags and tents with our name on them," he says. "When they're 40 and more affluent, they may get a Winnebago motor home."

Sales of Winnebago's camping products added up to an estimated $12 million to $15 million last year, which means royalties contributed only a small fraction of the company's $424 million in revenues. But Mr. Brecht is not complaining.

He says after Winnebago approves a licensed product, the marketer takes responsibility for producing and selling it "and we receive the royalties—with no capital outlay for facilities, marketing or design."

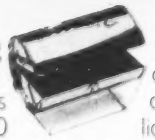
Coors®

YOU'VE GOT OUR NAME ON IT.



When we decided to get into the licensing business, we went about it in the very same way Adolph Coors set out to brew his beer. We made a commitment to deliver the finest quality products money could buy. Today, people across this country are discovering the impact Coors is making in the licensing world. We have over 50 licensees, producing more than 600 different items, all with the Coors stamp of approval. You'll find the familiar Coors and Coors Light logos on a variety of products ranging from Hawaiian shirts, barbecue sets, and water skis, to pool cues and beach towels. The fact is, whenever you see our name on it, you'll know it means quality. Find out more about our licensing program, and you'll discover how valuable a name like Coors can really be.

'Going it alone' often a viable option

By Joanne Y. Cleaver

Both licensing agents and licensees say they perceive a backlash by many companies against character licensing, used in the early 1980s for product visibility and solid sales opportunities.

Increasingly, marketers of even such mundane items as toothbrushes and sleeping bags are forgoing traditional licensing agreements in favor of graphics and characters developed in-house.

That was the decision made by John O. Butler Co., a Chicago-based marketer of toothbrushes and other dental hygiene products.

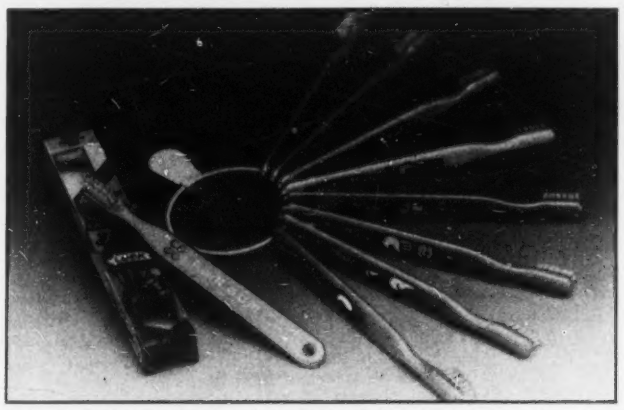
Butler isn't categorically opposed to licensing; it held the Batman license for toothbrushes in the late 1960s, recalls Ron Tarrson, Butler president.

But two years ago, the company decided to design a toothbrush proportioned specifically for a child's mouth, with a smaller head and larger, easy-to-grip handle. Because the broader handle cried out for some kind of decoration, Butler began exploring alternatives.

Joanne Y. Cleaver is a frequent contributor to Special Report.

"Licensing was considered right from the start, but we wanted to create a concept, not a character," Mr. Tarrson says. "The characters had to [be appropriate] for a child's toothbrush, not a scaled-down adult one. In looking at what was available for licensing, it was a tough job to find a suitable character; this [product] will live a long, long time."

■ *Some marketers shun licensing by creating their own graphics and characters.*



John O. Butler Co. developed the Butler Critters in-house as characters to appear on the company's toothbrushes.

Although Butler's marketing executives did consider several characters popular with 1-to-7-year-old boys and girls, including Cabbage Patch Kids and Care Bears, they eventually rejected them all in favor of creating their own characters.

Introduced last year, the Butler Critters look much like other soft, pastel animal characters. They appear on the brushes themselves, not just on the packaging.

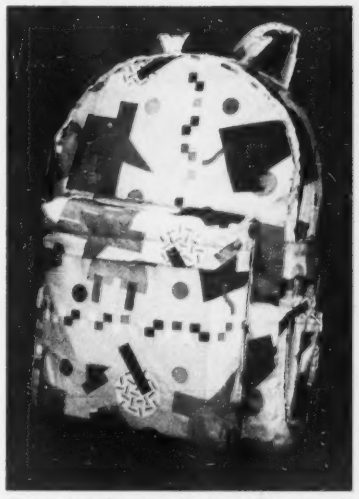
Several factors entered into Butler's decision. The company didn't want to limit the brush's life cycle by burdening it with a hot-today-dead-tomorrow character. Executives were reluctant to deal with the legal and financial arrangements of licensing.

The Butler Critters, although sold through drug stores, are promoted almost exclusively to dentists, who recommend them to patients. The company wanted to use the characters on these promotional items for dentists without having to seek permission from a licenser.

For similar reasons, Scott Paper Co. eschewed licensing for Kachoos, its new line of facial tissues designed for children.

Michael Kilpatrick, Scott's manager of public information, says the Philadelphia-based company did consider licensing briefly, but shied away because "we were afraid the license would go out of fashion, and then we'd have to find another trademark."

Instead, Scott came up with eight different original designs for the Kachoos boxes. Some are "me-too" graphics that closely imitate popular themes in licensing: outer space, unicorns and rainbows. But several of the designs feature outdoor scenes or soft and cuddly generic animals—much like the Butler Critters.



Ero Industries commissioned Lisa Frank to design backpacks and other items.

Clothing, housewares, food to pace the pack

Most insiders predict that food, clothing and housewares will be among the licensing industry's top growth categories during the rest of the decade.

They look for more products similar to Hershey's chocolate milk; Hiram Walker's Haagen-Dazs cream liqueur; Land O'Lakes' butter-based baked goods and cream sauces; Oreo Cookies 'N Cream, an ice cream product from Popsicle Industries with a name licensed from RJR Nabisco; and Southern Comfort's flavored chocolate candies from Swiss chocolatier Tobler Suchard.

These insiders also expect more licensing of personal care products, home tools, automotive supplies, home video and computer products. But they say corporate licensers soon may find they've saturated some areas.

Craig Kalter, president of Marathon Projects, a Forest Hills, N.Y.-based licensing agent, thinks apparel already is getting crowded. "It's one thing to have Calvin Klein underwear," he says. "It's another thing to have 25 different food brands on T-shirts."

Others insist clothing is a huge, diverse market with plenty of niches yet to fill. According to "The Licensing Letter," about $18.7 billion in licensed clothing and accessories were sold last year, which makes that category more than twice as large as licensed toys and games, which added up to $8.3 billion.

The Coca-Cola line of apparel introduced by Murjani International two years ago is regarded as one of corporate licensing's most impressive success stories. Now others are following suit.

McDonald Corp.'s McKids line for young children will debut at Sears, Roebuck & Co. stores in September. Burger King's line of children's sportswear and General Foods' Jell-O clothing for kids are expected to hit the racks just in time for back-to-school shopping.

Marketing/Trademark Consultants, licensing consultants based in La Jolla, Calif., and New York, brokered the McDonald's-Sears match. President Wes Anson says the idea for that partnership came out of focus groups "where we mentioned McDonald's and heard the word trust coming back at us. Every mother knows she can take the brat there and he'll eat. The Sears name generates that same kind of trust."

He says that's what makes a good marriage. Licensed clothes lines may come and go, Mr. Anson says, "but I'm convinced this one will have a 15-year life cycle."

—Lori Kesler

Adidas fits nicely for Beecham scent

By Lori Kesler

Sometimes, confides one licensee, you wonder if you're doing the right thing. You pay a company a hefty fee for the privilege of borrowing its name. Yet when things go wrong, you shoulder the financial burden and pay the licenser a minimum guarantee.

But when it succeeds—when a licensed product can capture top-of-mind awareness—"For a licensee, it's the most cost-effective marketing tool there is," he says.

"Everyone calls it the 'licensing industry,'" says Murray Altchuler, executive director of the New York-based Licensing Industry Merchandisers' Association. "But when you peel away the veneer, licensing's just an extremely efficient marketing tool, when done right.

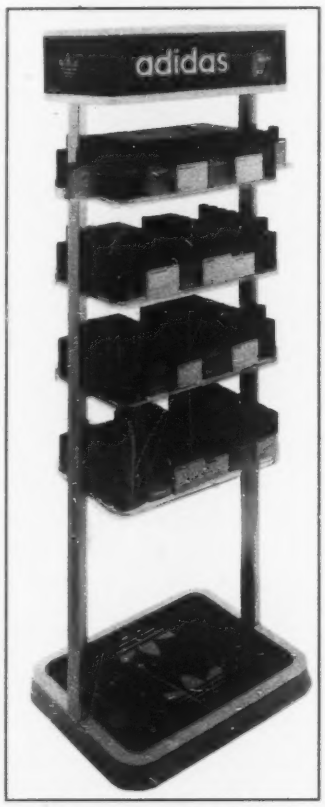
"It cuts through clutter—and, aside from the Procter & Gambles of the world, how many companies can do that?"

For instance, it made sense for Chicago-based Beecham Cosmetics to put the Adidas name on a new line of men's toiletries last fall. Peter Whitaker, Beecham marketing director, points out the new products hit the starting line with a name already familiar to 97% of American males. The U.S. licensing arrangement also made sense for Adidas, which was attempting to broaden its fashion base.

Beecham followed the example of its West German Margaret Astor Cosmetics subsidiary, which introduced a similar line of Adidas men's toiletries to Europe in 1985.

Mr. Whitaker says research had shown Adidas' name was tied to a wide range of sporting activities, and it tested especially well in the mass-market category where the new line would compete. In addition, he says, female consumers who might be scared off by a "sexy positioning" in men's toiletries responded positively to Adidas' "safe, familiar" name. Women buy about 60% of men's toiletries as gifts.

The Adidas products include aftershave and cologne, shampoo, deodorant, antiperspirant and a lotion that warms muscles by heating the skin. Fragrance currently provides the bulk of sales, but Mr. Whitaker says Beecham wants to expand the line by adding more "sports-related products that exclusively fit the Adidas name."



Adidas, aiming to widen its fashion base, licensed its name to Beecham Cosmetics for men's toiletries.

He concedes that the idea of naming a fragrance after a sport shoe did surprise some people at first. But he says when consumers saw the total package, they accepted it because "the package and fragrance both are clean, crisp and sporty. They make a strong impression."

■ *Licensing link often can make marketing sense for seemingly strange bedfellows.*

On the surface, the combination of a power-tool company and a toy marketer is as odd as the Adidas-Beecham connection. But, according to Marvin Greenburg, president of Creative Design, "These days people are buying toys with more function and play value."

So when his Jenkintown, Pa.-based toy company decided to produce a series of toy appliances that looked just like the real thing, he got together with Black & Decker. The line of B&D Junior small appliances will reach retail stores this month.

The toys, which target girls aged 6 years and older and cost less than $10, will include a Spacemaker mixer, a replica of B&D's under-the-counter model; a toy Dustbuster that generates some vacuum power; a toaster; and an automatic shutoff iron. All are battery-operated.

B&D hopes the toys will help build brand awareness for its small appliances. "We've only been in the housewares business since April 1984, when we acquired General Electric's household products division," says Barbara Lucas, VP-public affairs for Black & Decker, Towson, Md. "This is another way to groom future clientele."

Mr. Greenburg thinks his toys will be more popular because of the B&D connection. "We're a small company, but we spend time creating toys that have value," he says. "We went to B&D and pitched our proposal because we think they have the leading name in small appliances."

Similarily, Mark Echales, president of Little People Footwear, Des Plaines, Ill., says when he read that the East Aurora, N.Y.-based Fisher-Price division of Quaker Oats was moving into diversified products, he immediately contacted them.

"They've been in the toy business 54 years, and in that time they've developed one of the most trusted names in kids' products."

Fisher-Price challenged Mr. Echales to create a line of footwear that met its specifications for quality and style at a popular price. After producing samples and conducting a two-year test, his company won approval to market a line of children's shoes priced at less than $20. Little People Footwear now is selling Fisher-Price shoes through mass-market chains and independent shoe stores across the country.

When Mr. Echales answers the telephone these days, he refers to his company as Fisher-Price Footwear. He doesn't mind. He says that's the way the game is played. "From a marketing point of view, we're not a shoe company that's putting the Fisher-Price name on our product," he says. "As far as consumers are concerned, we *are* Fisher-Price shoes." AA

'Going it alone' an option

(Continued from Page S-6)

newsletter, points out that in-house character developments shouldn't be confused with knock-offs, which merely imitate a successful property. He also questions the effort that companies involved in developing their own franchises must invest to build recognition and loyalty, without benefit of a recognizable character.

Chicago-based Ero Industries, whose $40 million in 1986 sales are generated almost totally by licensed products from backpacks to camping gear, has come up with a less expensive alternative to licensing that has some built-in recognition.

James Solarz, VP-marketing for licensed products, says Ero is introducing a line of sleeping bags printed with exclusive designs by Lisa Frank, a designer of children's stickers.

The bright, poster-like designs seek to catch the eyes of junior high school-age children—those too old for juvenile characters. Ero holds the Snoopy, Mickey Mouse and Sesame Street licenses for slumber bags and bed tents but their appeal is limited to 3-to-7-year-olds, Mr. Solarz says.

Two of Ms. Frank's designs—one of bubblegum machines and the other of a bear and penguin holding hands—have sold well enough that Ero and the designer worked out a quasi-licensing agreement for a new line, called 40 Winks.

Although Ms. Frank's signature is on the bags, it's doubtful that the average pre-teen will notice it, much less recognize the name. But there's no way the pre-teen can fail to notice the splashy designs: both wild, brightly colored geometrics and stylized, oversized animal prints.

The bags will be hitting mass merchandiser shelves sometime later this summer, says Mr. Solarz.

"Some people are trying to come up with their own designs, but it's much harder to execute than it sounds. We've tried in the past to come up with generic things and it's not easy," he says. "That's why we like Lisa Frank." AA

Sidelights

LICENSING

Spuds, ALF, Ernest should liven up show

This week's Licensing '87 will feature its share of offbeat characters.

The June 3-5 conference/exposition at New York's Jacob K. Javits Convention Center is produced by the Licensing Industry Merchandisers' Association, New York, and Expocon Management Associates, Southport, Conn. Among the unusual properties on display will be:

- Spuds MacKenzie, Anheuser-Busch's spokesdog/party animal.
- Max Headroom, the ABC-TV series star, via Hamilton Projects, New York.
- ALF, NBC-TV's wise-cracking alien, via Leisure Concepts, New York.
- Regional commercial star Ernest P. Worrell, ("Know whut I mean, Vern?"), star of Walt Disney Productions' summer movie "Ernest Goes to Camp," via Quentin Properties, Memphis.

Stan Miskiewicz

But get ready. Perhaps next year's show will top that list with a visit from Freddy, the star of three (so far) "Nightmare on Elm Street" horror flicks. New York-based New Line Cinema, the movies' producer and distributor, hopes "Nightmare" may spawn some spinoff toys and other licensed items.

The razor-gloved star of the cult films, Freddy (portrayed by actor Robert Englund) has a big following among moviegoers in the youth market, primarily among 14-to-25-year-old males.

—James P. Forkan

Link leaves Murjani, Coke effervescent

In discussing corporate licensing, industry executives invariably mention the joint venture of Coca-Cola USA, Atlanta, and Murjani International, New York.

In 1986, its first full year of sales, the Coca-Cola clothing line racked up $250 million in sales in about 1,500 retail locations in the U.S., representing "a substantial portion" of Murjani business, according to a company spokeswoman. She says the company this year has signed agreements with 19 sublicensees to market related products such as beachwear, outerwear and shoes.

Murjani also this spring won the rights to market its Coca-Cola products internationally, and expects to have Fizazz boutiques—featuring Coca-Cola products exclusively—in Toyko and London by yearend.

The original Coca-Cola clothing line first made its mark with high school and college-age consumers. Murjani has broadened its line to include clothing for large women—scheduled for a late 1987 introduction—and children—introduced last fall. Youngsters can buy Coca-Cola clothing not only for themselves, but for their dolls.

Stan Miskiewicz

For kids craving the Coke look, there is a line of Coca-Cola clothes for dolls.

Introduced at Toy Fair '87, the Barbie-size dolls, from New York-based BBI Toys International, sport a variety of Coca-Cola-branded apparel—exercise outfits, sportswear, T-shirts and even a Hawaiian skirt and lei. Also available are accessories including a picnic cooler and, of course, doll-size replicas of Coke bottles and cans.

According to Michael Stone, president of New York-based Taft/Hamilton Group, Coca-Cola's licensing agent, future licensing areas include toy trucks, bicycles, toy athletic equipment and skateboards. "We want to create in Coca-Cola toys what Murjani has created in Coke clothes," he says.

—Julie Liesse Erickson

Through reseacher's effort, legends live on

Licensing opportunities these days extend beyond products to personalities—not only living celebrities such as Vanna White and Mikhail Baryshnikov, but also the famous among the dead.

Names including Elvis Presley, Laurel & Hardy, Frank Lloyd Wright and Ernest Hemingway are available for a licensing fee. For potential licensees worried about how relevant these names are with today's consumers, Marketing Evaluations offers a possible solution.

The Port Washington, N.Y.-based research company, marketer of the TvQ, Performer Q, Cartoon Q and Product Q popularity ratings, is promoting a new service at this week's Licensing '87 convention. The new rating measures the public's familiarity with and appreciation for legendary celebrities.

Marketing Evaluations President Steve Levitt's name for the new service: Dead Q.

—Julie Liesse Erickson

Not just a product, it's also a lifestyle

One of the licensing industry's current buzzwords is lifestyle licensing, a nebulous term encompassing not simply individual characters or personalities, but broader themes.

"The key in licensing today is establishing and licensing properties that connote a lifestyle—for example, Ralph Lauren's Polo moniker, or Coca-Cola—so that the consumer wants to buy not just the product, but that lifestyle," says Michael Sisson, president of Sisson Group, New York, a licensing agent.

Mr. Sisson is working with New York-based Simon & Schuster to market Nancy Drew's River Heights USA. Plans call for the program, marketed to 12-to-16-year-old girls, to include a new series of Nancy Drew mystery books plus licensed cosmetics, apparel, school supplies and a fan club. "We want to find products that fit the concept of middle America," he says. "We want that young girl to feel like she's in River Heights."

Likewise, Kansas City, Mo.-based Hallmark Properties has begun licensing its Auntie Em line, which includes greeting cards, furnishings, housewares and giftware—all reflecting a 1930s Midwestern prairie style.

But one of the purest lifestyle concepts is New York-based United Media Licensing's Sun East "lifestyle brandmark." Sun East began as a series of graphic designs, but today, a United Media spokeswoman says, "It's more. It represents a lifestyle, a strong statement of energy, confidence and individualism." The "Sun East way of life" is "the inner drive behind spiking the ball over the net."

The original Sun East designs were created by 28-year-old Brian Geverd while an art director for a small, family-owned New Jersey ad agency. Currently appearing on sportswear, sport bags and watches, the designs have spawned a store in Philadelphia; plans call for franchising the stores and licensing the property to housewares, giftware and paper goods marketers.

United Media Licensing's line of sportswear pushes the "Sun East way of life."

Mr. Geverd is the second agency art director whose licensed property is represented by United Media. Susan Rose, a former senior art director at J. Walter Thompson USA, New York, is co-creator of Fido Dido—a new-wave cartoon—that is licensed to six companies.

—Julie Liesse Erickson

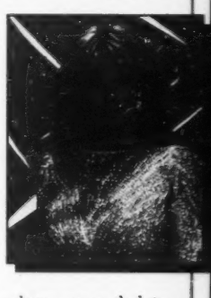
'Dynasty' dresses up its licensed lines

For Esther Shapiro, co-producer of ABC-TV's "Dynasty," TV soap operas capitalize on the licensing industry's trend toward broad lifestyle concepts.

" 'Dynasty' symbolizes a return to elegance and family," Ms. Shapiro says.

Despite a ratings drop this season, the show has 20 U.S. licensees and about as many abroad, according to Joseph Grant, Licensing Corp. of America chairman.

Current licensees are estimated to have sold about $200 million last year in "Dynasty"-branded products. The group is led by After Six, Philadelphia, and Charles of the Ritz Group and Leslie Fay Cos., both New York.



Charles of the Ritz accounts for the bulk of those sales—about $120 million—through its Forever Krystle and Carrington fragrances.

This year the "Dynasty" lineup has been expanded to lingerie, via Kayser-Roth Corp., New York; crystal, china and silverware from Gorham division of Textron, Providence, R.I.; and monthly novels and audio cassettes from Pioneer Books, New York.

Int'l advertisers take consumers' view vs. ban, tax

By LAUREL WENTZ

KILLARNEY, IRELAND—The World Federation of Advertisers is calling on the Canadian government to reject its proposed ban on all promotion of tobacco products.

The action taken at the WFA conference here May 18 to 20 was an example of advertisers basing the case against ad restrictions on consumers' rights to information rather than the advertisers' own right to self-expression.

In its petition, the WFA said, "The consumers of Canada now receive information through advertising regarding tar and nicotine content of tobacco products and other relevant health-related communications, which will be diminished if advertising is banned."

In a similar petition asking for the repeal of the new 5% sales tax on advertising in Florida, the WFA said, "Truthful advertising of lawful products and services is a valuable aid to consumers in exercising their freedom of choice in the marketplace ... and taxation upon the advertising process is ... an abridgement thereof."

In the Canadian case, John Foss, president of the Assn. of Canadian Advertisers, said, "The next thing this Health Minister [Jake Epp] will go after is alcoholic beverages. ... Analgesics have been mentioned and even some food products, like sugar-coated cereal."

Robert Goldstein, VP-advertising, Procter & Gamble Co., said, "The advertising industry is changing the presentation of its case from advertisers' right to advertise to the citizens' right to information from advertising."

But Dr. B. Schmitz, legal counsel to the European Consumer Unions, took an opposing view.

"We wonder seriously whether commercial speech should be put on the same footing as information in the sense mentioned by the European Convention on Human Rights," he said.

Dr. Schmitz advocated greater regulation of the advertising industry, saying, "In our view, self-control is insufficient control."

He also suggested that if the ad industry was concerned about the supply of information, general requirements for the information content of advertising should be set up and lack of consumer information in advertising should be counterbalanced by stricter labeling rules and other means.

"The ad industry could support our request to counterbalance advertising on radio and television by free time being given to consumer associations to impart information to the audience," he said.

On other topics, delegates approved a resolution calling for a consistent method of TV audience research that would include all the ways TV programs are delivered—by networks, cable, satellite or videocassette—and provide national data in standard forms to allow comparison and analysis between different countries.

Vincent Finn, director general of the Irish state radio and TV broadcaster Radio Telefis Eireann, predicted TV ad spending in Europe, estimated at $5.8 billion in 1986, will explode as more ad time is opened up on existing channels in Britain, France and Italy and on new channels in Holland, Scandinavia, Spain and Portugal.

For example, Mr. Finn told delegates that about 250,000 Irish homes now have greater viewing choice through satellite TV channels delivered to cabled TV homes.

WFA President Marvin Koslow, senior VP Bristol-Myers, said the organization will be expanding in Asia and Latin America, where advertiser associations in several countries have expressed interest in joining the WFA.

"We must broaden our geographical horizons," Mr. Koslow said. "And we hope to get more women delegates, along with blacks and other minorities."

Mr. Koslow said the WFA plans to sponsor a seminar in London in the next year on the portrayal of women in advertising worldwide.#

Lottery fever sweeps Ireland

KILLARNEY, IRELAND—The new national lottery is sweeping the country, backed by a $4.5 million advertising campaign that convinced 74% of Ireland's 2.4 million adults to try the game in the first 17 days. The lottery will be the biggest Irish advertiser this year.

In the first eight weeks after the March 23 launch, the lottery took in $45 million from ticket sales, said John Fitzpatrick, national lottery director and a former president of the World Federation of Advertisers.

The TV, print and radio campaign by Ogilvy & Mather-owned Wilson Hartnell, Dublin's third-largest ad agency, uses the slogan, "Come play your big dream."

Two TV spots feature vignettes of happy participants enjoying their winnings. A farmer lounges in a hammock sipping champagne and watching someone else drive his tractor. Another winner ends a shopping spree by stepping into a Rolls-Royce ahead of a row of bellhops weighed down with her purchases.

Instant prizes won by finding three matching numbers after scratching the latex film off the play area of the lottery ticket range from $3 to $7,500. Each week five players with special winning tickets identified by stars on the play area are eligible to play the Grand Prize Game and spin the Grand Prize Wheel to win cash amounts ranging from $7,500 to $375,000.

"Our management targets were for sales of $75 million for the first year," he said. "Now it's clear we're going to beat the hell out of it."

Lottery proceeds will be allocated by the Irish government to projects in the areas of health, sports and recreation, culture and the arts, he said.#

Nutrition push in U.K., Germany

Mac's ad export

By SCOTT HUME

McDonald's nutrition-information print campaign, which has stirred controversy in the U.S., is being exported to Europe.

Print ads extolling the quality and outlining the nutritional makeup of the restaurant chain's foods are running in West Germany and the U.K.

According to a spokesman at the chain's Oak Brook, Ill., headquarters, the strategy overseas, as in the U.S., is to "communicate in a straightforward way about the good food we serve."

Both the West German and U.K. campaigns are independent efforts by operators in those two countries, the McDonald's spokesman said, rather than parts of a unified global strategy of stressing links between McDonald's menu items and nutrition. Whether similar campaigns are conducted in other countries will be decided by local operators' marketing officials.

Packaged salads have been introduced in West Germany, as they recently were in the U.S. (AA, May 18), and are spotlighted in some print executions. Another is a variation of the U.S. "We shop where you shop" ad in which McDonald's lists brand-name suppliers it uses for its foods.

The U.K. and West Germany are two of McDonald's largest overseas markets. The 231 U.K. restaurants and 245 West German outlets account for two-thirds of its 665 European outlets.

Heye & Partners, Munich, handles the $18 million McDonald's Systems of Germany account.

Details of the U.K. campaign were unavailable. Leo Burnett Co., London, handles the $12 million account.#

"Many vitamins and few calories at McDonald's," German ad says.

Boost for Swedish TV ads

By JACK BURTON

STOCKHOLM—Swedish Television is consolidating its foreign program-buying departments, an action which threatens to reduce the purchase of TV shows from abroad.

The controversy may wind up giving a boost to those who support allowing commercial advertising on Swedish TV (SVT).

To reduce costs, SVT plans to merge the program purchase units for the two state-run, non-commercial channels and cut personnel from 100 to 80. The long-range goal of STV is to have at least 60% Swedish-produced shows.

However, SVT is handicapped in its efforts by a lack of funding, and the need to produce more Swedish programming is providing one key argument for allowing advertising on at least one of its two channels.

SVT director Sam Nilsson, an ad supporter, estimates that SVT could receive $75 million to $90 million a year from ad revenues, boosting its budget by 50% from its current funding level of $180 million.

Sweden's Socialist government, however, still is opposed to the introduction of advertising despite growing support for TV commercials from the public and non-socialist opposition parties.

Goran Sellberg, one of the chief buyers for TV 2 and the man responsible for bringing such U.S. TV hits as "Dallas," "M*A*S*H" and "Dynasty" to Sweden, has resigned to protest the consolidation of the buying departments. He believes the merger will end the "stimulating competition" between TV 1 and TV 2.

The move is also being viewed as part of an attempt by SVT to counter the arrival of Pan-European satellite channels.

Although the satellite channels have established only a small beachhead in Sweden so far, they have proved enormously popular among those receiving them. This has caused fears among government officals about the erosion of Sweden's cultural identity.#

Source: Media Records

This data has been provided by Media Records for exclusive publication in Advertising Age and may not be reprinted or published in any form without explicit permission from Media Records. All newspapers represented are subscribers to Media Records. For those newspapers that subscribe to Media Records National Advertising Reporting Service, Total Advertising data shown has been supplied by the publisher to Media Records and included in this compilation. All publisher supplied figures are converted to MRCS/SAU inches by Media Records. These newspapers are indicated with an asterisk (*).

REPORTING METHODOLOGY

Media Records continues to measure in linage but due to the introduction of the SAU 6 column format Media Records has designed and developed a methodology with the approval of our subscribers, the INAME Measurements Committee, The ANPA/NAB Working Committee, The AAAA Newspaper Committee, and other industry groups.

The approved methodology is titled The Media Records Conversion System (MRCS) and is based upon the printed page area of each product of the newspaper and is a five step approach as follows:

1. Measure Printed Page.
   Width and Depth in Inches.
2. Determine Square Inches of Page.
   Multiply Width by Depth Inches.
3. Determine the Number of SAU Inches of Page.
   Divide the Square Inches by 2.0625 (SAU Inches).
4. Measure the Total Lines of the Page.
   Multiply Column Depth Agate Lines by the Number of Columns on the Page.
5. Determine the Factor for Converting Measured Lines to Reported SAU Inches.
   Divide the Total Lines of Page by the Number of MRCS/SAU Inches of the Page.

SAU® is the registered trademark of the American Newspaper Publishers Association.

AAF, GF rally against tax

Execs see hopeful signs

By STEVEN W. COLFORD

ORLANDO, FLA.—As an estimated 1,000 American Advertising Federation conventioneers rally today against Florida's 5% ad tax, some industry leaders believe the state may retreat from its plan to tax national advertising.

That optimistic view by two advertising and media industry leaders is not shared by Florida Gov. Bob Martinez, state legislators or bureaucrats. The regulators say they still plan to start collecting the tax on July 1 but admit they are having a hard time drafting rules on how to apportion and collect the sales tax.

"If they see prospects for change, I don't know what they're looking at," said a Martinez spokesman.

AAF leaders believe their anti-tax rally, ads and other high-profile events will keep public attention riveted on the tax and the politicians who are ignoring public sentiment by raising state taxes.

DeWitt Helm Jr., president of the Association of National Advertisers, and William Gorog, Magazine Publishers Association

Company may get tough

By JUDANN DAGNOLI

General Foods Corp. went on the attack last week with its tough stance against Florida's 5% tax on advertising, making senior executives available to the news media in hopes of spreading its views.

In addition to planned ad cancellations in the state, a GF spokeswoman hinted the food company might consider curtailing production at its six Florida plants if the tax is not repealed. The plants employ 1,300 people.

GF's plans for curtailing its advertising in Florida (AA, June 1) involve canceling 90% of its local advertising and consumer promotions. In addition, the Rye Brook, N.Y.-based company is considering having its network TV spots blacked out in Florida markets, a step also being examined by Kraft Inc.

The cancellations will begin July 1, when the ad tax takes effect, and will involve not only spot TV but print and radio as well. GF said it spent $3 million on spot TV in Florida last year, but estimates of the total amount of ad dollars involved in the cancellations were not available.

Other companies that have announced

Sanguine penguins

Coca-Cola USA is giving the penguins that played backup to the Pointer Sisters their own commercials. The Atlanta-based soft-drink company will feature the web-footed flightless birds in Diet Coke commercials running June 15 through Labor Day. The birds got their own commercials after Coca-Cola's toll-free hot line heated up with phone calls from the penguins' fans. SSC&B, New York, created the spots with outtakes of the Pointer Sisters commercials.

Hakuhodo, SSC&B link

By JULIE SKUR HILL and DAVID KILBURN

Plans for a new Japanese-American agency with offices in Tokyo and New York solidified last week, nearly a year after a similar joint venture hit rough waters.

SSC&B:Lintas Worldwide, part of the Interpublic Group of Cos., and Hakuhodo Inc., Japan's second-largest agency, exchanged letters of intent to create the Tokyo office of the joint venture (AA, Dec. 8, 1986).

The office, to be called Hakuhodo SSC&B:Lintas Co. Ltd., will open July 1.

Plans for a New York office, to be called SSC&B:-Lintas Hakuhodo Co., are expected to be finalized next month.

Last year, a conflict with the parent companies of DYR Worldwide, a joint venture between Dentsu and Young & Rubicam, the world's two largest ad agencies (AA, May 11), led to losing major client Canon USA

Last Minute News

JWT stock keeps hopping

NEW YORK—JWT Group's stock price, after rising on heavy trading through June 3 to a high of $38.75, declined to $37 by June 5 on trading of 316,700 shares June 4 and 5. As of June 5, there was no filing with the Securities & Exchange Commission that might explain the trading. Various rumors on potential buyers focused on WPP Group, whose chairman, Martin Sorrell, had "no comment" *(see news analysis on Page 2)*; Lorimar Telepictures Corp., the entertainment/agency company, which denied it was involved; the U.K.-based Hanson Trust, which said corporate policy is not to comment; and entertainment conglomerate MCA Inc., where no one was available for comment.

Heublein backs Lancers blush

FARMINGTON, CONN.—Heublein today breaks a multimillion-dollar network TV campaign to promote new Lancers Blush Wine. Young & Rubicam handles. The spots, directed by former

Will test discount plan

Newspapers cut national ad rate

By WILLIAM F. GLOEDE

In what's being called a significant breakthrough, a sizable segment of the newspaper business is about to start slaughtering a sacred cow: the premium paid by national advertisers for newspaper space.

During the next two weeks, 258 daily newspapers—representing 52% of all U.S. circulation—will begin offering national package-goods advertisers an average 30% discount for orders of ¼-page or larger, run 13 times.

The lower rate is part of an overall, industrywide effort among newspapers to reverse a long decline in their national ad volume.

While the special package-goods test rate—to remain in effect for the next 18 months—is an average 25% higher than comparable retail rates, it is an average 30% lower than current frequency discount rates for national advertising.

At press time, the aggregate circulation of the newspapers indicating they would participate was 32.3 million.

Each ¼-page insertion in all 258 papers, costing around $237,000, would generate more than 50 gross

U.K. political ad duel heats up—P. 60

Addy Awards, Effies and One more—P. 68

Highlights

Omnicom to produce cost-cutting plan 12
Omnicom Group executives are exploring whether they can cut TV production costs and media-buying expenses by using Omnicom's clout as an agency group. If successful, the group could provide the kind of megamerger benefit clients have wanted.

Burnett's Subchapter S filing questioned 33
Leo Burnett Co. officials said they have adopted Subchapter S tax-filing status in the past year to reduce the company's tax burden. But the $2 billion agency holding company has more than 200 shareholders, said Vice Chairman Jack Kraft, and the Internal Revenue Service says Subchapter S filers must have fewer than 35 owners. That has observers wondering how the company changed status without meeting the IRS' limit.

200 shopping days till Christmas 36
K mart Corp. wants to make shopping hassles a memory of Christmas past with a $1 billion automation program it hopes will eliminate long lines and other frustrations. The focus on service turns K mart 180 degrees from its initial marketing philosophy.

Daihatsu drives into fierce fight 43
Daihatsu Motor Co. is entering the U.S. market during what could become the most competitive selling season in recent years. The market is saturated with new-car models, and volatile currency exchange rates are increasing the prices of once-inexpensive imports. Industry analysts are predicting that this year Japan's once-indomitable automakers may not sell the Ministry of International Trade & Industry's 2.3 million allocation.

Gauging adwomen's success worldwide 62
While American women have been making gains in the fight for equality in the agency business, women overseas have met with varying degrees of success. Worldwide, there are very few women at the top in the agency business; usually it's only the women who have founded agencies who have titles of chairman or president. While opportunities for women in agencies vary in different disciplines from country to country, women do well in account management positions in very few countries.

INTERNATIONAL

European elections keep voters busy 60
In the U.K. elections, the Labour Party is taking a page from the campaign handbook Saatchi & Saatchi wrote for Margaret Thatcher and the Conservative Party in the last two elections. For its $6.5 million election campaign, the party also has tapped the team behind the Oscar-winning movie "Chariots of Fire" to create its election commercial. In Italy, all six main political parties are using ad agencies in the June 14 election campaign for the first time in the country's history.

First comparative ads break in Japan 61
Comparative advertising has reached Japan via a $1 million campaign for All Nippon Airways, handled by Dentsu Inc. The campaign promotes the airline's trans-Pacific service to the U.S., comparing the spaciousness of ANA's "2-2-2" seating with the "2-4-2" of its competitors.

FEATURES

A view from the aisle 54
As anyone who works in a supermarket knows, the nation's food basket is filled with contradictions and surprises. Observation at a New Jersey A&P Futurestore revealed some insight into marketing—and the expert there is the 20-year-old manager of the store's health & beauty aids merchandise.

OTHER NEWS

The U.S. attorney investigating N W Ayer's handling of the U.S. Army account has dropped plans to indict Ayer Public Relations VP Thomas Donoghue. Page 12.

Borden's acquisition of Prince Co. last week noodled Hershey Foods Corp. further away from the No. 1 position in pasta, and gave Borden an entry into the spaghetti sauce market. Page 24.

Tired of its toy-company image, Worlds of Wonder is diversifying into school supplies and teen-age electronics with a pricey line of school supplies. Page 32.

Young & Rubicam has improved substantially in its standing among U.S. agencies, according to Agency Watch, a national survey of corporation advertising executives. Y&R moved into second place—tying Ogilvy & Mather—in how often it was named the agency providing the best products and services. J. Walter Thompson Co. ranked No. 1. Page 39.

Thirty Connecticut ad agencies are fed up with the reinterpretation of a 7.5% state sales tax and are pooling money to fight back. In 1984, the state decided some creative services fell under the sales tax. But most of the agencies have not been paying the tax because they say the state has not made clear what can be taxed. Now the state is saying it's time to pay up. Page 63.

Johnson & Johnson wants to be the first to introduce a prescription anti-wrinkle cream, and it wants to do it by using an acne cream. Page 63.

SPECIAL REPORT

***Out-of-home**—As marketers continue to tighten budgets and targets, this medium of few words, bold color, low cost and strong local tradition is expected to show a dramatic increase in revenues in 1988. Starts after Page 46.*

NEWSPAPER AD SPENDING, MARCH 1987 28

Vol. 58, No. 24—ADVERTISING AGE (ISSN 0001-8899) is published weekly except semiweekly the fourth week in March and the first week in September at 740 Rush Street, Chicago, Ill. 60611-2590. Second-class postage paid at Chicago and additional mailing offices. Send address changes to ADVERTISING AGE, Circulation Department, 965 E. Jefferson, Detroit, Mich. 48207. Microfilm copies are available from University Microfilms, 300 N. Zeeb Rd., Ann Arbor, Mich. 48103. Microfiche copies are available from Bell & Howell, Micro Photo Division, Old Mansfield Rd., Wooster, O. 44691. $1.50 a copy, $59 a year, $104 two years. Add $104 per year for air delivery to Europe & Middle East. Add $34 for surface mail to all other foreign countries. WILLIAM STRONG, VP-circulation; JOHN HUFFMAN, fulfillment director; DAVE KELLEY, circulation manager. Four weeks' notice required for change of address. Address all subscription correspondence to Circulation Department, Advertising Age, 965 E. Jefferson, Detroit, Mich. 48207 (313) 446-0494.

Hostile buyout of JWT seen as possibility

NEWS ANALYSIS

By STEWART ALTER

Long-held conventional wisdom that unfriendly takeovers don't work with ad agencies is being turned on its head by JWT Group, which may be facing just that kind of takeover threat.

More than 1.4 million JWT Group shares, or almost 15% of the total 9.6 million outstanding shares, were traded between Thursday, May 28, and Wednesday, June 3, boosting the share price almost 20% from $32.50 to $38.75.

As speculation grows about whether a single buyer is accumulating JWT stock, doubt also is growing about whether JWT's management would be able to defend itself in spite of its great resolve to do so.

Although no one knows yet who the bidder might be, speculation continues to focus on Saatchi & Saatchi's former financial chief, Martin Sorrell, who now heads the WPP Group (AA, June 1).

Mr. Sorrell said he had "no comment" about the rumors when he was reached at a Wertheim Schroder & Co. seminar for investors he was presenting in New York June 5.

WPP chiefly focuses on acquiring marketing services companies, though he has purchased a specialized real estate ad agency.

In response to a question, Mr. Sorrell would not rule out that more ad agencies could become part of his company's holdings as well.

Even though no buyer had declared ownership of at least 5% of the shares, as is required by the Securities & Exchange Commission, JWT Group Chairman-CEO Don Johnston last week issued an internal memo stating, "We have not been approached by anyone regarding a sale, acquisition or merger. . . . We are monitoring what is going on carefully. . . . We believe it is in the best interest of our people, our clients and our shareholders to remain independent."

In the past, Mr. Johnston has said hostile takeover bids would be met with an "equally hostile" response.

But many observers, from both the agency and financial communities, are starting to feel JWT's reported plan to buy back its own stock as a defensive move against a takeover is no longer possible.

The stock price may be getting too high for JWT to try going private as a defense, unless it were willing to sell off some units—such as its Hill & Knowlton PR unit—to raise the cash, sources say.

In other words, no banker would be willing to lend JWT more than $370 million plus perhaps 11% interest to buy back shares at the current price, given the agency group's history of low margins and uneven financial performance.

These sources also note JWT's chances decrease tremendously if it is challenged by a determined bidder with deep pockets. If that buyer were someone with knowledge of the agency business and a good reputation, and if the participation of some former JWT executives were enlisted, the buyer might come across as a credible stabilizing influence to shareholders, employees and clients of the giant agency, these sources say.

"It's a cinch to buy Thompson,"

(Continued on Page 86)

Account worth $14 million

FCB wins HMO

IRVINE, CALIF.—Travelers Health Network named Foote, Cone & Belding, San Francisco, and its direct-marketing unit, Smith Hemmings Gosden, El Monte, to handle its $12 million-to-$14 million account after a monthlong review.

THN is the new name for Whittaker Health Services, acquired last year by Travelers Corp.

Also in the review were: Ketchum Advertising, San Francisco; Keye/Donna/Pearlstein and Ogilvy & Mather, Los Angeles; and Scali, McCabe, Sloves, New York, interim agency on the account.

Scali retains the Yellow Pages billings. Kaiser McEuen, Los Angeles, handles collateral.

The 100,000-member health maintenance organization will begin a branding campaign, identifying it with Travelers, in the fourth quarter.

FCB said the THN account does not conflict with the $15 million American Medical International account handled by its Los Angeles office. AMI approved the agency's participation in the review, said Steve Hayman, general manager of FCB's Los Angeles office.

Vipont Pharmaceutical, Fort Collins, Colo., marketer of Viadent toothpaste and mouthwash, hired McCann-Erickson for its estimated $5 million account, after a review in which incumbent agency McCaffery & Ratner, New York, didn't take part. DDB Needham Worldwide, Ramey Communications, both Los Angeles, and McCann and Pallas Advertising, both San Francisco, were finalists.

Vipont, which has aimed its advertising at healthcare professionals, is considering its first intensive consumer effort.

Its professional marketing program will continue in conjunction with McCann's healthcare unit, Sieber & McIntyre.

This Flash Report of newspaper advertiser investments, compiled for Advertising Age by Media Records, is derived from tabulations that cover 29 dailies and 23 Sunday editions in 15 cities: Atlanta, Baltimore, Boston, Cincinnati, Chicago, Cleveland, Dallas, Denver, Detroit, Los Angeles, New York, Philadelphia, San Francisco, Washington and Youngstown.#

Source: Media Records Inc.

Ad spending up 6.6% to $318M

New York—Ad spending in 16 categories showed an overall increase of 6.6%, hitting $318.1 million, during March in major-market daily newspapers, according to the Advertising Age Flash Report prepared by Media Records Inc. here.

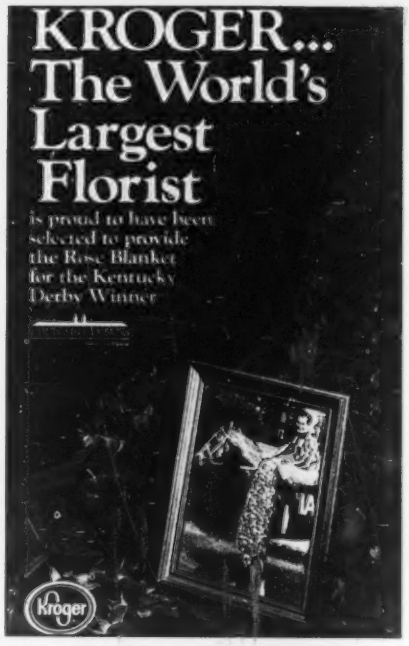
Automotive (new passenger cars) led the categories posting increases; it shot up by 57.6% vs. the same period in 1986, to $27.7 million. Spending by general merchandise stores also posted a strong dollar gain, rising 11.6% to $51.1 million.

Other gainers included food stores, up 10.1% to $34.5 million; amusements, up 6.2% to $33.8 million; radio-TV-phonograph-record dealers, up 6.3% to $19.7 million; banks and trust companies, up 31.1% to $12.9 million; publishing and media, up 8.6% to $11.5 million; public service utilities and communications, up 70.8% to $7.6 million; computer stores and supplies, up 13.3% to $5.9 million; computers, equipment and services, up 1.6% to $2.9 million; and cameras, photo supplies and services, up 55% to $437,721.

Department stores, the largest users of newspaper ad space, cut spending 3.9% to $87.4 million, with the drop partly due to the fact that Easter was in March last year.

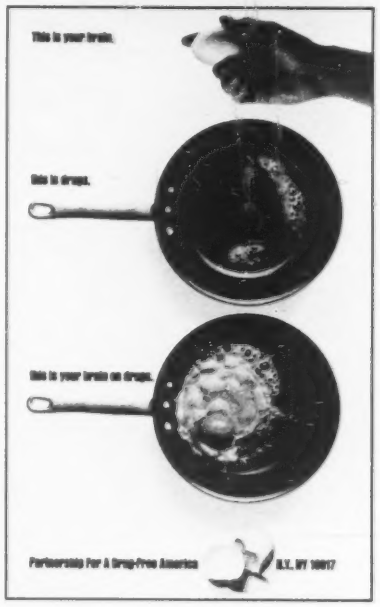
Other losing categories included airlines, down 18% to $16.1 million; stock, bond and investment houses, down 1.1% to $2.9 million; cigarettes, down 50.7% to $2.4 million; and alcoholic beverages, down 25.6% to $1.3 million. The Flash Report is based on iinage measurements in 27 daily and 23 Sunday newspapers in 15 major markets.#

Best of Press selections are made by a committee of three: Hank Simons, VP-creative director at the Newspaper Advertising Bureau; James Dunaway, VP-information, Newspaper Advertising Bureau; and William F. Gloede, Advertising Age's newspaper industry reporter. National System Inc., St. Louis, provides tear sheets to the NAB for much of this work. Advertising agencies, clients and newspapers are invited to submit newspaper ads for review. Submissions should be sent to Mr. Gloede in AA's New York bureau.

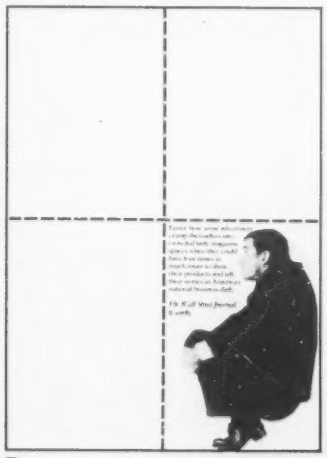


KROGER...
The World's Largest Florist
is proud to have been selected to provide the Rose Blanket for the Kentucky Derby Winner
Kroger

Kroger Food Stores' advertising department found three ways to make this ad particularly creative. First, it tied in the ad with a news/sports event; next, it chose a great combination of words, colors and graphics; and, finally, it used a sepia-tone photo to give the process color even more impact and the ad a sense of timelessness. Creative director and copywriter: Rich McGraw; art director: Ron Baker; photographer: Bray Ficken.

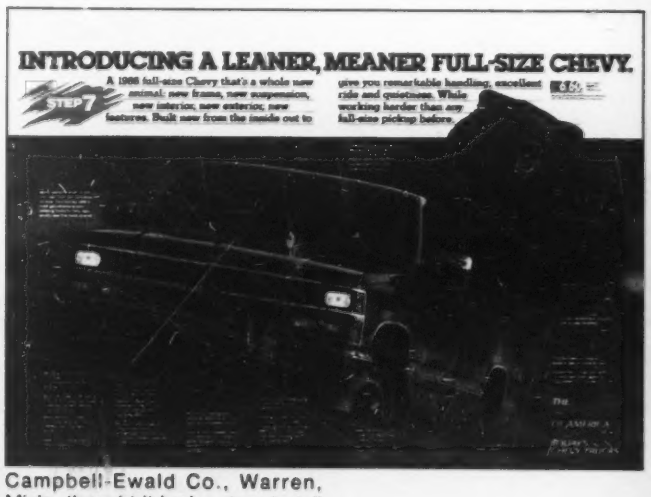


This public service advertisement by Keye/Donna/Pearlstein, Los Angeles, for Media-Advertising Partnership for a Drug Free America, New York, used a good mix of copy and graphics to make its point. We also thought the ad translated well into the companion TV commercial. Creative director: Paul Keye; copywriter: Larre Johnson; art directors: Rick Bell, Scot Fletcher; photographer: Michael Rupert.



This promotion ad for *The Wall Street Journal* from the Johnston & Johnston Group, New York and Los Angeles, is a textbook example of how to use space to illustrate a product's value. Copywriter and designer: Jim Johnston; art director: Petter Thoen; photographer: Gil Smith.

INTRODUCING A LEANER, MEANER FULL-SIZE CHEVY.
The 1988 Chevy Pickup. A whole new truck built new from the inside out.
STEP 1
Begin with a massive new frame. One of the biggest, heaviest ever put under a full-size Chevy Pickup.
THE
OF AMERICA
TODAY'S CHEVY TRUCKS



Campbell-Ewald Co., Warren, Mich., thought it had a story to tell about the new full-size Chevrolet pickup truck. So the agency told it like a news story, day by day over the course of a week in a series of seven ads that built the truck from the frame up. It made news of the advertising. Creative directors: Don Gould, Bill Ludwig; copywriter: Keith Stentz; art directors: Kick Chasey, David Johns, Carlos Vazquez; photographers: Tom Bent, Guy Morrison.

Y&R gets corporate kudos

Shop ranks 2nd to JWT in survey

By JOSEPH M. WINSKI

Perhaps reaffirming the value of independence in an era of megamergers, Young & Rubicam has improved substantially in its standing among U.S. agencies, according to Agency Watch, ADVERTISING AGE's national survey of corporation advertising executives.

New York-based Y&R, which has picked up significant business from disaffected clients of merged agencies, moved into second place—tying Ogilvy & Mather—in how often it was named the agency providing the best products and services.

Y&R and Ogilvy each were named best agency by 8% of the respondents, behind J. Walter Thompson Co., named by 10% of the 300 people surveyed.

In all previous Agency Watch surveys, JWT and Ogilvy held the No. 1 and No. 2 positions by comfortable margins.

Y&R's 8% first-quarter score compares with its average 1986 score of 4.1%.

The agency also moved into third place from No. 4 in top-of-mind awareness. It was named the agency that first comes to mind by 13.6% of those surveyed, a statistically significant increase from its score of 8.9% for the fourth quarter and 8.7% for 1986.

Y&R also improved in six agency attributes specifically surveyed by Agency Watch.

Here are the percentage of respondents naming Y&R best for those attributes in the first quarter, vs. its 1986 average. Its first-quarter rank in that attribute is shown in parentheses:

- Creativity—3.7% (No. 4), up from 1.4%.
- Account execs—5.2% (No. 3), up from 2.2%.
- Top management—6.5% (No. 3), up from 2.2%.
- Media—6% (No. 2), up from 2.5%.
- Marketing—4.3% (No. 3), up from 1.9%.
- Research—4.9% (No. 2), up from 2.6%.

No other agency has made such sweeping gains in any quarter since the Agency Watch survey of agency reputations began in fourth-quarter 1984.

Y&R's improvement in Agency Watch's quarterly surveys began in last year's fourth quarter when, in the space of six days, it got important assignments from major advertisers Kraft Inc., Hertz Corp. and Pillsbury Co.

In that quarter, 6.7% of respondents named Y&R the best agency, up from 4% the previous quarter.

But other agencies have shown one-quarter spurts, only to revert to previous levels.

Bozell, Jacobs, Kenyon & Eckhardt, for example, was named best agency by 6% of those questioned in the third quarter last year but fell back to its typical score of 2.3% in the fourth quarter and to just 0.7% in the latest quarter.

Y&R, however, managed to continue its gains from last year's fourth quarter.

That may be due in part to its winning of the highly visible competition for the U.S. Army account in January.

But the agency also may be benefiting from growing appreciation of its string of account gains, which the agency and its clients alike have attributed in part to Y&R's resolve to remain independent and less prone to account conflicts.

Thanks, no doubt, to its much-publicized management upheaval that began early this year, JWT's first-quarter awareness soared.

Asked to name the agency that first came to mind, 27.9% of the respondents named JWT, up from an average of 19.2% in 1986. JWT has led in awareness in every Agency Watch quarter. Its latest score is its second-highest yet.

Somewhat surprisingly, perhaps, JWT was named best agency by 10% of the respondents, up from its 7.5% average for 1986 and 6.7% for the fourth quarter last year.

It ranked No. 1 in best-agency polling for the quarter, the sixth time it has done so in the nine quarters of Agency Watch surveys.

The persons surveyed last quarter apparently felt—at that point, at least—that JWT's top-management troubles hadn't impaired the quality of the work delivered by the people who work most directly with clients.

The survey was conducted early in the agency's continuing wave of executive departures and before key client Burger King Corp. announced that it would stage a competition for the account, which JWT has held since 1974.

In another significant finding of the latest survey, Hal Riney & Partners was named the country's hottest agency, being named that by 7% of those surveyed.

The San Francisco-based agency, probably best known for its Bartles & Jaymes wine cooler commercials for E&J Gallo Winery, began showing up in the hottest-agency polling in the second half of last year, when it was mentioned by 3% of respondents in both the third and fourth quarters.

In the latest quarter, Riney edged out Minneapolis-based Fallon McElligott, last year's hottest agency, by just one mention.

Agency Watch is conducted for AA by SRI Research Center Inc., Lincoln, Neb.

SRI each quarter polls a random sample of 300 ad directors and other ad executives of companies with more than $25 million in annual sales. The companies are not necessarily the country's largest advertisers; they are selected at random from the 20 largest markets, with the largest markets having the most respondents.

In questioning for best agency, awareness and hottest agency, each respondent is allowed as many as three answers, with each counted as one mention. Respondents can give two replies in naming which agency is best at specific attributes.

The maximum margin of error for each quarterly sample is 5.7 percentage points.#

For more information, contact Jim Clifton, SRI Research Center Inc., 301 S. 68th St., Lincoln, Neb. 68510. Phone: (402) 489-9000.

Best agency

Question: Which ad agency, regardless of size, provides the best overall services and products to its clients?

1985		1986		1st Quarter 1987	
1. Ogilvy & Mather	7.7%	1. J. Walter Thompson	7.5%	1. J. Walter Thompson	10.0%
2. J. Walter Thompson	7.4%	2. Ogilvy & Mather	6.7%	2. Ogilvy & Mather	8.0%

AGENCY SPOTLIGHT

Gotta getta Gund, the familiar tagline for Gund plush animals, got Scott Lancaster Mills Atha the reputation for being a "toy agency" after winning the account in 1980.

'Toy shop' hunts for new game

By CLEVELAND HORTON

LOS ANGELES—There's just not a lot of fame to be gained by creating TV commercials that air on Saturday mornings.

"People have an image of toy commercials that they're sort of cookie cutter [spots] with no creativity, no concept—just a bunch of mealymouthed kids going: 'I'm going to beat you!' 'No you're not!'" said Clifford Scott, VP-account supervisor at Scott Lancaster Mills Atha here.

But, he insisted, "From a creative standpoint [toy] spots are as good as many of the national, highly touted creative spots that get all the attention."

If Mr. Scott sounds defensive, he is. The agency his father, Stephen, founded with three partners and the Tyco Industries account 11 years ago retains its reputation as a "toy shop," despite some creative and successful ad campaigns in other fields.

"The toy industry is probably the most advertising-responsive industry there is," said the younger Mr. Scott. "The average marketing life cycle of a toy is two to three years, so toys don't really have time to depend on word-of-mouth or customer satisfaction. What really makes or breaks a toy is advertising."

SLMA is trying to raise its profile beyond toys, but, ironically, a round of account moves is at the same time opening up new business opportunities within the field (AA, March 30).

The shop picked up an additional $12 million-plus in billings from existing-client Coleco Industries, when the West Hartford, Conn.-based toy company became disenchanted with one of its agencies, Richard & Edward's, New York.

As part of its diversification effort, the agency developed a self-promotional campaign that it mailed to marketers in five diverse categories: fashion, beverages, package goods, health & beauty aids and retail.

Those "ads" feature catchy headlines, such as "We've got a drinking problem," followed by an explanation: "The problem is, we've done a lot of great work. . . . Yet when it comes to beer, wine and soft-drink accounts, our cup isn't exactly running over."

Toy accounts have represented the bulk of the agency's billings throughout its decade of work. And the billings have grown considerably. By the agency's reckoning, it billed $32 million last year, up 45% from 1985, putting it among the top five independent agencies

Special Report

Mary Anne Erickson

Marketers look to local medium

By Lisa Phillips

The timing is crucial for the outdoor advertising industry: Just as ad spending dips to new lows in tobacco and liquor, national package-goods marketers have begun to shift advertising emphasis to regional markets.

"We think the classic consumer products companies are looking for an alternative medium because of the decline in television viewership and the rising TV costs," says Pat Wheeler, director of advertising and PR at Gannett Outdoor Group and Outdoor Network, New York.

In outdoor, that shift is to middle-and-smaller markets, where local sales have always been strong. Those markets fared better in 1986 than did large outdoor markets such as Chicago and Los Angeles, where national advertisers cut back on ad spending.

Major marketers including Campbell Soup Co., Chiquita Brands, Del Monte Corp., and Nabisco Brands are using outdoor boards to target consumers on their way to the supermarket; for many consumers it's the last advertising message they see before entering the store.

Top 1986 outdoor categories
($ millions)

	Revenues
Cigarettes, tobacco	$304.2
Beer, wine & liquor	100.5
Travel, hotels & resorts	93.5
Business & consumer services	91.8
Retail	83.7
Automotive, accessories & parts	81.6
Entertainment & amusements	58.9
Publishing & media	58.9
Insurance & real estate	52.7
Drugs & remedies	18.0

Source: IOA estimates based on Leading National Advertisers

Clothing marketers, among them Reebok International and Jantzen, and department store chains such as R.H. Macy & Co., and J.W. Robinson Co., are using outdoor boards, bus shelters and transit posters to target local markets.

"Our [national] clients are saying that targeting local markets is more cost-efficient," says Richard Asch, president of Asch Advertising, New York. "They feel their national advertising is developing lots of waste circulation."

Alice Vantrease, president of Creative Marketing Services, a tracking service for out-of-home co-op advertising in Augusta, Ga., sees a "natural evolution in the sales promotion cycle," where national advertisers such as Burger King and McDonald's Corp., are using more outdoor advertising to promote tie-ins on local levels.

Some of the out-of-home ad industry's best

(Continued on Page S-2)

Package goods move up

(Continued from Page S-1)

news of the year came from Congress, and the defeat, in March, of an attempt to change the language of the Highway Beautification Act of 1965. Earlier in January, the House of Representatives passed the Surface Transportation Act of 1987, H.R. 2, a four-year funding bill that retained many of the rights of compensation guaranteed to outdoor board owners in the 1965 highway bill. A bill introduced by Sen. Robert T. Stafford (R., Vt.), in 1986, which would have banned all new or replacement outdoor boards—an act that would ultimately eliminate all outdoor advertising—didn't make it to debate; another bill, S. 387, also proposed by Sen. Stafford, which would have restricted construction of outdoor boards in "environmentally sensitive areas," was defeated in February by a 57 to 40 vote.

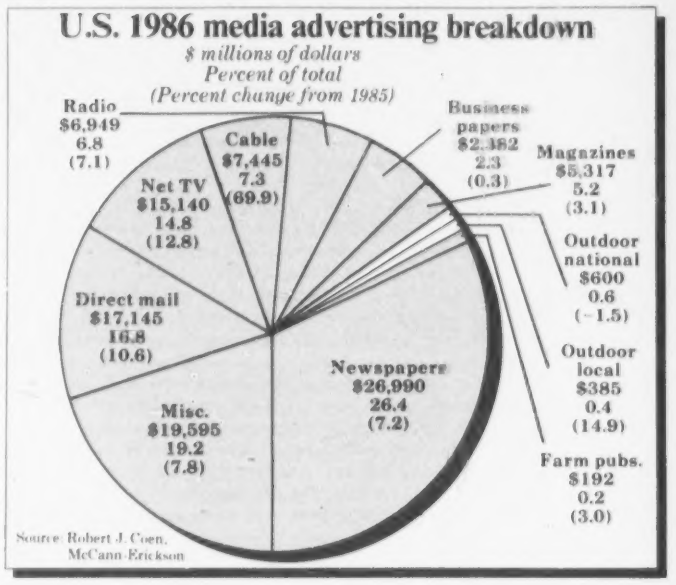
Although the Outdoor Advertising Association of America, Washington, doesn't expect another fight at the federal level this year, an OAAA spokesman says the controversy has transferred to the state and local levels; San Diego, Seattle and Portland, Ore., recently banned new outdoor boards and restricted on-premise signage.

To date, four states and several communities, primarily around famous resort areas have banned or restricted the placement of outdoor boards.

The outdoor industry also faces challenges from within. The long-anticipated crash in tobacco and liquor ad spending left the 30-sheet industry with soft sales in 1986—up only 4.4%, to $1.28 billion—an increase that fails to reflect the 6% to 8% industrywide rate hike in 1986.

According to Dave Rouatt, VP-marketing for Gannett Outdoor, the outdoor industry will see only 3% to 6% sales growth again this year.

However, Mr. Rouatt estimates 6% to 10% sales increases in 1988, as technological advances take hold and national advertisers become more familiar with outdoor's creative and marketing possibilities.



In the past year, Gannett doubled the marketing staff for itself and the Outdoor Network USA, a consortium of 36 outdoor companies led by Gannett. Last spring Outdoor Network USA also broke a $1.8 million self-promotion out-of-home ad campaign in the top 10 U.S. markets.

Outdoor co-op advertising reported sales of $58.5 million in 1986, a 100% increase over 1985's $29.2 million, says Ms. Vantrease. Along with co-op's phenomenal sales, the number of brands advertised on outdoor boards jumped to 2,553 from 1,206 in 1985.

In the first four months of 1987, CMS tracked $32 million in co-op sales at local levels, although 1987 first quarter sales in the co-op market were flat, Ms. Vantrease says. April sales figures show a 20% increase over the same period in 1986.

Despite increased spending, the flood of new co-op advertisers caused a decline in the overall share of market for traditional leading categories—automotive, beverages and fast food.

Much of the boom comes from the trend among national advertisers to give their local sales or marketing staff more power over local media buying.

"Even dealing with national companies like National Distillers, more and more there's a local marketing person who makes the decisions, no matter who I call on [at the company's headquarters]," says Connie Barry, president of TranStop Inc., a Minneapolis-based bus-shelter media company. The U.S. Postal Service has a separate marketing manager in each of its regions, with the power to make all media buying decisions for that area, she says.

The eight-sheet outdoor industry also is experiencing a spending boomlet. Sales in the mostly urban medium climbed 7.7% in 1986 to $112 million, from 1985, says Ronald Waggener, executive director of the Eight-Sheet Outdoor Advertising Association, Independence, Mo.

Last year national sales accounted for 45% of eight-sheet advertising; the ESOAA does not keep records for local sales, which accounts for the remaining 55%. Package goods, especially those targeted to Hispanics and blacks, marked the sharpest increases: food products increased 153%, personal care rose 30.8%, and miscellaneous—including healthcare services and other package goods—shot up 260%, Mr. Waggener says. Liquor, beer and tobacco advertising rose a more modest 25%, 21.4% and 24%, respectively.

Bus-shelter advertising hasn't been adversely affected by the slowdown in tobacco and liquor ad spending, chiefly because the industry has always pursued other advertisers and categories, says Ms. Barry. TranStop hasn't had a tobacco advertiser for the past two years, she says.

The company's first quarter sales hit record levels, up 64% over the same period last year, along with a 50% increase in inventory.

However, bus shelters form

only a small part of the overall out-of-home industry, and aren't located yet in all top 50 U.S. markets. Annual sales are estimated between $15 million and $20 million for all shelter advertising, Ms. Barry says.

Winston Network, New York, owning the largest share of the out-of-home market, is undergoing its own revolution. Company executives bought the out-of-home leader from the Winston family last December for an undisclosed amount, and Craig Heard, former exec VP, is now president.

Although first quarter 1987 sales were soft, second quarter figures are 100% ahead of last year's second quarter, which hit $105 million, says Helene Goldfine, VP-director of marketing.

Winston, now in 55 transit markets and representing seven of the nine U.S. rail systems, also manages telephone kiosks in New York, bus shelters and taxis in several markets, and is expanding its eight-sheet boards to reach a broader audience.

"We think eight-sheets are the future," says Ms. Goldfine. "In transit advertising, you can't sell more buses than are on the streets, but you can always add more boards."

Citing a recent study conducted by New York-based Simmons Market Research Bureau, Ms. Goldfine sees further industry growth in the synergy between out-of-home and other media—in this instance, television, using recall tests for the marketer of a nationally known nasal spray.

In Cleveland, the test market, bus cards supported TV spots in a 45-day test; recognition of the brand went from 3% before the test to 28% after. In Pittsburgh, the control market, only TV ads ran—using the same campaign and the same schedules as in the test market; brand recognition for the nasal spray went from 4% pre-test to 0% after 45 days

Finding a home for out-of-home—Clios taking step to solve dilemma

By Richard Edel

This weekend, The Clio Awards in New York will present more than 200 awards for outstanding creative advertising. In place of the single traditional poster category, two awards will be given for standard and non-standard out-of-home advertising.

Splitting the poster category is the first step in testing the potential of creating a separate competition for out-of-home, says Nancy Ross, Clio's VP for U.S. competition. The poster category now falls under print media, which competes along with TV, cinema and cable; radio; package design; and specialty advertising.

"There's always the possibility that out-of-home could become its own competition, but it takes time to do these things," Ms. Ross says. "I don't foresee it next year."

Standard outdoor includes 30-sheet printed posters and painted bulletins, while non-standard is all other out-of-home advertising such as smaller posters, transit, bus shelter, eight-sheet.

The odd thing about including outdoor in the print competition is that painted bulletins are not even printed pieces, says Joel Byron, Chicago-based marketing support manager for Scranton, Pa.-based Patrick Media Group. Mr. Byron first called attention to problems with the poster awards when a print ad that evolved from outdoor boards created by Chiat/Day, Los Angeles, for Nike athletic shoes won a Clio last year.

"After that I was up in arms," Mr. Byron says. "I felt it was a terrible injustice. There was not even a vague reference to the outdoor campaign that fathered the Nike print ad."

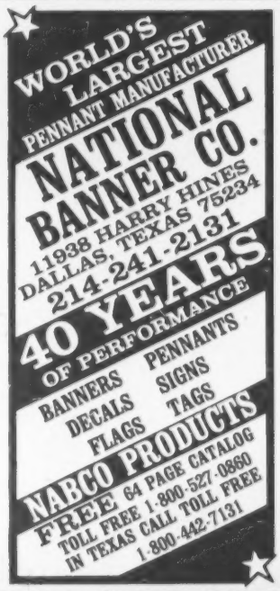
So Mr. Byron began writing letters and talking to executives at Gannett Outdoor Group, New York, and Patrick. "Under the print competition, outdoor is a separate sister," Mr. Byron says. "The only way outdoor will achieve parity with other forms of advertising is if we get our own separate competition."

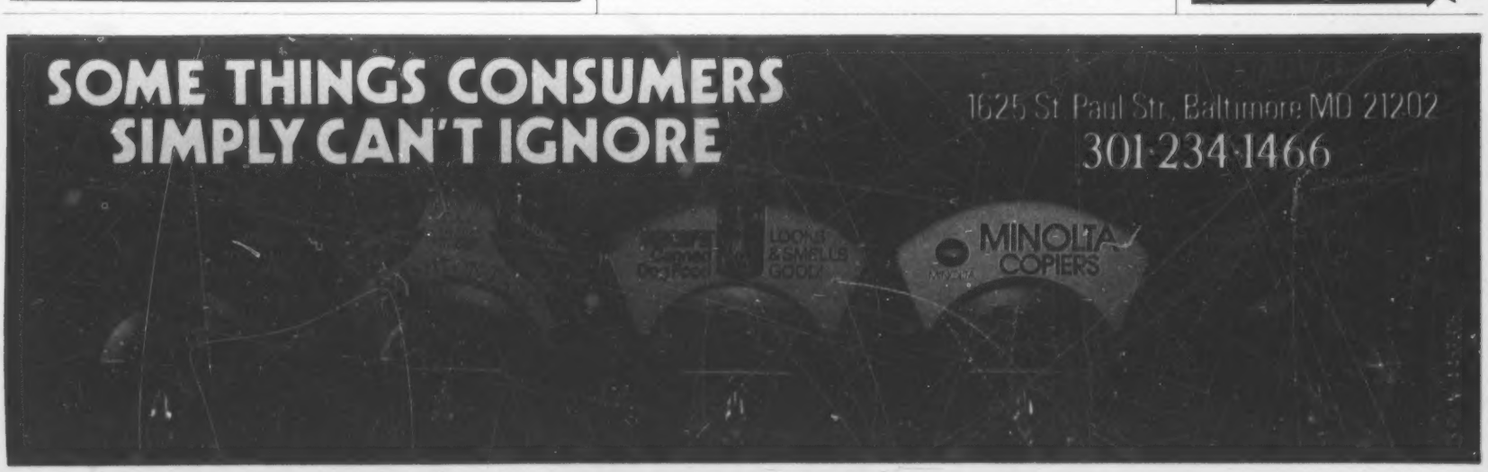
Outdoor advertising already has its own Obie awards sponsored by the Institute of Outdoor Advertising, New York. But The Clio Awards, often described as the ad industry's Oscars, are important in recognizing creative excellence, Mr. Byron says.

Entries for the newly split out-of-home categories are up slightly to 310 in 1986, from 298 the previous year, says Mike Demetriades, senior VP at The Clio Awards, who supervises the print and international competition. A total of 22 entries were selected as finalists from 200 entries for non-standard outdoor, and nine finalists out of more than 100 entries for standard outdoor, he says.

"Outdoor probably won't get its own competition in the near future," Mr. Demetriades says, "unless we really start to get a lot of entries."

Richard Edel is a frequent contributor to Special Report.





Local medium

of TV-only ad scheduling.

New technological developments—computerization is the biggest buzzword—will be changing the face of the outdoor industry in the next few years, according to outdoor watchers. Gannett Outdoor recently announced the U.S. introduction of Superflex, a vinyl fabric that will be used to cover boards that previously used paint or posters. Computer-painted images will have magazine quality reproduction, and special inks developed by Gannett won't fade for more than two years.

Metromedia Technologies, Los Angeles-based subsidiary of John Kluge's Metromedia Co., and the older Computer Image Systems, Torrance, Calif., have entered into marketing agreements with Gannett and will use Superflex with their computerized printing processes. AA

Aggressive media turning to outdoor in big, bold way

By Janice Steinberg

Media is spending millions of dollars on out-of-home advertising: It's King Kong on top of a building, it's an outdoor board painted to look like a movie marquee, it's a blowup of distinctive magazine cover art.

Whatever the picture, it measures 5% of total outdoor revenues in 1986, according to the Institute of Outdoor Advertising in New York. Radio and television stations, newspapers and magazines spent $60.9 million on painted bulletins and poster panels in 1986, up from $24.8 million in 1980.

Pittsburgh-based Gateway Outdoor, the nation's largest eight-sheet outdoor advertising company reports an increase of 20% in 1986 media participation, with sales up 5% from 1985, says Robert J. Smith, president of Gateway.

Helene Goldfine, VP-director of marketing for New York-based Winston Network, the largest vendor of transit advertising in the U.S., says that the media category moved past liquor, which has 5%, into second place with 19% of total advertising at Winston in 1986; tobacco is first with 23%.

Janice Steinberg is a frequent contributor to Special Report.

Although there is no percentage breakdown of media spending in the $15 million spent on bus-shelter advertising nationally last year, Connie Barry, president of TranStop Minnesota and the Shelter Advertising Association, says media is the largest category of advertiser with 25% of sales at the Minneapolis-based company.

The increasing use of out-of-home by media companies is coupled with a growing level of creativity, says Jack Donahue, VP-public relations at IOA.

"The big image, bold use of color, and minimal copy seem to be the magic formula," says Mr. Donahue.

"The whole industry has advanced in the last few years," says Larry Cognetti, VP-marketing, at Patrick Media Group's corporate office in Scranton, Pa. "Because of the use of computers, we can now target specific outdoor locations to meet client needs by ZIP code, by category, by industry, by ethnic or minority group."

The largest outdoor user among the media, radio, which accounted for 68% or $41 million of outdoor's 1986 revenues from media companies, is fine-tuning its targeting techniques. "They're using research that pinpoints their listeners by ZIP code and looking for outdoor locations within those ZIP-coded areas," says Nicolas Hemes, VP of Los Angeles-based Martin Communications, which has outdoor and mall locations in California and Hawaii.

Industry watchers note two trends in radio's use of out-of-home: a switch from two-or-three-month campaigns to year-round presence, and increasingly refined targeting.

The growth of continuous out-of-home advertising is partly in response to Arbitron's continuous measurement, which began in 75 major markets in the fall of 1985.

However, many radio stations went to year-round schedules prior to the changes in measurement.

KBIG-FM, Los Angeles, placed its message on the city's articulated buses seven or eight years ago. "It keeps our message out on the street," says Joyce

Bose, VP-promotion.

Los Angeles-based "KIIS (FM) has a game going now where you send in a postcard to try to win $5,000 to $50,000," says Bill Crabtree, VP-general sales manager at Gannett Co.'s Outdoor Network in Los Angeles—Gannett owns KIIS.

55% of its out-of-home budget annually on outdoor boards and 45% on other vehicles such as transit and mall posters.

In cable, Atlanta-based Turner Broadcasting System's superstation, WTBS, took a three-pronged approach in a $1 million campaign focused via

Part of an award-winning campaign, movie marquee bulletins promote the movie programming of WTOG-TV, St. Petersburg, Fla.

"They use it as a contest, but they also use it as a tool to locate their listeners." They've established priority ZIP codes, and outdoor can target those areas as no other medium can, says Mr. Crabtree.

KIIS features top personality Rick Dees on its out-of-home ads designed by Los Angeles-based Campbell Powell Thompson Advertising. Dan Acree, director of marketing at KIIS, says the station spends about

super king transit posters.

"We were trying to increase viewership. We were trying to gain subscribers for the cable operator. And we were putting our product in front of the agencies," says Ron Harris, VP-advertising and promotion.

The five-month campaign—last October through December and March and April of this year—ran in Chicago, Detroit, Los Angeles, Miami and New York, where advertising agencies are concentrated. In New York, bus advertising was augmented by subway posters, and in other cities, by outdoor.

Ms. Goldfine of Winston Network sees the WTBS campaign as part of a trend of media companies using out-of-home to attract advertisers. "I think now in the larger markets where there are advertising agencies, the media companies are trying to position their ads to pass by the people who have dollars to spend."

Television's spending in outdoor, although less than radio's, rose to $14.3 million in 1986. "For lack of a better term" it focuses on "star awareness," says Mr. Cognetti.

"They tend to highlight the new [local] anchor team or the new fall programming and the various stars.

"It's worked for them," he says. "Their studies have shown that putting that personality out in front of the programming allows them to garner more market share."

The '87 Obie merit award-winning movie marquee from WTOG-TV, St. Petersburg, Fla., went up last September. Designed by Louis Benito Advertising in Tampa, the six painted bulletins were intended to run for only three-to-four months, says Edward Aiken, WTOG's VP-general manager.

"But the impact was so great, we determined that they should stay up." The boards are now

Media turning to outdoor

(Continued from Page S-7)
scheduled for an indefinite run, says Mr. Aiken.

The bulletins were augmented in November with a paper showing of more than 190 boards, minus the flashing lights. The total cost of the out-of-home campaign was $100,000, representing 13% of the approximately $750,000 the station spends annually to promote its movie programming, he says.

Although newspapers account for only 6.4% of media spending in outdoor, newspaper advertising creativity wins high honors.

The past three media Obie Awards presented by the IOA have gone to newspapers; and the *Tulsa World* won in both 1985 and 1986.

The 1986 award-winning design, presented in 1987, by Brown Bloyed & Associates, Tulsa, shows the *World* folded into a boat with the copy line "World cruise $7.25" and in small print under the $7.25, "Monthly subscription." Arney Brown, agency president, says the *World* has three 14-by-48 ft. painted bulletins rotated at two

Papers press home their creativity

Outdoor industry watchers praise the creative work for the *Boston Globe*, the *Minneapolis Star & Tribune* and the *Los Angeles Times*.

Several years ago the *Globe* won a number of awards for a board created by Hill, Holliday, Connors, Cosmopulos, Boston, on which two "painters" gradually filled in a front page.

The *Globe's* current campaign featuring its editorial staff has four boards up for a cost of about $250,000 a year, says Sales Promotion Director Jim Regan.

Year-round presence also is an aspect of the *Minneapolis Star and Tribune's* out-of-home strategy. Last fall the *Star and Tribune's* painted bulletin across from the Metrodome pictured the outline of a football player cut out as if he had crashed through the board. The current creative has a three-dimensional baseball umpire who moves his arms to signal "safe."

"The *Star and Tribune* uses outdoor as a base continuity vehicle," says Kevin Lynch, VP-account supervisor at Bozell, Jacobs, Kenyon & Eckhardt.

The *Los Angeles Times* is currently running a major promotion that includes TV, radio and out-of-home.

Sports often figure in boards for the *Minneapolis Star and Tribune*.

The creative, developed by J. Walter Thompson USA in Los Angeles, uses the theme, "We're there for you, every day." The five different out-of-home designs show the face of one of five world leaders—Ronald Reagan, Margaret Thatcher, Pope John Paul II, Mikhail Gorbachev or Deng Xiaoping—each backed by a recognizable landmark such as the Vatican.

—Janice Steinberg

locations year-round, at a cost of about $20,000 per year.

Advertisers are the primary target of Hearst Magazines' *Redbook* out-of-home advertising. Five years ago the magazine added the *Redbook* juggler—the woman juggling husband, family, job and home—and followed the traditional route of using the ads in trade magazines. Then in 1983 the magazine's agency, Rosenfeld, Sirowitz & Humphrey, New York, suggested using the juggler in transit ads.

The response was so positive, says Promotion Director Sandy Spaeth, that approximately 18 months ago, *Redbook* added outdoor boards to the schedule.

Although magazines are the smallest media buyer in outdoor advertising, the category's spending increased by 600% from 1980 to 1986.

New York-based *Omni* blows up its cover art for New York subway ads and for bus shelters in Los Angeles, Minneapolis/St. Paul, Philadelphia and Washington.

Omni usually couples the shelter ads with television and spends approximately $140,000 annually for shelter space alone, with a total ad budget in excess of $2 million, says Andrew C. Kristiansson, accounts manager at Tilley Marlieb Advertising, *Omni's* in-house agency.

In response to unused space, out-of-home companies often exhibit unusual creative techniques to attract potential advertisers.

Malcolm Bordelon, sales and marketing manager at Carlisle Outdoor in Dallas, says self-promotion has made his company "practically a household name."

Carlisle owns seven painted bulletins equally spaced along a one mile stretch of the Dallas/Fort Worth turnpike. In February it put up a campaign series that started with one cartoon-style cow in a pasture and grew by the sixth board to a bovine herd. The final board says "Herd of Carlisle?" and gives the company telephone number.

All advertisers say that it is virtually impossible to measure the impact of out-of-home advertising; because there are so many factors involved in greater circulation or ratings, the effectiveness is gauged by more subjective criteria.

"You can't really attribute, 'Our sales are up, or viewership is up, or acquisition is up,' although all three of those are up. The real way we have to measure this type of campaign is based on awareness," says WTBS's Mr. Harris.

"We get feedback day in and day out from agencies and from Manhattan Cable," he says. "In fact, Manhattan Cable has gotten such feedback on our transit campaign that they're adapting it for a [Cable News Network] campaign."

When the *Boston Globe* boards stimulate a lot of conversation, "that's the best indicator we have, says Rita Harris, account supervisor at Hill, Holliday, Connors, Cosmopulos in Boston.

"We know that we have a successful board, a great creative, when the town is talking about it."

Utilities find outdoor right on target

By Richard Edel

Southern Bell Telephone & Telegraph is taking a slapstick approach to outdoor bulletins by comparing its Yellow Pages with those of competitors. In one campaign, the Atlanta-based company cautions consumers "How to avoid a case of mistaken identity," showing a Southern Bell directory next to a competitor's product wearing a funny nose and glasses.

The tone may be tongue in cheek, but the objective is quite serious.

It's an attempt to create brand awareness for directories published by Southern Bell's parent company, BellSouth, Atlanta, one of seven regional Bell companies formed by the 1984 breakup of American Telephone & Telegraph Co., New York.

The court-ordered divestiture introduced a new element of competition to the communications industry. One effect is a more visible role for out-of-home advertising among quasi-public utilities.

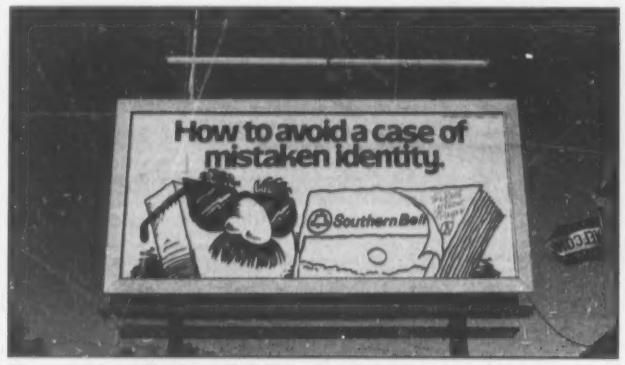
"We've been using a lot more billboard advertising [as part of an integrated strategy] in the last two years," says Neal Clay, manager-corporate information at BellSouth Advertising & Publishing Corp., Atlanta.

"We're striving to create brand awareness for our directories as 'The Real Yellow Pages,'" he says.

BellSouth, which publishes 500 directories in a nine-state area for its two main operating units, Southern Bell and South Central Bell, is in a pitched battle with independent publishers, Mr. Clay says.

The competition is stiff in larger markets, such as South Florida, but it is here that BellSouth can claim some success. Purchase, N.Y.-based R.H. Donnelley Information Publishing, a division of Dun & Bradstreet, announced recently that it is withdrawing a competing Yellow Pages this month from the Dade County, Fla., market.

BellSouth is not alone among utilities and communications companies in turning to out-of-



The portrait on Southern Bell Telephone's outdoor board may be tongue in cheek, but the campaign results are quite serious.

SERVING YOUR OUTDOOR ADVERTISING NEEDS IN OVER 37 MAJOR METROPOLITAN AREAS

James Brady

James Brady is as protean (taking on many forms; multi-faceted) as they come. He's a novelist, journalist, television news correspondent, and Emmy award winner. His weekly *Parade* magazine profiles of celebrated people are seen by 60 million readers. His *Advertising Age* columns are its best-read feature. He also does interviews on WCBS-TV, New York, nightly.

Brady's fifth novel, *Designs*, is being published now. His first *Paris One*, was a national bestseller hailed as a major work by *The New York Times* and other publications. He's writing his sixth.

Brady is one of the most captivating columnists your readers will ever see, appreciate, and quote. They'll love Brady's charm and style, insight and substance. So will you, along with his affordability – from $15, depending on your newspaper's size.

For sample Brady columns, offered by Crain News Service, call Art Mertz in Chicago, at (312) 649-5303. Outside of Illinois, call 1-800-621-6877 toll free.

CRAIN NEWS SERVICE

home advertising, says Andy Weitzer, VP-media research at Outdoor Network USA, a consortium of 36 independent outdoor companies nationwide represented by Gannett Outdoor, New York.

"We're seeing a lot of changes in how outdoor is being used. Years ago, outdoor might have been out of the mainstream, but now it's being used as part of an integrated advertising strategy, particularly in local markets to generate top-of-mind awareness," Mr. Weitzer says.

Nowhere is this more important than when dealing with a company's logo and image, says Rick Janke, communications coordinator for San Diego Gas & Electric.

The San Diego utility company is considering petitioning the California Public Utilities Commission this year to permit the creation of a holding company to own the utility. "If that happens, there will have to be widespread circulation of our new name and logo as part of an integrated campaign," which includes TV, radio and print media, he says. Mr. Janke adds that outdoor suits this strategy well.

Several years ago, the utility created a fully integrated campaign that asked consumers to reduce energy consumption during the peak hours between 11 a.m. and 5 p.m. A simple outdoor ad warning consumers to "Get off the juice" supported TV, radio and print. Post advertising research found the campaign highly effective, Mr. Janke says.

"It was the most successful public information campaign we've ever run," he says. "That was a good message for that kind of medium. It was simple and didn't require a consumer response."

Other utilities are recognizing the ability of outdoor to convey a simple message with impact. Toronto-based Consumers Gas Co. is launching a fully integrated campaign this month in Ontario to promote using natural gas or gasoline in modified vehicles, says Eleanor Abaya, manager-advertising and media relations.

Cars using natural gas go 50% farther on a per-dollar basis, she says. Outdoor boards show a horizon line with the copy, "Drive 50% farther," featuring the logo of Consumers Gas Co.

"It's a simple, straightforward, powerful visual," Ms. Abaya says. "We want people to make the connection between driving 50% farther and Consumers Gas Co. There's a lot of education to be done. Very few people are aware of [natural gas vehicles]."

The campaign is being placed cleverly, she says. The boards will appear on the backs of buses, where consumers and fleet operators will be certain to see it. "Your target is obviously everybody who drives. You're hitting people in the very environment where you'd like to reach them: in the car," she says.

Low-cost targeting also is the reason Northern States Power Co., Minneapolis, is using outdoor to reach likely users of its Budget Helper payment plan, says Michelle Juntunen, manager of paid communications. The utility is using outdoor posters at transit stops in moderate to low-income neighborhoods, she says.

The utility has used outdoor to show that its electric and gas rates are among the lowest in the country and to inform consumers about safety, and community programs.

Advertisers are shifting their media-buying patterns as they seek new media combinations to address changing demographic

(Continued on Page S-12)

How you live may save your life.

You may find it surprising that up to 60% of all cancers can be prevented. By avoiding excessive exposure to sunlight, by not smoking cigarettes, by not overeating and by following a diet high in fiber and low in fat.

The battle isn't over but we are winning.

Please support the American Cancer Society.

AMERICAN CANCER SOCIETY

Your market's going places!

Your market is mobile. Whether on the road, driving a hectic hour or more to and from work; rushing to make that commuter flight; heading cross country to close a deal; out to shop; getting the kids to school — or just getting away from it all. Today's consumer is spending more time out of home. And that means a lot of time away from the main thrust of your advertising campaign.

Ackerley Communications reinforces the impact of your print and broadcast communication, to assure result-getting recall of your sales message. In other words, to be there when your market's going places.

Be there with

ACKERLEY COMMUNICATIONS

Outdoor & Airport Advertising

Ackerley outdoor and airport advertising gets them coming and going...on the highway, on the way up, on the way in, on the way out — or, just on the way. Reminding them of *your* product. Convincing them of *your* service. Selling them on *your* advantages.

So, when planning your next campaign, get in touch with Ackerley Communications. On the road, or at the airport, we're in all the right places.

and TV viewership patterns, says Jack Donahue, IOA's VP-public relations.

The inability of daytime TV to reach working women, and the increasing use of VCRs during prime time programming, for example, are just two reasons why advertisers are paying closer attention to the out-of-home media. "Most advertisers are working under the mandate that they examine alternative media," Mr. Donahue says.

Additional factors include rising competition in certain categories, such as long-distance and cellular telephone service, says Gerard Joyce, president of Scranton, Pa.-based Patrick Media Group, the nation's largest outdoor media company, with reported revenues of $220 million in 1986.

"Four years ago, advertising for cellular telephone service was virtually nonexistent. Today, it probably represents 5% to 6% of our business. It's really come on," Mr. Joyce says.

Cost is a critical factor, says Pam Eldridge, general manager-PR, for BellSouth Mobility, the Atlanta-based cellular unit of BellSouth. "If you only have so many dollars available, outdoor becomes more attractive because it's so cost effective."

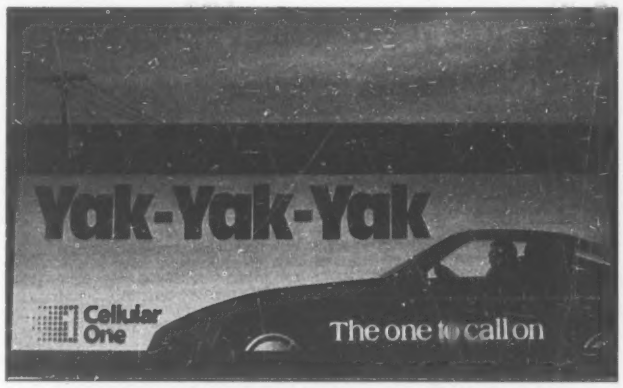
BellSouth Mobility is adapting out-of-home media in 17 major markets in the Southeast, served by 14 cellular systems. It is using outdoor to expand on its theme, "The fun company for your car," to include boats in the South Florida market and trucks in others, she says.

Although out-of-home represents the smallest measured media category, it had the largest percentage increase of any media category, up 35%, from 1985 to 1986 among communications and utilities companies, based on an analysis of Leading National Advertisers and Broadcast Advertiser Reports by Outdoor Network USA, New York.

In measured spending for the two categories in 1986, network TV was second in terms of percentage gain, up 14% to $206 million; followed by spot TV, up 9% to $303 million. Magazines fell 6% to $150 million; spot radio dropped 12% to $24 million; newspapers decreased 24% to $5 million, according to Outdoor Network USA.

The biggest advantage in using outdoor bulletins is targeting, says Jim Robertiello, advertising manager at NYNEX Mobile Communications, Pearl River, N.Y. NYNEX has used outdoor effectively in promoting its cellular telephone services.

"In our case, our purpose was to reach commuters. Our prime customers are people who are stuck in their cars on the freeway. You can't get any closer targeting than that," Mr. Robertiello says. AA



Cellular One won an Obie Award for Kansas City, Mo.-based Harmon Smith Advertising's "Yak-Yak-Yak" outdoor board.

Dear Los Angeles,

PATRICK MEDIA GROUP, INC. IS PLEASED TO ANNOUNCE THE FORMATION OF "THE NEW BUSINESS GROUP" JULY 1, 1987. THE NBG (NEW BUSINESS GROUP) IS A UNIQUE TEAM OF OUTDOOR AND MEDIA PROFESSIONALS COMMITTED TO IDENTIFYING NATIONAL CLIENTS AND DEVELOPING AND IMPLEMENTING NEW OUT-OF-HOME ADVERTISING PROGRAMS. IT WILL PROVIDE TOTAL SUPPORT SERVICES, RANGING FROM MEDIA PLAN CONSULTING TO POST-BUY ANALYSIS. IN ADDITION TO LOS ANGELES, OFFICES WILL BE LOCATED IN NEW YORK AND DETROIT.

Hanes/L'Eggs
Second Banana: Advertising Age estimates of 1986 billings by city had Grey Advertising as top New York agency last year with billings of about $838 million. Young & Rubicam ($795 million), DFS Dorland, Ogilvy & Mather ($708 million) and J. Walter Thompson USA ($600 million) followed.

But who's in charge?

By PAT SLOAN

New York—Saatchi & Saatchi Co. will announce consolidation of part of its empire today, and the group's Compton agency apparently lost out.

The consolidation of DFS Dorland and Saatchi & Saatchi Compton into Saatchi & Saatchi DFS Compton will make the merged agency the largest in New York, with combined billings of $1.2 billion.

But a high-level Saatchi & Saatchi source outside New York said, "There are a tremendous number of disaffected people at Compton." The combined shop

Second British bidder for JWT

By PAT SLOAN and LAUREL WENTZ

The advertising industry's first hostile takeover battle heated up last week when a second British company came forward as a possible "white knight" for JWT Group.

Trilateral Communications, a U.K. holding company formed four months ago and run by John Wood, a London adman, has had discussions with the New York-based agency group.

The move follows last week's breakfast meeting between JWT Group Chairman-CEO Don Johnston and WPP Group chief executive Martin Sorrell to discuss WPP's attempted takeover of JWT Group.

WPP's bid, upped last week from $45 to $50.50 a share, has not been matched by anyone, including Mr. Wood's group.

Late June 19, WPP extended its $50.50 offer to noon today, which one source close to the negotiations interpreted as a favorable sign for WPP. The total offer is worth $515 million.

U.S. agencies, either separately or in a consortium, also have been rumored to be looking at purchasing JWT Group, and Ogilvy & Mather is cited as the leading contender.

It would be ironic if JWT were "rescued" by another British company.

Trilateral was created to take a U.K. financial services group, British & Commonwealth Ltd., into the communications business.

B&C owns 24% of London-based ad agency Wood Brigdale, Nisbet & Robinson Ltd., and also owns a merchant bank, Cayzer Ltd., which would finance the deal.

Although he would not comment on any discussions in the works, Mr. Wood, who also is chairman of the agency, told Advertising Age three separate JWT officers from three different JWT-owned operations contacted him about acting as a white knight.

That began 10 days ago when WPP started lining up underwriting for its financing.

"It was a well-telegraphed punch," Mr. Wood said.

Mr. Wood would not identify the JWT individuals but said that Mr. Johnston was not one of them.

"Our merchant bank would be the vehicle" for the bid, he said. "[JWT Group] could have us as significant players in their company, leaving them free to restructure the financial side of the business with some help."

One possibility is a minority stake in JWT,

SmithKline, B-M prepare for OTC

Antacid attack

By NANCY GIGES

SmithKline Beckman Corp. is laying plans to take a consumer version of its $1 billion-a-year anti-ulcer drug, Tagamet, into the over-the-counter market, an explosive development likely to reshape the $700 million antacid category.

Although Food & Drug Administration approval of OTC-strength Tagamet may be a few years away, Bristol-Myers Co. already has positioned itself to share in the spoils.

Under a pact with SmithKline, B-M will be able to market its own OTC antacid containing cimetidine, the active ingredient in Tagamet.

Philadelphia-based SmithKline's patent on cimetidine runs until 1994, which should give it and B-M time to build awareness for their brands before competitors jump in with "me-too" products.

New York-based B-M earlier struck a similar marketing link with Upjohn Co., Kalamazoo, Mich., in the analgesics market. That earlier deal gave B-M marketing rights to Nuprin, the OTC pain reliever based on ibuprofen, a hugely successful prescription drug sold by Upjohn under the name Motrin.

SmithKline, though it markets consumer products such as Contac cold remedy, is primarily a prescription-drug marketer. In another deal last week, it acquired potentially valuable rights from B-M to a newer-genera-

GF may cut commission

By JUDANN DAGNOLI

General Foods Corp., one of the country's leading advertisers spending about $350 million a year, appears to be cutting back on commissions to its core ad agencies.

The four agencies—Grey Advertising, D'Arcy Masius Benton & Bowles, Young & Rubicam and Ogilvy & Mather—would not comment officially. But two inside sources said their shops are working up a plan to present to GF that would stretch the agencies' dwindling commissions from the Rye Brook, N.Y.-based marketer.

Those plans are said to include contingencies for additional new-product development payments and a relaxation of GF's stance on client conflicts.

It was not clear whether the agencies were working alone or in concert.

GF agencies now get the 15% commission that was once the industry standard, according to sources.

Expected to be hardest hit by the GF commission cut is O&M, which only two months ago lost an estimated $17.5 million in billings for GF's Maxwell House (AA, April 20).

Maxwell House's $70 million budget, cut by 25%, had been a casualty of volatile coffee pricing and high promotional spending in the category.

O&M also handles an estimated $47 million for Country Time powdered beverages, some Post cereals, Shake 'n Bake coating mix and

Highlights

Toppels just won't topple 12

After last year's new-product blitz crumbled, Frito-Lay is back testing Cracker Snax—the new name for its short-lived Toppels. The marketing test in Dallas contrasts F-L's ill-fated burst of new-product activity last year with MaxSnax, a family of three snacks including Toppels. But F-L just won't give up on the MaxSnax concept.

Shell experiences new image 12

Shell Oil Co. is shifting gears in an estimated $15 million ad campaign themed "Experience the difference." The nation's leading gasoline marketer will move from a straight product message to an umbrella image campaign, keying on consumer concern about service. The switch comes as virtually all other competitors are concentrating on "high performance" aspects of their products. "Experience the difference" is the first umbrella theme Shell has used since 1982.

Ad execs rap rate-busting 24

Business publishers who, like some consumer magazines, are employing flexible rate cards drew heat from agency and advertising executives attending the Business/Professional Advertising Association annual meeting in Boca Raton, Fla., last week. Fear of a trend toward rate-busting following *McCall's* highly publicized move to negotiable rates was a hot topic. None of the publishers admitted to selling off their rate cards, but several said they knew other publishers who did.

Paxson pitching game show 44

Home Shopping Network is taking its pitch one step further into the game-show business. HSN President Lowell "Bud" Paxson has begun a major media tour, including a satellite video conference and the talk-show circuit, to plug the new "Home Shopping Game." The show, which made its debut June 15, has been cleared in 50% of the country and will run on all CBS owned-and-operated stations. The game show marks the biggest challenge to date for HSN as it morns into syndicated TV from radio and cable and UHF TV.

Turtle Wax moves indoors 86

Turtle Wax is about to give its 5-year-old diversification plan its toughest test. The world's largest marketer of carcare products, looking to move out of the garage and into the home, this fall takes a major step into household products by introducing Scratchguard bath and kitchen cleaner. For Turtle Wax, a privately held company with annual sales of about $100 million, it means changing its distribution and sales networks, specifically targeting female consumers for the first time and taking on some of the nation's largest consumer-products marketers.

INTERNATIONAL

Detergent battle bubbles in the U.K. 60

Procter & Gamble Co. and Unilever are pitting their newly launched Ariel and Wisk brands against each other in a battle for the U.K.'s new liquid-detergent market. The two brands hold 20% of the $600 million low-suds detergent market since P&G launched Ariel Liquid nationally in December, following Unilever's rollout of Wisk in September.

Japan gets RJR apology 60

R.J. Reynolds Tobacco Co., under investigation by U.S. authorities after shipping to Japan Winston Lights cigarettes with tobacco containing higher-than-allowed herbicide levels, ran a newspaper ad apologizing to Japanese consumers. The ad, created by J. Walter Thompson Japan, expresses RJR Nabisco's "sincerest apology for having caused great concern to consumers and retailers due to various media reports regarding Winston Lights."

OTHER NEWS

Financial services could be the next major ad category to encounter agency/client conflicts. As banks, insurance companies and brokerage houses offer increased services, several agency executives say the concept of a financial "supermarket" will cause closer examination of account conflicts. Page 28.

Levi Strauss & Co. is back in the fashion business. A year after dismantling its fashion-conscious Battery Street Enterprises unit, the jeans marketer is testing the water again with Levi's Dockers, a new line of casual men's wear. Page 41.

Procter & Gamble Co. is racing to increase its estimated $30 million special-events sponsorship program and to add events-marketing agencies to its roster. P&G is exploring sponsorships of several spectator sports, including bicycle racing, sailboarding and fishing. Page 41.

Marketers are blurring the line between cars and trucks in response to a new wave of customers looking for carlike features in their trucks. "Toughness" is no longer the only positioning for trucks; "fun" and even "prestigious" are major selling points. Page 41.

The top 15 advertisers on network TV increased spending by 13% during the first quarter of 1987 vs. the same period a year ago, according to Broadcast Advertiser Reports. Johnson & Johnson Co., Chrysler Corp. and Mars Inc. increased spending, but Procter & Gamble Co. decreased its network spending 6% to $108.7 million. Page 70.

Alien message

Actor Luis Avalos of "Hill Street Blues" fame appears in Spanish-language TV public service announcements discussing the new immigration law, as part of the Immigration & Naturalization Service's information campaign. Actor Eddie Albert does an English-language version directed at employers. The tougher law is under attack from a number of quarters; its June 1 effective date has been set back to July 1. The government plans to add a paid ad campaign to the public service effort when the law takes effect. The Justice Group, Los Angeles, handles.

Chiat may give up Porsche

Nissan eyes 3

By CLEVELAND HORTON

Nissan Motor Corp. USA cut the list of agencies contending for its $150 million account to three—Chiat/Day, Ogilvy & Mather and Tatham-Laird & Kudner.

It also decided against splitting its account between cars and trucks, meaning there may be a parting of the ways between C/D and Porsche Cars of North America, Reno, Nev.

C/D Los Angeles General Manager Greg Helm insisted the agency hasn't resigned the $14 million Porsche business, but acknowledged it was up to Porsche whether the relationship will continue.

Porsche officials denied they are about to make a change, but sources said Porsche will sever its ties with the agency soon.

Dropped from the Nissan competition were the Bloom Agency, Dallas, and Jordan, Manning, Case, Taylor & McGrath, New York. Both Bloom and JMCT&M suffered because they lack a West Coast presence and executives ready to head a possible new office.

Carson, Calif.-based Nissan insists its account be serviced on the West Coast.

The winning agency will succeed William Esty Co. on the account (AA, May 4).

Another question on Nissan surfaced last week: Is there more than $150 million in billings at stake for the agencies involved?

Nissan's Japanese parent indicated last week it plans to establish a new U.S. division to market upscale cars and minivans in the 1989 model year.

That division, following the example set by American Honda Motor Co. for its Acura line and,

Levine acquires Los Angeles shop

By JENNIFER PENDLETON

Levine, Huntley, Schmidt & Beaver expanded outside its New York base by acquiring a majority interest in Los Angeles agency Larsen, Colby, Koralek.

The $10 million agency, founded less than three years ago by three former executives of Keye/Donna/Pearlstein, is becoming a division of LHS&B, but will operate under the LCK name.

LCK Exec VP-Creative Director Rick Colby declined to reveal how big a share LHS&B holds in his agency, but stressed the three LCK partners retain a sizable chunk.

Neither Mr. Colby nor LHS&B Chairman-CEO Harold Levine would reveal the terms of the deal.

The three LCK partners will keep their existing titles. Garry Koralek, 36, remains president-ceo; Mr. Colby, 35, and Gary Larsen, 38, will keep the title they share—exec VP-creative director.

West Coast News

LHS&B will use LCK to enter the southern California market, one of several U.S. regions into which the $130 million agency hopes to expand.

Mr. Levine said LHS&B clients Subaru of America and Jos. E. Seagram & Sons didn't demand the agency establish a southern California branch, although each has operations here.

Seoul riots cloud NBC's Olympics

By VERNE GAY and KEVIN COTE

The Olympics jinx that plagued NBC-TV seven years ago is rearing its head again.

Riots and political upheaval in Seoul, South Korea, where the 1988 Summer Olympics will be held, are raising old fears at NBC. But no sponsor has yet shown any public concern, and one, AT&T, is ready to make a major Olympics buy.

Still, "NBC has to be a little shell-shocked," said one media executive last week.

The network's plans to telecast the 1980 Olympics from Moscow were scuttled when President Jimmy Carter ordered a boycott of the Games by the U.S. teams.

NBC has estimated it will sell about $600 million in commercial time in the Olympics.

Sources estimate $150 million to $200 million of this amount is "incremental," or money that sponsors will pull from other sources to fund their Olympics sponsorship.

Current sponsors include Coca-Cola Co., General Motors, Eastman Kodak Co., Federal Express Corp., Visa USA, McDonald's Corp. and Isuzu Motors.

If the Games were canceled, this incremental money would probably flow back into promotion, or to other media vehicles, according to executives.

The rest of the money would likely be "re-expressed" in other replacement programming that would run from Sept. 17 to Oct. 2, when the Games will be telecast.

NBC would not have to pay the $300 million in rights fees to the Seoul Olympics Organizing Committee (SLOOC) if the Games are not held.

AT&T, the largest TV sponsor of the 1984 Summer Games, said last week a deal with NBC for the 1988 Games was imminent.

"I'm concerned obviously about [the unrest] ... but I'm confident there will be a deal with NBC—that's the bottom line," said Bob Watson, director of media and corporate services for AT&T.

"I would start to get worried if this unrest continues after June," said an official with SLOOC. Demonstrations have traditionally followed the cycle of the school year, which ends in a few weeks.

But Robert Helmick, president of the U.S. Olympic Committee, warned last week, "We don't want to participate in any athletic events where tear gas is popping off outside the stadium."

"I think most of the sponsors would say it is still a year until the games take place and a lot can happen in a year," said Ems Magnus, VP-marketing services, ISL Marketing in London, the company that arranges global sponsorship rights for the Games.

"I'm speculating, but even if the Seoul venue went away, there are other places that could handle the Olympics on short notice," said Steve Leff, exec VP-director of media services, Backer & Spielvogel, which has Hyundai and Miller as sponsors.

An NBC spokesman said, however, that "the Games will be held in Seoul or not at all."#

Oles Gadacz in Seoul also contributed to this story.

Ad linage error

In the Consumer Magazine Ad Linage report on Page 71 of this issue of Advertising Age, the year-to-date performance figure for the "Auto/cycle/rec. vehicles" magazine category is incorrect. It should read -0.4%, not -460.4%.#

CORRECTIONS & CLARIFICATIONS

- Stephen Matis was identified incorrectly in a list of Effie Award judges in the Research Beat column (AA, June 15, P. 34). He is director of marketing research, Colgate-Palmolive Co. Also, the list should have included Marvin Mord, VP-marketing research, Capital Cities/ABC.
- Tandem/DDB Needham, Madrid, created the umbrella theme "Spain, everything under the sun" for the Spanish Tourism Board. An article said Saatchi & Saatchi, Madrid, created the campaign (AA, May 18, P. 30). S&S created the U.S. portion of the campaign.
- A story about *New Republic* incorrectly described its financial status. *New Republic* is marginally profitable, not "financially troubled" (AA, June 15, P. 67).
- A story on liquid yogurt stated that 12% of yogurt consumed in the U.S. is liquid yogurt, a figure incorrectly reported by Dannon Co. The A.C. Nielsen Co. figure applies to sales of liquid yogurt in seven countries where Dannon markets Dan'up liquid yogurt (AA, June 1, P. 3).#

Global media offer order, obstacles

By Carolyn Hulse

Global advertising is for a privileged few. It's for a handful of "universal products," such as Coca-Cola and Levi's jeans, which are sold and recognized worldwide. It's for upscale products, such as BMW and Chanel No. 5, which sell to a small percentage of the world's consumers. And it's for state-of-the-art technology, such as Apple Computer and IBM Corp. computers, which are sought by the international business community.

While the majority of multinational advertisers still test foreign waters strictly on a market-by-market basis, it only takes one or two global accounts to make publishers of international magazines sing the praises of global advertising.

For the publisher, global packages permit economies of scale to be offered to advertisers; generate more business for international titles; make foreign editions more competitive with local media; and eliminate market-by-market pricing confusion, bringing order to the international ad placement process.

For the advertiser, global campaigns can reach the upscale, primarily English-speaking market; offer economies of scale and provide creative consistency, where desirable; and aid local agencies in solving tricky positioning problems.

But magazine publishers such as Chicago-based Playboy Enterprises, which licenses foreign editions to local publishers rather than owning them, and New York-based Hearst

(Continued on Page S-2)

Global order, obstacles

(Continued from Page S-1)

Corp., which also licenses the vast majority of its foreign editions, have been slow to put together international rate cards. They express ambivalence about committing enormous amounts of time, money and manpower to pursuing global ad sales.

This ambivalence is easy to understand, says international publishing consultant Lee Hall, president of IntPub, Chicago, if one considers the difficulty in placing an American-produced global ad, for example, in 16 licensed foreign editions when the U.S. sales staff has little to gain.

In licensor/licensee arrangements, the licensor receives percentage royalties on ad revenues from the licensed editions. The salesman for a global ad sale, however, receives commission only for ads placed in his local publication. What is needed, says Mr. Hall, is a licensee commission structure compensating the salesman for foreign sales.

"But this is where it gets complex," he adds. He says that licensees who are already paying royalties to licensors often don't want to chalk up the salesman's commission as well. For global packages to work with licensees, says Mr. Hall, there must be "more cooperation between the magazine's U.S. advertising staff and the licensed publisher."

Despite the obstacles, Playboy Enterprises, with 13 licensed foreign editions of *Playboy*, will "attempt" global ad sales, according to Tim Dolman, senior VP-assistant publisher. Mr. Dolman says there hasn't been much demand from *Playboy's* advertisers that the company respond to their global marketing needs. However, with new editions licensed in Turkey, Greece and Hong Kong within the last 18 months, he feels it's time to "show advertisers the worldwide capabilities of the magazine and to provide a financial incentive to commit to *Playboy* on a selected international basis." The combined foreign circulation of *Playboy's* licensed editions is 1.7 million, according to information supplied to Advertising Age by the publisher.

Similarly, Hearst Corp., which licenses Cosmopolitan, Esquire, Good Housekeeping, Harper's Bazaar, and *Popular Mechanics*, is "in the process of organizing a global rate card," says Pilar del Solar, director of international editions. "But it's slow in coming. International editions are growing so fast, and the licensees are doing so well on their own."

While publishers with wholly owned international networks reap the most benefit from global ad sales, the strategy is not without obstacles for them as well.

At Conde Nast International, New York, publishers of 27 international titles including editions of *Glamour, House & Garden* and *Vogue*, Ralph Timm, director-international advertising, says the major obstacle for his publications is local taxation, such as Italy's IVA—a whopping 18%—which often drives up the global price.

Another factor impeding global ad sales, he says, is philosophical confusion. "The same hesitation, the same element of worry, enters into international marketing that exists in marketing here. Advertisers aren't sure if they should launch a campaign to generate demand for a product not yet in distribution, or if it would be smarter to get the product into the marketplace first," he says.

An Apple Computer ad spread pushed the "family of computers" theme.

Conde Nast's U.S.-originated international ad pages—from ads placed in both the U.S. title and in anywhere from one to many foreign titles—rose from fewer than 100 pages in 1981 to 538 in 1986, according to Mr. Timm. Advertisers included Revlon Group, Estee Lauder Inc., Elizabeth Arden Inc., and Cosmair Inc., among others.

At *Newsweek International*, New York, President Peter Luffman is bullish about global ad sales over the long term, despite a 10% decline in global advertising over the last three years. He attributes the decline partly to intensified competition from local media.

Newsweek's biggest advantage, he says, is its commitment to the English language in 191 countries and its ability to offer global advertisers a one-book buy. *Newsweek International*, which posted 1986 revenues of $46.8 million, according to Elise Moyse, international promotion director, has approximately 10 global ad clients that agree.

One of them, Apple Computer, Cupertino, Calif., feels that English-language publications like *The Economist, Newsweek* and *Time* are serving the company's global marketing purposes quite well. To reach the English-speaking international business community, Apple is spending in excess of $1 million, or 10% of its international ad expenditure, on a two-tier global campaign that is primarily Pan-European, with a little Asian and Latin American support added.

Apple's campaign, created by BBDO Worldwide, New York, began with a corporate image ad celebrating Apple's 10-year anniversary and focusing on Apple's promise to "push open the doors of human possibility." "We hoped this first ad would stimulate thinking in each country," says Bill Holtzman, marketing communications manager for Apple Computer International.

The second step was a three-page magazine spread intended to launch the new Macintosh SE and Macintosh II computers, country by country. "By focusing on the 'family of computers' theme—'One good idea leads to another . . . And another'—the ads, which could be run with or without the third page (depending on product availability), were designed to help local distributors solve tricky positioning problems," he says.

While the English-language publications have an obvious appeal, some advertisers don't feel they're really covering the international market unless they're "heavily into local media, which requires enormous expenditure," says Denis Beran, VP-advertising for *USA Today* and former international publishing director for *Business Week*.

If Mr. Hall is right that the current trend among multinational advertisers is toward regionalization—nationally and internationally—global strategies may get put on the back burner and international media seeking global buys will have to wait.

Some aren't willing to do that, and have been assuring potential global clients that their international publications have strong local appeal. According to William Thorn, international advertising/marketing director for Reader's Digest, the fact that the *Digest's* 39 foreign editions, five of which are licensed, are locally edited and published with local content in 15 languages is a distinct advantage.

Mr. Thorn says the number and variety of local media choices are rising dramatically, and the only way to win the scramble for increasingly fragmented media dollars is to give advertisers global reach, economically, in an effective medium—one readers feel comfortable with because it's local and reflects their interests.

For his part, Mr. Hall stresses the importance of customizing campaigns to individual cultures, and takes the concept a step further than simple linguistic translation.

"Very few products can be marketed globally, with one ad, without the ad losing it's appeal and effectiveness in direct translation," he says. "When Chevrolet went to launch its new Nova in Mexico, for example, it discovered 'no va' in Spanish means 'no go.' What is needed is a single *marketing* campaign, individualized for each country."

Like *Newsweek's* Mr. Luffman, Frank Cutitta, managing director-international marketing services for Framingham, Mass.-based IDG Communications—formerly CW Communications—which publishes *Computer World, PC World* and other computer publications in 30 countries, is optimistic about his company's global ad sales. They're growing 40% annually.

IDG is whole owner of its international network of foreign editions, which are managed with a large degree of local autonomy. IDG's success in selling global ad space—$1.5 million so far this year—comes largely from sales to smaller, high-tech advertisers like Video 7, Polygon, EMC Corp. and Ashton-Tate, says Mr. Cutitta.

Despite the many arguments for and against global strategies, the real success of global advertising may boil down to matters of diplomacy, suggests Mr. Cutitta. For the publisher thinking of creating global packages, he recommends establishing a "symbiotic" not "heirarchical" relationship with foreign offices. "Be open to taking leads from foreign offices and focusing on accounts they want you to focus on."

For the advertiser, Apple's Mr. Holtzman has this final thought: "If you listen carefully and spend time in the field talking to product, marketing and advertising managers, you can assimilate their hopes and concerns. And, if you're creative, you can build that into a strategy so everybody wins."

DAWN DELIVERS
9TH LARGEST CONSUMER
MARKET IN THE WORLD

When you add up the dollars in Black America, you have the ninth largest consumer market in the world. When you want to reach those dollars, you have **DAWN** Magazine.

Dinah M. Robinson

Distributed coast to coast, North to South, via leading Black newspapers in most major United States cities, **DAWN** brings national interests into local focus for nearly two million readers.

Concentrating monthly on contemporary Black issues and lifestyles, **DAWN** provides a full spectrum of features on fashion, personalities, entertainment, food, business, and politics—all written to appeal to America's upwardly mobile Black men and women.

No advertiser can afford to write-off the dollars in Black America, and no advertiser has to search them out.

Just call:
Dinah M. Robinson,
National Advertising Sales Director for DAWN Magazine
(212) 679-5152.

We will bring Black America to you.

DAWN • National Magazine Supplement
Published by the AFRO-AMERICAN NEWSPAPERS
The voice of Black America since 1892.

JWT Group sold

Hefty $566M bid brings takeover victory to British newcomer WPP

By STEWART ALTER

The first hostile takeover of an advertising agency turned friendly last week when JWT Group agreed to be acquired by WPP Group.

The buyout occurred on June 26, after WPP made last-minute moves to sweeten the price, retain management—including JWT Group Chairman-CEO Don Johnston—and shelve plans to bring back JWT's ousted managers.

In a board meeting that started after dinnertime June 25 and ran into early the next morning, the directors of $4.3 billion New York-based JWT Group agreed to a tender offer of $55.50 a share, or $566 million. That price is up from WPP's previously raised offer of $50.50, and 23.3% higher than its original bid of $45 a share.

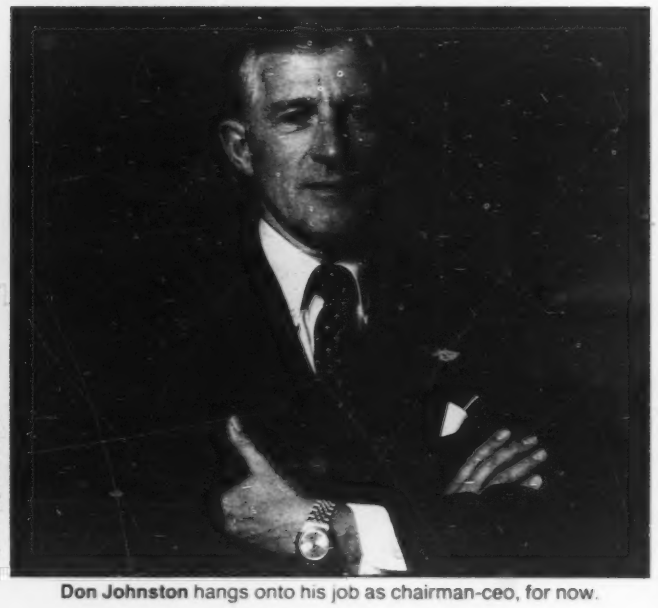
How JWT fell into takeover trap. Page 64.

Technically, the tender offer will expire at midnight July 13 unless extended. JWT shareholders still have to surrender their shares and WPP shareholders have to vote for the acquisition, but this is considered a formality.

As a result, the 123-year-old J. Walter Thompson agency—not only one of the best-known and most widely admired in the world, but a symbol of a U.S.-based global agency—will have as a new owner Martin Sorrell's London-based WPP Group.

Staff photos by Arnold Adler

Martin Sorrell succeeds in pulling off his JWT takeover.



Don Johnston hangs onto his job as chairman-ceo, for now.

This historic takeover sustained its first client fallout, however.

Goodyear Tire & Rubber Co., Akron, Ohio, immediately put up for review its estimated $30 million account. Goodyear had warned JWT and WPP that a takeover would prompt it to rethink its almost decadelong relationship with Thompson.

The buyout agreement culminates several weeks of speculation about whom was accumulating JWT's shares and sending the price up. During the 16 days of intense legal and financial maneuvering, JWT tried to enlist the Rockefeller family as a "white knight," and WPP topped a competitive bid of $55 a share in cash from an investment group led by three former executives of Ted Bates Worldwide.

WPP's move to pay more per share for JWT was expected, but the final $55.50 price raised some eyebrows on Wall Street, where the price was seen as being precariously high.

However, what was not expected was the management agreement that includes a key role for Mr. Johnston.

His decision to agree to the offer and remain chairman-ceo—at least

Will it take over Ford account?

O&M exits Nissan

By CLEVELAND HORTON

Ogilvy & Mather dropped out of Nissan Motor Corp. USA's review of its $150 million-plus account, leading to speculation the agency may be in line to take the $260 million Ford account from J. Walter Thompson Co.

In a surprise move, O&M did not attend the creative briefing at the second-largest automotive importer's Gardena, Calif., headquarters June 25.

The move stunned the remaining two agencies, Chiat/Day, Los Angeles, and Tatham-Laird & Kudner, Chicago. Observers noted that O&M has been pitching the account for about five years.

Sources said O&M U.S. Chairman Graham Phillips addressed O&M's Los Angeles staff late last week to explain the reasons for the decision. The fee arrangement proposed by Nissan through its consultants—Canter, Achenbaum, Associates—was unfair, Mr. Phillips reportedly told the agency's employees.

Mr. Phillips was returning to New York at press time and couldn't be reached for comment.

Nissan expects to name its new agency July 31. William Esty Co. previously handled the account.

There may be a method to Mr. Phillips' madness. With the takeover of JWT Group by London-based WPP Group, O&M is in a strong position to snare Ford Motor Co.'s Ford division business should the automaker decide to leave JWT. O&M handles Ford's advertising in the U.K.

Meanwhile, Porsche Cars North America, another piece in the automotive domino game, is expected to make a decision this week about its relationship with Chiat/Day.

Agency sources said Chiat/Day's Los Angeles office assumes it has lost the $14 million Porsche account. The agency has offered to assist Porsche in an agency review.

O&M's departure from the Nissan competition may mean

Highlights

Oatmeal war heats up 12

General Mills is declaring Total war on Quaker Oats Co.'s corner on the oatmeal market with its new one-minute "quick" Total Oatmeal. The Minneapolis-based company wants to turn Quaker to mush, and is taking the competitor head-on with similar cylindrical-shape packaging for Total Oatmeal, mimicking Quaker's decades-old container. Total Oatmeal also will be priced comparably.

Nielsen rates new meters 24

A.C. Nielsen Co. will install 200 "passive" people meters as part of a national test to start in fall 1988. If the test is successful, the new passive meter would eventually replace the system of people meters that will begin recording audience viewing behavior this fall. The people-meter system as it now exists is being criticized by the Big 3 TV networks. A key complaint is that children do not push buttons properly on the people meter, which looks and operates like a hand-held TV channel selector.

Levi signs on computer system 28

Levi's jeans will be electric blue in September. That's when San Francisco-based Levi Strauss & Co. inaugurates a video purchase system and joins Procter & Gamble Co., K mart Corp., J.C. Penney Co. and others in testing new ideas in electronic shopping. Levi will introduce by September video kiosks in 10 unidentified retail stores nationwide. Customers can view the full Levi's line of pants on the video display terminal and order their selections, which are delivered to them within two weeks. The bill is paid to the store.

Raisins to sweeten Hardee's ads 32

The popular, high-stepping California raisins are about to swing from the grapevine to the hamburger stand. Hardee's Food Systems, Rocky Mount, N.C., signed the exclusive merchandising rights in the fast-food category for the California Raisin Advisory Board's dancing raisins.

Our love affair with Fred Astaire 67

It isn't enough to say that he danced gloriously. And to take pleasure in the way he attached his debonair style and graceful voice to those marvelous movie songs. No matter who is singing oldies like "Cheek to Cheek," "Night and Day" or "They Didn't Believe Me," we always hear—and see—Fred Astaire, who died a week ago at age 88. From the beginning, about 55 years ago, Americans began falling in love with him and his movies.

How sweet it was 67

Jackie Gleason, who died June 24 at age 71, was one of the pioneers of TV comedy, but he remained a holdout in commercial endorsements until the past 10 years, when he used his trademark expressions in two major commercials.

INTERNATIONAL

Japan takes Grand Prix at Cannes festival 48

Just about anyone in advertising would agree that a cheap, fast, good commercial production is tough to get. But cheap, fast and good turned out to be the Grand Prix winner at Cannes this year. The Japanese spot, for an encyclopedia named "The Illustrated Guide to Animals," published by Heibonsha Publishing, won the top prize at the festival. The U.S., which brought back the Grand Prix the past three years, collected seven Gold Lions, 13 Silver Lions and 15 Bronze Lions.

U.S. agencies mull Eastern Europe 49

As major U.S. advertisers pierce the Iron Curtain to reach Soviet bloc nations, ad agencies are debating whether to follow suit. But agency executives still have concerns ranging from politics to finance, and, so far, Ogilvy & Mather Worldwide's office in Budapest, Hungary, is the only major U.S. agency branch in an Eastern European country.

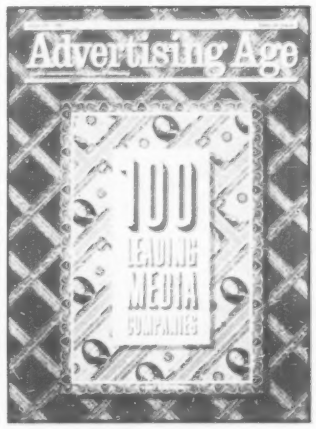
OTHER NEWS

Like a surrogate mother, American Motors Corp. is showing the press its new midsize car that likely will belong to Chrysler Corp. by the time it goes on sale in November. AMC's strategists also are plowing ahead with marketing plans for the car they have dubbed Renault Premier, though the fate of that name is uncertain because of Chrysler's pending takeover of the company. Insiders say Chrysler is expected to drop the Renault name. Page 12.

Affiliated Advertising Agencies International, a 49-year-old network of independent shops, broadened its member services by forming AAAI Media Buying Co-op. The 56 U.S. and 36 foreign members will share media research, trends information, competitive analysis, local-market information, planning and post-buy analysis as well as media buying. Page 32.

Organizers of We the People 200, Philadelphia's troubled celebration of the Constitution's bicentennial, are demanding that former chief fund-raiser Richard Rovsek return $160,000 in fees. Also, the Pennsylvania Attorney General's Office is seeking to recover all payments made to Mr. Rovsek, who quit the project last month after failing to raise any sponsor money. Page 32.

SPECIAL REPORT



Media Companies—*Acquisitions and divestitures continued to exact their toll on revenues generated by media companies, according to* Advertising Age*'s report on the 100 Leading Media Companies. This year there were nine new entries on the top 100 list, representing the largest year-to-year flux in the seven years the list has been compiled. The list ranks media companies by their 1986 media revenues. Starts after Page 36.*

TV nets eye big increases for prime time

By VERNE GAY

New York—The Big 3 TV networks are shooting for commercial price increases of as much as 30% on 1987-88 prime-time programs, according to agency and TV industry executives.

In the first sign of how aggressive networks will be with prime-time advertisers in the people-meter era, ABC, CBS and NBC last week submitted upfront—or advance—pricing details to about a half-dozen agencies with motion-picture clients.

Several closed deals by June 26 and were believed to have paid 20%-to-25% unit cost increases.

MGM/UA Communications, via Paul Schulman Co., New York, a subsidiary of Advanswers Media Programming, reported a three-network buy late last week.

Sources said price packages going to other advertisers this week will seek similar hikes.

Earlier rate increases in the upfront children's TV market went as high as 30%.

However, the children's market is dominated by a handful of advertisers.

So far, the proposed rate applies only to movie advertisers, which typically pay the highest rates on TV and, unlike other upfront TV buyers, do not get guarantees or make-goods on ratings shortfalls.

The networks can charge movie advertisers the highest price because those advertisers have unusually specific buying parameters. For example, many scramble for high-rated Thursday night inventory to support Friday releases.

The networks reportedly want to finish deals with non-guaranteed advertisers before those expected to demand guarantees.

"The networks first will find the guys willing to do business the way they want to do it before they tackle the ones who will play hard ball," said an agency executive.

"This [the proposed price hike] is not that unusual," said an agency executive. "We get our package back from the network [with the pricing], count to a hundred, call them back and say it's not acceptable. Then we start negotiating."

The initial asking price is never the final price in network negotiations, buyers said. Typically, the

Mobil may lead Fla. tax battle

By STEVEN W. COLFORD

Tallahassee, Fla.—Ad industry attorneys are urging the state Supreme Court not to answer the governor's request for an advisory opinion on the state's ad tax.

Industry leaders are trying to get Mobil Corp. or a comparable national advertiser to file suit against the tax, and lawyers are telling the high court an advisory opinion could affect lower courts.

An army of industry attorneys told the Florida Supreme Court June 22 that the tax is unconstitutional. But, they argued, the court should sit back, let the 5% tax take effect July 1, and wait for individual lawsuits on its constitutionality to filter up to its level.

The court is expected to respond to the governor's request by mid-July.

Not only is it highly irregular for the governor to seek an advisory opinion on legislation already passed, argued ad industry attorney Gregory Diskant, but it also is unfair for him to solicit such an opinion from the state's highest court and then expect lower courts to consider suits against the tax

(Continued on Page 66)

Cole & Weber wins

Diet Center switch

Rexburg, Idaho—Diet Center, which only three months ago hired Phoenix, Ariz.-based WFC Advertising to replace J. Walter Thompson USA, San Francisco, on its $6 million account (AA, March 30), reversed itself and appointed Cole & Weber, Seattle. The U.S.' largest franchisor of weight-control clinics appointed C&W without a review. Diet Center General Manager-Marketing Ted Austin said he was disappointed with the creative campaign that WFC developed for the fall and so turned to C&W, which had impressed him in the earlier competition.

Sega of America, South San Francisco, Calif., cut the list of finalists for its $7 million account to BBDO Worldwide, Los Angeles and San Francisco; Fallon McElligott, Minneapolis; and Jordan, Manning, Case, Taylor & McGrath, New York. The videogame marketer earlier fired J. Walter Thompson USA, San Francisco (AA, Feb. 16). At that time, the company said it would handle its account in-house. Woolward & Co., San Francisco, did some interim creative work; Bohbot & Cohn, New York, handled media buys.

GF ad policies look lenient

By JUDANN DAGNOLI

General Foods Corp.'s major agencies, facing a cut in their client's traditional 15% commissions, are pressing for a relaxation of GF conflict policies that already are liberal by most standards.

GF's worldwide agencies—New York-based D'Arcy Masius Benton & Bowles, Grey Advertising, Ogilvy & Mather and Young & Rubicam—are planning to request greater leeway in conflict policies and more compensation for new-product work (AA, June 22).

But GF's current policies on these matters, as outlined by documents obtained by ADVERTISING AGE, are not unreasonable, and the two documents—one from 1984 and an amendment from 1985—indicate GF already has relaxed its conflict policy at least twice.

A memorandum dated Nov. 28, 1984, designated "Advertising agency relationships," delineates international conflict policies. It singles out coffee beverages and fruit beverages as GF's foundation businesses, where the strictest conflict policies apply.

A later document, dated Jan. 16, 1985, entitled "Product conflict in agencies," expands the foundation categories to five, adding ready-to-eat cereal, packaged desserts and processed meat and poultry.

Within beverages, according to the documents, Rye Brook, N.Y.-based GF considers these products direct conflicts: fruit juice and nectar products, regardless of form; concentrates; and fruit-flavor, ready-to-drink refreshment beverages, carbonated, non-carbonated, bottled and canned.

Considered indirect conflicts are mineral waters, alcoholic beverages, alcoholic beverage mixers, milks and colas.

In the '85 document, GF amended that stance to allow its shops to handle sugar-sweetened colas and carbonated beverages but not diet carbonated beverages.

Full-strength juices, the documents say, are not direct conflicts, but "the agency assigned Kool-Aid ought not to be allowed to handle a product" in juice or sugar-sweetened carbonated beverages. Grey handles Kool-Aid.

Coffee conflicts are determined geographically, according to the documents.

An agency handling a GF coffee in Europe may not accept coffee assignments from GF competitors in that continent.

GF's main coffee agency, for flagship Maxwell House, is O&M. DMB&B handles Yuban and Brim; Y&R handles Sanka.

GF's meals division—Birds Eye, Minute Rice, Open Pit, Shake 'n Bake and Stove Top—has a less clear-cut policy.

Categories where the shops are advised to consult GF before accepting business include starches, vegetables, coatings/sauces, dressings and convenience meals.

Compensation, according to the documents, is 15% of gross media payments or a 15% service charge on net non-media payments. GF also compensates its agencies with cost plus 25%—or a flat fee—for design and sales-brochure work.

The agencies also are "expected to contribute to the cost of creative research, usually at the rate of half of 1% of billings."

As for product-development work, GF pays its agencies "a fee not to exceed full cost plus a profit of 25%," the documents say. Only during the "advanced development stage"—defined in the documents as the "point which product formulation, general marketing strategy and introductory timing are known"—is the new product formally assigned to a GF agency.

After assignment, the agency is paid commission during the first year. In the second year, "agency costs of servicing the brand that are not offset by test-market or regional commissions may be offset by fees," the documents state, set at a maximum of $30,000.#

CORRECTIONS & CLARIFICATIONS

- In the decision by the National Advertising Division of the Council of Better Business Bureaus involving Warner-Lambert Co.'s Trident sugarless gum (AA, June 15, P. 24), the company said it would employ qualified promises to advertise the gum's cavity-reduction properties, not that it would refrain from using cavity-reduction claims entirely.
- In the credits for the Global Gallery item for Ken-L Ration Tender Chops (AA, June 8, P. 56), the name of Debbie Nightingale as copywriter was omitted by the agency.
- The International Advertising Festival, New York, said its 73 gold awards for print included 14 for outdoor, rather than 14 additional prizes, as reported (AA, June 22, P. 88).
- Burke Promotional Marketing, Chicago, is one of the finalists for Sales Promotion Agency of the Year. The agency was misidentified earlier as Burke Creative Merchandising (AA, June 22, P. 88).#

Media errors

At press time, two errors were found in the 100 Leading Media Companies report in this issue of ADVERTISING AGE:

- **Cox Enterprises is mistakenly referred to as Cox Communications.**
- **Capital Cities/ABC's total media revenues should be listed as $4,124.4 million in the table on Page S-8.#**

THE MEN YOU WANT ARE WATCHING DALLAS, CHEERS AND DIFFERENT STROKES.

The upscale men you're after stand way apart from the norm. And so do their viewing habits. To this select group, "Night Court" means a college basketball game in prime time. And "L.A. Law" is the Raiders' defensive unit. No wonder these men who earn more, spend more and do more are turning off the broadcast networks and turning to ESPN.*

They know ESPN is where they can find CFA College Football, Top Rank Boxing, NHL Hockey, College Basketball and more. This season we've even got TV's ultimate weekly drama series: NFL Sunday Night Football.

And smart advertisers know ESPN is where they can find men who buy 22% more life insurance, 35% more telecommunications equipment and who take 35% more business trips than the national norm.* Which proves just how above average our average viewer is.

Without ESPN, you're underdelivering this very attractive audience. But you can reach them effectively—for a much lower CPM than the networks—by placing a mere 10% of your sports budget with us. You'll see results so dramatic they could change the way you spend your ad dollars from now on. After all, if you're still trying to reach upscale men through the likes of "Knots Landing," you just might be missing the boat.

Sales surge 11% for media giants

By R. CRAIG ENDICOTT

The nation's 100 leading media companies continued to show strong revenue growth and exceptional profitability in 1986 in spite of a soft national advertising market.

The AD AGE 100, selected annually on the basis of net revenues, grew 11.1% in media-only sales to $58.4 billion in 1986 over 1985. The same companies reported total sales of $122.1 billion, up 13.4%, for a 20% year-to-year growth rate. That profitability largely could be attributed to media divisions of the 100, because some $47.4 billion of the spread between media and total revenues came from two basically non-media companies: No. 4 General Electric Co. and No. 20 Westinghouse Electric Corp.

Acquisitions continued to dramatically reshape the industry. About 400 media properties were bought and sold by the 100 media companies. Ten companies from the 1985 list underwent ownership changes, and the sale of two more on the 1986 list is pending. From the 1985 list, RCA Corp. (NBC) went to General Electric; American Broadcasting Corp. merged with Capital Cities Communications to form No. 1 Capital Cities/ABC; and No. 18, Viacom International, was sold to National Amusements. John Blair & Co. was split apart, putting No. 28 Advo-System and No. 61 Quad/Graphics on the list. A.S. Abell was sold to No. 6 Times Mirror Co., Houston Chronicle Publishing went to No. 12 Hearst Corp., McCall Publishing Co. evolved into a joint venture, No. 77 Working Woman/McCall's, Rollins Inc. was sold to No. 100 Heritage Communications, Winston Network was sold to management and became No. 98 American Media Network, and GFV was bought by No. 45 Consolidated Press Holdings, Sydney, Australia.

Other additions to this year's list include No. 57 Chicago Sun-Times Co. by virtue of its purchase by its publisher from Rupert Murdoch's News Corp. Ltd.; No. 63 Product Movers, which experienced a 33% growth in revenues; and No. 78 Home Shopping Network, which saw its revenues jump to $160.2 million overnight as the network fed the tele-merchandising crazed marketplace.

Properties bought in late 1986 or early 1987 from the 100 leading media companies will ensure ascent to the list in 1987 of TVX Broadcast Group, Virginia Beach, Va., Cooke Media Group, Middleburg, Va., and Gillett Holdings, Nashville, Tenn.

Sure to be absent next year from the 100 list is No. 100 Heritage Communications, whose returns will be folded into prospective parent No. 23 Tele-Communications Inc. RKO General, No. 55, is on the block to help its parent company, Gencorp, pay off the debt incurred in fighting off an unwanted suitor.

Newspapers, the largest contributor in sales in accounting for 36% of the 100's total media, grew to $21.4 billion in 1986, up 10.7%. Newspapers began to emulate cable in clustering. No. 10 Tribune Co. and No. 17 Scripps Howard swapped community papers in a six-county area of west-central Florida to maximize operations around larger dailies.

Evening newspapers continued to take it on the chin. Times Publishing Co., No. 69, closed its St. Petersburg (Fla.) *Evening Independent*; No. 47 Landmark Communications shut down the afternoon edition of its *Greensboro* (N.C.) *News & Record*; and Knight-Ridder, No. 9, continued its conversion policy, switching four more evening papers to morning editions.

Heavy buying of leading dailies has slowed as the number of available properties has diminished. The big media companies are now emptying their pockets on weeklies, often with intent to increase frequency. Major dailies did change hands, though, led by two papers from economically-depressed Texas—the *Dallas Times Herald*, sold by Times Mirror to No. 37 Media News Group, and *Houston Chronicle*, sold by Houston Endowment to Hearst Corp.

Newspaper divisional revenue declines were recorded by No. 24 Harte-Hanks Communications, No. 26 Opubco and No. 93 Allbritton Communications, as the result of divestitures, and by No. 51 Maclean Hunter Ltd. (the *Houston Post*) as a result of the depressed Houston market.

Broadcast (TV and radio) claimed a 9.2% year-to-year growth with $15.5 billion in revenues for the 100, although as a percentage of total media sales, broadcast dropped from 27% in 1985 to 26.5% in 1986.

Contributing to the drop were reduced revenues from Times Mirror, No. 22 Kohlberg Kravis Roberts & Co., No. 46 McClatchy Newspapers, No. 48 Taft Broadcasting Co., No. 50 Donrey Media Group and No. 60 Providence Journal Co.

Only prime-time ratings leader NBC fared well among the three networks. ABC and CBS even did the unmentionable in cutting ad rates for prime-time commercials.

However, CBS's President-CEO Laurence Tisch expects a healthy year for the Big 3 in 1987, predicting advertisers will pay at least 6%-to-8% more for upfront ad time. Other than a poor national ad climate, the networks themselves were the object of buyouts that ultimately brought on wholesale changes in their executive suites and budget slicing, including major layoffs.

Magazines were the poorest performing media group. There were 41 magazine companies or segments contributing to the 6.4% growth in magazine revenue to $9.5 billion in 1986. Magazines as a rule have been down for several years, particularly the trade press, newsweeklies and general interest titles.

Strapped with revenue losses in their magazine properties were No. 14 Washington Post Co. (Newsweek); No. 25 International Thomson Organisation; No. 27 Readers Digest Assn.; No. 59 National Geographic Society; No. 72 Playboy Enterprises; and No. 83 U.S. News & World Report.

A combination of this slump and new direction at No. 59 Working Woman/McCall's led to the highly controversial move by *McCall's* to open its ad page rate to negotiation, reflecting the "open" TV-style of buying advertising and mocking the rate-breaking practices of Seven Sisters titles. Prior to its decision, McCall's, of all the Sisters, was most often singled out as the major violator of the rate-card buying structure.

Cable deregulation in the U.S. and Canada during 1987 will give cable companies a larger revenue stream. Cable operators have wasted no time in hiking their rates. No. 90 Rogers Communications already has boosted rates up to 23% in most of its U.S. systems. Media General, No. 35, boosted rates 22% at its Fairfax cable system serving 140,000 basically affluent subscribers in Washington-area bedroom communities that already pay an average of $32 per month for service. There has been no apparent drop-off in subscribers, either. The industry theorizes that higher rates for basic will influence greater subscriptions for pay, because in narrowing the differential, pay will "seem" less expensive.

Of the individual media tracked in this issue, cable had the largest year-to-year growth of 14.9% to $6.9 billion among the 100. Cable accounted for 11.7% of total media dollars in 1986. In 1985, it took 11.4% of the total.#

Composite revenues for 100 leading media companies

Media revenues at Advance Publications, which grew to $2.2 billion in 1986, up 8.3% according to ADVERTISING AGE estimates, largely reflect the acquisition of the *Trenton Times*, a 65,000-circulation daily newspaper in New Jersey's capital city and a 6.5% overall increase in revenues across the company's holdings.

Advance is a tightly held, extremely private enterprise controlled by the two sons of the late Samuel I. Newhouse, Donald and S.I. Jr. Its primary revenue generator is newspaper publishing, which accounts for an estimated $1.47 billion in revenues. Magazines account for about $544 million and cable, an estimated $186 million.

The acquisition of the *Trenton Times* from Allbritton Communications for an estimated $40 million to $50 million—about its annual gross, analysts estimate—put Advance in a hotly contested battle with Ralph Ingersoll's tabloid *Trentonian*. Advance already has a strong presence in New Jersey, owning the Newark *Star Ledger*, the state's largest paper.

As June began, a grand jury was still investigating allegations that Advance illegally conspired with Cleveland industrialist Joseph Cole to create a monopoly by shutting down Mr. Cole's *Cleveland Press* and sell its distribution list to Advance's *Cleveland Plain Dealer*. The grand jury empaneled to probe the allegations was slated to be disbanded at the end of June.

Another legal matter, the settlement of the estate of the late S.I. Newhouse still is pending. In that case, the IRS claims the family owes $914 million in estate taxes; the family claims its liability is only $47 million. The parties agreed early this month to settle out of court.

In Advance's magazine division, Conde Nast Publications took on a new leader and a new title in 1986-early 87. The leader is Bernard Leser, who previously had run the company's British subsidiary. He succeeded Robert Lapham as president of the group. The new title was *Signature*, acquired from Citicorp/Diners Club. In September 1987, the old *Signature* was scheduled to reappear as *Conde Nast's Traveler*, which analysts presumed would develop synergies with the "Fodor Travel Guides," which are owned by another Advance company, Random House.

It appears that *The New Yorker* has achieved more stability under Newhouse ownership than it had before its sale to the brothers in May 1985. *The New Yorker* ended 1986 with a 10.5% drop in ad pages to 2,683 and a 12.1% drop in ad revenues to $46.4 million. That contrasts with losses of 15% and 12.4%, respectively, in 1985, while circulation climbed 10.7% to 560,000, according to yearend 1986 figures reported to ABC.

At *Parade*, Advance's newspaper-distributed Sunday magazine, ad pages were off 2.1% to 643 while revenues climbed 5.5% to $198.4 million and circulation rose 2% to an all-time high of 31.4 million. In early 1987, *Parade* sold its rotogravure printing unit, Diversified Printing Corp., to British publishing magnate Robert Maxwell for an undisclosed sum. Gannett Co. precipitated the sale when it notification Advance it would terminate its contract for the printing of *USA Weekend*, its Sunday newspaper magazine, when the current contract expired in 1988.

Of the Ad Age 100 leading media companies, newspapers accounted for 36.6% of total media sales of $58.4 billion in 1986, and broadcast, 26.5%, but both were slightly down from their percentage of total media of the 100 in 1985. Cable, which contributed 11.7% of total media revenues, showed the strongest year-to-year growth among monitored media of 14.9%.

A top Advo-System executive says the "worst is behind and the strong potential is beginning to be realized" at Advo, based in Windsor, Conn.

In mid-1983, Advo developed a joint venture with John Blair called Network Mail (now called Mail Box Values). Within months, Blair purchased Advo and began to build the business. Blair's impatience, however, was costly. Although Advo's Shared Mail concept—marrying various ad pieces into a single packet for distribution via third-class mail—was a sound one (it reached 23 million households weekly in 1983), growth was gradual.

Blair forced the pace—increasing its shared mailings to nearly 50 million households weekly and sending out its Network Mail about every other week. Blair paid for all this—about $100 million (including a $35 million purchase price for Advo); and quickly accumulated losses of more than $50 million. Competition from other FSI publishers was stiff. Growth proved artificial and too rapid.

Last year, after turning down an offer of only $100,000 for Advo, Blair sold 28% of the equity in Advo to Warburg Pincus, which obtained voting control. When, a few weeks later, Reliance Capital bought Blair *sans* Advo, the remainder of Advo was distributed to Blair shareholders as a special dividend. Since last fall, Advo has been a publicly traded company.

During 1986, Advo had a year-to-year growth of 5.3% in revenue to $467.1 million. It lost $44.9 million after-taxes because of a $75.2 million one-time goodwill writeoff.

New management at Advo may realize its potential. In late 1984, Hugh R. Beath was appointed Blair's chief operating officer. He began paying more attention to Advo, which led to restructuring in 1985, though with little financial results. He took over the presidency in February 1986, and quickly began reorganizing the company. He reduced employees, pulled out of certain markets and instituted a salary freeze.

Simultaneously, division presidents were named to each of four geographically localized divisions, each representing about $160 million in revenues, which put operating and profit responsibilities lower in the organization to make Advo more responsive to local market conditions.The theory was that despite being a national organization, Advo needed to be close to local markets.

The result: In 1986, Advo made almost $10 million. This year Advo is "expanding selectively again, going back into certain markets that show potential, and signing up new customers." It made nearly $4 million in the quarter ending in December and about $2 million in the quarter ending in March.

Advo's 22,000 customers can use the company's assistance in designing ads, pulling and targeting appropriate ZIP codes and coordinating printing. Advo claims it can achieve 98% penetration of homes in a designated trading area.

The company has two basic programs. Solo Mail covers about 1.5 billion catalogs and other specialty mailings sent out yearly; and Shared Mail, the increasingly popular combination of ads from several customers in one package, in the form of either an FSI or individual ad.

Affiliated Publications, Boston, dropped its radio broadcasting and cable TV businesses and picked up a magazine publisher during 1986. Affiliated also recorded record revenue and net income, saw its stock split two for one—a little more than a year after a three-for-two split—and began trading on the New York Stock Exchange.

Affiliated Broadcasting was sold Dec. 2 to EZ Communications, Fairfax, Va., for $65.5 million. The division, characterized financially as static in revenues and profits, had been a minor contributor to Affiliated. The company sold the operation to "expand into cellular telephone and paging," says Daniel Orr, Affiliated VP, noting the sale of its cable TV operations was done for the same reason.

The company bailed out of cable TV when McCaw Communications Cos., in which Affiliated has a 45% interest, sold all its 46 cable systems, effective Dec. 20, 1986, to Jack Kent Cooke for $755 million.

Through the McCaw venture, the company agreed to purchase the cellular telephone interests of Charisma Communications Corp. and Maxcell/Telecom Plus for $158 million, and all the cellular licenses and paging systems of MCI Communications Corp. for $120 million. These purchases will make McCaw one of the largest cellular telephone operators in the country.

Affiliated's first priority remains newspapers, specifically the *Boston Globe*. To that end, the company made offers but no buys last year. "We are looking at papers with 40,000 to 50,000 in circulation or more," says Mr. Orr, although Affiliated made a bid to purchase the employee-owned Journal Communications, Milwaukee, for a reported $626 million. It was rejected.

Affiliated's strategic plan places cellular telephone second in emphasis followed by cable.

Affiliated's fourth strategic priority is magazines. Affiliated purchased Billboard Publications on April 30, 1987, for $100 million. As part of the deal, several members of Billboard's management bought a combined 10% equity in Billboard. The acquisition gives Affiliated an instant stable of successful publications including eight magazines and 15 specialty publications. Billboard's leading publications are *Amusement Business, Backstage, Billboard, Interiors, Music & Media* and *Photo Weekly*.

Affiliated revenues from all operations in 1986 increased 14.4% to $401.1 million. Operating income was $85.6 million, a 32.4% improvement over 1985 credited to a 9.1% increase in ad volume, an average 7.5% hike in ad rates and moderate increases in newsprint and labor costs.

The *Boston Globe* continued to generate the revenue and profits at Affiliated. Advertising revenue for 1986 jumped to $328.3 million, up 17.2% from the year before. Circulation revenue showed a modest 2% gain to $70 million because of selective price increases.

The ABC FAS-FAX report for average circulation at March 31, 1987, reported the daily *Globe* at 500,106, down 2.7% from year earlier figures, and 798,118 for Sunday, down 1.6%. Ad linage for the year increased 9.8% to 4.5 million inches for Sunday and daily combined.

The *Globe* is relishing the situation at its crosstown rival, the feisty *Herald*. Rupert Murdoch's News America must sell the *Herald* because of a cross-ownership conflict that arose when Mr. Murdoch acquired local TV station WXNE-TV for his Fox Broadcasting Network.

Under Mr. Murdoch, the *Herald* made significant gains and was a constant thorn to the *Globe*. "We love competition. We hope there will always be two newspapers here," says Mr. Orr. On the cellular telephone side, Affiliated in August began operating a 50/50 joint venture with McCaw, called Affiliated McCaw Personal Communications, which also is involved in the radio common carrier or paging business. Apart from the 50/50 venture, McCaw Communications Cos., 45% owned by Affiliated, has cellular operations in 23 markets and paging systems in seven states.

McCaw operations showed net losses for the year. Affiliated McCaw joint venture had revenues of $11.2 million, and a net loss of $10.5 million for the five months of its existence in 1986. McCaw Communications had full-year revenues of $63.3 million and a net loss of $62.9 million. Affiliated does not report its percentage of revenues from either its joint venture or minority ownership position in McCaw but shows its participation in both on the income side.

Bonneville PSAs up

Bonneville Media Communications, the full-service agency arm of Bonneville International specializing in public service accounts, gained American Library Assn. and Salvation Army in 1986. A new anti-drug campaign featuring basketball superstar Julius Erving of the Philadelphia 76'ers has gone to the top 75 markets and networks. Bonneville's largest and long-time client, the Church of the Latter Day Saints, made a greater commitment to paid media in 1986, with campaigns in 30 of the top 100 markets.

Geographic factors affected A.H. Belo Corp. earnings in 1986, which dropped 11.3% from 1985 to $20.3 million on a 3% growth in revenues to $397 million. All of its newspaper holdings, including its flagship paper, the *Dallas Morning News*, are in the economically depressed Dallas-Fort Worth area as is one of its five TV stations. Two other TV properties are in Houston and Tulsa, cities even harder hit by the downturn in oil prices.

The company showed a one-time loss of $12.8 million related to debt retirement. That was offset by the positive impact of a major debt restructuring program and the Dec. 31, 1986, sale of its two Dallas radio stations, KRQX-AM and KZEW-FM, for $20 million to Tampa-based Anchor Media Ltd.

In April 1987, Belo announced an agreement to sell its two remaining radio stations, KOA-AM and KOAQ-FM in Denver, to Jacor Communications for $24 million. Officials say the move to consolidate holdings in newspapers and TV is an effort to concentrate in the most successful areas.

In the newspaper arena, ad revenues at the *News* remained flat in 1986, staying at the $191 million level of 1985. But the *News* continues to lead rival *Dallas Times Herald* in circulation and advertising share. During the year, the *News* won a victory of sorts when Times Mirror Co. of Los Angeles ended a 15-year fight with the *News* for dominance in the Dallas-Fort Worth market and sold the *Times Herald* to Media News Group. The *Times Herald* continues the war with a livelier looking paper and an aggressive ad campaign that dishes out barbs like "Nobody wants to read a wimp newspaper," at the more established News.

The *Times Herald* also has challenged the *News* and the ABC in federal court, charging circulation figures are padded. The *News* countersued, leveling circulation irregularity charges of its own. In November 1986, Texas Attorney General Jim Mattox started investigating the matter, an action that wound up in district court when the *News* sued to stop the investigation. In February, the court called a six-month truce in that battle.

The dispute between the two papers continues with both being left off ABC's March 31 audit list. According to the ABC's Sept. 30, 1986 FAS-FAX report, the *News* circulation was reported as 390,987 daily, up 3.5% from the year-earlier period, and 531,417 Sunday, up 6.1%, while the *Times Herald* reported 246,371 daily, up 6.6%, and 338,963 Sundays, up 2.2%.

In TV, Belo leads the Dallas-Fort Worth market with WFAA-TV, but it is less successful in other markets like Houston where it has failed to raise KHOU-TV from third place in the key 6 p.m. and 10 p.m. news slots.

In Dallas, *News* advertisers, Joske's department stores and Safeway's North Texas grocery division, were purchased by competitors that also were *News'* advertisers, eliminating about $3 million in advertising revenues annually. Belo executives blamed declining ad revenues, limited promise for short-term recovery and a 7% increase in newsprint this year at the *News* in deciding this May to eliminate about 100 positions.

Its first-quarter earnings reflected a 3% decline in revenues to $87.5 million in 1987. However, earnings increased 37.5% to $2.2 million. Analyst Richard Straley of Eppler, Guerin & Turner does not predict a major improvement in revenues for Belo through 1987 but says its earnings should benefit from lower interest and tax rates.

In 1986, Belo, seeking to ensure in-

What is media?

As witnessed by the composition of the leading 100 media companies profiled in this issue, media cannot be confined to a classical fourth-estate definition. That is a stereotype.

The definition of media continues to evolve as the "traditional" media companies themselves add yet another "non-traditional" activity to their business profile. Seventeen of the companies in this seventh 100 Leading Media Companies report now contain "communications" in their title—a word generally added in recent years to reflect a broad sweep of "media" activities years removed from the classical media form that first identified the company.

As a rule the definition essentially comes down to the dissemination of information, editorial or advertising, through subscription or otherwise, a broad reading that lets in the media door total market coverage units within newspaper companies, and companies as free-standing as their inserts—the direct marketers who have drawn a bead on your Zip code.

Videodiscs, home shopping networks and subscription-based information networks that provide everything from electronic news services to analyses of corporate returns and commodity information to farmers also are merged into the definition. Specialty advertising calendars and the networking of news and information via satellite to member stations are classified as media.

Still on the doorstep, but not included in Advertising Age's interpretation of media, are program production, motion pictures, syndication activities, book publishing and ad rep sales made to non-owned broadcast stations.

The definition is continually being rewritten—today by the skywriters over crowded beaches and the entrepreneurs planting advertising and movie previews on the movie cassettes picked up for a night's viewing, and tomorrow?

It also should be noted that media companies that are headquartered outside the U.S. are ranked in this issue only by their U.S. revenues.

Capital Cities/ABC had a less-than-spectacular financial performance in 1986 as it consolidated operations following the January 1986 acquisition of American Broadcasting Co. by Capital Cities Communications.

Cap Cities, known for its financial austerity, has supplanted what was predominantly a spend-thrift "show-biz" image of ABC with one of financial conservatism.

Capital Cities' top executives also have quickly reorganized priorities. Cap Cities/ABC is not a company dominated by a TV network, but one dominated by two major divisions, publishing and broadcasting. The TV network is merely a component—and an ailing one—of the broadcast division where the real performers are the owned-and-operated TV stations.

Cap Cities/ABC totals shown in the accompanying box include pro forma results for 1985 as if ABC had been part of what was then Capital Cities Communications. Using these totals for comparison, operating income in 1986 decreased 10.3% to $501 million on a 1.4% increase in revenues to $4.12 billion.

In comparing the various segments of the company in 1986 with pro forma 1985 returns, ABC Television Network Group had $2.05 billion in revenue, down 4% from 1985, while the network reported a loss in operating income of $70 million, compared with a pro forma 1985 profit of $105 million.

The Broadcasting Group (owned-and-operated TV, radio and video enterprises) accounted for $1.1 billion in revenue, up 13%, with operating income of $412 million, up 42% from 1985 pro forma results. Publishing, including both specialized publications and newspapers, recorded net revenues of $970.8 million, up 1.2%, and operating income of $159 million, down 4.6% from pro forma 1985.

Of the segment totals, daily newspapers accounted for $412.4 million (includes shoppers and inserts), up 2%, and special publications (includes some book publishing), $558.4 million, up 0.8%.

Overall, consolidated income at Cap Cities/ABC in the first quarter 1987 was $23.9 million compared with $1.9 million (before the sale of some TV properties) the year before. Net revenues were $959.2 million, a 5% increase from the same period in 1986. Broadcast revenues were $721.9 million, a 6% increase, while publishing had revenues of $237.3 million for a 3% increase. Profits were $76.6 million, up from $30.1 million.

During 1986, despite gains in other divisions, the TV network continued to grab most of the attention. The network had a dismal year, due to overall slowdown in ad spending and one of the worst performances of its prime-time schedule ever. Continuing escalation in program costs and the final and most expensive year of its National Football League contract did not help.

ABC is coming off of its worst prime-time season (1986-87) since 1955. The network's average 14.1 rating was 26% lower than top-ranked NBC's. CBS had a 15.8 rating.

In addition to the regular season average, ABC suffered its worst sweeps ratings ever in May 1987. The network had an 11.3 rating and 20 share during May, compared to the previous low of 12.9 rating in May, 1970.

There was even bad news within the good news. "Moonlighting" emerged as ninth most popular show of the 1986-87 season, but because of an extremely difficult production schedule, about one-half of all episodes were repeated. The network cannot even break even on its most popular show.

In network daytime, ABC continued to lag behind CBS in household ratings. ABC had a 5.3 rating through May 10. CBS's was 5.5. However, ABC maintained its lead in some key demographics. Its "Good Morning, America" remained entrenched behind NBC's "Today Show."

In on-going tests with people meters —which this fall will supplant diaries as the primary means of measuring the demographic components of the TV viewing audience—ABC was found to have superior demographics in some categories to CBS. For example, the people meters show that ABC's strengths in younger demos are much higher than thought.

ABC also won a new $1.43 billion contract to telecast National Football League games through 1990, including 16 "Monday Night Football" games. The network dropped five "special-edition" games on Thursday and Sunday nights. ABC blamed much of its loss under the old contract on these games which in the main drew poorly. ABC's loss was ESPN's gain. The cable sports network with 41 million subscribers is 80% owned by Cap Cities/ABC. It paid $50 million-per-year for eight regular-season Sunday night games, four pre-season exhibition games, and the Pro Bowl.

The transaction is a big gamble for the cable network, which had earlier estimated it might charge advertisers $40,000 a 30-second unit to break even. ESPN, however, plans to make up its expenses through increased subscriber fees.

The ABC-TV Stations division, the crown jewel of the company in 1986, had an increase of 11% in net revenues over 1985 for its eight TV stations—a gain attributed to strong local advertising that offset the weakness in national spot advertising.

Radio revenue increased a modest 4% over 1985. The FCC has granted Cap Cities/ABC an 18-month waiver for the sale of its radio properties in Los Angeles, San Francisco, Chicago and New York and is seeking public comment on a proposal that would allow both Cap Cities/ABC and General Electric Co., which has NBC, to retain ownership, reasoning that retention would help the companies save money that could then be invested in better programming. Under cross-ownership rules the company would have to divest at least one of its radio or TV stations in those markets by July. Since it's unlikely Cap Cities would part with the profitable TV stations, four AM and three FM stations would be sold if the rule is enforced.

The radio division, up 4% in revenue in 1986 on a pro forma basis, was hurt by poor local sales. The division was bolstered by the acquisition for $10 million of KQRS-FM, Minneapolis-St. Paul.

Cap Cities/ABC breaks down its publishing segment into specialized publications, newspapers and shoppers. The over-all decline in operating income for the publishing segment was largely caused by poor results from Fairchild Publications, several units of ABC Publishing, the *Fort Worth Star-Telegram* and Southern California shopping guide operations.

Fairchild, considered part of specialized publications, suffered its second consecutive year of lower earnings—largely traced to the weak marketplaces and increased competition for its *Women's Wear Daily, Daily News Record* and *Electronic News*. ABC Publishing operating income increased only slightly while revenues decreased in 1986. Continuing to be a negative influence was its agricultural group, whose revenues and profits were down substantially. Chilton and Hitchcock Publishing had record profit years. ABC Consumer Magazines had substantial gains in operating income largely because of it computer magazine group. The depressed market of Fort Worth held back returns of the *Star-Telegram*.

Beset by plunging profits and hostile takeover attempts in 1986, CBS Inc. instituted major management changes and strategies to pare its budget. Laurence A. Tisch, chairman of Loews Corp., effectively gained control of CBS and claimed the ceo post from Thomas H. Wyman for himself after Loews raised its holdings in CBS to 25%. Mr. Tisch brought back CBS founder William S. Paley as chairman.

Despite significant declines in its broadcast division, CBS salvaged its performance in 1986 through massive staff reductions and the sale of assets, including its St. Louis TV station KMOX-TV, its music-publishing operations and its educational and professional publishing division. These one-time sale gains are reflected in the jump in net income, from $27 million to $375 million in 1986. Total revenue increased 6.7% to $4.75 billion, and operating profit fell 10% to $426.6 million, mainly the result of declining profitability of the CBS/Broadcast division, which accounts for about 60% of total revenues.

Early achiever

Malcolm Forbes, Forbes Inc. chairman and *Forbes* editor in chief, returned to newspaper publishing with the acquisition in March 1987 of Somerset Press (six weeklies with 44,300 combined circulation), Somerville, N.J., for $6 million. Mr. Forbes, fresh out of Princeton in 1941, bought the *Fairfield Times*, a weekly in Lancaster, Ohio, and founded the *Lancaster Tribune*, but folded the papers when he was inducted into the Army in 1942.

CBS reduced debt to $687 million in 1986 from $1.2 billion in 1985 by using proceeds from asset sales and internal cash flow. CBS incurred heavy debt in 1985 when it bought back more than 20% of its common shares to repel a takeover attempt by Ted Turner.

In the broadcast division, operating profit plunged 39% to $229 million. The TV network accounted for the decline; by contrast, both the owned-and-operated TV stations and the radio division performed well.

The other divisions fared better. While total revenue for CBS's magazine division remained flat at $407 million, operating profits rose to $10.6 million from $4.6 million. This included substantial amortization charges associated with the 1985 acquisition of the Ziff-Davis magazines.

For the most part, the financial community has applauded Mr. Tisch's arrival. Under his regime, CBS has become a much leaner operation. In 1986, the overall work force shrank by about 10%, while corporate staff was reduced by as much as 35%. Mr. Tisch accelerated staff reductions begun under Mr. Wyman.

Job cutbacks and budget slashing have continued into 1987. In March, Mr. Tisch called for a $30 million reduction (about 10%) in the news division, drawing sharp criticism from inside and out. The House telecommunications subcommittee scheduled hearings to discuss the matter in April this year, concerned that the cuts would adversely affect news coverage. Earlier, the Loews acquisition had prompted a request for an investigation by the FCC on the issue of control over the broadcast stations. The FCC responded to the request saying that control had not been transferred. Had it found otherwise, CBS may have been forced to sell some of its broadcast properties.

The staff reductions made last year will save CBS up to $100 million a year, according to some estimates. However, one analyst commented that so far, the cuts have been only a Band-Aid cure. Edward Atorino, communications analyst at Smith-Barney, believes that nothing short of a turnaround in programming and ratings will bring back profitability.

This is no small challenge. For the second successive season, CBS ranked behind NBC in the prime-time TV ratings. CBS dropped from its No. 1 spot for the first time in six seasons at the end of the 1985-86 season. At the same time, CBS lost its chief of programming, Harvey Shephard, to Warner Bros. Mr. Shephard was succeeded by Kim LeMasters. This change is seen as a positive one by observers, who view Mr. Shephard's primary strength as scheduling and Mr. LeMasters' as program development.

Under mounting pressure from advertisers, CBS, like ABC, announced last year it was cutting prime-time prices for early buyers. The cuts, averaging 1% to 5% below 1985 start-of-the-season prices, are unprecedented in view of the network's history of consistent increases. These cuts helped CBS maintain tighter inventory and a firmer price structure, but may affect revenues adversely.

CBS initiated the 15-second commercial to attract new advertisers. Other networks followed. Analysts say the practice has hurt the networks by enabling existing advertisers to capitalize on the savings of shorter spots while not attracting a sufficient number of new advertisers.

CBS Sports renewed an exclusive contract for network TV rights to air the NCAA Basketball Championship tournament through 1990. "Murder She Wrote" and "60 Minutes" were among the top 10 shows of last season.

The close scrutiny of the Tisch regime is no less apparent in other divisions. Despite several inquiries to buy CBS Records, CBS vetoed the idea as operating income of CBS Records grew 114% to $192.1 million in 1986. Mr. Tisch also said CBS had no plans to sell its magazine division, which in

January 1987 sold *The Runner* to Rodale Press.

For the first quarter 1987, CBS reported operating income of $67.9 million, up 30% from the prior year period, while net income grew to $48.7 million from $16.3 million. These gains were attributed to a decline in net interest expense and a strong performance by CBS Records.

Although network TV again showed a loss, this was offset by profits from its TV stations and sales from the Super Bowl. Year-earlier results also were restated to reflect CBS's sale of its book-publishing division in 1986 to Harcourt Brace Jovanovich for $500 million.

Central Newspapers thrives in two disparate markets: the booming Valley of the Sun, Phoenix, Ariz., and Indianapolis, America's so-called surviving crossroads.

Though Central Newspapers is headquartered in Indianapolis, the *Arizona Republic* continues to be the strong horse in the company's stable of newspapers. Average net paid circulation of the morning *Republic* was 343,723 on March 31, 1987, up 3.6% from the same period in 1986, according to ABC FAS-FAX reports. The Sunday Republic grew 6.1% to 539,323 in the same period.

Central Newspapers is no exception to the national trend in declining evening circulation. Despite Phoenix's burgeoning population, the evening *Phoenix Gazette* had average daily circulation of 111,253, down 1.5%, according to ABC.

In Indianapolis, as in Phoenix, Central dominates the daily newspaper market. For decades the company's morning *Indianapolis Star* and evening *News* have been the only dailies in town.

This combined with aggressive downtown development contributed to a slight circulation increase for the Sunday *Star*—to 401,776, up 1.8%, according to ABC.

The evening *News* dropped 6.8% to 119,720 circulation during the year-to-year period, as the morning *Star* increased circulation 0.6% to 227,225.

Central's other dailies in Muncie and Vincennes, Ind., registered slight circulation decreases.

In July 1986, Central ceased publication of its year-old *City Life*, a free weekly entertainment tabloid published by Phoenix Newspapers. *City Life* was launched to compete with the local independently owned *New Times*, but apparently fell short of its mark.

Also in July, the company suspended operations of its Teleguide Videotex service, after 2½ years. "It was not a feasible economic program," says Central President Frank Russell.

The company's joint venture project to develop a newsprint mill in the state of Washington found its fifth and last partner—Knight-Ridder Newspapers, which replaces Chronicle Publishing (*San Francisco Chronicle*), which had bowed out of the project now scheduled to break ground this July.

Chronicle Publishing Co. in 1986 pruned away some non-media holdings and expanded in its areas of strength—newspapers, broadcast and cable TV—as it grew 13.6% to an estimated $275 million in media revenues.

San Francisco-based Chronicle Publishing added another $3 million in sales from a book-publishing operation and returns from the defunct non-media ventures to bring total revenues to $278 million. Media sales do not include income from newspaper properties acquired late last year.

Chronicle eliminated all but media-related properties in 1986, divesting its real-estate holdings and Bay Area Teleguide, a public access videotex system in San Francisco.

Chronicle Broadcasting owns KRON-TV, the NBC affiliate in San Francisco, currently No. 1 in the market in prime time and prime access. The company also owns NBC affiliate WOWT-TV in Omaha, Neb., and

Your media plan may be missing the mark.

If you're taking aim at the New York ADI, make sure your media plan isn't missing an important part of its target audience: the affluent residents of Bergen and Passaic counties in northern New Jersey.

Only one newspaper gives you a clear shot at this lucrative market and the $20.7 billion in purchasing power wielded by the people who live there: The Record, New Jersey's largest evening newspaper.

The Record reaches more adults in the Bergen/Passaic market than any other newspaper, and targets readers with the greatest spending power.

In fact, Record readers have the second highest personal employment income in America, and Bergen/Passaic residents account for more than 21 cents of every dollar spent in the entire state of New Jersey.

In 1985, they dished out an incredible $909 million in restaurants, and rang up $10.1 billion in retail spending. This impressive grand total placed Bergen/Passaic 29th in the nation for total retail sales.

With The Record's Bergen/Passaic audience, you're taking aim at a market whose population of 1,293,400 makes it the 33rd largest in America. And sixty-five percent of this affluent audience cannot be reached regularly in any other newspaper. That's because no other newspaper covers their world so well or so colorfully. The Record's award-winning reporting, full-color graphics and eye-popping demographics give you an advertising forum that hits home with Bergen/Passaic residents like no other newspaper.

The Record. Try to target the Bergen/Passaic market without it, and you're just taking a shot in the dark.

The Record
We cover your world. All of it.

KAKE-TV, the ABC affiliate in Wichita, Kan. In 1986, Chronicle purchased KOBY-TV, Colby, Kan., from Channel 4 Broadcasting Ltd. for an estimated $1.3 million.

Daily circulation of the morning *Chronicle*, as reported in the March 31, 1987, FAS-FAX reports was 557,934, up 0.9% from the same period in 1986, reversing a downward trend in circulation in recent years. The company's Sunday paper, operating under a joint operating agreement in which revenues and profits are shared with Hearst Corp.'s *San Francisco Examiner*, had circulation of 708,035, down 0.2% from March 1986.

The JOA, forged in 1965, gives the *Chronicle* a morning monopoly and keeps Hearst's *Examiner* an afternoon paper. The *Sunday Examiner & Chronicle* has its news pages supplied by the *Examiner*. The *Chronicle* turns out feature material and editorials. The JOA comes up for renewal in 1991. Either paper can then extend the arrangement for 10 years. Both must agree to continuation of the JOA in 2005. It is believed the *Examiner* might then elect to revert to morning publication. The daily *Examiner* is far behind the *Chronicle* in circulation. The evening circulation as of March 31, 1987 was 142,335, down 5.4%.

Last December Chronicle concluded the purchase of the daily *Worcester* (Mass.) *Telegram & Gazette*, a morning/afternoon newspaper with daily circulation of 134,725 and 128,112 Sunday from the Stoddard and Booth families. Along with the purchase came 12 weeklies and three small dailies owned by Beacon Co., a wholly owned subsidiary of Worcester Telegraph & Gazette Inc. The three dailies were the *Marlboro Enterprise*, *Clinton Daily Item* and *Hudson Daily Sun*.

Chronicle added to its cable interests with the acquisition of Ventura County Cable Systems in California from Storer Communications, Miami. The 58,000-subscriber operation covers eight communities. The Ventura system brings Western Communications cable subscriber total to 238,000, up 36.8% from 1985.

Chronicle Information Services, a division of Chronicle Publishing, currently operates Computer Sports World, a Las Vegas-based sports videotex service offering sports information accessed by PCs and telephones.

This was a year of acquiring and being acquired for the biggest of the free standing insert producers, GFV Communications, based in Livonia, Mich., which at yearend was merged into Consolidated Press Holdings Ltd., Sydney.

Bearing the monogram of its founder, George F. Valassis, who started the four-color free-standing insert field in the early 1970s, GFV now claims $325 million in revenues, which would give it more than half the U.S. FSI market.

Led by the familiar Valassis Inserts, the glossy four-color 8¼-by-11¼ inch folders from several producers have grown to be a familiar part of the weekend newspaper. By late 1986 the then four FSI producers had scheduled 122 insert dates for 1987.

Reportedly it was to cut this number and stabilize FSI rates to advertisers that GFV in November 1986 bought the No. 4 FSI company, Newspaper Co-op Couponing, a division of Marketing Corp. of America, Westport, Conn.

Then on Dec. 3, George Valassis sold the company to Australian media group, Consolidated Press Holdings Ltd., Sydney. Although the move surprised many it probably was clearly in character for Mr. Valassis.

A printer, Mr. Valassis founded GFV as an entrepreneurial venture and is said to have become removed in recent years from day-to-day involvement with details but still felt closely attached to GFV and its personnel. Now in his 50s, he is expected to pursue other interests. Consolidated Press Holdings' chairman Kerry Packer now runs GFV, while GFV's Larry Johnson and David Brandon continue in their posts as president and exec VP-chief operating officer respectively.

With the NCC purchase, GFV moved from a 45% market share to about 55%, according to Lynn Scholz, GFV marketing services. The other two major competitors, Quad/Marketing and Product Movers, fairly evenly split the remaining market, but they also peg GFV at a lower figure than it claims.

For 1987, GFV jumped to 44 insert programs from 33 in 1986. Included this year are 42 original GFV dates plus two from NCC. The 1988 schedule will carry 42. And Ms. Scholz says that GFV is looking for 10% growth next year in the total $700 million FSI market.

This would put total Valassis 1988 sales around $423.5 million, a 30% increase over 1986.

Circulation of Valassis Inserts now stands at 48.5 million, putting total circulation of the 44 1987 insert programs in the 2.1 billion-to-2.2 billion range.

Innovation in both graphic arts and marketing techniques from the major GFV competitors also are keeping the FSI market in continual evolution. One of the biggest moves was the recent introduction of a national, rather than regionalized, insert program by Quad/Marketing, which bought the John Blair Marketing division in 1986. Like GFV, Quad is firmly founded in printing technology, and in February 1986 announced its new rotogravure national insert, printed in a single version for distribution throughout the U.S.

Production economy is a clear advantage, but GFV says it is not thinking about a national program.

Ms. Scholz says "The industry that buys FSIs wants targeted regionalized editions. They don't want to buy and use a full national run. Some customers may buy nationally, but they want to regionalize their presentations."

GFV markets itself, but rarely advertises. The company's major promotional efforts are made directly to customers, principally through a quarterly newsletter, "Couponing Insights," which goes to GFV's package-goods customers.

Continental Cablevision boosted its cable holdings, continued with its cluster strategy and through stock buybacks became more tightly controlled in 1986.

Four acquisitions added 82,549 new basic and 72,261 pay subscribers to the multiple system operator, whose basic subscriber count is 1.54 million and pay subscribers, 1.43 million, and helped raise Continental's overall revenues 32.9% to $392 million in 1986.

Privately held Continental paid $127 million for four McClatchy Systems' cable systems—all in the California/Nevada area—raising its total count to 106 systems in 14 states. Purchased were Fresno (Calif.) Cable TV TelCab Communications, Reno, Nev., Nor Cal Cablevision, Yuba City, Calif., and Continental Cablevision of the Sierra Valleys, Stockton, Calif., The latter system also covers the area of Tulare and Visalia, Calif.

Continental has been following a clustering strategy for the past few years, and in 1985 acquired a 3,000-subscriber system, PCNH Inc., in Hampton, N.H., and a 50% interest in Stellar Communications, Chicago, from Tele-Communications. The company also paid $13 million to buy the remaining 60% of Commonwealth Cable Corp., Westfield, Mass., and a 68% interest in Natick Cablevision Corp., Natick, Mass.

The Boston-based company's pay-to-basic ratio, previously one of the highest in the cable industry, dipped dramatically during 1986, from 1:1.5 to 1:1.

The cable industry believes deregulation, begun in 1987, is expected to improve the pay-to-basic ratio industry-wide largely because of the psychological impact of bringing basic charges in line with pay costs. The reasoning is that pay will then "seem" less expensive.

Continental, which in 1985 bought back almost 8% of its stock from Dow Jones & Co., the only corporate stockholder in Continental, continued its strategy of stock repurchases in 1986, buying back an additional 37% of its stock from individual shareholders.

In early 1985, Amos Hostetter became chairman of the company. His previous post of president was filled by Timothy Neher, former exec VP.

Copley Newspapers plotted a steady, uneventful course in 1986. Newspaper properties showed overall improvement largely because of growth at the *San Diego Union* and *Tribune*. While less of a factor, maturing cable TV operations, which contribute about 1.2% of corporate revenue, doubled their contribution in 1986 from 1985.

The La Jolla, Cal.-based company reported combined daily circulation for its five California and seven Illinois papers of more than 747,000, up less than 1% from 1985, says Robert F. Crouch, VP-finance.

The Copley executive says expanded coverage in a rezoned market area in San Diego, as well as continuing population growth, has resulted in the increased circulation of the morning *San Diego Union* and evening *Tribune*, whose combined circulation of 375,773 as of March 31, 1987, is up 2.2% from 1986. The gain was offset by losses in other markets, notably in the Los Angeles area where the evening *Santa Monica Outlook* suffered a 12% loss in circulation to 24,854, according to ABC Sept. 30, 1986 audit reports.

Separately, the *Union* reported average daily circulation of 252,686 for the March 31, 1987, ABC audit period, up 3.9% from the same period in 1986. The evening *Tribune* circulation fell 1.3% to 123,087.

Most of Copley's seven daily newspapers in central Illinois and metropolitan Chicago reported small daily circulation declines during 1986. Exceptions were Sunday editions of most papers and the *Joliet Herald News* with 47,413 daily circulation, up 1.3% from the year-earlier period.

Copley's cable TV partnership, Copley/Colony, contributed $4 million, up 100%, to media revenues from Copley's ownership share. The joint venture, a partnership with Colony Communications, Providence, R.I., serves nearly 100,000 subscribers in six Orange County cities.

In its only major property sale of the year, Copley sold its electronic classified ad service in California called CLEO (Computer Listing of Employment Opportunities) to Dallas-based Management Insight.

Privately held Cox Enterprises, still absorbing its 1985 purchase of Cox Communications, operated basically in a stand-pat mode through 1986. "It's not that we weren't interested in acquisitions. In fact, we made bids on several properties," says John R. Dillon, VP-cfo, "but we found the cost of media properties to be extremely high."

The company, however, sold media properties in 1986, which did not stop it from showing a 6.7% growth in overall revenues to $1.57 billion in 1986, and a gain of 10.5% in media revenues to $1.47 billion. Cox's revenue continues to come largely from its newspaper division, which owns 21 dailies, mostly in the Sun Belt from Florida to Arizona.

The newspapers have a combined daily circulation of 1.29 million and Sunday circulation of 1.58 million. But about 35% of the daily circulation and 41% of the Sunday circulation is held by the company's two leading Atlanta papers, the morning *Atlanta Constitution*, and the evening *Atlanta Journal*.

The emergence of James Cox Kennedy, exec VP and scion of the family which controls 97% of the Cox Enterprises stock, as designated heir to Chairman Garner Anthony the end of this year was paralleled by a major change in operating philosophy at the Atlanta newspapers. In late 1986 the company broke a decades-long tradition of promoting its news executives from within the company when it named Bill Kovach, who had been chief of the *New York Times* Washington bureau, as editor of the *Atlanta Journal-Constitution.*

Mr. Kovach, in turn, promptly recruited *Times'* veterans Wendell "Sonny" Rawls and Dudley Clendenin to head the metro news operation and newspapers' features department, respectively.

In 1986, the two Atlanta papers scored net circulation gains of 5%, but virtually all of that gain was accounted for by the *Constitution*, which had daily circulation of 264,812, according to the FAS-FAX report for March 31, 1987. That compared with 251,042 at the same time in 1986. Circulation on the *Journal* was up only 801 on March 31, 1987 from the 187,816 of a year earlier.

The Cox-owned *Miami News*, which has a joint operating agreement with Knight-Ridder's far stronger *Miami Herald*, continued its circulation slide. The paper had a March 31, 1987 circulation of 57,119, down 2.2% from 1986.

The broadcasting group sold WZGO-FM in Philadelphia to Malrite Guaranteed Broadcast Partners, Cleveland, in December. In April, the company sold its CyberTel radio common carrier division to St. Louis investor David Bayer.

Cox neither added nor sold TV stations in 1986. The TV flagship, WSB-TV in Atlanta, an ABC affiliate, has slipped behind NBC affiliate WXIA by 0.2 of a rating point in Nielsen sign-on to sign-off ratings. WSB's 7.1 rating and 23 share were hurt by the lackluster ABC prime-time schedule. Cox boasts possession of the UHF independent with the largest sign-on to sign-off rating in the top 50 markets with WKBD-TV, Detroit. The station is constructing a new $8 million building.

Cox's TV programming division is involved in syndicating several popular shows, including "Entertainment Tonight," "Star Search" and "Lifestyles of the Rich and Famous."

Cox was one of a group of four cable operators which last summer each purchased a 10% stake in the Discovery Channel, a basic cable service specializing in nature and adventure documentaries. Cox also struck a deal in June 1986 to begin bringing the American Movie Classics pay service to subscribers on its systems. Cox officials say the movie channel could reach about 100,000 additional homes under the agreement.

Since the company neither added nor sold cable systems in 1986, cable subscribers were up 2.7% to 1,353,731 in 1986. Subscriptions to premium channels were off 4.3% to 1,206,009. Cox operates 24 cable systems.

Donrey Media Group immediately was embroiled in a local controversy at its latest acquisition—the 106-year-old Pulitzer Prize-winning *Pine Bluff* (Ark.) *Commercial*—following the paper's purchase at the end of 1986. Shortly after Donrey took over from Freeman Newspaper Group, the Donrey-appointed general manager fired the Freeman Group executive editor over an editorial dispute.

Whether or not this dispute is symbolic of changes ahead in Pine Bluff, what is almost certain is the paper will become more profitable under Donald Reynolds, the 79-year-old media mogul who lists himself as publisher on each of his 130 newspapers.

The Freeman Newspaper Group purchase, estimated at $20 million, was done in typical Donrey style: Find a family-owned paper that isn't meeting its economic potential, purchase it for cash or with little debt involved, then pump it up to a money-making operation.

The Freeman papers, which in addition to the daily 21,000-circulation *Pine Bluff Commercial*, included a daily and weekly in Arkadelphia, Ark., and a weekly in Yazoo City, Miss., represented Donrey's largest purchase in 1986 and added about 30,000 to the almost 750,000 subscribers Donrey counts. In 1986, it also added the 7,000-circulation *Claremore* (Okla.) *Daily Progress*, and the *Athens Daily Review* (6,800 circulation), but sold Nevada radio stations KORK and KYRK-FM.

Donrey, owned 100% by its founder, talks little about its financial operations. But from media sources, total revenues for the company are estimated at $285 million, with media accounting for about $275 million, up 16% from 1985.

Donrey executives, including Fred Smith, president, who has assumed increasing operating responsibilities, declined to give specific financial information about operations. Newspapers, however, remain the bulk of revenues, although Mr. Reynolds began investing in catfish farming in 1985 and effectively doubled that operation in 1986. A 1985 venture into a cellular telephone operation in Tulsa, Cellular One, was sold in 1986.

Donrey's leading newspaper, the *Las Vegas Review-Journal*, maintained its circulation upswing, increasing daily 8.3% to 114,269 and Sunday 10.9% to 135,407. Las Vegas is one of few Donrey properties facing local print competition. Donrey also operates lucrative outdoor advertising operations, Donrey Outdoor Advertising.

Mr. Reynolds plans to leave his vast holdings, estimated by *Forbes* to be pushing $1 billion in net worth and including seven homes across the U.S., to a foundation that will operate what he began with $300 in cash and $700 in borrowed money.

Dow Jones & Co., New York, boosted net earnings 32.3% to $183.4 million in 1986 on revenues of $1.14 million, up 9% over 1985, despite a drop in ad linage at the company's flagship, the *Wall Street Journal*.

Journal ad linage was down 1.7% for the year, reflecting the general soft advertising market for most national media. Circulation of the *Journal* closed out 1986 at 2.04 million, up 1.8% from the end of 1985.

The advertising outlook showed signs of improvement during the year's fourth quarter, as *Journal* linage increased 6.3%. Dow Jones is projecting a slight ad linage increase for the *Journal* in 1987.

Earnings for the first quarter 1987, excluding one-time gains from year-to-year period, rose 23% to $37.4 million —an improvement Dow Jones credits partly to a 4.3% growth in ad linage at the *Wall Street Journal*, which also gained 2% in circulation to 2.05 million.

Linage at Ottaway Newspapers was up 4.2% in the quarter.

The *Journal*, which accounts for 65% to 70% of Dow Jones' earnings each year, in 1986 raised its national ad rates 5% and its regional rates 6%. The slowing of inflation, which has made advertisers less tolerant of price increases, did not seem to affect adversely the *Journal*.

Dow Jones' full-year earnings for 1986 included a first-quarter gain of $31.4 million from the sale of part of the company's stake in Continental Cablevision of Boston back to that company. Dow Jones retains a 17% stake in Continental, which has 1,541,000 subscribers.

Increases by the company's information services group and by the Ottaway community newspaper operations helped offset the shortfall in *Journal* linage.

The information services group's operating earnings rose to $41.4 million in 1986 from $17.7 million, while revenues increased 23% to $125.8 million. The group accounted for 15.7% of total Dow Jones earnings in 1986, up from 7.3% in 1985.

The Ottaway community newspaper group's pre-tax operating profit jumped 19%, to $41.9 million, on an 11% revenue increase to $195.1 million. Ottaway publishes daily newspapers in 22 communities.

Circulation of *Barron's*, Dow Jones' other national publication, increased 5.7% during the year, to 279,000, as ad linage and revenue also gained.

The *WSJ* in Europe and Asia grew in advertising by 27% and 11%, respectively, and in circulation by 6.4% and 15%, respectively. Dow Jones also boosted its stake from 49% to 100% in the *Far Eastern Economic Review*, a 64,000-circulation weekly.

The *WSJ* is attempting to adapt to a tougher competitive environment by increasing special sections and stepping up coverage of personal money management.

Dun & Bradstreet's divestiture of Technical Publishing for $250 million in the fourth quarter 1986 scaled down media contributions to its marketing services segment, including Donnelley Marketing cooperative mailing programs, A.C. Nielsen Co.'s marketing and media-research groups and high-tech researcher Dataquest.

D&B actually ended its involvement in magazine publishing through two divestitures. Cahners Publishing bought Technical Publishing, which included 20 magazines and related services in the industrial, medical and technology markets. The publications had a book value of about $41 million; Technical had about 740 employees. The second sale was of Technical's *Dun's Business Month* to Boston-based Goldhirsh Group, publisher of *Inc.* Technical Publishing's ad pages had been dropping, reflecting the downturn in heavy industries and the technology markets served by the publications.

Remaining publishing units include Official Airline Guides and Yellow Pages classified directory publishing, via the Donnelley Directory subsidiary. The 1984 breakup of AT&T has allowed D&B to renegotiate long-term directory deals with regional phone companies, permitting the company to take greater advantage in the growth of its markets. D&B also has expanded its activity in publishing its own line of "proprietary" directories, both in competition with other regional phone companies and in less established territories. This effort has been particularly active in Mideast states, including Pennsylvania and Delaware.

In the marketing sevices segment, the company in July 1986 acquired Market Data Retrieval, a closely held Shelton, Conn.-based marketer of data on businesses, executives and educational institutions.

D&B was outbid in late 1986 for Broadcast Advertiser Reports and its subsidiary, Radio-TV Reports, by Arbitron Ratings Co., a competitor of D&B's Nielsen. Nielsen in September 1987 will drop its long-used diary system of evaluating TV audience composition in favor of the "people meter." ABC-TV has dropped the Nielsen Rating Service. The company originally planned to introduce the people meter in 1986 but fell to pressure from the Big 3 networks to delay the move. The meters have been showing lower demographic ratings for several popular prime-time shows, suggesting the traditional diary method had been overstating viewing levels.

D&B, on behalf of its Nielsen Marketing Research subsidiary, expanded its role in selling grocery ad research via the December 1986 acquisition of Majers Corp., an Omaha, Neb., company that specializes in the measurement of grocery chain product activity. The estimated $30 million acquisition of Majers was expected to complement Nielsen's Scantrack Plus, which provides scanner-based sales data. Both are sold primarily to brand managers.

D&B's non-media business segment, business information services, includes D&B credit services, administration of small-business group insurance plans, commercial collection and computer services and McCormack & Dodge.

The company late in 1986 announced it would end 86 years of operating in South Africa, citing the "direct and indirect effects" of apartheid. Also overseas, Nielsen Marketing Research acquired the Marketindex Co. of Helsinki, bringing to 28 the total number of countries in which Nielsen operates.

Earlier this month, dissident Freedom Newspaper heir Harry H. Hoiles lost his battle in court to dissolve the company in a bid for control of the $1 billion-plus publishing chain. The ruling, returned two months after the hearing began, erased at least temporarily the one dark cloud hanging over this otherwise solidly performing media company.

Freedom operates 29 daily and three weekly newspapers in 11 markets across the U.S. and five TV stations. Its lead paper is the *Orange County Register* in Santa Ana, Calif., Freedom's home base until late last year when the company moved its corporate headquarters to nearby Irvine.

Based on details of the company's financial performance disclosed in court documents during the protracted litigation, Advertising Age estimates that Freedom's total sales increased 9.9% to $357 million in 1986, most of it generated by the *OCR*.

Following the purchase of WRGB-TV in Schenectady, N.Y., from General Electric Co. in early March, media acquisition activity by Freedom seems to have ceased. Expansion plans appear to have been moved to a back burner, pending settlement of the court case.

The three immediate heirs of R.C. Hoiles, factionalized into two groups, each own about a third of the privately held company founded in 1935 by R.C. Hoiles when he bought the *OCR*, then the *Santa Ana Register*.

In 1985, R.C. Hoiles' son Harry placed the value of the company at $1.01 billion when he offered to buy the shares of other family members for a total of $682.5 million or sell them his shares for $330 million. Subsequent offers by Mr. Hoiles, which also were rejected, reached as high as $900 million. In the absence of a sale, he

sought to dissolve the corporation. Cited among the points of contention was his objection to Freedom's expansion into TV. The company bought the first of its five TV stations in 1982.

The suit also claimed that other family members froze Harry Hoiles out of a key management position and took a number of actions, including refusing to elect him chief executive of the company, thus damaging the value of his family's stock. Mr. Hoiles' attorney says an appeal of the decision handed down June 2 by a judge in Orange County Superior Court is under consideration.

With an average daily paid circulation of 314,300, according to March 31, 1987, ABC FAS-FAX reports, *OCR* is up 4.4% from year-ago figures. The *OCR* Sunday edition reports a 5.9% gain to 360,404. In its home turf, Orange County, the *OCR* is outpacing the *Los Angeles Times*, which also recorded modest circulation gains for its Orange County edition, according to ABC reports. The *Times* outside Los Angeles and mostly in Orange County, had daily circulation of 165,736, up slightly from a year ago, holding steady with a 22% market penetration in both 1985 and 1986. The *Times* Sunday circulation was 210,440, up 0.3%, for a 28% market penetration in Orange County, the affluent suburban area south of Los Angeles.

Daily circulation of the *OCR* only in Orange County was 294,562, for a 39% penetration, while the *OCR's* Orange County Sunday circulation of 336,581 represented a 45% market penetration.

OCR has 32 community editions, which cover the county with zoned advertising capability (the zoning structure was in the process of being revamped at press time) and local news coverage, providing the newspaper with total market coverage. The community editions are mailed to more than 300,000 households each week and they are inserted in the *OCR* on Tuesdays. Combined with the 8,609 daily circulation of Freedom's *Anaheim Bulletin* and the 4,968 of the *La Habra-Brea Daily Star-Progress*, daily circulation totals 327,877.

Keeping pace with circulation at *OCR* were increases in advertising linage. According to Media Records, the paper ranked No. 1 nationally in 1986 full-run daily advertising, No. 2 in classified, No. 3 in retail and No. 3 in total advertising, up from No. 6 position in 1984. By 1986, the paper had moved to third place, with more full run advertising than the *New York Times*, *Washington Post*, *Chicago Tribune* or *Boston Globe*. Last year the paper published over 5.3 million inches of full-run advertising, the equivalent of 100 ad pages per day.

All of Freedom's five TV properties are CBS affiliates, except for WTVC-TV, Chattanooga, an ABC affiliate. All stations are No. 1 news stations in their markets, except for WLNE-TV, New Bedford, Mass., reportedly in No. 2 position in late night news ratings.

Journal assumes upbeat title

A more contemporary-sounding Journal Communications, Milwaukee, became the new name of employee-owned Journal Co., whose lead properties are the evening *Milwaukee Journal* and morning *Milwaukee Sentinel*. "We felt that it was more indicative of the scope of our company. We don't own a ball team," quipped a bemused Jack Knake, VP-corporate communications, presumably referring to Tribune Co., owner of the Chicago Cubs.

Other	211.0	208.0	1.4

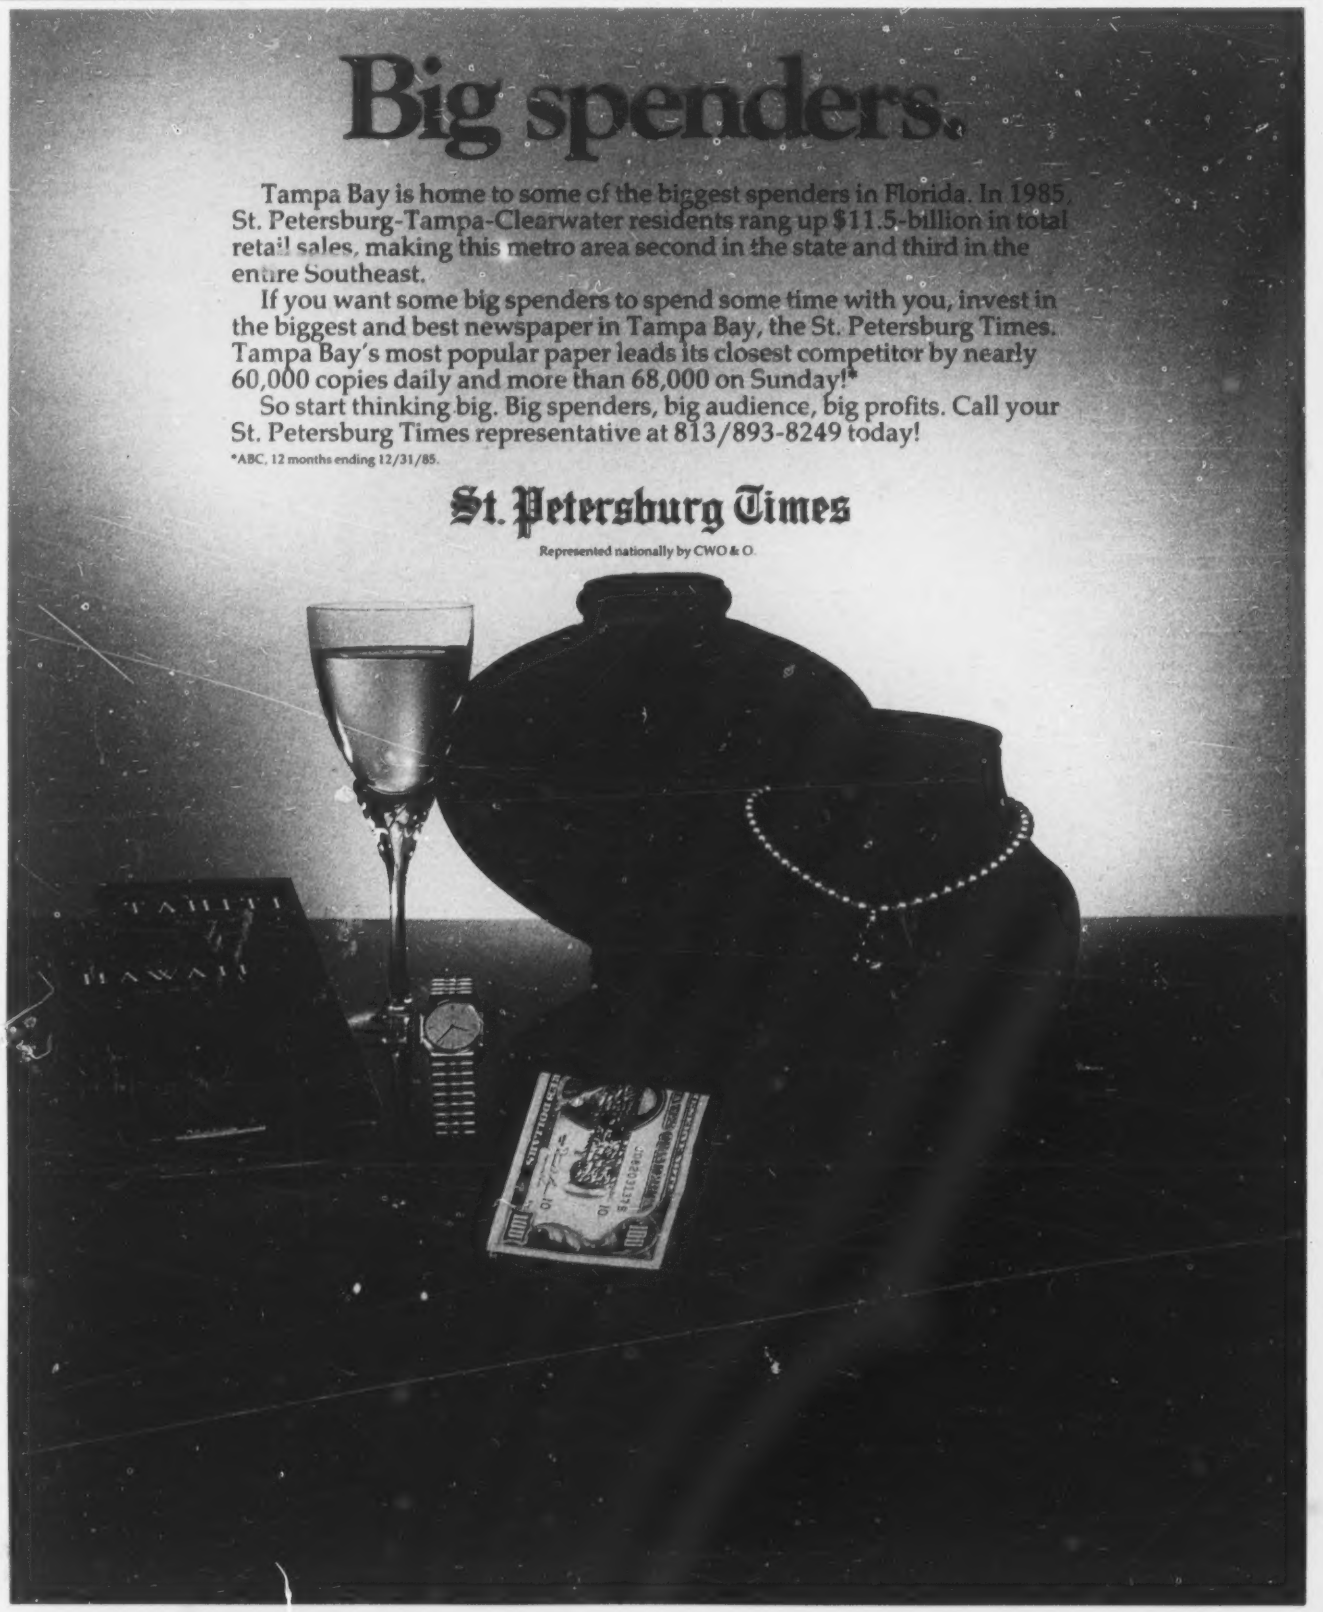
Perhaps the most significant development at Gannett Co. so far this year is its failure to make a major acquisition. Acquisitions in 1986 helped boost net income 9% to $276.4 million and revenues 27% to $2.8 billion.

Those gains continued to roll in in the first quarter 1987, which recorded a 17% jump in net income to $52.3 million and a 16% growth in operating income to $117.1 million over the year-earlier period. Newspaper linage in the first quarter increased 4%, with *USA Today* showing a health 24% rise in linage to help offset "sluggish" national advertising at Gannett's broadcast and outdoor divisions.

By January, Gannett decided to fold the *Louisville Times* evening daily and broaden its *Courier-Journal* into an all-day newspaper. The papers' acquisition earlier in the year from Louisville's Bingham family completed Gannett's purchases of what chairman Allen Neuharth refers to as the "Triple Crown" of dailies, the other two being the *Des Moines Register* and *Detroit Evening News*. The *Arkansas Gazette* also was purchased in 1986, for $51 million, and Gannett sold off its *Knoxville Journal* for $25 million to two executives from the daily.

In broadcast, Gannett last year added WUSA-TV, Washington, by virtue of its purchase in late 1985 of the Evening News Assn., Detroit, for $717 million, and KVUE-TV, Austin, Texas. Both Chairman Mr. Neuharth and President-CEO John Curley predicted *USA Today* would achieve its five-year goal of profitability in 1987, and it did—turning into the black this May. Gannett says the international daily showed ad revenues up 48% through April 24 and that audited circulation for the six months ending March 28 averaged 1,544,547, or up 9% over the previous period. Readership, according to the Mediamark Research spring 1987 survey, ranked *USA Today* as the nation's most widely read newspaper with 4.8 million readers.

Total newspaper ad linage at Gannett in 1986 grew 4%, with classified alone up 8%. This helped to offset a slight decline in national linage. Operating income was $501 million, up 21%, on operating revenues of $2.24 billion, up 29%. Daily circulation for Gannett papers last year declined 1%.



Big spenders.
Tampa Bay is home to some of the biggest spenders in Florida. In 1985, St. Petersburg-Tampa-Clearwater residents rang up $11.5-billion in total retail sales, making this metro area second in the state and third in the entire Southeast.
If you want some big spenders to spend some time with you, invest in the biggest and best newspaper in Tampa Bay, the St. Petersburg Times. Tampa Bay's most popular paper leads its closest competitor by nearly 60,000 copies daily and more than 68,000 on Sunday!*
So start thinking big. Big spenders, big audience, big profits. Call your St. Petersburg Times representative at 813/893-8249 today!
*ABC, 12 months ending 12/31/85.
St. Petersburg Times
Represented nationally by CWO & O.

Operating profit for the Gannett broadcasting division increased 27% to $116 billion, and operating revenues grew by 32% to $351 million.

Gannett's outdoor division grew 9% in operating income to $46 million, as operating revenues were $211 million, up 1%. Gannett attributes the declining numbers to reduced ad expenditures by the alcohol and tobacco industries.

General Electric Co., Fairfield, Conn., continues to digest RCA, its $6.46 billion acquisition that brought on board the RCA subsidiary, National Broadcasting Co., GE's sole media operation.

For the last seven months of 1986—the period of ownership by GE—NBC had revenues of $1.8 billion and operating profit of $203 million. ADVERTISING AGE estimates that full-year revenue for NBC would be $2.97 billion, an increase of 12% over the prior year.

GE's revenues for the first quarter were $8.32 billion, up 41% the same period in 1986. Net income rose 16% to $624 million. GE did not disclose NBC's quarterly results.

GE's influence on its new holdings were seen in several ways. In September, GE sold its 75% interest in the RCA/Ariola record business to Bertelsmann AG, a West German company that owned the other 25%.

At NBC, Robert C. Wright, the president-ceo who came over from GE, looked to make the network more efficient. In the fall NBC announced personnel cutbacks "in the low hundreds" throughout the organization.

NBC continued to lead the networks' ratings race for the second year in a row. For the season ending in April, NBC had a 17.8 overall rating and a 28 share, compared with CBS's 15.8/25 and ABC's 14.1/22. That was the largest lead for network since the 1978-79 season. It was the only network not to pare back its rates.

"The Cosby Show" finished at the top with a 34.9 rating and a 53 share. "Family Ties" finished second with 33.4/50 and "Cheers" was third with 27.5/41. "The Golden Girls" finished fifth at 24.5/41 and "Night Court" was seventh at 23.2/35. The only new fall program that did not survive was "Easy Street." NBC Sports, which averaged a very high 68 million viewers for each game of the 1986 World Series, will broadcast the 1988 Summer Olympics from South Korea.

NBC had five owned-and-operated TV stations before its January 1987 purchase of WTVJ-TV in Miami for $270 million. NBC bought the CBS-affiliate with General Electric Property Management Co., a holding company. GE also brought another TV station into the deal, KCNC-TV in Denver, an NBC affiliate.

GE has yet to sell five of the eight NBC radio stations that are in markets served by its owned-and-operated TV stations. It must do so by December 1987 in accordance with FCC regulation on multiple media properties held in the same market. RCA had cross-ownership rights under grandfather clause privileges, which do not apply to properties if they change ownership. GE has applied to the FCC to retain these properties, however. A ruling has not been handed down.

Privately held Harte-Hanks Communications, San Antonio, Texas, sold nearly half its operating divisions in 1986 to concentrate on running a smaller number of larger units in attractive markets.

Robert G. Marbut, Harte-Hanks president-ceo, says the company made agreements last year for more than 75 divestitures and 27 acquisitions, including 56 divestitures in November. Even though all the deals did not close during 1986, HH was involved in restructuring the entire year.

Last November, HH announced it would sell 56 operating units. Media properties sold included newspapers, shoppers, broadcast and cable tv systems that only produced 15% of HH's revenue and operating profit, according to HH officials.

Included among the divestitures were 25 newspaper-related units and three shopper-related operations sold to Worrell Communciations, Charlottesville, Va. Worrell then granted Tucker Sutherland, who had resigned from HH as its senior vp-president of the newspaper division, an option to buy nine of the newspaper-related divisions acquired from Harte-Hanks.

Mr. Sutherland, through Sutherland Media, acquired from Worrell six Texas dailies: *Corsicana Daily Sun, Copperas Cove Leader-Press, Universal City Herald-News, Medical Gazette*, San Antonio, *Wingspread*, serving Randolph Air Force Base and *News Leader*, serving Fort Sam Houston.

Radio & Records, a 7,800 circulation weekly trade publication for the radio and recording industry, was purchased from HH by Westwood One.

HH also completed the sale of KYTV in Springfield, Mo., to Schurz Communications, South Bend, Ind. It was the only TV station among the operating units being sold.

HH sold 13 cable TV systems serving 25 communities in seven states to First Carolina Communications, Rocky Mount, N.C. Although cable is still one of its five core businesses, the company wants to focus resources on operating a smaller number of systems in larger growing markets, officials say. Industry observers say HH put the units on the block to reduce the bank debt from its leveraged buyout in 1985 that took the company private. Harte-Hanks continues to operate cable systems in suburbs of Houston, Miami and Philadelphia, with a total of 103,600 subscribers.

HH ceased publication of *Texas Weekly* magazine in August 1986. The Sunday magazine, concentrating on Texas news and features, was begun September 1985 to replace Gannett Co.'s *USA Weekend* in some of the 13 HH-owned Texas newspapers. It ran as a news feature in others, but lack of ad support HH credits to the poor Texas economy forced its closure.

Corpus Christi (Texas) *Times*, an afternoon newspaper with a circulation of 22,667, was discontinued this June 1. Officials of the Caller-Times Publishing Co. say resources spent on the afternoon paper would be transferred to the morning *Caller*, now called the *Caller-Times*. Some jobs were eliminated. The combined *Caller-Times* has circulation of 69,807 on Saturdays and 90,857 on Sundays, according to ABC FAX-FAX reports for March 31, 1987. The *Caller-Times* is largest newspaper owned by HH.

HH merged its San Antonio direct mail operation with its Houston direct mail facility. Houston will increase significantly production capacity to handle business now being handled by the San Antonio unit.

HH Community Newspapers in nine North Dallas suburbs launched a major promotion in September called The Sell Classifieds. The promotion guaranteed that if an item advertised did not sell within a week that advertiser would get another week of free advertising.

HH is the country's largest publisher of shoppers, which are grouped into 380 zoned editions, reaching more than 5 million households weekly. The largest shopper is in Southern California and has a circulation of 2.4 million. Last year, HH acquired from Mel Skolnik the *South Coast Shopper*, a weekly direct-mail shopper with a 32,000 circulation in southern Orange County. The combined circulation of the two provides advertisers with total Orange County coverage. Harte-Hanks California CDM in Brea, Calif., also acquired Greensheet Publications, publisher of *Greensheet Shopper*, in Van Nuys, from Tribune Co., Chicago.

One other big portion of HH business is Harte-Hanks Direct Marketing, consisting of five marketing service companies and 11 direct-mail systems that offer advertisers direct mail programs reaching 96% of American households. It has three alternate delivery systems which can reach more than half a million households via hand delivery.

Hearst Corp., on the heels of a soft year in media sales, rebounded in 1986 to post improved performances in magazines, broadcasting and books/publishing. The company also stepped up its pace of expansion.

Hearst, celebrating its 100th year in 1987, invested in the division it has had the most trouble with recently—newspapers—with the March 1987 acquisition of the *Houston Chronicle*, Texas' largest daily newspaper.

The *Chronicle* was Hearst's second largest purchase, following its March 1986 acquisition of WCVB-TV, the ABC affiliate in Boston, from Metromedia Inc. for $450 million.

The *Chronicle* purchase reinvigorates a division characterized more recently by selloffs, closures and declining metro dailies. Hearst closed down the failing *News-American* in Baltimore in 1986. Losses continue at its *Los Angeles Herald Examiner*. Hearst publishes 15 daily newspapers with a combined circulation of 1.5 million and 2.6 million on Sundays.

In late 1986, Hearst purchased the News America Syndicate Division of News America Holdings. News America is a U.S. holding company for Rupert Murdoch's News Corp. Ltd.

The nation's largest publisher of monthly magazines, circulating just over a quarter billion copies of 12 monthlies, one bi-monthly and other special magazines, closed out 1986 with the purchase of *Esquire* for $50 million plus future payments.

March '87 saw the debut issue of *Victoria*, a spinoff of *Good Housekeeping* that reflects the romance of the Victorian era, with an initial circulation of 400,000.

Hearst Broadcasting, sparked by impressive second-half performances by WCVB-TV, Boston; WBAL-TV, Baltimore; KMBC-TV, Kansas City, Mo.; and WDTN-TV, Dayton, Ohio, was reported to have made a strong comeback after a somewhat disappointing 1985. The company's six VHF TV stations and seven radio stations make Hearst one of the largest group broadcasters in the U.S.

The cable communications division's Cablevision of California acquired the Mountain View, Calif., system from Viacom International. The purchase brought the number of Hearst cable systems in northern California to six and added another 10,000 basic subscribers for a total of nearly 50,000.

The Lifetime cable network, jointly owned by Hearst, ABC Video Enterprises and Viacom, became both fee and advertiser-supported in 1986. The network now serves 27 million homes. Arts & Entertainment (A&E) network,

another joint ownership of Hearst, ABC and RCA Cable Inc., now serves 20 million households on 2,200 cable systems in the U.S. and Canada.

Ingersoll Publications continues to stick to the newspaper business, concentrate on smaller suburban weeklies and dailies, and pursue acquisitions aggressively—a strategy that produced total media sales of $370 million in 1986, up 57.5% from the year earlier.

In the past year, the Princeton, N.J.-based company has acquired 23 newspapers in eight states, including 10 newspapers in New Jersey: *Northern New Jersey Suburbanite, Teaneck Suburbanite, Ocean County Reporter, Summit Independent, Independent Press, Short Hills/Millburn Independent, Madison Independent, Independent of the Chathams, Berkley Heights/New Providence Press, Suburban News Target.*

Ingersoll paid more than $25 million last winter for its first Wisconsin newspaper, the evening *Sheboygan Press* with circulation of 29,690 on March 31, 1987, according to AEC's FAS-FAX report. The company also purchased the *New Haven* (Conn.) *Register*. In Delaware, it added *Town Talk/Delaware, Brandywine* and *Wilmington West;* in Indiana, the *Anderson Herald* and *Anderson Daily Bulletin;* in Michigan, the *Ionia Sentinel-Standard, Lake Odessa-Sentinel* and *Portland Sentinel;* in North Carolina, the *Courier-Tribune*, and in Pennsylvania, *Town Talk Newspapers.*

Also, in mid-May Ingersoll entered into a partnership with Chanry Communications on Long Island, which publishes 40 weeklies in that area as part of the Center Island Pennysaver group. "We're enthusiastic about both dailies and weeklies, but the weeklies are growing faster. The dailies are a little less volatile since they already have the circulation," notes Ralph Ingersoll II, the company's chairman.

In Connecticut, the last edition of the morning *Journal-Courier* was printed in late March 1987. Ingersoll, which bought the *Journal-Courier* and *New Haven Register* last May for nearly $200 million (four times the annual revenue)—its largest purchase to date—merged the two publications and converted the afternoon *Register* to a morning publication. Combined daily circulation, according to March 31, 1987 FAS-FAX data, was 120,886, down 5.6% from the corresponding period in 1986.

Offices in Lakeville, Conn., New York City and Philadelphia were shut down last summer and the Ingersoll headquarters consolidated in Princeton.

David Carr became president, succeeding Thomas Geyer, who was named editor and ceo of the *New Haven Register*. With the organization since 1966, Mr. Carr was the creator of the "St. Louis Suburban ring," a paradigm of Ingersoll's saturation strategy that has been duplicated in Youngstown, Ohio, Providence, R.I., Philadelphia, and most recently, northern New Jersey. By clustering newspapers in a region, Ingersoll has been able to build substantial readership and blanket the area, often challenging the dominant daily there.

The northern New Jersey situation is sparking debate in media circles as to whether the company intends to go up against Macromedia's *Bergen County Record*, the dominant ad medium in the area. While Mr. Ingersoll insists there is plenty of room for all, last October he grouped nine locally edited newspapers, with 28 zones midweek and an additional 10 on Sunday, under a new marketing organization, Suburban Newspapers of Northern New Jersey. The papers have a combined daily circulation of 156,765, according to ABC FAS-FAX reports.

Together the publications cover Bergen and Passaic counties, and parts of Morris, Union, Hudson and Essex counties. Package buys are available for advertisers who want to run in a minimum of four newspapers. "From a news point of view, we're clearly not competition," says Chazy Dowaliby, senior publisher of the Bergen division of Suburban Newspapers of Northern New Jersey, stressing the community nature of the coverage. "If anyone feels there is competition, it is probably with our regional advertising, but many of our regional advertisers also advertise in the *Record*. They don't feel there's a conflict."

International Thomson Organisation, which continues to shift out of the highly volatile oil and gas industries and into publishing and leisure and travel, spent $610 million on information and publishing acquisitions in 1986, quadrupling for the second consecutive year its outlays on all acquisitions.

Major purchases in 1986 included Cordura Corp. in June for $204 million, and South-Western Publishing Co. for $265 million in December. Cordura, now Mitchell International, publishes a range of automotive repair manuals and estimating data for the U.S. casualty-insurance industry. South-Western is a publisher of high school business texts. To help pay for the acquisitions, Thomson raised $290 million by issuing Canadian preference shares.

Oil and gas holdings provided only 19.9% of total income in fiscal 1986, down sharply from 50.3% a year earlier. Revenues from the same properties contributed 13% of the corporate total, down from 26% in 1985. For fiscal 1986, ITO had income of $153 million, down 12.8%, and revenues of $2.53 billion, down 3%.

Information and publishing segment accounted for $1.02 billion in revenues, or 40.4% of the total, up from 34% of the total in 1985. For the purpose of this issue, four out of the six groups comprising the segment contain operations that classify as U.S. media: International Thomson Business Press had revenues of $184.2 million in 1986; InFiNet generated $72 million; International Thomson Professional Publishing, $164 million, and International Thomson Publishing, $214.8 million. Some 87% of all this is from U.S. properties.

Medical titles are the backbone of Thomson's U.S. business press activity, but publications addressing industrial, transportation and retail complement this core.

Lead publications in the medical field are *Medical Economics*, a fortnightly, and one of a number of titles published by Medical Economics Co., Oradell, N.J. Latest available revenue data for *ME* is for 1985 when the publication dropped 6.2% in ad revenue to $19.5 million on a decline in pages of 14.2%, according to *Folio:400*, which compiles statistical data on consumer and business magazines.

Mitchell lends its reference manuals titles to a Thomson automotive sector that includes Ward's Communications, publisher of Ward's *Auto World*.

InFiNet includes the publishing of newspapers, *American Banker, Bond Buyer* and *Credit Markets* among other activities.

U.S. dollar figures for this profile were converted from British pounds at the rate of 1 pound sterling=$1.47. The same figure was applied to 1985 figures for comparison. The British pound improved 1.4% against the U.S. dollar during the 1986 calendar year.

By the early 1990s, ITO expects half its profits to come from North American holdings, largely information and publishing.

First quarter 1987 returns show revenues of $585 million, up 15.2%, although net income dropped from $19 million to only $2 million largely because of reduced earnings from oil and gas holdings primarily in the North Sea area. Again, information and publishing interests—the latter including a "particularly encouraging performance from business magazines in the U.S."—proved the strength of International Thomson.

James Cole, media analyst with Toronto's McCarthy Securities Ltd., says the company will continue to redeploy cash flow out of the U.K. and into the U.S. where the greater portion of assets currently are located.

Although public, 73.5% of ITO's common shares are owned by the family of Lord Thomson of Fleet, the same Thomson family that owns 61% of Thomson Newspapers, profiled elsewhere in this issue. Administratively, Thomson family operates from Toronto the Woodbridge Co. Ltd., which controls by itself or through affiliates both Thomson Newspapers and ITO.

Miami-based Knight-Ridder, Miami, is divesting its non-media and money-losing properties and seeking additional newspaper and tv properties. KR is dominated by five newspapers—*Miami Herald, Philadelphia Inquirer, Philadelphia News, San Jose Mercury News* and *Detroit Free Press*—which provided 55% of operating revenues in 1986. Twenty seven other dailies and six suburban papers contributed 33% of revenues.

Last year, KR made its first newspaper acquisition in six years, paying $311 million for six daily newspapers, two weeklies and two printing operations in South Carolina and Mississippi, owned by the Columbia, S.C.-based State-Record Co. K-R a year after acquiring the company sold three of the newly-acquired Mississippi papers—the *Daily Times-Leader* of West Point, *Daily News* in Starkville, and the weekly *Webster Progress-Times* in Eupora—to Morris Newspapers Corp. of Savannah, Ga.

KR, which generated 5% of its operating revenues from eight TV stations, purchased for $160 million three TV stations from Gannett in Oklahoma City, Tucson and Mobile, Ala. The broadcast buys influenced a 57% increase in broadcast revenues in 1986.

The remaining 7% of operating revenues came from a Northeast cable operation, a book division, business information services and other operations.

The heart of KR is still its newspaper operation. Ad linage for all papers in 1986 rose a slight 0.5%, though at least eight newspapers had linage declines. Ad revenues rose 9.2%, however, mainly resulting from a rebound in Philadelphia, which suffered a 46-day strike in 1985. Overall, KR circulation improved by 2.9% for morning papers, dropped 13% for evenings and gained a scant 0.1% on Sunday.

In April 1986, the *Detroit Free Press* accepted the title of the failing newspaper in a proposed JOA with its rival *Detroit News*, owned by Gannett. Under the Detroit JOA, as in most JOA agreements, business operations of the two papers would be combined, while editorial staffs would remain independent. The *Free Press* had lost $56.5 million from 1980-85, plus an additional $17 million in 1986. Its daily circulation during 1986 had been slightly less than the *News* but trailed by 85,000 on Sunday.

U.S. Justice Department hearings on the JOA begin Aug. 3. The Justice Department's antitrust division challenges the *Free Press* claims that it is a failing newspaper. The division has suggested the *Free Press* pursued market dominance over the *News* at the expense of profitability.

Converting from afternoon to morning publication in 1986 were the *Boca Raton News, State College* (Pa.), *Centre Daily Times* and the *Gary Post-Tribune*, and brings to eight the number of conversions in the past 10 years. A handful of KR afternoon dailies remain.

Late last year, P. Anthony Ridder, president of the KR newspaper division and son of former Knight-Ridder chairman, Bernard H. Ridder Jr., initiated staff cuts throughout the system, primarily through attrition and early retirement, to contain expenses.

Long KR's most profitable newspaper, the *Miami Herald*, suffered a year-to-year drop in ROP linage of 4.7%, a drop KR officials connect to Dade County's soft economy. Its share of KR operating revenue dropped from 16% in 1985 to 15% in 1986. According to the ABC FAS-FAX report monitoring average circulation for March 31, 1987, circulation at the daily *Herald* fell to 437,233, down 4.7% from the year earlier period, and dropped 2.3% to 546,980 for Sunday.

KR serves 184,000 cable tv subscribers in New Jersey and New York through its TKR Cable company, up 7.6% from 171,000 in 1985. The company is a joint venture with Tele-Communications. TKR purchased in April 1987 three additional cable systems representing 55,000 additional subscribers. The systems were in Ramapo, N.Y., and Warwick and Wildwood, N.J. KR treats cable returns on an equity basis, folding 50% of the joint-venture earnings into its income.

KR's Business Information Systems division generated 5% of revenues in 1986, mainly from its Commodity News Service. Another division publication is the five day a week *Journal of Commerce*, a New York-based trade and transportation newspaper. The company's HP Books, a how-to book publishing company, is being sold in July, 1987, to Price/Stern/Sloan Publishers in Los Angeles. Some early forays into mobile phones and videotext were disbanded in 1986.

Boss reaps bounty

Warner Communications' chairman-CEO Steven J. Ross is reaping the rewards of Warner's strong fiscal performance under his new 10-year contract that provides Mr. Ross a base salary of $800,000 a year, $400,000 a year in deferred compensation, a bonus of 1% of the company's net income each year and a long-term bonus in cash tied to Warner's stock and earnings. If the full-year's performance ends up reflecting first quarter 1987 results, Mr. Ross truly will be a rich man. In the first quarter 1987, Warner's net profit rose 115% to $66 million.

Kohlberg Kravis Roberts & Co., New York, is seeking to divest what is left of the media properties it obtained from Storer Communications and Wometco Cable in leveraged buyouts that totaled $3.2 billion.

Following the logical course of a leveraged buyout, KKR is selling off these assets to cover the cost of the buyout and make a profit. Since the acquisition of the two Miami-based companies—Storer in 1985 and Wometco in 1984—KKR has sold or is in the process of selling parts of these properties for more than $3 billion.

KKR currently is negotiating a media divestiture of 50% interest in six TV stations with Gillett Holdings, Nashville, Tenn., for $650 million. Gillett, which is becoming a major broadcasting concern itself, will have operating control over the stations and the right to buy KKR's remaining interest should KKR decide to sell. As part of the agreement, Gillette also will manage Storer Television Sales, a TV rep; Storer Programs, a TV programming unit; and a Washington news bureau. The agreement is expected to be finalized by July.

Included in the transaction is WAGA-TV, Atlanta; WJW-TV, Cleveland; WJBK-TV, Detroit; WITI-TV, Milwaukee; KCST-TV, San Diego; and WSBK-TV, Boston—the stations that were included in a deal with Lorimar Telepictures that fell through late last year when a final agreement could not be reached.

The only other Storer TV property is WTVG-TV in Toledo, which the company is expected to sell to Buddy Ray, president and general manager of Toledo Television and Terry Lee, chairman/president-ceo of SCI Holdings, for an estimated $65 million. SCI is the KKR-created parent company of Storer.

In a finalized sale, KKR unloaded the Wometco cable systems, which had estimated revenues of $120 million, to a joint venture headed by Robert M. Bass Group for $625 million. Included in the venture is Taft Broadcasting, in which Mr. Bass has a 24.9% interest, and members of Wometco Cable management.

Wometco Cable includes 41 systems serving 350,000 subscribers largely in the South.

KKR also sold for $270 million in cash the former Wometco station, WTVJ-TV in Miami, to General Electric, parent company of NBC. The station is a CBS affiliate and NBC is currently in an affiliation contract with WSVN-TV, Miami, that it is expected to break soon, leaving CBS without an affiliate in one of the industry's major markets.

WSVN-TV could drop in value $100 million or more if CBS does not link with it, because it would be forced to go independent, some analysts believe.

Two small Wometco tv stations, WWHT (now WHSE) in Newark, N.J., and WSNL (now WHSI) in Smithtown, N.Y., were sold to Silver King Broadcasting, a subsidiary of Home Shopping Network, in October for $25 million.

Storer Cable is KKR's largest media asset not yet being sold. The company did, however, divest all systems in Arizona, California, Minnesota, Oregon, and parts of New Jersey last year for a total of $329 million. Without these systems, Storer cable had 1.3 million subscribers and revenues of $416.7 million in 1986.

Besides this revenue, KKR's total includes returns from its seven Storer stations of $232 million, and $15 million from Wometco TV station WLOS, Asheville, N.C./Greenville-Spartanburg, S.C. which was sold to Anchor Media, St. Petersburg, Fla. on April 30, 1987, for $55 million.

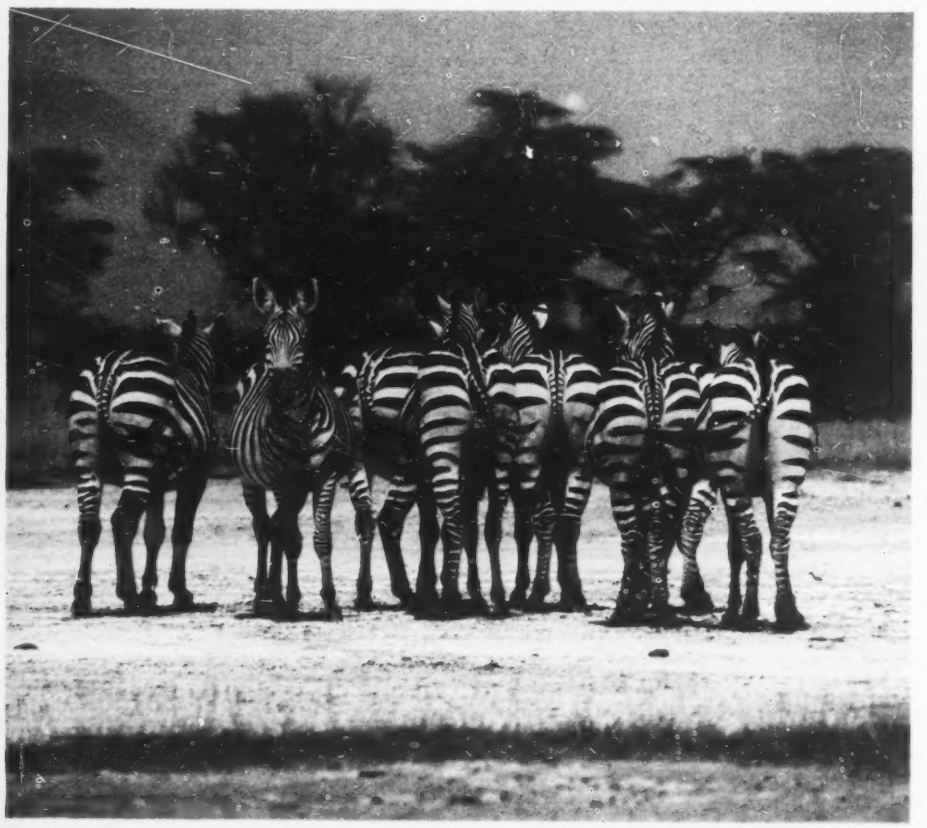
Steady growth in each of Landmark Communications media divisions led to a 12% increase in revenues over 1985. Leading the growth surge was the Weather Channel based in Atlanta.

While Landmark's efforts at acquiring an additional major metropolitan TV station were thwarted, the Norfolk, Va.-based company expanded its community newspaper operation and also formed a new division—Classified Advertising Publications.

The 24-hour Weather Channel now reaches 27 million households, compared with 20 million at the end of 1985. Cable systems under contract

BIG GAME HUNTERS



. . .set your sights in
THE RIGHT DIRECTION!

Don't get behind in your business decisions by choosing just any printer to produce your game promotion.

Be the one going in the right direction by calling Chicago Lithographing Company to guide you through the game card territory. Our only business is manufacturing security games of chance for advertising, sales promotion and marketing agencies.

We have printed billions of Profit Tickets, including scratch-off, break-open and punch-out style, for satisfied customers throughout the world.

Chicago Lithographing Company's extensive facilities offer everything from high speed multi-color printing to sophisticated numbering, perforating, die-cutting and collating—and the controls to help you produce secure hidden image games. We'll even compute the odds and handle the dispersion of prizes. Added to each job are security, distribution and on-time delivery.

Big game and small game hunters are invited to talk to the single source professionals who know the terrain.

rose to about 2,750 from 1,962 in 1985. During the year, subscriber fees were increased, generating an estimated $13 million in 1986. Ad revenues also continued to rise, says TWC Chairman John Wynn, noting that year-to-date 1987 revenues were up 30%. The company predicts subscriptions will grow 50% in 1987.

Landmark is primarily a publications company, with print operations providing 84% of total revenues. Newspaper revenues grew 12% for the year. The backbone of the company's newspaper operations are three dailies, each operated a separate division: the *Greensboro* (N.C.) *News & Record*, *Norfolk Virginian-Pilot* and *Ledger Star* and Roanoke (Va.) *Times & World News*.

The three papers had combined daily circulation in 1986 of 258,477, Saturday circulation of 355,710, and Sunday, 483,486. Circulation was up only slightly at the papers in 1986, and although revenue increases were steady, they failed to meet budget expectations, says Landmark VP E.C. Oldfield.

In February 1986 the *Greensboro News & Record* discontinued its afternoon edition, combining elements of both editions into the morning paper. The morning and evening *Roanoke Times & World News* completed its conversion to offset presses and its move into a new distribution center. The division's largest newspaper, *Richmond* (Va.) *Times-Dispatch*, had March 31, 1987, circulation of 141,544, up 1.2%. Sunday circulation was 245,741, up 2.3%.

Landmark Community Newspapers added seven papers to its non-daily portfolio. The division includes 34 newspapers with combined circulation of 210,286. Five of the papers are dailies, the latest conversion being the *Citrus County Chronicle*, Inverness, Fla., which in September went from a tri-weekly to a Sunday-through-Friday publishing schedule with circulation of 14,090.

In November, Landmark purchased the *Roane County News*, a 7,000 circulation tri-weekly in Kingston, Tenn. The purchase included three weeklies: *Rockwood Times*, *Harriman Record* and *Morgan County News* in Wartburg.

In March 1987, three additional non-dailies in Kentucky were bought from Scripps Howard: *Kentucky Standard*, Bardstown, *Pioneer News*, Shepherdsville, and *Grant County News*, New Castle.

Early in 1986, Landmark formed its new Classified Advertising Publications division, with the purchase of seven *Tradin' Times* classified publications in Illinois, Michigan, Minnesota, Missouri, Ohio and Pennsylvania.

McClatchy Newspapers expects to be nearly 100% print-oriented by the end of this year when it sells off its four remaining broadcast properties. The Sacramento, Calif.-based company, which had an estimated 12.7% increase in media revenues in 1986, will divest four profitable cable systems and a perennially losing videotex operation during the year as a prelude to the broadcast selloff.

McClatchy is intensifying its concentration on newspapers (seven dailies and three weeklies). It purchased the daily *Tacoma* (Wash.) *News Tribune* and the weekly *Pierce County* (Wash.) *Herald* from Tribune Co. in 1986 for an estimated $112 million. The papers were part of a $205 million sale that included Tribune's cable and tv properties, which went to Viacom.

The *News Tribune* joined the McClatchy newspaper fold on Aug. 1, 1986 and shifted this April to a morning publication. The *News Tribune*, the lone Tacoma daily, has a circulation of 110,184 daily, up 2.3%, and 122,948 Sunday, up 3.2%, according to ABC FAS-FAX figures comparing March 31, 1987 with the same period in 1986.

To finance the Tacoma purchase, McClatchy sold for an estimated $127 million four cable systems with 86,000 subscribers to Continental Cablevision, Boston. The systems encompassed Reno, Nev., and in California, Fresno, Marysville/Yuba City and Visalia.

McClatchy's lead properties are its *Bee* papers, the *Sacramento Bee*, *Fresno Bee* and *Modesto Bee*, all morning dailies. ABC FAS-FAX reports comparing the March 31, 1987 period with the same period in 1986, show Sacramento circulation of 245,377 daily, up 4%, and 289,083 Sunday, up 5.5%; Fresno circulation of 139,888 daily, up 0.5%, and 166,899 Sunday, down 0.06%, and Modesto circulation of 75,675 daily, up 1.9% and 81,592 Sunday, up 0.7%. While the Fresno and Modesto papers have no head-on competition, the Sacramento paper competes with the much smaller *Sacramento Union*, also a morning paper, which had daily circulation of 90,888, down 3.4%, and 89,561 Sunday, down 3.6%.

Currently on the media selling block are McClatchy's four California radio properties, which the company hopes to sell as a package before the end of the year. Asking price was not disclosed. Also, it is selling its commercial printing operation in Clovis, Calif., a Fresno suburb. The plant accounts for $5 million in revenues annually.

The company's electronic communications division has continued to shrink with the closure of the El Dorado Teleguide, a public-access videotex information service begun in 1984.

McGraw-Hill recorded operating profit increases for all segments in 1986 except its Publications Co., the divisional home of MH's lead publication, *Business Week*.

The group—one of four segments contributing to media revenues as defined in this issue—returned operating income of $42.2 million, down 11.9%, on revenues of $318.2 million, up 1.7%.

Returns by *Business Week*, one of some 60 magazines in the publications group, which also oversees newsletters and newswires, were symptomatic of the problems besetting the magazine field in general. The publication sold 3,893 pages in 1986, 7.6% fewer than in 1985, representing $166.6 million in gross ad revenues, up 1.5%, according to Publishers Information Bureau.

Despite a difficult advertising market for much of the year, *Business Week* increased its market share and carried more ad pages than any other magazine measured by PIB, and ranked No. 1 in ad revenues among business magazines. However, *Business Week* profits declined because of on-going enhancements to the editorial quality and design and investments to strengthen the subscriber base.

A turnaround at the publication has begun in 1987. In the first quarter 1987, gross ad revenues have grown 10.4% to $38.8 million on a 3.8% growth in ad pages to 847, reports PIB. Circulation also has jumped from 860,000 in January 1987 to 902,000 in May, according to Standard Rate & Data Service.

Within the publications segment, McGraw-Hill acquired *Industrial Chemical News*. In 1987 the magazine was redesigned and renamed *Industrial Chemist*.

New York-based McGraw-Hill in 1986 had overall growth in net income of 4.8%, and a 5.7% increase in operating revenue from 1985. Net income growth, while modest, still outpaced the year-to-year growth from 1984 to 1985 of 2.2%.

McGraw-Hill Information Systems Co., which consists of two market-focus groups aimed at the construction and computer markets, had revenues of $366.1 million, up 3.8%, and $94.2 million in operating profit, up 5.4% in 1986 over 1985. Within this group the corporation acquired Construction Information Systems and LSI Systems, both building-products databases.

Standard & Poor's Corp. (formerly McGraw-Hill Financial & Business Information group) was restructured in 1986 to create two operating companies: Standard & Poor's Corporate Information Co. and the Financial & Economic Information Co. Together, they had revenues of $311.9 million, up 10.6%, and operating profit of $74.7 million, up 17.2%.

Broadcasting Co., comprising four TV stations in regional markets, had revenues of $92.9 million for the year, up 11.5%, and operating profit of $32 million, up 16.3%.

McGraw-Hill made several acquisitions and expansions in the magazine field, but most took place abroad, notably in China. In May 1986, McGraw-Hill acquired the telecommunications tariff information services and related assets of Telcom MIS, used by telecommunications managers and vendors for network planning and competitive analysis.

McGraw-Hill Book Co. is the only non-media contributor at the company. Its revenues of $487.7 million in 1986 were up 6%, and operating profits of $71.8 million, up 6.4%.

Other	—	—	—

Media General, which is upgrading its media hardware—$45 million in presses at the *Tampa Tribune*, ongoing $200 million cable system construction in northern Virginia, and new TV towers in Tampa, Fla., and Charleston, S.C.—wrote off much of the equipment made obsolete by these improvements in 1986, along with some TV syndication rights, in posting a $16.8 million after-tax charge that reduced earnings 48.4% to $17 million on sales of $635 million, up 10%.

For the first quarter 1987, revenues were up 10% over 1986 to $167 million, and net income was up 16% to $8 million.

During the year, the Richmond, Va.-based company's three large morning dailies showed daily circulation increases with only the afternoon daily, the *Richmond* (Va.) *News-Leader* showing a decline.

The ABC FAS-FAX figures for March 31, 1987 compared to prior year averages show the morning *Richmond* (Va.) *Times-Dispatch*, up 1.1% to 141,544; the morning *Winston-Salem* (N.C.) *Journal*, virtually even at 91,571; *Tampa* (Fla). *Tribune*, up 8.6% to 248,415, and the evening *Richmond* (Va.) *News-Leader*, down 1.9% to 109,103.

VP David L. Jordan says Media General, which folded a circulation-losing afternoon paper in Winston-Salem in 1985, had no plans to drop the *News-Leader*, which he termed "a pretty viable newspaper." In the Richmond area, he says, its circulation is larger than that of the *Times-Dispatch*, which depends on statewide readership. "But being an evening newspaper, you can't get it to northern Virginia."

Newspaper revenues were up in all three cities. Garden State Newspapers, in which Media General has a 40% interest, added 13 dailies and several weeklies in 1986, to bring its total to 18 small-to-medium-size dailies and eight weeklies. Media General also owns a string of weeklies in southern California, some of which struggle against fierce competition. Seven of them were folded or converted to shoppers in 1986.

The company also provides electronic database services and several small special-interest magazines. Sales for this division were down, but initial response to a new glossy, free-distribution monthly, *Virginia Business*, has the company considering moving it to a paid basis.

Subscribers to the new Fairfax cable system along Virginia's northern border number 140,000. They pay an average $32 for services, a rate far above the norm. Subscriptions did not drop in the high-income bedroom community near Washington after a 22% rate increase went into effect the beginning of the year. Media General expects the system to show a positive cash flow this year for the first time.

Media News Group, Woodbury, N.J., made the biggest acquisition in its four-year history when it purchased the *Dallas Times Herald* on Sept. 1, 1986, for $110 million in cash and notes.

The purchase of three other smaller newspapers in 1986 brought the total owned by the newspaper chain to 24. Acquisitions, particularly that of the *Times Herald*, lifted companywide revenues to $375 million in 1986, almost 2½ times what it was the previous year.

Media News is composed entirely of newspapers, most in the 10,000-circulation range. The policy of President William Dean Singleton, until now, has been to buy foundering small- or medium-circulation dailies and return them to profitability via automation and aggressive cost-cutting.

His reputation clearly had some employees nervous, especially after more than 100 *Times Herald* employees were laid off or given early retirement less than a week after the newspaper was sold.

However, Tony Tierno, a financial officer in the Woodbury, N.J., home office, says, "The Dallas economy is that way right now. Other Dallas papers have had staff trims too." The competing *Dallas Morning News* in the early months of 1987 has eliminated 120 positions.

In September 1986 Media News purchased the *Alameda* (Calif.) *Times-Star* for an undisclosed sum. The circulation has been boosted from 8,200 to 9,000 since the takeover, according to ABC. On December 29, 1986, MNG purchased the *Bristol* (Conn.) *Press*, a daily with circulation of 19,826 on March 31, 1987, down 1.3% from the prior year, according to ABC FAX-FAX reports.

In February, 1986, MNG bought the *Elizabeth* (N.J.) *Daily Journal* with a circulation of 31,000. Circulation has risen since the purchase to 32,000.

Gloucester Suburban Newspapers, part of the New Jersey-based Media News Group, in July 1986 purchased the *Blackfoot Morning News*, a daily in southeastern Idaho. Terms of the Idaho sale were not disclosed. Gloucester is owned by Peter Bernhard of Salt Lake City and Mr. Singleton. Mr. Bernhard is president of Green Sheet Newspapers, a group of seven weeklies published in the region of Salt Lake City.

Media News Group is 40% owned by Media General of Richmond, Va. Media General also owns Garden State Newsprint, which sells recycled newsprint to publications, including those owned by Media News Group.

Meredith Corp. continues to refocus on its primary businesses—national advertiser-supported magazine publishing and broadcasting—primarily through divestiture.

In 1986, the Des Moines, Iowa-based company sold its Los Angeles and San Jose, Calif., weekly newspapers and all but one of its nine Texas, Louisiana and Arkansas-based Star cable TV systems. It also divested its percentage ownership in *Dallas-Fort Worth Home & Garden* and *Houston Home & Garden*. Meredith is selling its remaining Texas system, and its 82% share of Planned Cable Systems Corp.

Meredith Corp. had media revenues of $390.7 million for the fiscal year ended June 30, 1986, a 9.7% increase from fiscal 1985. Media revenues account for 73% of total company revenues of $533.4 million in 1986, up 12.3%. Companywide earnings were $42.7 million, up 10.5%. The remainder of Meredith's operations are commercial printing and real estate-related activities.

While many magazine publishers are continuing to experience softness in the market—and Meredith is no exception—advertising revenues, accounting for 28% of total net revenues, rose 17% to $151 million in 1986. Subscription and newsstand revenues increased 19%. They represent 22% of total revenues.

Part of Meredith's strategy is to continue to launch new magazines. *Midwest Living*, started from scratch, debuted in February 1987. After three issues, the new every-other-month magazine has met or exceeded projections, including achieving a 400,000 rate base and 142 ad pages for the first three issues.

Ladies' Home Journal, purchased last year from Family Media, has become a fully integrated Meredith product, no longer a wholly owned subsidiary. *LHJ* and lead magazine *Better Homes & Gardens* are now being sold in a combination discount rate card, which gives a 20% discount on open rates to dual advertisers. Publishers Information Bureau shows that *LHJ* had gross ad revenue of $77.1 million, up 0.1%, on 1,337 ad pages, down 1.8% from 1985. *BH & G* sold 1,347 pages, down 1.2%, as gross ad revenue advanced 5.3% to $129.8 million.

Metropolitan Home underwent a facelift (larger format, heavier stock) with the September 1986 issue. Ad rates, newsstand and subscription prices rose accordingly. *MH* sold 683 ad pages, down 11.7%, but higher rates brought gross ad revenues to $14.7 million, up 5.7%.

Farm Computer News, which received good subscriber response, was unable to outlast the agricultural depression and was discontinued.

Meredith continues to realize healthy revenues from its 19 special interest publications.

WPGH-TV, Pittsburgh, was sold to Lorimar-Telepictures, although Meredith plans to add broadcast properties in Sunbelt areas up to FCC limits.

The company had a 13% growth in revenues to $442.3 million for the three quarters of fiscal 1987, which ends June 30, although net earnings dropped 31.7% to $25.6 million during the period—the latter a factor of lower year-to-date profits from printing, book and broadcasting operations and special items charged against earnings.

Privately held Morris Communications Corp., experienced an estimated 3% real growth in media print revenues in 1986, although total media sales grew substantially because of a full-year inclusion of Naegele Outdoor Cos., acquired in July 1985.

While nothing in the last 12 months compares with the boost to sales given by Naegele, Morris has moved to solidify its already substantial position in its several markets.

Morris, which publishes the South's oldest newspaper, the *Augusta* (Ga.) *Chronicle*, established in 1785, experienced flat to slight declines in circulation not only for the *Chronicle* but for the other morning, evening and weekend Morris dailies in Jacksonville, Athens, Augusta, and Savannah, Ga., and Amarillo and Lubbock, Tex.

Morris seeks to maintain growth through clustering newspaper and printing operations in its markets. For example, in the Jacksonville area, Morris publishes the port city's only daily papers, the morning *Florida Times-Union* and evening *Journal*, and also the evening *St. Augustine Record*, circulating about 13,000 in that retirement and tourist area, and the weekly *Putnam County Courier Journal*, to the south in Crescent City, Fla. In addition, St. John Publishing Co., operating at the *St. Augustine Record* production plant, turns out commercial printing, including newsprint marketing supplements for the *Record's* advertisers.

Similarly, Hartwell Publications in Hartwell, Ga., serves Morris ad clients in its Athens, Ga., marketing area. Besides its morning *Daily News* and evening *Banner-Herald* in Athens, Morris publishes in surrounding counties the semiweekly *Elberton* (Ga.) *Star-Beacon*, and two weeklies, the *News Leader* in Royston and the *Sun* in Hartwell.

The biggest of these ancillary printing operations is in Amarillo, where Morris owns the city's two dailies, the

Mags rev up Knapp returns

Unlike many other magazine companies that experienced flat to declining advertising in 1986, Knapp got sterling performances from its big three—*Architectural Digest, Bon Appetit* and *Home*—which gave the Los Angeles-based company a year-to-year 15.1% increase in net media revenues.

COME TO RHODE ISLAND AND SEE IF YOUR CHICKEN CAN FLY ACROSS AMERICA.

A company like Weaver doesn't launch new products on a wing and a prayer. To find out how their new chicken specialties would fly nationally, they rolled out their Zesty Wing line extension in Rhode Island. Because Rhode Island's a near-perfect microcosm of America. With demographic and economic profiles that are remarkably close to the national norm. What's more, the market's virtually immune to media spillage. And it's extremely cost-efficient. You can reach practically everyone in the market through Rhode Island's only major newspaper. At a CPM that's mere chicken feed. So if you're introducing something new to America, don't run around like a chicken with its head chopped off. Come to Rhode Island. Call Bill Peckham at 401-277-7172 or write and ask for our free test market information kit.

Other	—	—	—

At Multimedia Inc., revenues have continued to climb despite softness in the ad market, enabling the company to retire debt resulting from a 1985 recapitalization at a much faster rate than anticipated.

Revenues at the Greenville, S.C.-based company were up 10.7% in 1986 to $372 million. The trend continues with first quarter 1987 sales of $89.8 million, up 9.7% over the first quarter a year ago.

Applying 1986's increased revenues to the debt resulted in a net loss for the year of $5 million, down from net gain of $22 million in 1985 but contrasted favorably with the $19 million the company had expected to lose in 1986. A profit is predicted for 1987, something previously considered unlikely.

Because of the debt payment, President-CEO Walter E. Bartlett says Multimedia has no plans to acquire properties or pay dividends. "We are keeping our capital spending very tight."

There are 14 daily and 33 non-daily newspapers, five TV and eight radio stations, nearly 100 cable franchises in Kansas, Illinois, North Carolina and Oklahoma, and an entertainment division producing syndicated TV daytime talk shows bearing the names of their hosts, Phil Donahue and Sally Jessy Raphael.

During the year, four small cable systems in Kansas adjacent to franchises already owned were bought, in line with Multimedia's preference for clustering its cable systems.

WWNC-AM, a country music station in Asheville, N.C., with a whopping 35% market share, is being sold. An agreement has been reached in which Heritage Broadcast Group will buy the station for $7.3 million. Heritage operates WKST-FM and WISE-AM in Asheville.

Basic cable subscribers in the four states served numbered 294,000 by the end of 1986, and pay subscribers, 260,000. Revenues of $81 million in 1986 were up 9% over 1985.

All four network-affiliated TV stations were tops in their markets in the February Nielsen ratings, says Mr. Lynagh, and the only independent station, WZTV in Nashville, was No. 1 among independents in its market. TV-radio station revenues were up 11% in 1986, to $119.3 million.

The U.S. contribution to worldwide media operations of News Corp. Ltd. controlled by Rupert Murdoch, continues to escalate following the purchase of seven TV stations and the forging of a new TV network in 1986.

Of worldwide total revenues in the fiscal year ended last June 30, 1986, U.S. holdings, largely in media, contributed $1.31 billion, or 49% of worldwide revenues of $2.67 billion. World revenues were up 40.5%, and net profit was $169.9 million, up 128%, over the prior year. News Corp. is ranked in this issue on its U.S. holdings.

Media acquisitions during calendar 1986, however, sent U.S. contributions to News Corp.'s fiscal performance soaring in the current fiscal year. In the first nine months of fiscal 1987, the U.S. portion, largely in new media activity, rose to $1.46 billion or 58% of worldwide revenues of $2.52 billion. The U.S. accounted for 61% of worldwide net profit of $147.1 million, or $89.7 million for the three quarters. For the period, worldwide revenues were up 34%, and net profit up 50% over 1986 levels.

The big contribution to year-to-year growth at News Corp. was the $1.55 billion purchase in 1986 of six of seven major market TV stations from Metromedia Inc. The stations, with the addition of WXNE-TV in Boston, now WFXT-TV, have a 23.9% coverage of all U.S. TV households.

In 1986, News Corp. restructured its TV and entertainment holdings into three principal groups: Twentieth Century Fox film; Fox TV Stations, and Fox Broadcasting Co., which late in 1986 became the nation's fourth commerical broadcast network.

FBC was launched in May and rolled out by October when "The Late Show with Joan Rivers" hit the air. By June 1987, however, internal disputes about content and format and a continual ratings erosion led to Ms. Rivers leaving her post as permanant host. Meantime, FBC's prime-time programming, which to date had been confined to Sunday nights, delivered an audience under projections.

News America Publishing, the umbrella for News Corp.'s U.S. print holdings, had revenue gains from magazine and newspaper operations.

Elle, News Corp.'s 50% joint venture with Hachette, the French publishing house, increased ad pages 342.4% to 1,417 and ad revenues 535.9% to $15.86 million during calendar 1986, according to Publishers Information Bureau. Among other News Corp. titles, *Star* increased revenues 12.4% to $13.9 million against an ad page loss of 8.5%; *New Woman* was up 30.8% in pages and 49.3% in revenues to $10 million; *European Travel & Life* was up 97% (there were only four issues in 1985) in ad revenue to $1.7 million. Ad pages were flat at *New York,* with revenues up 7.8% to $41.3 million. Ad revenues at *Automobile,* in its first full year of publication, reached $3.3 million.

In newspapers, News Corp. sold the *Chicago Sun-Times* to an investor group headed by the paper's publisher, Robert Page, for $145 million., after News Corp. had bought WFLD-TV in Chicago in the deal with Metromedia. It then sold its news syndicate, News America Syndicate, to Hearst Corp.

In Boston, the *Herald* was running at break-even for the first time in years. News Corp. will be forced to seek a waiver from the cross-ownership laws or sell the paper because it bought WFXT-TV in Boston.

In New York, the *Post* lost an estimated $10 million in 1986. It, too, must be sold or a waiver sought from the cross-ownership laws because WYNY-TV was acquired from Metromedia.

The guard changed in late 1986 at the *New York Times* when Max Frankel was named to succeed A.M. Rosenthal as executive editor, a position Mr. Rosenthal had held since 1977.

Mr. Frankel, who had been editorial page editor since 1976, assumes the new post with a company in strong financial position. For calendar 1986, New York Times Co. had revenues of $1.57 billion, up 14.3% from 1985. Net income increased 13.7% to $132.2 million. For the first quarter of 1987 revenues were $409 million, up 9%. Net income was $41.1 million, up 21%.

Revenues in the newspaper group, consisting of the *Times* and 32 regional papers, were $1.25 billion, up 13%, while operating profits rose 25%, to $245.4 million. Ad linage at the *Times* rose 5.9%, to 118 million lines. The *Times Magazine* topped all magazines in total ad pages for the second straight year, with 4,127 pages.

Average daily circulation topped a million for the first time on weekdays, rising 2.6% to 1,019,000. Sunday circulation increased 0.3% to 1,604,000. For the first quarter, the *Times'* ad linage rose 7.9%, compared with 1986.

The *Times'* regional newspapers suffered from sluggish advertising. Ad volume declined 1% to 15.9 million inches for the 27 papers the company had for the full years of 1985 and 1986. That excludes five papers purchased during 1985. The trend continued in the first quarter, as ad volume for all 32 papers slipped 3.1%.

Revenues in the magazine operations rose 1% for the year, to $219.2 million, although operating profits moved ahead 44.5% to $25.5 million. The company attributed that gain to a good showing by *Golf Digest* and tighter operations and distribution.

Family Circle underwent extensive staff shifts on the business and editorial sides as ad pages slipped 3.3% to 1,792. Circulation dropped 2.5%.

Family Circle began publishing a quarterly in 1986 called *Decorating Remodeling.* It had average circulation of 457,000 and carried 135 ad pages.

The Broadcasting/Cable TV Group boosted revenues 36%, to $93.1 million, while operating profit increased 30% to $14.3 million. The results included full-year returns from two TV stations acquired in 1985, bringing the total to five. The cable operations, serving 56 communities in New Jersey, rose 7.7% in subscribers to 140,000.

Most of the growth in 1986 at Oklahoma Publishing Co., Oklahoma City, is attributed to a 300% increase in revenues from The Nashville Network cable operations. TNN sales ballooned from $15 million in 1985 to $60 million in 1986, says Oklahoma Publishing President Edward L. Gaylord.

Oklahoma Publishing, which grew 21% in revenues to $500 million, gained the cable network in 1983 when it purchased the Grand Ole Opry, Nashville. The Opryland Hotel, Opryland theme park, cable station and production company were included in the package. TNN has more than 33 million subscribers, up 20% from 1985.

The private company, known as Opubco, closely guards its financial information. Other income comes from newspapers, broadcasting, electronic database services and other operations.

Broadcast sales were up slightly in 1986, says Mr. Gaylord, but newspaper sales were down 12.3% to about $135 million because of the $30 million sale in 1986 of the *Colorado Springs* (Colo.) *Sun*, to Freedom Newspapers, Santa Ana, Calif., which publishes the rival Colorado Springs *Gazette Telegraph*. Freedom ceased publication of the *Sun* in February 1986.

The flagship, *Oklahoman & Times* and *Sunday Oklahoman*, according to ABC FAS-FAX reports covering the six-months ended March 31, 1987 had daily circulation at 239,024, a slight dip from a year ago, and Sunday circulation of 334,615, up 1.8%.

Gaylord Broadcasting Co., the broadcast division, currently is selling two units in 1987. CBS-affiliate WTVT-TV, Tampa, Fla., expected to close this June, will go to an investment group that includes Nashville-based George Gillett and Clarence V. McKee, a Washington communications attorney at Pepper & Corrazzini, the law firm handling most FCC matters for the 10 TV stations owned by Mr. Gillett. Price is $365 million. Gaylord is also in the process of selling WVUE-TV, an ABC affiliate in New Orleans, for $60 million to Burnham Broadcasting, Chicago. That sale is expected to close in October.

On completion of these divestitures, Gaylord will be left with five independent stations. Last year, the company indicated that two of the independents, KSTW-TV, Tacoma/Seattle, Wash., and WVTV-TV, Milwaukee, might also be on the block.

DataTimes, the electronic database news retrieval subsidiary of Opubco's Datatek Corp., has grown to include full-text electronic libraries of 30 newspapers, with 15 more scheduled to sign on this fall. DataTimes now serves about 3,000 subscribers, says Allen Paschal, Datatek VP.

A new database, Business Dateline, is the combined effort of Dow Jones News/Retrieval and UMI/Data Courier. Selected full-text articles from business journals are now available to DataTimes customers.

Opubco owns a 35% stake in the Texas Rangers baseball team, located in Arlington, Tex. Gaylord's KTVT-TV in Dallas-Fort Worth has TV rights for the baseball team.

Pulitzer Publishing Co.'s revenues soared 21% in 1986, but net income fell 18% as the company fought off a hostile takeover attempt, which ended with the $187.4 million buyout of dissident Pulitzer relatives who had attempted to force the company's sale.

The 109-year-old family company, traditionally secretive about its business affairs, opened its doors just a crack when it offered 1.4 million common shares to the public in December 1986, but it kept control in the hands of family members.

Some 98% of the voting power is consolidated in a voting trust controlled by chairman Joseph Pulitzer Jr., his half-brother, Michael Pulitzer, president of the company, and a cousin, David Moore—all three grandsons of the founder, the late Joseph Pulitzer.

Revenues in the first quarter calendar 1987 rose 22% to $83.7 million fueled by gains in publishing. Much of that growth came from the *St. Louis Post-Dispatch*, which stands alone as St. Louis' only daily since the October shutdown of the *Globe-Democrat*. Returns also included revenues contributed by the Southtown Economist Newspapers, a Chicago community newspaper group bought in April 1986.

First quarter net income fell to $1.5 million, down 56.2% from a year earlier. Cited were higher interest expenses and costs related to the purchase of the Southtown Economist group, the latter of which will continue to depress income through 1988, says the company.

The *Post-Dispatch* already is reaping the benefits of its new monopoly status. In January it increased ad rates about 8%. ABC FAS-FAX reports comparing March 31, 1987 with the year-earlier period placed daily circulation at 357,314, up 12.2%, and Sunday at 548,955, up 5.7%. Full-run advertising linage grew 9.3% in 1986 with classified rising 17.9%, a reflection of a strong year in auto and home sales.

Officials say the *Post-Dispatch* continues to increase penetration in St. Louis city and county, and expect daily circulation to reach 400,000 by the end of the year. But "we don't see a lot of new retail outlets coming in," says Nicholas Penniman IV, senior vp-newspaper operations.

The company moved aggressively into the Chicago suburbs in 1985-86 when it bought two local chains—Lerner Newspapers for $9 million and Southtown Economist group for $40 million. Pulitzer hoped to build a ring of suburban papers in Chicago akin to the blanket market coverage of Ingersoll Publishing in suburban St. Louis, but abandoned the strategy because of Chicago's size.

Southtown's unaudited paid daily circulation grew from 18,433 early last year to 30,600 in May while Sunday circulation in the same period increased by 11,600 to 46,000, says Mr. Penniman.

The daily circulation of Pulitzer's Tucson morning paper, the *Arizona Daily Star*, grew to 87,571 as of March 31, 1987, up 9% from a six-month average pulled March 31, 1986, according to ABC FAS-FAX reports.

Reader's Digest Assn. acquired *Travel/Holiday* magazine at the end of 1986, and in April sold The Source, a computer-based information service, in keeping with a new strategy of staying within four core business lines adopted by a new management team headed by Chairman-CEO, George Grune and Chief Operating Officer Richard McLoughlin.

RD lists those four core areas as magazines, recorded music, direct mail and book publishing, the latter being the largest revenue-generator and accounting for 44% of Reader's Digest's $1.4 billion in worldwide net revenues.

At the end of last year, Pleasantville, N.Y.-based Reader's Digest took a major step in expanding its magazine business—35% of total revenue—when it purchased the monthly *Travel/Holiday* from owner-publisher Sheldon Shane. Advertising gross revenues for the monthly were $6.2 million, up 1.4% over 1985, according to Publishers Information Bureau. Ad pages, however, dropped 5.7% to 432. Headquartered in Floral Park, N.Y., *Travel/Holiday* dates to 1901. Current circulation is 780,000.

Mr. Grune says travel is "a consistently strong industry, even in tough times," in citing RD's interest. The magazine also has similar demographic features to *Reader's Digest*, thereby contributing to the company's direct mail core of 16.3 million subscribers. RD records more than $1 billion in revenues annually through direct mail.

This April Welsh, Carson, Anderson & Stowe, a venture-capital company, bought RD's 80% stake in Source, the computer-based information service headquartered in McLean, Va. Source serves more than 100,000 personal computer users and generated over $14 million in revenues last year.

Reader's Digest cut its rate base last year to 16,250,000 and lowered ad rates 3%, which improved profitability, according to Craig Louder, public relations director of the company. Ad pages grew 12.3% in 1986 to 1,203, according to PIB, although gross ad revenue dropped 1% to $109.4 million.

Scripps Howard entered the media-swapping business this year to enhance an acquisition made last year when SH purchased *Naples* (Fla.) *Daily News*. The acquisition gained further significance when SH traded nine weeklies in suburban St. Petersburg and Tampa in April 1987 for eight weeklies in and around Naples and Fort Myers to the north owned by Tribune Co. The trade gave both media companies contiguous media properties grouped around major newspapers.

Scripps Howard in July 1986 gained full ownership of TeleScripps Cable Co. by buying out the 50% interest of partner, Tele-Communications, for $78 million. TeleScripps serves 375,000 basic subscribers.

Scripps Howard Broadcasting, SH's publicly held broadcast unit, purchased WXYZ-TV, an ABC affiliate in Detroit, and WFTS-TV, a Tampa independent, from Capital Cities/ABC for $246 million. The purchases, folded into operations January 1986, largely influenced growth in total reve-

nues at the broadcast company of 56.5% to $210.5 million in 1986, and the drop in net income from $30.9 million in 1985 to $5.5 million because of higher interest payments and costs related to the purchases.

In September the company completed its merger with the John P. Scripps newspaper group, controlled by a different branch of the family. The merger added six dailies and four non-dailies in California, plus a daily in Washington.

At yearend, the company received $24 million in stock of American City Business Journals, Kansas City, Mo., for its 11 metropolitan business journals and three magazines comprising its Scripps Howard Business Journals group.

Three major shareholder groups of Taft Broadcasting Co. have put aside their apparent differences over the company's future and agreed to go their separate ways. As a result, Taft is expected to be acquired by a subsidiary of Carl H. Lindner's American Financial Corp. and continue to operate out of Cincinnati, though under a new corporate name, according to a board decision this month. Stockholder and regulatory approval still are required.

Taft's cable interests—with 544,000 basic subscribers—will likely operate as a separate entity.

Taft's strategic direction has been uncertain ever since investment partnerships associated with Texas financier Robert M. Bass began acquiring a stake in the company in 1985. Mr. Bass, who gained four seats on Taft's board in July 1986, eventually bought almost 25% of the company's stock.

Mr. Lindner, who has held large stakes in other media companies over the past decade, joined the fray in mid-1986, accumulating more than 16% of Taft's stock.

The third major shareholder group is the Taft family, which owned about 12% of Taft's stock as of 1986. It is represented on the board by three family members, including Dudley S. Taft, son of the company's founder. Dudley Taft stepped down as president-chief operating officer in July 1986 and was named vice chairman.

All three groups, controlling more than an aggregate 46% of Taft's stock, formed a partnership to take Taft private for $157 a share. Under the agreement reached by directors the company will become a subsidiary of general partner FMI Financial Corp., a publicly traded subsidiary 72% owned by American Financial.

Taft's cable properties—BT Cable, a partnership formed by Taft and the Bass group to acquire Wometco Cable in December 1986, and Taft Cable Partners, a partnership with Tele-Communications—as well as WTUN-TV in Columbus, Ohio, will come under the Bass group's control. Cable operations generated $11 million in revenue in fiscal 1986, a figure eclipsed in the first three quarters of fiscal 1987.

In a separate agreement, FMI has agreed to sell WGHP-TV in High Point, N.C., to a new entity formed by the Taft family and help it acquire at least one other major-market TV station. FMI will extend a $235 million line of credit, secured in part by the family's partnership interest, to finance further media acquisitions.

In early April, Taft completed the sale of its five independent TV stations—WTAF-TV, Philadelphia, WDCA-TV, Washington, WCIX-TV, Miami, KTXA-TV, Dallas, and KTXH-TV, Houston—to TVX Broadcasting Group for $240 million. Because of poor performance by the Houston and Dallas operations, Taft had been losing money on the independent group.

In radio, Taft in 1986 bought WBCS (AM, FM), Milwaukee, since renamed WLZR (AM, FM), and sold WRLT-FM and WGR-AM in Buffalo.

Reported earnings have continued to be depressed by $750 million in long-term debt, most of which was taken on to finance the acquisition of Gulf Broadcast properties in 1985.

For fiscal 1987 ended March 31, Taft report net revenues of $499.8 million, up 5.5%, and a loss of $53.1 million. Taft's broadcast group, which determines Taft's media ranking in this issue, was down 0.8% to $281.1 million and operating profit dropped 0.3% to $71.8 million. Losses during the year were attributed largely to the sale of its independent stations.

Tele-Communications Inc. broke out of a two-year earnings slump to end 1986 with net income of $72.3 million, up from only $10.1 million in 1985, a growth TCI attributes to gains from the sale and exchange of assets during the year. Earnings also were influenced by the company's expansion of existing systems, a 32.4% jump in basic subscriber levels and increases in rates in its cable TV system.

Beginning in 1987, Englewood, Colo.-based TCI raised its rate structure to offer more basic services to subscribers, says Art Lee, VP-cable operations. Basic rates now run from $10 to $15 per month.

TCI finished stringing its cable for its St. Louis franchise in the fourth quarter of 1986 that passes 130,000 homes, while beginning construction on a Washington, D.C. franchise that will pass 250,000 homes. At the end of the year, TCI was in 45 states.

TCI in June 1986 was one of several buyers of the 135-system Group W Cable from Westinghouse Electric Co. TCI's share was 35 systems in 17 states serving over 645,000 subscribers. The deal, closing in December, did not significantly affect TCI's 1986 returns.

TCI gained another 750,000 basic subscribers and more than 1,000 movie theaters in the last quarter of 1986 when it finalized a 65% stake in United Artists Communications.

In February 1987, TCI entered into a merger agreement with Des Moines-based Heritage Communications, and moved closer in April to that acquisition when it purchased a 6% stake in Heritage from the Robert M. Bass Group for about $48.2 million. At year-end, TCI totaled 4.2 million basic subscribers. That total could jump to 6.2 million subs with the Heritage purchase. TCI had 2.6 million pay subscribers by yearend 1986.

TCI served as one of the 31 investing units that bailed out Ted Turner this June by buying 37.5% of the stock in debt-ridden Turner Broadcasting Systems for $562.5 million. The group was led by TCI's commitment of $175 million.

TCI's largest sale of the year was in the March 1986 sale of its share of TeleScripps Cable Corp. for $78 million to Scripps-Howard Broadcasting Co., the TV and cable subsidiary of Scripps Howard.

During the first quarter of 1987, TCI launched a drive signing up premium subscribers. Called the Pay $2 Promo, it allowed existing subscribers who had not signed up for a pay service to do so at a rate of $2 per month for the initial first year. So far, about 700,000 subscribers have signed up, says Mr. Lee.

TCI lost its court battle against Central Telecommunications Inc., Jefferson City, Mo., when the U.S. Supreme Court refused to hear the case after lower courts had ruled against TCI. TCI was claiming violation of its First Amendment rights. Central was awarded damages of $36 million.

Thomson Newspapers increased sales from U.S. media holdings 9% to $412 million in 1986. Still, the gain is minimal compared with the 26.8% increase of fiscal 1985.

The increase in sales cooled off on a year-to-year basis because Thomson bought fewer newspapers according to James Cole, a media analyst at McCarthy Securities Ltd. in Toronto. "They didn't make acquisitions to the same extent last year primarily because of the prices being high," he says.

However, in the first quarter 1987, Thomson acquired a Minnesota daily and reached an agreement in April to purchase the daily newspaper publishing interests of Clay Communications, including full ownership of three papers and half ownership in another.

Overall fiscal revenue increased 8% to $746 million for the year, with U.S. operations comprising 55% of the total.

In the first quarter 1987, net income of $32.9 million was 13.8% more than the prior year period. U.S. newspaper profits were lower, however, than in the last quarter 1986, although that is expected to pick up through the year, says the company. Overall revenues for the quarter increased 4% to $177.9 million.

A major reason behind Thomson's expansion is its overall financial position: At year end, Thomson's cash and short-term investments equaled $49 million and total debt was only $13 million. "They're debt free at the end of 1986," says Mr. Cole. "This is a company with over C$1 billion and earnings over C$200 million annually. Debt is not a problem with them."

U.S. dollar figures for this profile were converted from Canadian currency at the rate of C$1=$0.7244. The same rate was applied to 1985 figures for comparison. The Canadian dollar rose 1% against the American dollar during the fiscal year ending Dec. 31, 1986.

During 1987, acquisitions have continued with the acquisition in February of the *Worthington* (Minn.) *Daily Globe*, followed by the deal that is pending with Clay that will bring to Thomson papers with combined circulation of 118,000. The papers are the *Register/Herald* of Beckley, W. Va., *Shelby* (N.C.) *Star*, *Enquirer-Journal* in Monroe, N.C., and half interest in the joint venture that publishes the evening *Charleston* (W. Va.) *Daily Mail*, the morning *Charleston Gazette*, and *Sunday Gazette-Mail*.

Thomson under the joint venture will have editorial responsibility for the *Charleston Daily Mail*.

In Canada, media sales increased to $334 million last year, up 6.4% from 1985. Companies headquartered outside the U.S. are ranked in this issue by their U.S. revenues only.

Time Inc. continued to concentrate on cutting costs and developing new areas of growth during 1986. Several new magazine ventures were abandoned and business lines were streamlined through acquisition and divestiture. In addition to more narrowly focusing its magazines, Time expanded its publishing arm with the December acquisition of Scott Foresman Cos., a major educational book publisher, for $520 million.

Time posted a 10.5% increase in total revenue to $3.8 billion and an increase of 88% in net income, the latter a reflection of a pretax gain on the sale of 20% of its cable subsidiary, American Television & Communications. Gains were offset by charges resulting from staff reductions and other management restructuring. The company estimates that staff reductions in 1986 saved Time $75 million. More layoffs are expected in 1987.

The magazine division posted a 6% gain in total revenue but an 8% decline in operating revenue, to $162 million in 1986. This is attributed to a $32 million charge to cover staff reductions and other expenses resulting from the closing in late 1986 of *Picture Week*, after 15 months on the market.

Like other newsweeklies, Time Inc.'s lead magazine, *Time*, was hurt by the weak advertising market. It suffered a 4.2% decline in ad pages for the year to 2,582, which with higher rates translated into gross ad revenues of $344.8 million, down only 0.5%. Despite *Time*'s off year, the company reported an overall 3% rise in ad revenues and 10% in circulation revenue, both largely the result of higher prices. *Time* maintained the lion's share of company's consumer magazine ad revenue, estimated at 22.6%.

Magazine revenue gains also were linked to strong sales of *Life*, which celebrated its 50th anniversary, and a full year's contribution from the Southern Progress magazines acquired in 1985. *Life* had a 1% growth in pages to 779, but a 22.2% growth in ad revenues to $48.7 million, according to Publishers Information Bureau.

Time reclassified its video business, separating its pay TV programming from its cable systems. The programming division, consisting of two pay-TV services—HBO and Cinemax—reported an 8% decline in operating income because of higher costs, on revenues that rose 11% because of higher rates and increased subscribers; HBO has more than 15 million subscribers, and Cinemax about 4.1 million.

Time's cable TV division, which is comprised of ATC and Manhattan Cable Television, registered increases of 9% in revenue and 22% in operating income. ATC's basic subscriber count rose 700,000 to 3.4 million. Subscribers to pay TV grew 500,000 to 2.8 million. Continued revenue growth from cable seems assured in 1987 because of higher rates permitted in the newly deregulated environment. Time's ATC bought 13% of Group W Cable in 1986 and joined a consortium of cable operators in investing $562.5 million in Turner Broadcasting Systems.

In addition to its magazine and video operations, Time's books and information services division reported a 20% rise in revenue and 9% drop in operating income. Returns were affected primarily by increases in book sales and the acquisition of Burke Marketing Services, which was merged with Time's own market research unit, SAMI. Thus far, the merger has not been as successful as hoped. Burke is reportedly up for sale.

Major shifts in management took place in July when Time named Nicholas J. Nicholas Jr. the new president and chief operating officer. Mr. Nicholas had been head of Time's video business. As he stepped into Richard Munro's spot as president, Mr. Munro, still CEO, became chairman, replacing Ralph P. Davidson, who was appointed executive committee chairman.

In May 1987, Time announced the sale of *Discover* to Family Media Inc. for $26 million. Time gained a foothold in the women's market through a joint venture with Working Woman/McCall's Inc. Through this arrangement, it has acquired a 50% interest in *McCall's*, *Working Mother* and *Working Woman*.

Time announced an 8% drop in net income to $46 million, while total revenue increased 7.4% to $939 million. Cost saving measures at the magazine group helped increase operating profits 64% to $59 million in the period. Operating profit at HBO fell 7.7% to $36 million because of the absence of a one-time gain in 1986. Operating profits at ATC rose 31% to $37.8 million.

Times Mirror Co. conducted an extensive buying and selling campaign in 1986 that marks the completion of a restructuring process begun in 1984.

The Los Angeles-based company paid $600 million for A.S. Abell Co., owner of Baltimore *Sun* newspapers, added *Broadcasting* and the *National Journal* to its magazine holdings for $75 million and $10 million, respectively, and sold the struggling *Dallas Times Herald* for $110 million. It also disposed of five TV stations, including two acquired as part of the Abell purchase, cable interests in Las Vegas, and a number of non-media holdings.

After divesting $1 billion in assets during the three-year restructuring period and spending $750 million on acquisitions, Times Mirror now concentrates its resources in three core businesses—print media, electronic media, and information-based, professional publishing.

Dispositions in 1986 contributed to record earnings of $408 million, 72.2% higher than 1985. Earnings also were favorably affected by a change in the method of accounting for pensions. Operating revenues were down 0.3%, a drop attributed to loss of revenue from the divested properties. In the first quarter of 1987, a leaner Times Mirror reported a 35% growth in earnings, to $58.2 million, and a 3% growth in revenues, to $715.8 million, over first quarter 1986.

With the restructuring completed, Times Mirror plans to dedicate a major share of future resources to capital expenditures, particularly in its newspaper operations. Newspapers accounted for 58.6% of total revenues in 1986 and generated operating profits of $330.9 million, an 18% increase over 1985, primarily due to higher rates.

Times Mirror is embarking on a five-year, $385 million capital investment in a new plant and facilities for the *Los Angeles Times*. The company also will expand press facilities at the *Sun* papers, modernize the *Hartford Courant* and *Denver Post*, and increase production capacity at the burgeoning New York City edition of *Newsday*.

Launched two years ago, *New York City Newsday* has gone from a circulation of 40,000 in 1985 to 133,000 in spring 1987. Long Island-based *Newsday*'s circulation for all editions is 624,291 evenings and 680,618 Sunday, according to ABC FAS-FAX reports for March 31, 1987.

The *Baltimore Sun* has been pursuing suburban readers and last year debuted *O.C.* (Ocean City), a section targeting summer vacationers on Maryland's eastern shore. The section, published 26 times a year, averaged 38 pages and 1,250 ad inches, a total expected to hit 1,650 this year. The closing last year of Hearst's *Baltimore News-American* has stimulated the *Sun*'s circulation. Combined daily circulation grew 15% to 410,638 on March 31, 1987, compared to the prior year, while Sunday circulation grew 14.5% to 489,771, according to ABC FAS-FAX reports.

The *Los Angeles Times* debuted *Los Angeles Times Magazine* Sunday magazine in October 1985. A *Times* executive says the glossy magazine has done what the company wanted it to do—attract national advertisers. It now runs a minimum of 52 pages advertising, 56% national.

The *Times*' daily circulation increased 2.7% in 1986, to 1,117,952, accord to ABC FAS-FAX reports for March 31, 1987, compared with the same period in 1986. Although the undisputed leader in Los Angeles, it continues to encounter significant competition in other parts of the Southern California market, particularly Orange County.

In the beginning of 1986, Times Mirror tried to bolster the *Dallas Times Herald* by bringing in Shelby Coffey III as editor and introducing new sections and technology. But in June 1986 the company sold the paper to Media News Group.

The company's book, magazine and other publishing segments ended 1986 with a 14% increase in revenues and operating profits and several important new properties. Times Mirror gained the *National Journal* in May and *Broadcasting* in December.

Broadcasting is seen as the nucleus of a trade-publishing cluster, which Times Mirror has stated is a significant strategic objective. This fall the company will introduce *Sports Inc.*, *The Sports Business Weekly*.

In 1986, Times Mirror sold WSTM-TV (Syracuse), WHTM-TV (Harrisburg, Pa.), and WETM-TV (Elmira, N.Y.) for a total of $79 million. A 1.6% decrease in broadcast TV revenues reflected the absence of these stations and soft national advertising. However, higher revenues at the company's four remaining broadcast properties resulted in a 10% rise in operating profits. WMAR-TV in Baltimore and WRLJ-TV in Richmond, Va., were sold for over $200 million two days after they were acquired from Abell.

On Jan. 1, 1987, David Laventhol became president of Times Mirror. He succeeded Robert F. Erburu, who continued as chairman-ceo.

Triangle Publications is getting good results in redirecting the circulation thrust of its newest publication, *Good Food*, from newsstand to mainly subscription. The Radnor, Pa.-based publisher controlled by chairman, Walter Annenberg, was forced to alter distribution of *Good Food* when its first several issues since February 1986 averaged only 375,000 in circulation, far below the 750,000 guaranteed rate base.

The main thrust of the circulation move was the acquisition and then the discontinuation of *Great Foods*, a 600,000-circulation magazine based in Englewood Cliffs, N.J. The two lists were merged beginning with the July issue for a base of around 900,000.

Ultimately, Triangle expects the magazine's distribution to be two-thirds subscription and one-third newsstand, says Frank Wolf, group publisher of Triangle Communications, the subsidiary which publishes *Good Food* and *Seventeen*. Ad contribution is nominal at this point—$1,144,735 from 100 pages in its first 11 issues.

Seventeen's 4.2% decline in ad pages was attributed by Mr. Wolf to "general softness in the magazine business during 1986." Gross ad revenue increased by 3.5% to $35.4 million, according to PIB. However, circulation grew 5.8% to 1,853,314, for six months ending Dec. 31, 1986, compared to the prior year period, according to ABC.

Triangle's dominant publication, *TV Guide*, showed a gross ad revenue increase of 1.3% to $318.1 million in 1986, while pages declined by 2.8% to 3,566—a decline linked to the dramatic changes affecting the tv networks, from economics to ownership, and reduced cigarette advertising. *TV Guide* will boost rates 4%, effective July 4, bringing the full-page color rate to $99,750.

Circulation at *Daily Racing Form* had an overall 1.4% increase. The largest gain coming from the Saturday circulation, up 2.4% to an average of 188,486 for three-month figures ending June 30, according to ABC.

Tribune Co., Chicago, spent the better part of 1986 digesting two recent acquisitions—the record-breaking $510 million 1985 buy of Los Angeles' KTLA-TV, and *Daily Press* of Newport News, Va.—and divesting its remaining cable systems.

When the company bought *Daily Press* for $200 million last year, it immediately put the *Daily Press*' two Virginia cable systems on the block and got $100 million back for them. And Tribune completed separate sales of 15 cable systems it owned before the Daily Press purchase for an aggregate of $450 million that brought an after-tax gain of $88 million in 1986.

Tribune Co., whose media revenues grew to $1.81 billion, up 4.7% from the prior year, had operating profits of $281.3 million, up a record 17%, while net income grew 136% to $292.9 million, a gain that continued into the first quarter of 1987 when the company reported a more than sixfold increase in net income, to $106.9 million, due mainly to a one-time gain from the sale of the *Los Angeles Daily News* to Cooke Media Group. That sale was required by FCC rules after Tribune's purchase of KTLA. Excluding the gain, the company had net income of $18.3 million, still up 10.6%. Revenues for the period rose 0.9% to $453.5 million.

In newspaper publishing, which accounted for 67% of total operating revenues last year, ad revenues rose a modest 1.2%, to $983.7 million, while circulation revenue grew 3.8%, to $311.4 million. The *Chicago Tribune* accounted for 36% of newspaper revenues, and the *New York Daily News* represented another 30%.

High labor costs continue to hinder the company's two largest dailies, although the *Tribune* is profitable. The *Daily News*, in the midst of negotiations for renewed labor contracts, lost $11 million in ad business over the past year from consolidations by New York-area retailers. It also has faced increasing competition from Times Mirror Co.'s *Newsday*, which has made gains in Manhattan via a *New York Newsday* edition.

The broadcasting and entertainment division, which includes the company's TV and radio stations, programming arm and the Cubs baseball team, reported a 21% increase in operating revenues, to $466.2 million, and a 9.3% gain in profits, to $65.5 million. Excluding the Cubs, the unit had estimated revenues of $442.9 million.

Facing a glut of syndicated programming projects, Tribune has scaled back its development to two new series this fall. Currently, the company co-produces 10 weekly TV series.

Actual yearend 1986 results at Turner Broadcasting Systems, Atlanta, were forecast internally almost to the dollar, says the company, which must have been a hard forecast for founder Ted Turner to swallow because by yearend, TBS had lost $187.3 million.

The year was a wash financially for Mr. Turner. This June, he sold a 36% stake in the company for $562.5 million to a consortium of 31 investing units, thus paring his holdings to about 50%. Proceeds were used to retire massive debts TBS piled up in last year's buyout of MGM/UA Entertainment.

After failing in its 1985 attempt to acquire CBS Inc., Turner in March 1986 bought MGM/UA with intent to sell off all but the film library to retire the debt incurred through the issuance of preferred stock. But by mid-May 52.6 million of the preferred stock was still outstanding requiring continuous dividend payments. Faced with the prospect of having to issue common stock to raise money to pay the dividend, Turner concocted the plan to sell off part of itself. Under the plan, the participating MSOs will get seven seats on the board, newly expanded to 15.

Joining the huge debt left over from the MGM/UA acquisition as a leaven-ing agent on financial returns were $26 million in losses from the Turner-sponsored, Olympic-style Goodwill Games held in Moscow last summer. Undaunted, Turner plans another round of Goodwill Games in Seattle during in 1990. But this time, there will be more advanced planning.

Despite its heavy losses, TBS continues to survive through strong cash flow from its base cable TV business. WTBS, the Turner "Superstation," continues to be the top-rated basic cable network with a composite 1986 Nielsen rating of 2.1, which translates into 654,000 households nationwide. About 93% of the cable households and about 45% of total U.S. TV homes receive WTBS. WTBS generated ad revenues of $185.3 million, up 7.2% in 1986 over the prior year.

Cable News Network and CNN Headline News combined were rated a composite second in the 1986 Nielsen cable ratings for basic cable services with an 0.9 rating, representing 326,000 cable homes. Together, the Cable News Network and CNN Headline News generated $91.2 million in revenue, up 30%, most of that coming from Cable News Network ($73.1 million, up 29.4%).

Aside from its film library and cable TV operations, TBS owns the Atlanta Braves and Atlanta Hawks.

Turner also produces original programming—the occasional Jacques Cousteau specials and a continuing series profiling all 50 states hosted by Hal Holbrook. Some of CNN's original programming also is sold to local stations.

Mr. Turner has said he would like to start yet another cable network using the MGM film library as the base programming. But it still is uncertain what impact the buy-in by cable operators will have on TBS. The refinancing "provides a recapitalization and that will give them [Turner] a more stable equity base," says Lee D. Wilder, first VP, Robinson-Humphrey Co. "It also puts a few more chefs in the kitchen." Ms. Wilder predicts a $6 per share loss this year "and I don't expect to see reported earnings for several more years."

After defending itself from takeover by financier Carl Icahn in early 1986, Viacom International rejected an offer from management in bowing to a bid of $3.4 billion from National Amusements.

The deal, subject to governmental approval, merges this broadcast and entertainment company that produces and syndicates "The Cosby Show" with one of the country's largest movie theater owners. National is owned by its president, Sumner M. Redstone.

Viacom in 1986 had revenues of $919.2 million, up from $444.1 million in 1985. The dramatic increase was largely because of a full year's ownership of Showtime/The Movie Channel and MTV Networks. In November 1985, Viacom bought the 50% it did not already own in Showtime/TMC and the 66% it did not already own in MTV. Seller in both cases was Warner Communications. Viacom reported a loss of $9.9 million compared with a gain of $37 million in 1985. The net loss reflected the costs of about $30.1 million related to repurchase of stock from Icahn Group.

First quarter 1987 saw a loss of $45.8 million from a gain of $4.2 million in the prior year period as revenues increased 10.3% to $234.2 million. The loss was because of expenses incurred when it terminated a merger agreement with MCV Holdings, the management-led buyout group.

Viacom Broadcast Group's earnings from operations rose 51% in the first quarter of this year. Earnings from operations would have been only 9% higher excluding the results from the May 1986 acquisition of KMOV-TV, St. Louis (formerly KMOX-TV) from CBS for about $122 million.

In the quarter, the Networks Group, comprised of Showtime/TMC, MTV Networks (MTV, VH-1 and Nickelodeon) and 33% of Lifetime, experienced a decline in earnings from operations of 27%, compared with the year earlier, S/TMC's poor performance was responsible for the drop.

Showtime/TMC, with a little over 8 million subscribers and a pay cable market share of about 29%, runs a distant second to HBO. At the end of 1986 Neil Austrian left his post as Showtime/TMC's president-ceo because it lost its independence when it moved from part to full-ownership.

Viacom was among 31 investing units that bought 36% of Turner Broadcasting Systems this June.

Post ads show more blacks

Washington Post in September instituted a new real estate display ad policy that required advertisers to show blacks in at least 25% of their display ads. The policy came after a Washington legal group sued Realtors and agencies for not showing blacks in ads. Real estate display ads, which declined during 1986, are up the first half 1987.

Warner Communications bought into theater operating companies to augment its filmed entertainment division (Warner Bros.) and gained full ownership of Warner Cable during 1986, a year in which its three leading divisions—cable and broadcasting, filmed entertainment, and recorded music—posted record profits. First quarter 1987 results were equally strong.

New York-based Warner's revenues rose 27% in 1986 to $2.8 billion. Net income dropped 5.1% to $185 million because of a gain in the prior year from the sale of its interest in MTV Networks and Showtime/The Movie channel to Viacom International.

First quarter 1987 revenues of $788 million represent a 14% increase from the first quarter 1986. Net income in the quarter rose 115% to $66 million largely because of strong growth in the recorded music and Warner Cable divisions.

Warner became one of the last entertainment companies to buy a theater chain, when in late 1986, it came to the rescue of financially troubled Cannon Group by exchanging $50 million for notes and stock in Cannon. Securities involved in the deal are convertible into 50% of Cannon's European theaters. For another $25 million in cash, Warner also acquired North American home video rights to 21 Cannon films.

In February, the company further moved into the theater operating business when it agreed to acquire 50% of Gulf & Western's domestic motion picture theater operation.

According to a spokesman, Warner most likely will issue stock to the public this year to reduce its risk in the venture.

During 1986, Warner's largest division, filmed entertainment, posted an 8.3% increase in revenues to $1.3 billion and a growth of 7.5% in operating income to $172.2 million. First quarter 1987 revenues of $342 million were up 1.5%, and operating income up 4.4% over first quarter 1986. Warner recently signed an agreement with Disney Studios for the foreign distribution rights to Disney's films. HBO signed a five-year deal, for about $125 million, for TV rights to Warner's films.

Last year was the first time Warner consolidated Warner Cable into its overall financial statements. The cable and broadcasting division had 1986 revenues of $325 million, up 9.8%, and operating income of $16.2 million, compared with a loss of $8.9 million in the prior year when Warner Cable was 50% owned and accounted for on an equity basis. Warner bought the other half from American Express for $450 million in February 1986. First quarter 1987 revenues grew 17.9% to $92 million as operating income rose 57% to $7.4 million.

Warner Cable, with slightly more than 1.3 million subscribers, is looking to rate increases to provide revenue growth and funds for upgrading of current systems.

Washington Post Co.'s move last year into cable appears to be paying off. Revenues for the 53-system cable division purchased in January 1986 from Capital Cities/ABC for $350 million increased 17% in the first quarter of 1987, with greater increases predicted for the year.

Post Co. intends to invest $17 million in the cable systems this year, after investing $24 million into them in 1986. It also will continue to buy smaller cable systems and combine them into existing operations. The cable subscriber base rose 3% in 1986 to 369,000. Ad sales were launched in 19 of the 53 systems in 1986, and the Modesto, Calif., system is experimenting with pay-per-view.

The rejuvenation from cable comes as the Post's magazine division's mainstay, *Newsweek*, performed poorly in the past year, with revenue falling 2% to $320.9 million. While *Newsweek's* first quarter 1987 ad pages and revenue were flat, compared with the same period for 1986, the magazine will be slightly ahead in the second quarter, says Richard Simmons, Post Co. president-coo.

The *Washington Post* continues to be the company's major revenue producer. In the first quarter of 1987, the newspaper saw revenues increase 8%, with ad inches up 3% to 1.3 million. Ad rates increased 6% to 6.5% in January.

Last September, the *Post* introduced an expensive redesign of its Sunday magazine, now a glossy, smaller-sized insert.

For the first half of 1987, the magazine is ahead about 16% in ad pages over the same period in 1986, and ad revenues are up as well. However, the magazine is more costly to produce, and officials say it will take several years to become profitable. The magazine editorial has been controversial. Its first issue created a furor among blacks because of a cover story about a black man accused of murder. The *Post* has since appeased black readers by running more positive pieces about blacks.

The newspaper reorganized its sales force for the magazine and created a national sales force, including a new, six-person office in New York. The national team also sells ads for the four-year-old *Washington Post National Weekly*, which saw no growth last year in either ad pages or circulation, which remains at 50,000.

Overall, Post Co.'s advertising revenues increased 4% in 1986, even with *Newsweek's* 11% decline in ad pages. The *Washington Post's* ad revenues rose 6% to $454.3 million, while advertising volume rose 1.2% to 5.5 million inches.

The *Post's* circulation rose 2% daily and 2% Sunday to 796,659 and 1,112,802, respectively, for the six months ending March 31, 1987, compared with a year earlier, according to ABC. Penetration of the *Post* remains 54% of Washington households daily and 73% on Sunday.

To gain a stronger foothold in some newer suburban communities, the *Post* opened news bureaus in outlying areas to compete with the *Baltimore Sun* for residents living and working in the counties between the two cities.

The Post Co.'s other newspaper, the *Herald*, in Everett, Wash., had its second straight year in the black since 1980, with ad volume rising 12% to 2.2 million inches.

Newsweek remains Post Co.'s problem. Officials brag, however, that readership—a selling points to advertisers—rose 3% to 17.4 million. Newsstand sales rose 11% in 1986. But *Newsweek* has kept its rate base at 3.05 million. Rates in 1987 rose 2.5% for color, but stayed the same for B&W.

Christopher Little, former senior VP-director administration, last September became *Newsweek* president, replacing Mark Edmiston, who had held the post for five years before he was forced to resign.

This year *Newsweek* introduced *Newsweek on Health*, a quarterly 500,000 controlled circulation magazine, which was in test in 1986. At least half of the copies are distributed to doctors' waiting rooms.

In 1986 *Newsweek* ventured into several new foreign markets, but plans no new foreign ventures in 1987.

The Post Co.'s broadcast division revenue rose 8% to $167.1 million. The four stations continue to hold the top position in their markets, as of November 1986 rating. The stations' ad revenues are up about 6% in the first quarter of 1987, and will be up "significantly more" in the second quarter, says Mr. Simmons.

In its non-media holdings, Post Co. intends to sell its minority interests in cellular telephone ventures in Washington-Baltimore and Detroit Cellular Telephone Co. for about $50 million and has increased its ownership in the Miami-Ft. Lauderdale Cellular One Co. to 100% from 60%.

On June 18, 1987, The Washington Post Co. announced the sale of all its interest in SportsChannel to Cablevision Systems, Woodbury, N.Y., for $6 million after taxes.

Events at Westinghouse Electric Corp. in 1986 tended to swirl about Westinghouse Broadcasting Co., also known as Group W. The big revenue generator, Group W Cable, was sold at mid-year; Group W's exec VP took over from the group's chairman, who took early retirement this March; and the new leadership vowed to expand Group W, which lost out on two expected large acquisitions in 1986 and early 1987.

A diminished Group W reported revenues in 1986 of $839 million, down nearly 22% from 1985. Those numbers reflect the loss of six months of revenues from Group W Cable. Group operating profit was up more than 8%, rising to $149.9 million.

Group W, which accounted for only 7.8% of total Westinghouse revenues in 1986, became the center of attention May 1 when Group W's Chairman-CEO Daniel L. Ritchie relinquished his post to Exec VP Burton B. Staniar.

Mr. Ritchie reluctantly endorsed the sale of Group W Cable but denied that its sale had any effect on his decision. So far, Group W officials say, the transition has been a smooth one.

In late January 1987, Westinghouse pulled out of a deal in which it had agreed to buy KHJ-TV, Los Angeles for $310 million from RKO General. The FCC caught Westinghouse off guard when it recommended the sale be disallowed because of challenges to KHJ-TV license over the past decade by Fidelity Television. (Part of the Group W deal with RKO was to pay Fidelity $98 million of the $310 million to settle the challenge.) Westinghouse dropped its bid, citing the one-year delay in FCC ruling and that it was tying up needed corporate resources. The station since has been sold to Walt Disney Co.

Also, a radio merger deal between Westinghouse and National Broadcasting Co. collapsed in December 1986.

Charles R. Furlong, director of communications for Group W Radio, says Westinghouse lost interest in the merger because the finances would not have improved Westinghouse's earnings significantly enough.

Westinghouse remains "interested" in buying individual properties from NBC. Group W Radio is fastening its growth on acquisitions.

Overall, in 1986 Westinghouse posted consolidated revenues of $10.73 billion, up 0.3%, and profits of $732 million, down 1.3%, and was affected heavily by the gain of $651.2 million from the Group W Cable sale, and a $790 million loss from provisions in restructuring the company.

First quarter 1987 returns showed improvement, with earnings of $151.6 million, up 12.1%, although revenues dropped 9% to $2.32 billion.

Westinghouse in 1986 also bought KEZW-AM, Denver, and sold the Muzak music subsidiary.

Shining sun days in Cannes

Blue skies and conviviality in Cannes. Enjoying themselves at this gathering of adfolk (top left) are Jane Feinberg and husband Bob Feinberg (right), exec VP-creative director, Bozell, Jacobs, Kenyon & Eckhardt, New York, and Bill Appelman (center), senior creative director, BJK&E. Lunching at the beach (right) are Sean Fitzpatrick, exec VP-creative director, Campbell-Ewald Co., Warren, Mich., and wife Sue Ellen. Mr. Fitzpatrick also was one of the U.S. judges.
Sightseeing (bottom left) on the beach of the Carlton Hotel are (from left) Sally Minard, Karen McIver and Joanna Patton, founders of Lotas, Minard, Patton, McIver, New York, with, amongst them, Alban Lloyd, director, European operations, Saatchi & Saatchi Compton Worldwide. His wife, Rosemarie, is next to Ms. Patton. Next to Mrs. Lloyd, who herself works at S&SCW in London as account director and who is on the board of directors, is Judy Lotas, another LMPM founder.

Bird in hand is Grand Prix winner

By CLAIRE WILSON

CANNES, FRANCE—Just about anybody in advertising would agree that cheap, fast, good commercial production is tough to get.

But cheap, fast and a Grand Prix winner in Cannes?

That's exactly how Yasumichi Uwagawa, 39, the creative supervisor for Dentsu's regional office in Osaka, Japan, describes his commercial, "The Illustrated Guide to Animals."

The commercial, for an encyclopedia of the same name, published by Heibonsha Publishing, won the top prize at the International Advertising Awards Film Festival here (AA, June 22).

Even though no U.S. agency brought home the Grand Prix this year, American agencies did collect seven Gold Lions, 13 Silver Lions and 15 Bronze Lions.

Ten Gold, four Silver and nine Bronze Lions went to the U.K., while Brazil received three Gold, three Silver and five Bronze. France won two Gold, 13 Silver and seven Bronze Lions.

The rest of the gold, silver and bronze prizes were divided among Argentina, Australia, Belgium, Denmark, Germany, Holland, Israel, New Zealand, Sweden and Spain.

Japanese agencies also took four gold and three awards each in the silver and bronze categories.

But of all the Cannes winners, the top prize-winning commercial from Japan probably was the least costly to produce.

"Two days of shooting that didn't cost much at all. The whole thing might have come to about $100,000," said Mr. Uwagawa, who also was the creative director for Dentsu's Gold Lion-winning robot spot for National Electric Co. two years ago. "Besides, we didn't have the budget to go to Africa for real animals anyway."

While prizes in recent years have gone to U.S. agencies for strong ideas as well as compelling productions, it was Mr. Uwagawa's technique that most said won the prize for Dentsu this year.

The 60-second spot featured a veritable mini-herd of animals fashioned from the hands of Mario Mariotti, an artist and performer from Milan.

Mr. Mariotti's hands and arms were painted to depict jungle beasts, from birds to zebras and serpents to swans.

It took up to two hours for Mr. Mariotti to put on the makeup for the giraffe, while other animals took less time to create, using paint and an assortment of plastic eyes.

The team for "The Illustrated Guide to Animals" spot, which broke in April 1986, included Hiroshi Matzuzaki, head of Dentsu's creative group; Mr. Uwagawa; producer Nobuo Hirata; and art director Azuma Uchida. The Proceed Co., Tokyo, handled the production.

"Animals" is quite a departure from the Grand Prix winners of the last three years, which were American. These winning spots were built around well-developed and elaborately produced ideas.

Last year's winner was Boston-based Hill, Holliday, Connors, Cosmopulos' commercial for John Hancock Mutual Life Insurance Co.

HHCC also won the Agency of the Year award from ADVERTISING AGE last year (for 1985).

That spot projected a strong idea with a production somewhat less elaborate than the previous two years' winners, which were New York-based BBDO's "Archeology" spot for Pepsi-Cola in 1985 and Los Angeles-based Chiat/Day's "1984" spot for Apple Computer.

Mr. Uwagawa said it's the simplicity of a commercial like "Animals" that holds the appeal for him. "It was easy to understand for parents and children," said Mr. Uwagawa, who has two children. "It attracts the viewers without shouting."

Dentsu's winning spot features hands that look like animals.

"Animals" entertains and hopes to get children or their parents to want the encyclopedia, he said.

In his 15 years at Dentsu working on accounts including NEC, Panasonic and Shiseido Cosmetics, Mr. Uwagawa said he has come to prefer a positive style in ads.

"I love to put a kind of dream into the commercial," he said, "to make the spot some kind of love letter from the company or the client, something that gives a positive twist."

Mr. Uwagawa discovered Mr. Mariotti's work when he saw a series of volumes about the artist in a Los Angeles bookstore. The books showed Mr. Mariotti's range of characterizations with made-up hands.

The two worked together on a Panasonic spot, where Mr. Mariotti's hands were painted to depict musicians. "Imagine all these," Mr. Uwagawa said, gesturing with his fingers and humming Vivaldi's "Four Seasons"—the music for the spot—"imagine all these dressed up in little black ties and cummerbunds like orchestra musicians."

Such imagery is the most popular and successful kind of Japanese advertising, especially when teamed with great music, Mr. Uwagawa said.

He can sing all the verses of "Call Me Irresponsible," the sound track he used for the NEC robot spot that won him the earlier Gold Lion. The sound track for "Animals," appropriately, is jungle music.

Mr. Uwagawa says the animals also were used as part of the print campaign. The choice of media was limited due to the low budget and the high cost of airtime in Japan, he said.

He added that he probably will not use Mr. Mariotti again in commercials, to keep the technique special. "It would lose its freshness as a unique idea," he said.

The complete list of Gold Lion winners follows:

Boase Massimi Pollitt (U.K.) for *The Guardian*—"Points of View."
BBDO Worldwide, New York (U.S.) for Apple Computer—"Red Eye," "Going to Work," "The Report."
Collett Dickenson Pearce (U.K.) for Gallaher—"Photobooth," "Fancy Dress Party."
Young & Rubicam Italia (Italy) for Barilla Pasta—"Barilla Rome."
TBWA (France) for Samsonite—"Les Claquettes."
Saatchi & Saatchi Compton (U.K.) for Index on Censorship—"The Censor."
Delaney Fletcher Delaney (U.K.) for TUC—"Babies."
Yellowhammer (U.K.) for Greenpeace—"Meltdown."
Virgin Records (U.K.) for music video—"Sledgehammer."
Yellowhammer (U.K.) for Barclays Bank

Della Femina in the pit

Judges see spots before their eyes

By JERRY DELLA FEMINA

CANNES, FRANCE—Outside, it was a topless festival. Inside, it was a bottomless pit. And that sums up the 1987 International Advertising Awards Film Festival in Cannes.

Try these commercial "gems" on for size:

- A commercial that shows 10 men standing in front of urinals, singing (mercifully, this was shot from behind . . .). What could they possibly be selling? What else but a Brazilian beer? Don't ask me what the message was—I averted my eyes at the end.
- Then there was the pasta commercial featuring the divorced Italian father who was lamenting his failed marriage. When he takes his young daughter home, his ex-wife cooks pasta and, of course, they are reunited over a steaming bowl of the stuff. If only my life were that simple.
- Then we had the Norwegian commercial featuring a young man in a sauna who drops a newspaper over his "private parts." The purpose, I guess, was to get people in Norway to see this newspaper as being indispensable. In this case, it was.
- And will I ever forget the graphic Japanese commercial for hemorrhoids that was as painful to look at as any commercial I have ever seen? Once again, I averted my eyes (this time I also covered my ears).

J. Della Femina

And *these* were some of the *winners*. The losers? Don't ask.

The judges at the Cannes festival looked at 2,900 commercials. It was like searching for truffles. Every once in a while you found one and it was delicious, but you had to dig through an awful lot of dirt to get there.

The advertising I saw at Cannes (for the most part) was as flimsy as

(Continued on Page 60)

ADWATCH

Pepsi's 'Choice' keeps top spot in ad awareness

By SCOTT HUME

Pepsi-Cola's "Choice of a New Generation" campaign remained king of the hill in consumer awareness in May, after gaining that top spot in April.

The advertising for Pepsi was mentioned most frequently when 1,000 adults were asked to name the first advertising they recalled having seen, heard or read in the previous 30 days.

The adWatch survey is conducted every month as a joint project of Advertising Age and SRI Research Center, Lincoln, Neb.

The older generation also was represented in the survey as E&J Gallo Winery's Bartles & Jaymes wine cooler again made the top 10 list, in the No. 9 slot.

New advertising for the brand promises that Ed Jaymes will be skywriting "Ed's Red" this summer to introduce the "Red" flavor.

B&J's greatest support came from consumers not in the 18-to-24 age group but from those ages 55 to 64.

One-fourth of those who said B&J advertising was the first to come to mind were in this older age group, while one-fifth were from the younger group.

When respondents were specifically asked to name the first wine or wine cooler advertising that came to mind, B&J did even better.

In May it was named first by 12.8% of the sample—good enough for first place—compared with an 8.8% share of first mentions for third place in the April survey.

Among the top 10 in overall (unaided) awareness, Coca-Cola stayed close behind Pepsi in second place, while the dancing California raisins fell back to fourth place from second in the April survey.

Making a surprisingly strong showing in the May survey was the Miller Brewing Co. tandem of Miller and Miller Lite.

Its latest "Lite All-Stars" reunion commercial, featuring an alien spacecraft unloading a crew of Rodney Dangerfield look-alikes, and its new, tougher "As real as it gets" pitch for Miller Genuine Draft, seems to have registered with male viewers, who comprised 74% of respondents for whom Miller came to mind first.

Women were more apt to recall General Foods Corp.'s Jell-O, as that brand's advertising made one of its infrequent appearances among the top 10 last month.

Only 11% of those for whom Jell-O was the top ad were male.

McDonald's Corp.'s advertising, ranked No. 8 last month, also benefited from strong recall by women, who made up 79% of those who said the "Golden Arches" first came to mind from all the advertising they had seen, heard or read.

The appeal of both Pepsi's and Coca-Cola's advertising is fairly evenly split between men and women. The male/female ratio for those who named Pepsi the most memorable advertising was 46-to-54; for those for whom Coca-Cola first came to mind it was 48-to-52.

Pepsi's ascendancy was most obvious when consumers specifically were asked to name the first soft-drink advertising that came to mind. In May, 36.3% named Pepsi, the greatest share of first mentions it has received in the past three years.

Coca-Cola last month was named by 30.9% of the sample, with 7UP third with 2.5%.

Among other highlights from the May survey:

- IBM Corp. in the **computer** category maintained the No. 1 ranking it first established in the April survey. It received 24.3% of first mentions last month, while Apple remained No. 2 with 21.6%. Radio Shack/Tandy was third with 2%.
- Burger King Corp. last month lost the slight gain it had registered in the **fast-food** category in the April survey. Its "Best food for fast times" advertising garnered 9.9% of first mentions, down from 14.2% the previous month. McDonald's retained its seemingly unassailable hold on first place with 41.9% of first mentions; Wendy's International was third with a 9.4% share.#

Building success from 'peaks and valleys'

Hearst celebrates 100th

By STUART J. ELLIOTT

New York—The "peaks and valleys" of Hearst Corp.'s 100 years of communications history were commemorated here last week at a centennial gala.

More than 800 attended a dinner-dance at the Waldorf-Astoria Hotel June 22, from every field in which Hearst has holdings: books, business publishing, cable, magazines, newspapers, radio, syndication and TV.

"I'm sure if my father were alive today, he'd be proud," Hearst Corp. Chairman Randolph Hearst said of his father, William Randolph Hearst, who started the estimated $2 billion company in 1887.

"There isn't any company that has complete success at all times over 100 years," Mr. Hearst said. "There were peaks and valleys. In the '50s, when my father died, and the '60s, we had some tough times. After a while, we finally got ourselves together."

He credited that to Frank Bennack Jr., Hearst's president-ceo, and to Hearst's core employees.

Mr. Hearst also credited part of the company's success to its privately held status.

Hearst's centennial celebration "truly does deserve to be called historic," said Mr. Bennack, as William Randolph Hearst's "legacy has grown today to encompass more than 135 businesses with some 14,000 employees."

The longtime core of Hearst, its newspapers, provided the basis for remarks by New York Mayor Edward Koch and New York Gov. Mario Cuomo.

Gov. Cuomo reminisced about his days of growing up in the New York borough of Queens, reading "two great Hearst papers, the *Journal-American* and the *Mirror*," both of which folded in the '60s.

"Times have changed," said Gov. Cuomo, "and there are far fewer papers. . . . But the Hearst Corp. is still playing a crucial role. Despite all the changes, since I've moved to Albany [New York's state capital] I once again have two Hearst papers to read," the *Times-Union* and the *Knickerbocker News*.#

Della Femina

(Continued from Page 48)

the bathing suits on the beach. However, in the end, I believe we selected some great advertising (with the exception of the abovementioned), but there were some lessons that I learned.

First of all, we will be railroaded into something called "global marketing" but there will never be a "global creativity" in our time.

Sean Fitzpatrick, my fellow American judge and an intelligent, sensitive person, made a most eloquent plea to award the Phil Collins "Tonight Tonight" Michelob commercial a Gold Lion.

Then we voted.

The vote: the U.S., Canada and the U.K. for Michelob; the rest of the world for the urinal commercial.

The other judges were intelligent, sensitive and dedicated.

They simply live in a different world than we do and, until the U.S. learns to respect these people and their cultures, we will never do well in or even understand international competitions again.

The Grand Prix winner was from Japan. It was a simple, stunningly beautiful commercial that made all of the judges' jobs easy. It should be shown to everyone in this business who has come to believe that the only way you can produce a winning commercial is by spending half of your client's budget on production.

Japan is certainly the country to watch in future advertising competitions.

Up until 1987, Japan was a one-note winner—if you wanted a great battery commercial, you went to Japan.

This year, Japanese agencies' work for Shiseido in the cosmetics area and for Kirin in the beer category was sensational—and this seems to be just the tip of the iceberg.

The Japanese judge took notes on just about every one of the 2,900 spots we saw. He looked at the reel with the same glint in his eye and in the same manner that the Japanese looked at our electronics industry in the early 1950s.

(Then they decided to build their first transistor and you know what happened.)

For the most part, the entries from the U.S. were disappointing—one notable exception being the Michael J. Fox commercial for Pepsi, via BBDO Worldwide, which was by far the most popular American Gold Lion winner.

Many of this year's U.S. entries were either Sedelmaier or warmed-over Sedelmaier commercials.

If it wasn't Sedelmaier, it was Joe Pytka or a Pytka imitation.

Most of the Pytka commercials, if you look closely, are well-acted, intelligent versions of the old Procter & Gamble slice-of-life spots of the 1970s.

Where Sally used to tell Madge about how new Iceblue Secret has done wonders for her underarms, we now have Biff telling Troy about how his new Apple computer has done wonders for his budget forecast.

Mr. Pytka may be the first director to specialize in "masculine slice-of-life" commercials.

The work from the U.K. confirms my theory that the movie "Bladerunner" was the worst thing that has happened to the advertising business. Everything from England seems to be about the future or Ridley Scott's version of it; and if that's what the future is, it's indeed bleak.

All in all, it was an interesting experience and I feel this show was judged as fairly as any competition in the industry.#

Jerry Della Femina, chairman of Della Femina, Travisano & Partners, New York, was the president of the jury at the Cannes advertising film festival.

Buy-fest: Networks may grab $3 billion in upfront

By VERNE GAY

NEW YORK—The network TV upfront market exploded last week.

At least 12 major ad agencies initiated or completed long-term deals with the Big 3 networks for prime-time positions in the 1987-88 TV season. Both buyers and sellers believe the advance sales will reach $3.2 billion, or $700 million more than the 1986-87 upfront market. That represents a 28% increase.

NBC-TV is expected to close in on $1 billion in prime-time sales as early as today, equaling last year's upfront total, agency sources said. ABC-TV and CBS-TV each expects to surpass $1 billion in sales for the first time when the market concludes later this summer.

Neither network ever has surpassed $900 million in prime-time upfront sales.

If NBC sells out all its advance time this week, as some industry executives expect, it would be the quickest upfront sales pace ever established by a major network.

Others contend it is unlikely NBC will shut its doors to advertisers now. However, pricing could be expected to climb dramatically on the top-rated network this week and after.

If the inflation pattern in the upfront market continues, as expected, the average prime-time unit cost—a 30-second spot—this fall could reach $136,000, ADVERTISING AGE estimates indicate, or 15% over the average unit cost for last fall.

Advertisers traditionally purchase their TV commercial inventory for the fourth quarter and the first three quarters of the succeeding year by July 4, the upfront buying period. They do this to secure "guarantees," or assurances that ratings goals will be met, and to get better pricing than they can in the short-term, or "scatter," market.

But this year's results are shoving aside projections:

- The single biggest factor behind the '87-88 bull market has been an influx of small advertisers. An estimated 225 individual advertisers are in the upfront market. Last year, between 99 and 125 bought upfront. Many of the new, smaller spenders generally worked the scatter market last year. By going upfront, they are hoping to escape the huge price escalations that plagued the scatter market the first two quarters of this year.
- The networks are getting advertisers to accept cost-per-thousand price increases of, on average, more than 20% ahead of last season's levels, agency executives said.

NBC won increases of as much as 30%, sources said. Young & Rubicam, which was the first big buyer this year, reportedly agreed to increases of 19% to 22% two weeks ago, and now that looks like a bargain.

The people meter, which in tests has shown lower viewing levels than the soon-to-be-phased-out diary-based system of A.C. Nielsen Co., contributed to the price increases.

These lower meter results added a substantial "artificial" increase in buyers' cost-per-thousand. With lower audience levels, advertisers are, in effect, subject to a price "increase" when data show lower viewing levels.

These current buys have as much as a 10% "increase" built in, sources said.

Although the upfront market is extremely strong, that does not guarantee ad spending

WPP link to Saatchi irks clients

By LAUREL WENTZ

LONDON—Unilever and Procter & Gamble Co. appear to be increasingly concerned over Saatchi & Saatchi's 7% stake in WPP Group, which is about to purchase JWT Group.

"Of course there is some concern about the Saatchi investment in WPP, and we would prefer that it did not exist," said a spokesman at the London headquarters of Unilever, a JWT client in 25 countries. Saatchi & Saatchi is one of P&G's major agencies.

"However, it is extremely unlikely to affect our long-standing business relationship with JWT," the spokesman said. "We've been with JWT almost man and boy. All you can do is express some concern and hope something can come about."

The Unilever spokesman implied that if P&G expressed a similar concern about Saatchi's involvement with WPP, a Saatchi divestment of its WPP stock could become an issue.

A key source told ADVERTISING AGE that Saatchi & Saatchi is

Is JWT getting ready to lose BK?—Page 84.

under heavy pressure from P&G to sell its WPP stock. Both S&S and P&G declined to comment officially.

Unilever also is concerned that JWT's client service may be eroded by cutbacks, the company spokesman said. This concern has been exacerbated by WPP Group Chairman Martin Sorrell's reputation as a finance-oriented agency executive.

"What we use JWT for is the quality of service from the agency," the Unilever spokesman said. "If Mr. Sorrell is going to bring agency profitability up, we'd obviously be interested in knowing how and that it's not going to affect quality. For all we know, Mr. Sorrell will be a shot in the arm for JWT."

N.V. Philips, a JWT client in 13 countries, has expressed the same concern about client service.

Philips is reviewing its $20 million account with JWT in Europe and Latin America.

The marketer is talking with JWT but has asked for proposals from its other international agencies—Ogilvy & Mather, SSC&B:Lintas Worldwide and BBDO Worldwide.

These anxieties are surfacing as WPP nears completion of its

Sues over research forecasts

Beecham vs. Saatchi

By STEWART ALTER

NEW YORK—Beecham Inc. is suing Saatchi & Saatchi Co.'s research unit, Yankelovich, Skelly & White/Clancy, Shulman, for more than $24 million, claiming over-optimistic forecasts induced the marketer to introduce Delicare Cold Water Wash, a detergent for delicate fabrics.

Beecham alleges it would not have introduced Delicare last year if the researcher had not projected the product could dislodge American Home Products Corp.'s Woolite as the No. 1 brand in the cold-water-wash segment.

The case could have broad implications for the industry if it is held that market research companies generally are liable for the accuracy of their projections.

The suit, filed in U.S. District Court here, also contends Saatchi & Saatchi's purchase of Yankelovich, Skelly & White contributed to Beecham's problems by fostering a "management malaise."

It charges negligence, negligent misrepresentation, professional malpractice and breach of contract.

The suit alleges that, without YSW/CS' projections and rec-

Highlights

Weight Watchers gets mean on lean 4

It's not over till the skinny lady sings. That's the new philosophy of Foodways National, marketer of Weight Watchers frozen entrees. Weight Watchers is coming on strong in the diet-food wars. In 1984, Stouffer Foods' Lean Cuisine outsold Weight Watchers 3-to-1. Now, Weight Watchers has built strength through 46 consecutive monthly share gains and stands just 2 share points behind its rival, 11% to 13%.

ARCO to pump methanol in California 12

Atlantic Richfield Co. is entering a rare alliance with a state agency to test-market a methanol-based fuel as a gasoline substitute. The petroleum company, known for its aggressive and innovative marketing programs, this year will sell M85 fuel—comprising 85% methanol and 15% premium unleaded gasoline—at some of its stations in southern California.

Coors challenges alcohol act 27

Adolph Coors Co. is challenging federal labeling restrictions to advertise beer as a "beverage of moderation." But at least one rival suggests Coors' real motivation is to combat its nagging image as "weak" beer. Coors, the nation's fifth-largest brewer, filed suit July 2 in U.S. District Court in Denver, challenging the constitutionality of the Federal Alcohol Administration Act prohibition against stating alcohol content on beer labels or in advertising.

Ice cream makers won't chill out 32

The Donvier ice cream maker, the originator of no-fuss homemade frozen concoctions, is feeling the chill from hot competition. Nordic Ware's Supremer Ice Creamer and Salton's Big Chill are putting the pressure on Donvier in mass-merchandise and department stores. Donvier, responding to the new threats to its estimated $35 million in annual sales, has doubled its ad budget this summer to $3 million by turning to network TV and magazines.

Dakin makin' holiday push 75

R. Dakin & Co. is lining up its stuffed troops for a holiday battle in the $1 billion plush-toy market. The company will recruit its heaviest hitter—a boxing glove-clad Garfield the cat—for a $1.5 million pre-Christmas TV campaign aimed at increasing brand recognition among young mothers. Spots will include the theme "Dakin makin' friends."

Untouchables star backs INS 87

As Eliot Ness, Robert Stack was bad news for gangsters, but this week the former star of TV's "The Untouchables" has some helpful words for employers of immigrants. Mr. Stack stars in both paid and public service TV spots warning employers they must comply with the controversial immigration law passed by Congress last year and enacted in May.

INTERNATIONAL

Parker Pen in the black 49

Parker Pen Ltd., under new ownership and with a new advertising approach, is finding black ink again. The former Parker executives who bought the Parker Pen Co. pen business in January 1986 say they have turned a $500,000 loss in fiscal 1986 into a $23.4 million pretax profit for the fiscal year that ended last February.

Agency business restructuring 64

Events of the past 18 months, culminating in London-based WPP Group's recent agreement to purchase JWT Group, point to a very obvious conclusion: internationalization has restructured the advertising agency business with fury and speed.

OTHER NEWS

Disney characters will pop up this month to promote Delta Air Lines' designation as the official carrier of Walt Disney World. The centerpiece of Delta's estimated $3 million campaign is the airline industry's first "pop-up" ad, featuring 1½-inch-high Disney characters with the Magic Kingdom castle in the background. Page 26.

The Big 3 TV networks are freshening up their veteran series for the fall A.C. Nielsen Co. ratings wars. Besides preparing their new series, the nets are making changes to renewed shows, mostly cast additions and new story line directions. Page 80.

Changing Times hopes a humorously innovative TV campaign will help change its image and low profile. A 30-second spot is meant to get readers and the advertising community to see the monthly in its contemporary focus, and increase awareness. Page 69.

Borden's acquisition this month of Snacktime Co., Indianapolis, is the company's latest step in a plan to improve its position against Frito-Lay, which dominates the $7 billion salty-snack market. Snacktime is Borden's second salty-snack company acquisition in the Midwest, a region where Borden has been weak. Page 75.

SPECIAL REPORT

Sports Marketing—*There are two outs, bottom of the ninth, man on third . . . and the viewer retires both sides. The overabundance of sports programming has hurt sports media as viewers turn off and advertisers turn their budgets aside. New players are working their way into the sports media lineups, taking advantage of the game's changing rules. Special Report examines the shifts in the sports media marketplace and agencies' and advertisers' reactions to them. Starts after Page 46.*

Irangate airline hopes agency can lift image

By MAUREEN GLABMAN

MIAMI—The airline that Lt. Col. Oliver North used to deliver missiles to Iran has doubled its advertising budget in a move to improve its image.

Southern Air Transport, a cargo carrier, handed Tinsley Advertising the $400,000 account with instructions to distance its name from the Iran-contra scandal and the Central Intelligence Agency.

Lt. Col. Oliver North's use of Southern Air Transport to deliver missiles to Iran has created an image problem for the airline.

The CIA once owned the airline, said Bill Kress, Southern's administrator for corporate communications and advertising.

Southern has flown since 1947 and is owned by James Bastian, a Miami attorney who also is its chairman. The airline's shaky reputation stems from its ownership by the CIA from 1962 until 1973 and from Mr. Bastian's willingness in recent years to accept offbeat U.S. government work.

Among the airline's credits are its servicing of Gene Hasenfus' plane in Miami en route to Nicaragua prior to Mr. Hasenfus' capture by the Sandinistas.

But Southern, with 28 cargo planes in its fleet, also has moved zoo animals, delivered relief supplies to earthquake and famine victims, carried Mercedes-Benz and Rolls-Royce automobiles to African kings and, last October, transported a plane load of greyhound dogs from Boston to Venezuela.

The airline even hauled King Kong over Wilmington, N.C., in last year's box office flop, "King Kong Lives."

"People expect we're a ramshackle air carrier with all of our employees hiding behind dark glasses," Mr. Kress said. "We want to turn our image around in the minds of those who read business journals."

For more than three years, the airline had used a small Miami agency, Jean Wescourt Advertising, spending $200,000 on ads in such publications as *Air Cargo News* and *Aviation Week*. Now Southern plans to spend $400,000 in *The Wall Street Journal* and other national business publications this fall.

The ads, said agency Chairman Sandy Tinsley, will emphasize the airline's experience in transporting large items. The campaign won't mention the Iran-contra scandal, she said.

"We know a lot of ceos have heard our name," Mr. Kress said. "We're going to capitalize on that to form the correct image for ourselves."

Mr. Kress said during the initial agency discussion the company played with the idea of promoting its missile shipment work with a slogan, "Southern moves anything."

However, Mr. Kress said, that idea never made it to the chairman's desk.#

Woolworth unit picks Italia shop

CITY OF INDUSTRY, CALIF.—Holtzman's Little Folk Shop, a division of F.W. Woolworth Co., hired Los Angeles-based Italia & Associates for its $5 million retail account, previously handled in-house.

The company, which operates 300 Kids Mart stores in the western and southern U.S., plans to add 150 stores nationwide in 1988. Advertising spending will jump 20% at that time.

Italia, an agency specializing in retail accounts, also picked up Chatsworth-based Public Image, a 12-store off-price retailer specializing in young men's apparel, to its roster. The account was previously unassigned.

ZZZZ Best Co., Reseda, Calif., which filed for Chapter 11 bankruptcy protection last week amid allegations that founder Barry Minkow defrauded the company, has shelved plans to continue TV spots featuring the flamboyant Mr. Minkow. Agency Pearlman/Wohl/Oldshever/Marchese, Los Angeles, said the retail carpet-cleaning service had been on a regular advertising hiatus before the allegations came to light. ZZZZ Best had been spending $2 million annually in nine California markets.

West Coast News

Chiat/Day named Peter deVaux, 42, senior VP-chief operating officer, based in Los Angeles. Mr. deVaux formerly was senior VP-finance at Young & Rubicam, New York. He succeeds Steve Hunt, who left.

Evans/Kraft, Seattle, named Lon LaFlamme, 38, president of its three-office network. He previously was exec VP-director of client services. Mr. LaFlamme succeeds Donald Kraft, 60, who becomes chairman and remains ceo.#

Christopher

'Ms.'-givings over celebration

By MAURINE CHRISTOPHER

"Let the celebration begin," *Ms.*, a leading voice of feminism, trumpets in the introduction to its 230-page, 15th anniversary issue.

M. Christopher

I started flipping through, hoping for inspiration to shake women and their millions of male supporters out of their lethargy and spur them to action on crucial areas for them and the country.

Like a homework assignment, I read practically everything—from the Chevrolet Beretta gatefold ad for sporty motoring, through the Charlie fanny-patting Revlon ad, to the More cigarettes back page with a striking woman seeking "more cigarettes, more pleasure" despite the bold warning against the link to lung cancer, heart disease, emphysema and difficult pregnancies.

By the end, despite the optimistic results of a superficial survey of the mood of 200 women and 100 men, I was convinced women will have to look elsewhere for direction in pinpointing achievable goals, developing workable strategy and finding future leaders not associated with past disappointments. After the Equal Rights Amendment fiasco, new generals must be found.

Late at night when I accidently tuned in Gloria Steinem, co-founder and editor of *Ms.*, on the radio, plugging her special issue and the Henry Holt book, "Letters to *Ms.*," I felt even less like celebrating. She said victory in some areas may be 100 years away.

Ms. Steinem could be right if women reinforce the worst stereotypes about them by concentrating on the matters that take up a good deal of the milestone issue of a magazine that has been a trailblazer in its best moments.

Note the titles from the index. How about these pieces for tranquilizers? "A Global Click?" (Who in the family is going to do the laundry and cleaning?) "The Marriage Trap." "Teen Lust." "The F Word." "Sister/Friends." "Best Girl Friends." And the "15 Dumbest Men in America."

One writer felt triumphant now that women as well as men are listened to during the conversation at dinner parties. Oh, glory be.

I suggest the type of women *Ms.* is trying to sell to advertisers—"opinion makers," Ms. Steinem called them on the "Casper Citron Show" on WMCA-AM—might have been expecting attention and analyses on more pressing problems, such as:

- The diversion of billions to the military while families and singles are left to deal with unemployment, catastrophic medical costs and the shortage of childcare facilities.
- Mothers' anger at having to produce the sons that are sacrificed to foreign policy while having little, if any, influence over that policy.
- The danger that women in their child-bearing years again may lose control over their own bodies if the anti-abortion crusaders win.
- Lax enforcement of equal-employment opportunity laws and the disparity between what men and women are paid.

The July-August special does have an excellent article by Angela Bonavoglia about Pamela Rae Stewart, who is being sued in California for giving birth to a brain-dead son.

Otherwise, the most interesting reading for me came in the samples from "Letters from *Ms.*" A 73-year-old Philadelphia writer theorized ERA failed because farm women were never mobilized for the fight.

Also in "Letters," a Maine reader wrote: "What disappoints me most is that women in the U.S. have not organized sufficiently to put more women in government and key decision-making positions in the military. Women are absent from areas where their presence would humanize decisions."

Unfortunately, the lead celebrities featured in quickie interviews in letters are women no longer in power: Bella Abzug, former congresswoman; Carol Bellamy, former president of the New York City Council; and Gerry Ferraro, who must wish she had never heard of Walter Mondale.

The most disconcerting note of all: *Ms.* wraps up by exhorting readers to send money—$1,000—for a tax-deductible lifetime subscription. On the late-night radio show, Ms. Steinem said her magazine is "not in the black but is not losing such large sums of money" as other magazines. She put her losses over 15 years at less than $4 million. She estimated *Esquire* lost $26 million in a much shorter period and cited reports that *Vanity Fair's* red ink is running at about $40 million.

By contrast, according to the cofounder, readership and circulation are trending the right way for her. Advertiser guarantee rate base is 450,000. Ms. Steinem said she and her colleagues may relinquish their foundation status to become a profit maker by mounting a paid advertising and promotion campaign for *Ms.*#

Tobacco takes dip

Smokeless '86 sales slide 6.2%

By JOHN C. MAXWELL JR.

The big news in the sagging smokeless tobacco area is Pinkerton Tobacco Co. starting a new-product segment with its chewable Masterpiece Tobacs.

This new, gumlike product is unlike anything on the market today.

Masterpiece Tobacs, which comes in peppermint and cinnamon flavors, does not prompt the need to spit.

There are six units per foil-blister pack and three foil packs per box. The box looks something like a hard pack of cigarettes.

Each piece is hexagonal and weighs about 1.2 grams.

The product will retail at about $1.25 to $1.45, depending on state and local taxes, and is in the process of going into test (AA, May 11).

Smokeless tobacco units overall were down 6.2% in 1986, the largest decline in recent history. The previous year marked the first decline—off by about 1%.

This acceleration has come about because of the labeling regulations and taxation on the industry, as well as the bad press due to the supposed adverse effect that chewing tobacco has on the user.

We think this type of outlook will continue, so we anticipate further declines in the industry for the foreseeable future.

All sections of the industry declined, particularly plug, down 14%, and moist plug, down 13.7%.

Moist snuff and fine cut were down only a little more than 3%.

The main factor in the industry, loose leaf, was down in line with the industry, dropping 6.4%.

These trends, of course, had various ramifications for the individual companies.

Richmond, Va.-based Pinkerton, which has more than 80% of its volume in loose leaf, had the biggest share decline, down some 1.4 share points.

However, the company maintained its No. 3 position within the industry.

Greenwich, Conn.-based U.S. Tobacco Co., which is preponderantly in moist snuff and fine cut, gained 0.8 of a share.

Memphis, Tenn.-based Conwood Co., the industry leader, with items in most product areas, also was the leader in share gains, up some 0.9 Conwood gained share pretty much across the board, up one share point in loose leaf, 0.3 in moist cut and fine cut, three share points in moist plug and 0.65 in plug.

The company maintained share in twist roll and lost slightly in the dry snuff area.

We believe this industry will continue to be under pressure from the Surgeon General and others, and basically will have a downward momentum that we also see in the other tobacco areas.#

Mr. Maxwell is with Furman Selz Mager Dietz & Birney, New York.

Sugar group backs logo

WASHINGTON—The Sugar Association this month breaks advertising and promotional campaigns tied to its Sugermark logo, via North Castle Partners, Greenwich, Conn.

The advertising campaign is print only. The promotional campaign is for a contest for consumers to write a slogan for the logo.#

New Product Roundup

The following reports cover new-product introductions and product-line extensions.

SEASONINGS

MELROSE PARK, ILL.—**Alberto-Culver Co.** next month introduces nationally Mrs. Dash sodium-free seasoning convenience packs with a $1 million print campaign via Grey Advertising, Chicago.

LAUNDRY PRODUCTS

CARLSTADT, N.J.—**Airwick Industries** is testing liquid Lavender Sachet fabric softener in Northeastern markets as well as Dallas, Miami and the Carolinas. The product, part of a line that Airwick acquired from Bismarck, N.D.-based Gold Seal Co., is being advertised via 30 and 60-second TV spots that broke June 30 and free standing inserts distributed earlier in the month. Bloom Agency, New York, handles.

CIGARETTES

WINSTON-SALEM, N.C.—**R.J. Reynolds Tobacco USA** moved a lights version of its highly successful More cigarettes into test July 1 in western markets. More Lights 120s will deliver 12 milligrams of tar vs. the 17-milligram tar level of the mother brand, which has racked up a 1.4% share of market, or about $280 million in annual sales, since it was introduced in 1975. The new cigarettes are being marketed in western states including Arizona, Colorado, Montana and Wyoming. The rollout is supported by outdoor, magazine and point-of-purchase advertising, as well as by in-store promotion and couponing. Young & Rubicam, New York, handles.#

When your clients programs include loose-leaf binders...

then it warrants the very best.

A Peterson Case® takes you away from the ordinary.

A Peterson Case® identifies a uniquely constructed cover. It is an electronically sealed, turned edge, supported vinyl product which affords a rugged durability and exceptionally fine appearance. It can always be identified by the debossed line around the periphery of the lining which is a distinctive feature and has become a trademark of The Peterson Case®.

Many loose-leaf manufacturers incorporate "The Peterson Case®" in their "top-of-the-line" loose-leaf binders.

Ask your usual source for a sample or write to:

This data has been provided by Media Records for exclusive publication in Advertising Age and may not be reprinted or published in any form without explicit permission from Media Records. All newspapers represented are subscribers to Media Records. For those newspapers that subscribe to Media Records National Advertising Reporting Service, Total Advertising data shown has been supplied by the publisher to Media Records and included in this compilation. All publisher supplied figures are converted to MRCS/SAU inches by Media Records. These newspapers are indicated with an asterisk (*).

REPORTING METHODOLOGY

Media Records continues to measure in linage but due to the introduction of the SAU 6 column format Media Records has designed and developed a methodology with the approval of our subscribers, the INAME Measurements Committee, The ANPA/NAB Working Committee, The AAAA Newspaper Committee, and other industry groups.

The approved methodology is titled The Media Records Conversion System (MRCS) and is based upon the printed page area of each product of the newspaper and is a five step approach as follows:

1. Measure Printed Page.....
   Width and Depth in Inches.
2. Determine Square Inches of Page.....
   Multiply Width by Depth Inches.
3. Determine the Number of SAU Inches of Page.....
   Divide the Square Inches by 2.0625 (SAU Inches).
4. Measure the Total Lines of the Page.....
   Multiply Column Depth Agate Lines by the Number of Columns on the Page.
5. Determine the Factor for Converting Measured Lines to Reported SAU Inches.....
   Divide the Total Lines of Page by the Number of MRCS/SAU Inches of the Page.

SAU® is the registered trademark of the American Newspaper Publishers Association.

Games remain, but market ho-hums

By Ed Fitch

It might have been one of the best sports battles of the year. It might have rivaled Hagler vs. Leonard, the Mets vs. the Red Sox, Hulk Hogan vs. Andre the Giant. Instead it was more like the second half of Super Bowl XXI. In the end, the Oscars killed 'em.

According to Northbrook, Ill.-based A.C. Nielsen Co. the Academy Awards show drew nearly twice the audience as the March 30 NCAA championship basketball game pitting Indiana University against Syracuse University. During the game's crucial second half, when Chevy Chase was bantering and, of all things, Dom DeLuise and Telly Savalas singing on the Oscars, the score was, Oscars: 30.6 rating, 45 share; NCAA: 16.2 rating, 24 share.

While the NCAA championship game certainly lacks the appeal of the seventh game of the World Series, this rare one-on-one dramatic entertainment vs. sports entertainment should have been called for no contest. Even if the hotly contested Mets-Red Sox World Series was pitted against the Oscars, the game would have gone into extra innings: The Oscars matched the series' prime time seven game average of a 29 rating, 45 share.

Sports programming is not down for the count, however. By May, quite a while since the last whistle blew on the gridiron, ABC's "Monday Night Football" was in Nielsen's top 20 listing of 1986-87 season-to-date prime-time ratings.

But taking a look at National Football League broadcast rights shows just how much the game has changed. While ABC still will broadcast "MNF" next season and CBS and NBC will carry national and regional telecasts, cable network ESPN will carry four preseason contests, the Pro Bowl and eight regular season Sunday night games. This represents the first time NFL broadcast rights have strayed from the cozy con-

Market ho-hums

(Continued from Page S-1)

fines of the networks.

"The TV world is changing in terms of who is carrying sports," says Robert Dowling, president, Westport, Conn.-based *Sports Marketing News*. "Ten years ago, the networks commanded 92% of all viewers, now the percentage is in the low to mid-70s."

As the players have changed, so have the rules.

To overly simplify past practices, the networks would send their bids to the sports' commissioners and, with about as much mystery as Oscar night, the envelopes would be opened and the winners announced.

"[The sport executives] would sit down and say, 'We have this hot property, and you know it's hot, and you're making money off of it, so we're going to charge this much,' " says Bob Iger, VP-programming and rights negotiations, ABC Sports, New York. "I'm not going to say there was no element of negotiation, but the negotiation aspect wasn't so . . . so . . . difficult. The economic circumstances didn't require anything different."

Put simply, everybody was making money hand over fist. Despite paying high rights fees, the networks weren't suffering.

"We were passing some wildly inflated costs on to the advertisers," Mr. Iger says. "We were raking in the bucks, the sports were raking in the bucks."

In 1985, the networks started to realize they would have to trade in their rakes for tweezers. The proliferation of sports on both cable and network TV—the amount of network sports programming increased 63% from 1973 to 1983, according to Paul Kagan Associates, Carmel, Calif.—started to take its toll.

"The bottom fell out because of the proliferation," Mr. Iger says. "Things once considered special no longer were, and ratings slipped." Advertisers' interest tumbled along with the ratings. The networks found themselves locked into long-term contracts on products that would never be profitable.

For example, the three networks lost an estimated $75 million on NFL broadcasts last season. An even more dramatic case is ABC Sports' estimated $600 million, six-year contract with Major League Baseball for "Monday Night Game of the Week," alternating World Series, League Championship Series and All-Star games. The soft market and MLB Commissioner Peter Ueberroth's reported refusal to renegotiate the contract, which doesn't expire until 1989, has analysts saying ABC will lose an estimated $200 million on the package.

Despite some sizable deals, such as the $166 million CBS reportedly paid for the three-year exclusive rights to the NCAA basketball tournament, sports executives are starting to realize they "simply can't demand the same fees," says Mr. Dowling.

The reason is based in simple economics. CBS will pay an average of about $55 million for the rights to the NCAA tourney that culminated in the game that was drubbed by the Oscars in terms of ratings. And although it's only one program vs. an entire tournament, a spokesman for the Academy of Motion Picture Arts & Sciences says ABC paid "considerably less" than $55 million for the Oscars.

The well-publicized management and ownership changes at the networks, placing greater emphasis on the bottom line, are having an effect as well, says Mr. Iger. "Sports is now operated under different business procedures. The mandate is to make money and streamline."

The NFL pact was the first major contract to come under consideration after this reassessment. "All of the networks approached this round of negotiations with essentially the same philosophy," he says.

Val Pinchbeck, New York-based NFL's director-broadcasting, indicates the league was very aware of the changing market. "Art Modell [Cleveland Brown's owner and head of the NFL's negotiating committee] and [NFL Commissioner] Pete Rozell went into the negotiations with the best information possible," he says. "The information previously had been that the networks were making money off of their NFL packages." This time, Mr. Pinchbeck says, they entered the negotiations knowing the rights fees' upward spiral already had hit the ceiling.

In signing a three-year, $1.4 billion contract with the three networks and ESPN, the NFL took a 3.3% decrease in rights fees, a figure Mr. Pinchbeck won't confirm but says is "in the ballpark." The networks' contribution to the billion dollar-plus package was down 15%, according to a network source. ESPN came in off the bench just in time to help offset the NFL's losses.

"This time around ABC, CBS and NBC showed no strong interest in the specials package at the required economic levels," Mr. Pinchbeck says. "This opened up the opportunity for other interested parties to come in. We were able to design a package that met their needs and ours."

Bidding for the prime NFL rights—"MNF," nationally televised games, conference championships and the Super Bowl—should remain competitive because 37% of U.S. adults, or 63.2 million viewers, frequently watch professional football, according to New York-based Simmons Market Research Bureau. Baseball, college football, boxing and college and pro basketball, all of which more than 20% of U.S. adults frequently watch, probably would find themselves on the networks despite the latter's new budget considerations.

"You can probably list on two hands the sporting events TV is willing to pay for," says Mr. Dowling. "Most of the time, the networks say, 'Come to us with a package and a sponsor we can develop a relationship with, and then we'll see if we can get you on the air.' Most events buy their way onto the air."

But Mr. Iger maintains that the era of putting high-ticket sporting events on the air just for their cachet is over. "Some events will not be considered because they are unprofitable."

The networks may have trouble altering the game plan they've played with for so long. Carrying and identifying themselves with certain events and sports are how the networks define themselves, something that tends to artificially inflate the price to score the rights.

Although the rights to the 1988 Winter Olympics were bid on in 1984, Mr. Iger admits they should have seen signs of impending softness and curtailed their spending instincts. Instead the network paid $309 million for the rights to the Calgary games—"way above what even the Olympics can bear"—just before the commencement of the 1984 Winter Olympics in Sarajevo, for which they bid a com-

NFL giving Monday its best shot

New York Giants and Chicago Bears fans will be the first to admit that what goes around comes around. After long years of residing in or near their respective divisions' cellars, the Bears and Giants have ascended to the throne as the undisputed kings of the pigskin. In fact, months before the two teams will square off on the season's first installment of "Monday Night Football," *Inside Sports* ran a cover feature on the Sept. 14 game.

Early publicity of this kind is a windfall for New York-based ABC Sports, which will broadcast "MNF," and the National Football League, which is hoping the networks make money on their football contracts and put rights fee negotiations back on the upward track.

But network and NFL officials will stand right behind Bears and Giants fans in acknowledging the cyclical nature of their fortunes. More than ever, the proposed "MNF" schedule seems designed for the TV ratings game. Fifteen of the 16 scheduled games feature a team that made it to the playoffs last year; 15 games also include at least one team from one of the eight largest U.S. TV markets.

"The top teams just happened to be in major media markets—the Jets, the Giants, the Bears, the Rams, the Raiders," says Val Pinchbeck, director-broadcasting for the New York-based NFL. "It's always been a goal in national games, particularly during prime time, to put together a strong schedule of contenders and major markets."

A spokesman for New York-based ABC Sports says the network is "delighted about the quality of the games scheduled for Monday night." Hopefully, he says, that quality will be reflected in higher ratings and stronger ad schedules. It's difficult to call the "MNF" schedule a success this early in the game. What looks like a sellout game in early April could be a dog by midseason.

Mr. Pinchbeck says despite the abundance of major-market teams on this year's lineup, team performance, not home markets, takes precedence. "We need games of national quality for national telecasts," Mr. Pinchbeck says. "If Pittsburgh and Miami or Tampa Bay and Cincinnati are the top teams, those are the ones people want to see."

He admits to a bit of luck, however, in having contenders in major markets. "If Philadelphia [Eagles] and Detroit [Lions] were doing better, it would be ideal. But these things are cyclical over time, as any New York Giants fan will tell you."

—Ed Fitch

Sports Marketing News

There's more to marketing than sports

By Pat McGeehan

While we are enamored of sports programming because of its density of our target audience, it is clearly not a must buy for us," says Mark Reiss, director-corporate media, Adolph Coors Co., Golden, Colo. "It is a desired purchase for us, but it doesn't have elements that are so unique that it actually demands our participation."

To hear that kind of talk from any advertiser is bad news for the broadcast and cable sports networks. But Coors is not the only one. Advertisers of all kinds, including those that rely heavily on adult males, have rewritten the rules of the TV sports market.

"For years and years, sports was an automatic buy if you were targeted to men," says Jim Bell, senior VP-group media director at Grey Advertising, New York.

Pat McGeehan, a former Advertising Age reporter, covered the sporting goods industry and contributed to previous Sports Marketing Special Reports.

There's a new refrain for Coors and others as they find alternatives to reach adult males

"It no longer is, not even for cars and beer," he says.

Advertisers were willing to pay top dollar for sports because it was considered the most efficient way to reach adult males. Many advertisers didn't see another option.

"What happened was the advertisers began grousing about these huge commitments that they were forced to make by the traditional networks in order to participate," says David Martin, exec VP, Stroh Media Services, Detroit. The networks demanded that advertisers buy a certain number of spots in an event, sometimes requiring them to invest in other, non-sports programs.

Then the networks' sports programming ratings dropped. The pivotal point came in 1984 when the College Football Association argued successfully for the right to cut its own rights deals, breaking up the networks' monopoly. "So there was a ton of college football properties out there; fragmentation occurred," Mr. Martin says.

A proprietary network property suddenly diversified into syndication, regional packages and three-network packages. "It divided up the numbers," he says, "and advertisers said, 'Wait a minute. I've got a tremendous amount of money devoted to

(Continued on Page S-6)

CATCH THE MEN YOU WANT WITH NETS, HOOKS AND TRAPS.

Let's face it, the upscale men you're hunting are a different kind of animal. They earn more, spend more and do more. And when it comes to TV, they want more. More sports. So more often than not they're eluding the broadcast networks and being snared by ESPN.®

Night after night, ESPN stops upscale men in their tracks with an endless lineup of live, prime-time excitement. From NHL hockey to CFA college football. From college basketball to golf to tennis to boxing. This year, for the first time, they'll even be watching us for NFL Sunday Night Football.*

And when they're not busy watching, these men are out spending. In fact, they buy 22% more life insurance, 35% more telecommunications equipment and take 35% more business trips than the national average.*

Without ESPN, you're underdelivering this very attractive audience. But you can catch them effectively—for a much lower CPM than the networks—by placing just 10% of your sports budget with us. The results could change the way you spend your ad dollars from now on.

After all, if you're still trying to capture upscale men with the same old network buys, you just might need to change your bait.

paratively minor $91.5 million.

NBC was keeping pace, however, offering $304 million, he says. "We had always been an Olympics network and we wanted to go into Sarajevo with the rights to Calgary."

If the same negotiations were being held now, Mr. Iger says, the Games' profit potential would have been the deciding factor. "We'll be looking for sports that have no economic risk because the risk already is covered, or those that offer a guaranteed profit."

The result will be a reassessment of all sports programming. This has opened up the possibility for other eventa to hit the big time, which means making it onto network TV. "We're much more open to new ideas, particularly for corporate-sponsored events," he says, in which sponsors usually commit to a sizable ad schedule, minimizing the network's risk.

"There are a lot of new opportunities in network programming," says Holly Turner, president of Auchincloss & Turner, the sports marketing arm of San Francisco-based Women's Sports Foundation. "There are gaps in their schedules that need to be filled. They are willing to listen to ideas."

The onus is on the program producers, however. "The nets aren't coming to us and saying, 'Give us a program,'" she says. "It depends on those packaging the programming to do something creative and innovative."

Producers should look to play into the trend of network interest in corporate-backed, low-risk programming. "It really helps when you bring in an advertiser they hadn't had before."

ABC's "Wide World of Sports" picked up the WSF's "The Challenge of the Champions" tennis match when WSF signed on Ocean Spray Cranberries as a sponsor. "We brought Ocean Spray to ABC for the first time," Ms. Turner says. "We look to make a marriage between the event, the production, the advertiser, the network."

Now if only the NCAA could play their championship game at the Oscars ceremony with Chevy Chase and Goldie Hawn calling the play-by-play . . . .

Seoul lament; wrong place, wrong time

By Lori Kesler

In January 1984, ABC agreed to pay a record $309 million for U.S. rights to broadcast the 1988 Winter Games from Calgary. That was the highest price a network ever had bid for an Olympics, more than triple the $91.5 million ABC bid for the Winter Games in Sarajevo, Yugoslavia, and well above the $225 million Los Angeles Summer Games' price tag.

It's understandable, then, that the Seoul Olympic Organizing Committee (SLOOC) expected a huge windfall when it started bargaining in mid-1985 for the 1988 Summer Games. Knowing the Seoul Games would generate nearly twice as much programming as Calgary, SLOOC officials reportedly wanted $1 billion.

But they didn't get it. A lot of things had changed between January 1984 and October 1985, when the SLOOC closed its deal with NBC.

Sarajevo had drawn lower ratings than expected, making TV and ad executives wary despite Los Angeles' success. And some thought Seoul's distant location would create severe time-delay problems.

"We still think it's a problem," says an ABC official. "We felt Calgary was the more viable of the two opportunities."

Seoul's distant location currently is the least of its problems. Because of civil unrest in South Korea, there was speculation at press time that the Olympic Games might be moved to Los Angeles or Moscow, both of which have existing facilities.

■ *Difficult rights talks, civil unrest portend trouble for country that once wanted $1 billion*

The SLOOC experienced another bit of bad timing. The negotiations took place at "the worst possible time for the SLOOC" because CBS was busy fighting Ted Turner and ABC was being taken over by Capital Cities/ABC, says Monica de Hellerman, president of New York-based Sport Summit.

Ironically, the success of the L.A. Games hurt the SLOOC's bargaining power, says Barry Frank, senior group VP, International Management Group, a New York-based sports marketing company. He says shortly after the 1984 Summer Games, the market "went to hell, and it's my theory that L.A. tore it apart."

"Too much money was taken out of the marketplace in a 17-day period," he says. "Suddenly, there was nothing left to invest in the last quarter of '84 and '85."

In the end, the Koreans settled for just $300 million in guaranteed rights fees. They'll also get a percentage of NBC's gross revenues at a certain point above $600 million, but that arrangement likely won't yield any benefits. Current projections call for NBC to take in $600 million on the Olympics; the network says it has sold $350 million in advertising so far.

An NBC official says none of the advertisers have expressed anxiety over the political situation in South Korea. The network, which lost $34 million when the U.S. boycotted the Moscow Games in 1980, is insured for the loss of rights fees and preparation expenses should a problem occur.

ABC admits it will lose millions on the Winter Olympics next year but says it's not giving up on the Games.

"They've been profitable for us in the past and we're confident they'll be profitable in the future," says Larre Barrett, VP-Olympic sales, New York-based ABC Sports.

Since ABC bought the rights to Calgary, a softening market has forced the nets to take a

Nets' efforts

(Continued from Page S-10)

that the Olympics and election year campaign spots create a surge in network ad sales every fourth year, and 1988 should be no exception if the Olympics generate the $865 million to $965 million predicted.

But that surge in network revenues may not be as big as it appears. Mr. Kostyra estimates the Olympics will add slightly less than 5% to TV's $9 billion market.

Insiders say the rest of the Olympic millions likely would be siphoned from other TV advertising, particularly sports. "It's got to happen," says one TV source. "Some companies have a separate fund for the Olympics, but many will take it right out of their existing budgets."

While flat ad spending and other factors may take a toll, many advertisers will support the Olympics to tie into an event that nourishes patriotism and honors excellence.

And they like the Olympics' TV audience, which splits about evenly between male and female and skews heavily toward the upper-income, harder-to-reach viewer.

"From a sports standpoint, nothing surpasses the Olympics," says Mr. Barrett. "Nothing else delivers the quality and quantity of audience over a period of time."

Mr. Kostyra agrees—to a point. "If Americans win big and win early, the audience will come to the TV set and watch,"

Our audience buys more sof

30% of all U.S. TV households watch WWF programming every month. That's a lot of thirsty people. They represent more consumers in the prime 12-34 age group than any soft drink can claim.

More good news: Our audience is evenly distributed over A, B and C counties. Household income figures accurately mirror the total U.S. TV audience. And here's the kicker:

We give advertisers more men 18-49 than the average network sports program. And we do it for

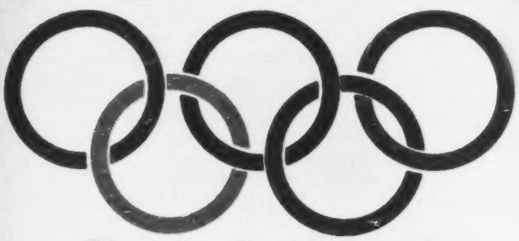
harder line as demonstrated by their negotiations with the National Football League. "You're going to see that same kind of posture for the 1992 Olympics," he says. "Everyone's interested in them, but we'll all be casting a cautious fiscal eye on the rights negotiations."

And this time, the networks will make their bids only after they've assessed 1988. They learned from ABC's experience: The network closed the Calgary deal a month before technical problems and snowstorms poked gaping holes in its coverage at Sarajevo.

Most of 1992's Winter Games in the French Alps and Summer Games in Barcelona, Spain, will be broadcast on a time-delay basis, cutting their value in the U.S., Mr. Barrett says.

Bert Zeldin, New York-based NBC's VP-Olympic sales and marketing, agrees. "There's no way American networks are going to pay as much for taped coverage from Europe," he says.

After 1992, the Olympics will be staggered at two-year intervals, with the next winter competition set for 1994, followed by the Summer Games in 1996. Most observers applaud the move, saying the Games will attract more advertising—and higher TV fees—if they are held in separate years.



The price of gold tops out

	Network	Rights fees
1988 Summer Games	NBC	$300 million
1988 Winter Games	ABC	$309 million
1984 Summer Games	ABC	$225 million
1984 Winter Games	ABC	$91.5 million
1980 Summer Games	NBC	$87 million
1980 Winter Games	ABC	$15.5 million

Olympics starting lineups

At press time, several major advertisers have signed on with New York-based networks NBC-TV and ABC-TV, including Allied Aftermarket, Anheuser-Busch Cos., Coca-Cola Co., Eastman Kodak Co., Federal Express Corp., Gator Aid, Johnson & Johnson, K mart Corp., McDonald's Corp., Miller Brewing Co. and Visa USA.

NBC also has signed American Gas Association, General Motors Corp., Hyundai Motor America and Isuzu Motors for the Summer Games.

ABC has American Airlines, American Motors Corp., Blue Cross & Blue Shield Associations, Chrysler Corp., Ford Motor Co., E&J Gallo Winery, Merrill Lynch & Co., IBM Corp. and Stanley Tool lined up for Calgary.

he says. "But if Americans aren't winning, the viewers will just turn it off."

Mr. Zeldin says people will tune in to see U.S. and Eastern Bloc athletes square off in the Summer Games for the first time in 12 years. "The Americans won't grab as much gold as they did in L.A.," he says, "but in many instances, that's not important."

Although Mr. Kostyra is confident the Olympics will generate a lot of interest, "advertisers do have concerns. For example, what happens if there are political problems [in the host country] or game delays or transmission difficulties?" Both networks already have covered events at their respective 1988 Olympic sites to reduce the chances for technical foul-ups during the Games.

But even if the transmissions come through loud and clear, advertisers are taking a now familiar stance.

"We just don't know how much the Olympics are going to deliver. Advertisers have gotten burned in the past with Sarajevo and Moscow. They're not exactly negative," he says, "just cautious."

Workshop spells out 'how to' of print ads

New York—Discovering how to write effective, sales-producing copy and learning how to boost the communication power of print ads will be the focus of several sessions at the Advertising Age Creative Workshop, scheduled for Aug. 23 to 26 at the New York Hilton.

Priscilla Waring, VP, Gallup & Robinson, will present a comparison of high and low-performing ads in a wide range of product and service categories and will demonstrate which techniques work best in today's competitive environment.

In her session, entitled "In the Eye of the Beholder," Ms. Waring will concentrate on how to use high-impact visual and illustrative elements to capture readers' attention and deliver the company's message.

Another presentation, called "The A, B & C of Effective Print," will be given by Anthony Antin, former director of creative services for *Reader's Digest*.

Mr. Antin will examine the standards by which print advertising can be judged.

Steve Hayden, exec VP-senior creative director, BBDO Worldwide, will look at the changing role of print advertising in "Define Print and How to Do It."

Mr. Hayden will discuss ways in which an agency can improve its print capabilities and will demonstrate the rewards of successes and the cost for failures in print.

Another examination of the power of print will be given by a panel of executives from some of today's leading small-to-midsize agencies. John Connors Jr., president of Hill, Holliday, Connors, Cosmopulos, will moderate the panel. Panel members will be Thomas Monahan, president-creative director, Leonard Monahan Saabye; Andy Berlin, principal, Goodby, Berlin & Silverstein; and Lee Lynch, chairman, Carmichael-Lynch.

For more information, contact Advertising Age Education, 220 E. 42nd St., New York 10017; or call 1-800-233-3435. In New York state, call (212) 210-0296.#

Connor backs video items

Wausau, Wis.—Connor Toy Corp. plans to spend $1 million on a merchandising effort for Videosmarts and ComputerSmarts during the summer and early fall.

Interactive video displays were placed in more than 2,000 retail outlets, said Jan Allan Nowak, Connor's VP-marketing communications.

He said 15 toy and retail chains will participate.

Each display will be equipped with a TV monitor, self-wind videocassette and a demonstration tape on Videosmarts, an electronic VCR-based learning system, and the more advanced ComputerSmarts.

Both products are attached to VCRs, but the latter also can be used as a portable computer for children ages 6 to 10.

ComputerSmarts will hit retail shelves in August.

Connor's other major line is Gymboree Corp., Burlingame, Calif., the internationally franchised exercise program for children (AA, July 6).#

INTERNATIONAL AGENCY/CLIENT REPORT

How to read the charts

ADVERTISING AGE asked the 28 agencies surveyed for this year's report to list accounts that were worth at least $3 million and that were served in at least three countries as of Dec. 31, 1986.

The charts are not a complete breakdown of every agency's offices and clients. Some countries were not included because of lack of space, and some accounts were not listed because information about them came in after deadline. Additional business is listed in the "Notes to Charts" that follow the agency summaries.#

*Non-equity affiliation. Source: N W Ayer

N W Ayer

N W Ayer, New York, had non-U.S. gross income of $33.4 million in 1986, a 24.6% increase over 1985. Non-U.S. billings were up 31.4% to $229.3 million. Worldwide gross income reached $125.5 million, of which 26.6% came from international business. Worldwide billings totaled $901.3 million, with international contributing 25.4%.

Ayer owns majority or maximum-allowable stock in 12 agencies and has non-equity affiliations with 23 others.

In 1986, Ayer bought majority equity in the TAPSA agency, based in Madrid. Connaghan & May Ayer in Australia bought Baker Robson Marygold in Melbourne and merged the CMA and BRM agencies. The new agency is now known as Baker Robson Marygold Ayer.

Major international business won in 1986 included Avon Products, Continental Airlines, Burger King Corp. (Hong Kong, Spain); Renault (Italy); Henkel (France); Ford Motor Co., BMW (Malaysia); Samsonite Corp., S.T. Du Pont Co. (Hong Kong); General Motors Corp. (U.K.); Subaru, Courvoisier (Australia); Bacardi Imports, Franklin Mint (Spain); Gillette Co., Ricoh (pan-European).

The agency lost the Smirnoff account in France, Visa in Singapore and Clairol Appliances in the U.K.

Key international executives include: Louis Hagopian, chairman-ceo; Jerry Siano, vice-chairman and chairman, Ayer, New York; Tom Maxey, president-international; Ted Regan, exec VP-international creative director; Peter Elder, senior VP-managing director, Europe/Middle East; David Dodd, senior VP-managing director, Asia/Pacific/Latin America; and James Haag, senior VP-international business development.#

Leo Burnett Co.

Leo Burnett Co., Chicago, had non-U.S. gross income of $104.2 million in 1986, an increase of 15.7% from 1985. Non-U.S. billings rose nearly 17% to $700.2 million last year.

Gross income was $292.3 million in 1986, with more than 35% coming from international accounts.

Worldwide billings were $2 billion, with international representing 34% of the total.

Burnett's non-U.S. network consists of 45 offices in 34 countries. It owns majority or maximum-allowable stock in 42 agencies, minority in three and has a non-equity affiliation with five.

Major accounts gained by the agency in 1986 included PepsiCo (in 23 countries) and First Brands (France, Spain, Egypt, Hong Kong, Philippines, Singapore).

Accounts lost last year included Seven-Up Co. (in 23 countries) and Union Carbide Corp. (Canada, Colombia, Netherlands, Egypt, Hong Kong, Philippines).

Top international executives include: Henry Feeley, chairman-ceo, international; Michael Conrad, president-chief creative director; regional managing directors Albert Winninghoff (Europe/Middle East), Tony Houghton (Canada), Bruce Bullpitt (Australia/New Zealand), Kerry Rubie (Asia) and Sergio Suarez-Solis (Latin America).#

DFS Dorland Worldwide

DFS Dorland Worldwide, New York, was formed in April 1986, when Dancer Fitzgerald Sample merged with Dorland Advertising, a U.K. subsidiary of Saatchi & Saatchi. The agency last month was merged by Saatchi with Saatchi & Saatchi Compton Worldwide.

The agency had non-U.S. gross income of $3.6 million in 1986, a 38.4% increase over comparable figures for 1985. Non-U.S. billings were $24.6 million, up 41.3% from 1985.

Worldwide gross income was $119.6 million, of which 3% was international. Worldwide billings were $926 million, with international business accounting for 2.7% of the total.

The network has 28 agencies with 41 offices in 26 countries. DFS Dorland owns majority or maximum-allowable stock in six agencies, a minority interest in three and has non-equity affiliations with 19.

Major international accounts won in 1986 included Pan American World Airways (Chile, Mexico, Venezuela, U.K.) and Wrangler-V.F. Corp. (Argentina, Chile, Colombia). Accounts lost last year included Distillers (France, Spain, U.K.), Fax beer (Denmark, Germany, Italy, Sweden) and Wendy's International (Canada, Australia, Japan).

Top international executives: Stuart Upson, chairman; William Vickery, director-international; Robert Eagan, senior VP-management supervisor; Michael Bungey, director-Europe.#

DMB&B

D'Arcy Masius Benton & Bowles, New York, had non-U.S. gross income of $144.4 million in 1986, an 8.1% increase from 1985. Non-U.S. billings rose 6.9% to $959.1 million.

Worldwide gross income reached $336.3 million last year, and international business contributed about 43% of the total.

World billings were up 1.3% to close to $2.3 billion, with 42% coming from international.

As of first quarter 1987, foreign agencies included 51 offices in 28 countries, with a majority interest in 49 and minority in two.

DMB&B has a non-equity affiliation with 14 other foreign agencies. In 1986 it still was experiencing shakeout of accounts as a result of the merger of D'Arcy MacManus Masius and Benton

& Bowles in 1985. More than 100 foreign accounts were added in 1986 while about 70 were lost.

The agency's top international executives include: John S. Bowen, chairman-ceo; George J. Simko, president-diversified communications; Peter T.W. Redsell, president-international; Craig D. Brown, exec VP-chief financial officer; Bernard Kanner, exec VP-international.#

DDB Needham Worldwide

DDB Needham Worldwide had non-U.S. gross income of $125 million in 1986, and non-U.S. billings of $830.9 million. Worldwide gross income was $375 million in 1986, of which 33% came from international business.

Worldwide billings reached nearly $2.6 billion, and international accounts made up 32% of that total.

The agency operates in 40 cities in 22 countries. It owns a majority or maximum-allowable interest in 63 agencies and minority in 29. It has a non-equity affiliation with one.

Omnicom Group's DDB Needham Worldwide was created with the merger of Doyle Dane Bernbach and Needham Harper Worldwide, both New York. The merger was completed in November 1986 and resulted in major changes in the operation's domestic and international businesses. Overall, the new agency increased its international accounts in 1986; gains included Mobil Oil, S.C. Johnson Co., Toys "R" Us and Xerox in Hong Kong.

Top international executives: Keith Reinhard, chairman-ceo; John Bernbach, president-chief operating officer; John Bradstock, president-international division; and Barbara Wolfson, VP-international service group.#

DYR Worldwide

DYR Worldwide, New York, a 50-50 joint venture between Dentsu, Tokyo and Young & Rubicam, New York (the world's largest and second-largest ad agencies, respectively), had non-U.S. gross income of $31.2 million in 1986, up 50.7% over 1985. Non-U.S. billings were $215.9 million, up 50.5% over the previous year.

Worldwide gross income was $50.7 million, with international business representing 61.5%. Worldwide billings were $347.1 million, 62.2% of which were from outside the U.S.

The network has offices in seven countries outside Japan and the U.S.

In 1986, Canon USA threatened to move its $60 million 35mm camera account from DYR because Y&R had gained rival Eastman Kodak Co.'s 35mm account. Although both Dentsu and Y&R contend DYR is an independent network, Y&R sold its shares in DYR's $95 million New York office to Dentsu-owned DCA, which now handles Canon. Also last year, DYR opened an office in China. Accounts gained include Holiday Inn in China and Unisys (Sperry/Burroughs) in China, Hong Kong and Japan.

Top international executives: Minoro Kamata, chairman (Tokyo); Tim Pollak, president-ceo (New York); Sinzo Uneno, exec VP-area director, Southeast Asia/Australia; Peggy Healy, senior VP-business affairs manager.

Eurocom Group

Eurocom Group, Paris, had total, non-French gross income of $41.4 million in 1986, down 13% from 1985.

Worldwide gross income was $216.4 million, 19% of which was outside France.

In 1985, worldwide gross income was $129.1 million, 37% of which was outside France.

Eurocom's foreign shops include 15 in nine countries in the HCM network. Eurocom has a 51% interest in HCM, with Young & Rubicam holding the

remaining 49%.

Through its Univas partnership, Eurocom holds equity in agencies in five countries and has partnerships in eight countries. With Belier, Eurocom has a 20% equity in CDP International in four countries. Havas, which owns 45% of Eurocom, is being privatized, though the government will maintain a "golden share" that will prevent hostile takeovers.

Top international executives: Bernard Brochand, president, and Claude Douce, VP.#

Foote, Cone & Belding

Foote, Cone & Belding Communications, Chicago, had non-U.S. gross income of $80.6 million in 1986, up 14.4% from 1985. Non-U.S. billings also rose 14.4%, topping the $537 million mark in 1986.

Worldwide gross income was $323 million in 1986, with international making up 25% of the total. Worldwide billings reached $2.2 billion, and there, too, international business held a 25% share. In 1985, FCB's non-U.S. gross income equalled 24.8% share of total.

FCB owns a majority or maximum-allowable interest in 46 agencies, has a minority interest in 17 and has non-equity affiliation with seven agencies outside the U.S. In 1986, FCB completed the integration of the NCK Organization. The agency closed offices in Berlin, Rome and Singapore because of insufficient volume and added offices in Thailand, Malaysia and Turkey. FCB merged with three foreign agencies in Mexico, Venezuela and Australia, and in Canada bought an agency and a public relations company.

FCB picked up 28 new accounts in 11 countries in 1986. Accounts lost included Pelforth (France); ICI Dulux (Germany); Renault (Italy); Kraft Inc., Gordon's gin, ICI Dulux (U.K.); Kraft and Kentucky Colonel (Canada).

Top international executives: Norman W. Brown, chairman-ceo; Abbott C. Jones, president-chief operating officer; Stanley Katz, vice chairman; W.R. Wirth Jr., exec VP-corporate resources; Craig R. Wiggins, president-ceo, FCB/Continental Europe; Len Sugarman, vice chairman-creative officer, FCB/London; Antonio Beja, chairman, FCB/Latin America-Pacific-Africa, and chairman, international committee of the board; Jose M. Cubas, president, FCB/Latin America; and Kevin Dutton, chairman, FCB/Australia-New Zealand.#

GGK

GGK, an agency group headquartered in Basel, Switzerland, had non-U.S. income of $40.3 million in 1986, 81.7% of total gross income of $49.3 million. The network consists of 16 agencies in 10 countries.

Major international accounts won in 1986 include Beiersdorf (Brazil, Netherlands, Spain). The agency lost the United Technologies account, which it had represented in the U.S., France, Germany and the U.K.

Top international executives: Peter Erzberger, director-international executive board, and Karl Gerstner, president.#

Grey Advertising

Grey Advertising, New York, had non-U.S. gross income of $105.5 million in 1986, a jump of 38.6% from the previous year. Non-U.S. billings rose at the same rate to $703.7 million.

Worldwide gross income was $309.1 million, of which 34.1% was international business.

Worldwide billings were just more than $2 billion, showing a 21% increase; international accounted for about 34% of the total.

The network consists of 66 agencies in 30 countries.

Grey gained Mars business in Aus-

tria and France; Nike business in Belgium, France and the U.K.; Hertz in Germany, South Africa and the U.K.

Grey also gained the U.S. Mint account in Germany, Hong Kong and Japan.

Accounts lost included Martini & Rossi in Argentina, Citroen in Belgium and Northwest Orient Airlines in Belgium and Taiwan.

Top international executives: Edward Meyer, chairman-president; Norman Vale, managing director-international; and area directors O. John Shannon, Europe; Frank Clarke, Americas; and Bruce McDonald, Pacific.#

Hakuhodo

Hakuhodo, Tokyo, had gross income in 1986 of $309.6 million on billings of $2.27 billion. The agency declined to reveal the percentage of income and billings derived from outside Japan.

In 1985, Hakuhodo had non-Japanese gross income of $6.6 million—3.3% of its total.

It has majority or maximum-allowable interest in six agencies outside Japan and has non-equity relationships with seven other agencies.

Major international accounts added in 1986 are Kirin beer in Hong Kong and Toyota in London. It lost the TDK account, which it served in Japan, Australia and Germany.

Top international executives: Michitaka Kondo, chairman-ceo; Ritsuo Isobe, president; and Tadakatsu Ishikawa, executive manager-corporate public relations.#

HCM

HCM, New York, a joint venture between Paris-based Eurocom (51%) and New York-based Young & Rubicam (49%), had non-U.S. gross income of $81.8 million in 1986, a 15.2% gain over the previous year. Non-U.S. billings rose to $545.4 million, also a 15.2% increase.

Worldwide gross income was $106 million, of which 79% was generated outside the U.S. Worldwide billings hit $723 million, and international business accounted for a 77.6% share of that business. HCM operates 31 offices in 10 countries, including the U.S., with a regional network of 12 shops in France. It owns a majority interest in all its agencies.

Accounts gained in 1986 included Bisquit cognac (France, Germany); Berlitz School, National Lottery, Larousse, Paribas Bank, Hewlett-Packard Co., KIS, CGE, Champion (France); Materne (Belgium); Deinhard, Sonnen & Basserman, Swiss Credit Bank, (Switzerland); Bongrain (Germany); Sony, Reckitt & Colman, Sunbeam (Switzerland); Hanorah, Essilor, Lovable, Pan American World Airways (Italy); Henkel, BDF, Nivea, CPC, Tempo, MIA, (Spain); Prince cigarettes (Netherlands); and Orangina, Pommery champagne (pan-European).

Accounts lost included SNCF-national railroad (France); Spies, Hecker & Co. (Germany); Allied Bakeries, Software Publishing (U.K.); and Lotto (Netherlands).

Top international executives: Robert Schmetterer, ceo-worldwide; Alain de Pouzilhac, ceo-Europe; Annie Prost, senior VP-director international accounts; and Alain Rousset, senior VP-chief financial officer.#

Lowe International

Lowe International, London, is a division of Lowe Howard-Spink & Bell, which had worldwide gross income of $111.3 million in 1986, of which $91.3 million, or 82%, was outside the U.K.

Lowe International consists of 16 offices in 10 countries.

In 1986, Lowe gained Parker Pen business in the U.S. and France. It lost the Rothmans account in the U.K. but still has it in Australia and Bel-

gium.

The agency's top international executives include: Frank Lowe, chairman; Les Delano, vice chairman, New York; and Keith Jacobs, international vice chairman.#

McCann-Erickson

McCann-Erickson Worldwide, New York, had total gross income outside the U.S. amounting to $280.9 million in 1986, a gain of 14.8% over the company's non-U.S. gross income in 1985. The agency's total billings outside the U.S. in 1986 exceeded $1.87 billion, a 14.8% increase over 1985.

Worldwide gross income hit $428 million in 1986, with international making up 65.6% of the total. Worldwide billings registered $2.85 billion, with international also accounting for 65.6%.

McCann owns majority or maximum-allowable stock in 119 foreign shops and has non-equity affiliations with 22.

The company's international client list changed substantially in 1986, but overall results made for a solid net gain in non-U.S. business.

Gains included American Express Gold Card (Austria, Denmark, France, Italy) and Bayer Aspirin (Austria, Germany, Italy, Netherlands, Spain, Brazil).

Top international executives: Bob James, chairman-ceo; Jerry McNamara, president-ceo; Barry Day, vice chairman; Gianni Cottardo and Jerry Shively, exec VPs-Europe; Michael Ferrier, exec VP-Europe/Africa; Jens Olesen, exec VP-Latin America; and Max Cusnir, exec VP-Asia/Pacific.#

Mojo MDA Group

Mojo MDA Group, Paddington, New South Wales, Australia, was formed in July 1986 with the merger of Mojo Australia and Monahan Dayman Adams.

In December, the group made its first move into the U.S. with the purchase of San Francisco-based Allen & Dorward.

The group had non-Australian gross income of $21.4 million in 1986, just more than half of its worldwide gross income of $42.4 million. It had non-Australian billings of $86.9 million in 1986, 31% of its worldwide billings of $282.8 million.

Mojo MDA's international network consists of 19 offices in four countries. The group also has non-equity affiliations with four agencies. The group is scheduled to open offices in the U.K. and New Zealand by Aug. 1.

A major account won since the merger is Swan Breweries in the U.S., which the agency already served in Australia.

Principal international executives include Brian Monahan, chairman; Malcolm Spry, group managing director; Don Morris, managing director; and Wayne Kingston, head of the London office.#

Ogilvy & Mather

Ogilvy & Mather Worldwide, part of the Ogilvy Group, New York, had non-U.S. gross income of $209.9 million in 1986, up about 32% from 1985. Non-U.S. billings were $1.49 billion, an increase of 31%.

Worldwide gross income was $459.6 million, of which 46% was international. Worldwide billings were $3.15 million, with international making up slightly more than 47% of that total.

The agency has 249 offices in 47 countries, including the U.S. It owns majority or maximum-allowable stock in 190 offices, a minority stake in 47 agencies and has non-equity affiliations with 12 agencies. In 1986, O&M Worldwide purchased Promotional Campaigns, a British sales-promotion company. The agency also purchased a minority interest in Reklam Moran, a Turkish ad agency, and entered into a non-equity association with Mahir, the major advertising agency in Hungary.

Key accounts gained in 1986 in-

cluded American Express Co. (Germany, Philippines); BAT Industries (Switzerland); Beecham, Dow Chemical Co. (Ecuador); Boeing (Australia, China, Germany, Philippines); California Prune Board (Finland, Germany, Italy, Norway, Spain, Sweden, U.K.).

Foreign accounts lost included BAT Industries (Brazil); Boeing (Sweden); Parker Pen (17 countries); and PepsiCo (Norway, Sweden).

The list Ogilvy and Mathers top international executives includes: Bill Phillips, chairman-ceo, Ogilvy Group; Ken Roman, chairman, O&M Worldwide; Alex Brody, president-international; Norman Berry, chairman-ceo, O&M, New York, and creative head, O&M Worldwide; Chuck Walsh, chief financial officer, O&M Worldwide.#

Publicis International

Publicis International, Paris, had non-French gross income in 1986 of $47.5 million, 65.3% of total gross income of $72.7 million. Non-French billings were $324 million, 68.6% of the total of $472.3 million.

Publicis owns majority or maximum-allowable stock in 21 shops and has non-equity affiliations with 15.

In 1986, the agency gained the international account of Woolmark (Belgium, Netherlands) and lost the international accounts of Europcar and Waterman pens and most of Henkel, except in Austria.

The list of Publicis' key international officers includes: Marcel Bleustein-Blanchet, chairman, Publicis Group; Claude Marcus, chairman, Publicis International; and Marcel Levy, chairman, Publicis Conseil.#

Roux, Seguela, Cayzac & Goudard

Roux, Seguela, Cayzac & Goudard, Paris, had non-French gross income of $27.6 million in 1986, 47.6% over its 1985 total. Non-French billings were $183.7 million, up 37.3% from the previous year. The agency's total worldwide gross income was $80.3 million last year on billings of $552.2 million. RSC&G owns majority stock in 18 agencies.

International accounts gained in the last year include Pernod-Ricard (France, Italy, U.K.) and Tempo Sanys (Germany). Accounts lost: Marlboro Leisurewear and Sheraton Hotels.

The list of key international executives includes: Bernard Roux, president; Jacques Seguela, VP; Alain Cayzac, president RSC&G-Paris; Jean-Michel Goudard, president, RSC&G International.#

Saatchi & Saatchi Compton Worldwide

Saatchi & Saatchi Compton Worldwide, London, had non-U.S. gross income of $295.9 million in 1986, a 9.1% increase over 1985. Non-U.S. billings rose 7.8% to $1.94 billion in 1986. Worldwide gross income was $490.5 million, with non-U.S. gross income making up 60.3% of the total. Worldwide billings grew to $4.43 billion in 1986, with non-U.S. billings 43.8%.

The network includes 60 agencies, in which Saatchi holds equity in 32 and no equity in 28.

Last month, Saatchi & Saatchi PLC merged Saatchi & Saatchi Compton Worldwide and DFS Dorland Worldwide into Saatchi & Saatchi DFS Compton.

Accounts gained on an international basis in '86 include American Brands, Beecham Group, Bongrain Gerard, Commonwealth of Puerto Rico, Racal, Sterling and Tonka Corp. The agency

lost McDonald's Corp., Mattel Inc. and Rowntree-Mackintosh (U.K.).

Top international executives: O. Milton Gossett, chairman-ceo; Jeremy Sinclair and Alban Lloyd, joint chairmen, Saatchi & Saatchi Compton International; Roy Warman and Terry Bannister, joint chairmen, S&SC International; and Ed Wax, president.#

Scali, McCabe, Sloves

Scali, McCabe, Sloves, New York (part of the Ogilvy Group), had non-U.S. gross income of $15.1 million in 1986, up 11.8% from 1985. Non-U.S. billings increased 11.4% to $101.1 million. The agency's worldwide gross income reached $77.5 million in 1986, with international accounting for 19.5% of the total. Worldwide billings were $556.6 million, with international accounting for 18.1%.

Scali owns majority or maximum-allowable interest in seven agencies and minority interest in three. In February 1986, Scali purchased a minority interest in Audour Soum, a French agency.

Key international accounts won in 1986 include Ralston Purina Co., Famsa/Daimler Benz, Seguros America, Moulinex (Mexico); London Commodity Exchange, Northern Foods, Orbis, Schwarzkopf, Smith & Nephew, British Telecom (U.K.); Champion, N.A. Decorative, Ralston (Burger Crunch), LaBatt Brewing (Guinness), Lipton (soup, fruit), Cadbury fudge (Canada); *Time*, Pacific Pet Foods, Michigan Bayley (Australia); and Bosch, Loewe, Siemens, Wella (Germany).

Losses included Alberto-Culver Co., (Mexico); Arthur Andersen, Radio Marketing Bureau, Savacenter, Watney (U.K.); Sara Lee Corp. (Canada); Met Transit, State Transit (Australia); and Vitra (Germany).

The top international executive for Scali, McCabe, Sloves is Martin Sloves, chairman-ceo.#

SSC&B:Lintas Worldwide

SSC&B:Lintas Worldwide, based in London, had 1986 non-U.S. gross income of $168 million, an increase of 18.9% over 1985. Non-U.S. billings rose to $1.2 billion, up almost 20%.

Worldwide gross income was $237 million in 1986, with international contributing 70.8%. Worldwide billings rose to $1.6 billion, with international business 72% of the total.

SSC&B:Lintas, part of the Interpublic Group of Cos., owns majority or maximum-allowable stock in 50 agencies, minority interest in four and has a non-equity affiliation with 15.

More than 90 overseas accounts were added in various countries in 1986, while about 30 were lost.

Top international executives: William Weithas, worldwide chairman-ceo; Kenneth Robbins, chairman-ceo, international; and Spencer Plavoukos, chairman-ceo, U.S.#

TBWA

TBWA Advertising, New York, had non-U.S. gross income of $50 million in 1986, an increase of 37% over 1985.

Non-U.S. billings increased more than 43%, to $348.8 million. This was attributed both to internal growth and international currency gains.

Worldwide gross income registered $65.7 million in 1986, with non-U.S. business accounting for 76% of total income. During the same period, worldwide billings rose to $453.3 million, with international contributing nearly 77%.

TBWA owns majority or maximum-allowable stock in 12 shops in nine countries, and has non-equity affiliations with seven.

International accounts gained in 1986 included Henkel (Spain); Ralston Purina Co. (U.K.); and Air Plus credit

The 1987 International Agency/Client Report was prepared by Mark Rosati, assistant international editor; Ann Keeton, free-lance writer; Carol Septow, graphics designer; and Ilse Cermak, international copy editor.

Some agencies declined to cooperate in providing certain information for the charts or agency summaries. In such cases, ADVERTISING AGE collected the data from its correspondents and asked those agencies to comment.

New or merged agencies added to the global roster this year: DDB Needham, Mojo MDA and WCRS.#

lein, Johnson & Johnson, L'Oreal, Nestle, Richardson-Vicks); **Panama** (American Express, Bayer/Miles, Beatrice/Hunt Wesson, Black & Decker, Carnation, Chesebrough-Pond's, Coca-Cola, Exxon/Esso, Gillette, Johnson & Johnson, Nestle, Union Carbide); **Puerto Rico** (Black & Decker, Chesebrough-Pond's, Coca-Cola, Del Monte, Exxon/Esso, General Motors, Gillette, Heublein, L'Oreal, Nestle, R.J. Reynolds, Texas Instruments); **Trinidad** (Coca-Cola, CPC, General Motors, Gillette, Goodyear, Heublein, Johnson & Johnson, L'Oreal, Lockheed, Martini & Rossi, RJR Nabisco, Quaker, Richardson-Vicks); **Turkey** (Bayer/Miles, Coca-Cola, Goodyear, Henkel, Nestle, R.J. Reynolds); and **New Zealand** (Black & Decker, Chesebrough-Pond's, Coca-Cola, Gillette, Goodyear, Levi Strauss & Co., Lockheed, Martini & Rossi, Nestle and Reckitt & Colman). Also, the agency's non-equity affiliate in **Indonesia** handles global accounts (Carnation, Coca-Cola, General Motors, Goodyear, L'Oreal, Lockheed and Nestle).

Ogilvy & Mather Worldwide also handles global accounts in **Colombia** (American Express, Chesebrough-Pond's, NutraSweet, Philips, Polaroid, Unilever); **Malaysia** (American Express, Bayer, Beecham, Boeing, General Foods, Guinness, Kimberly-Clark, Korean Air, Mattel, Nestle, Parker Pen, PepsiCo, Philips, Polaroid, Shell, Unilever, Warner-Lambert); **New Zealand** (American Express, Beecham, BMW, British Tourist Authority, Duracell, Guinness, Johnson & Johnson, NutraSweet, Polaroid, Seagram, Shell, Unilever); **Portugal** (Mattel, Philips, Polaroid, Seagram, Shell, Unilever); **Taiwan** (American Express, BAT, Beecham, BMW, Boeing, Duracell, General Foods, Johnson & Johnson, Kimberly-Clark, Korean Air, Mattel, PepsiCo, Philips, Polaroid, Warner-Lambert); and **Turkey** (BAT, Mercedes-Benz, Parker Pen, Philips, Polaroid, Unilever).

In addition, non-equity affiliates handle global accounts in **Korea** (Bayer, Chesebrough-Pond's, Kimberly-Clark, Korean Air, Shell, Unilever) and **Indonesia** (American Express, BAT, Beecham, General Foods, Guinness, Johnson & Johnson, Korean Air, Parker Pen, PepsiCo, Philips, Polaroid, Unilever, Warner-Lambert).

Also, O&M served 11 other clients on a multinational basis under the criteria of this survey—*i.e.*, in at least three countries and worth at least $3 million. These clients could not be included on the chart because information about them was provided after deadline.

Saatchi & Saatchi Compton Worldwide also handles global accounts in **India** (Allied Lyons, Fuji); **Malaysia** (British Airways, Procter & Gamble, Malaysian Tourist Board); and **Taiwan** (Beecham, Citicorp, PepsiCo).

For space purposes, Saatchi & Saatchi listed only those clients that it served in five or more countries. The agency says it serves at least 15 other clients on an international basis under the criteria of this survey.

SSC&B:Lintas Worldwide also handles global accounts in **Indonesia** (Citicorp, Heineken, ICI, Quaker, Schering-Plough, Sterling Drug, Unilever, Wander); **Malaysia** (BAT, C.C. Friesland, Citicorp, ICI, Johnson & Johnson, Quaker, Sterling Drug, Unilever, Wander); **New Zealand** (Bata, Citicorp, Coca-Cola, NEC, Philips, RCA-Columbia, Sterling Drug, Unilever); and **Pakistan** (BAT, Bayer, ICI, Philips, Unilever).

Questions linger after mergers

By STEWART ALTER

Events of the past 18 months, culminating in London-based WPP Group's recent agreement to purchase JWT Group, point to a very obvious conclusion: internationalization has restructured the advertising agency business with fury and speed.

For those who still doubt, consider the following two lists.

One is of agencies that, primarily reflecting a need to expand their international capabilities, have felt the need to sell or merge.

Most are private agencies that were unable to accomplish the expansion with their own resources, including Needham Harper Worldwide (now Omnicom Group's DDB Needham Worldwide); Dancer Fitzgerald Sample and Backer & Spielvogel (both owned by Saatchi & Saatchi); Leber Katz Partners (now a part of Foote, Cone & Belding); HBM/Creamer (purchased by WCRS Group); Bozell & Jacobs (sold to Lorimar Telepictures Corp., merged with Kenyon & Eckhardt and now being spun off again); and Benton & Bowles (merged with D'Arcy MacManus Masius).

Public agencies such as BBDO and Doyle Dane Bernbach also saw the need for more resources in place.

The second list reflects the internationalization of agencies from another perspective: ownership.

The declining U.S. dollar and the enthusiasm of the London Stock Exchange for the value of British ad agencies have made many U.S. agencies attractive buys.

Besides WPP Group's purchase of JWT, there is Saatchi's acquisition of DFS, Backer & Spielvogel and Ted Bates Worldwide; WCRS' purchases of Della Femina, Travisano & Partners and HBM/Creamer; and Boase Massimi Pollitt's buy of Ammirati & Puris.

Also, the entry of Mojo MDA of Australia and Roux, Seguela, Cayzac & Goudard of France into the U.S. market indicate that the British won't be the only influences.

NEWS ANALYSIS

While it may be growing sophistication in looking at world markets that explains the massive restructuring in the agency business, the impact so far appears to be more on how agencies think about strategy for themselves than for their clients.

Strategy clearly came to the ad agency business in a big way in April and May 1986, when Saatchi & Saatchi Co. fulfilled its long-publicized plan of becoming the largest agency holding company in the world, with its huge cash purchase of Ted Bates Worldwide, and when three sterling agency names—BBDO, DDB and Needham—joined in an unprecedented three-way merger to form Omnicom.

The mergers at first generated excitement, stemming not just from the names or size of the agencies involved. There was a sense that a major statement had been made. Agencies could take their fate into their own hands and not be totally at the mercy of a lower-paying client world.

But a year later, it all seems fuzzier; the acquisitions appear to be more about financial than marketing leverage.

The big risk in the new buy-and-sell environment is that while agencies can be acquired as companies, they really operate more like brand businesses. Therefore, consistency of image and quality of product, which are built by corporate culture, seem essential to the agency "brand promise" as a problem-solver. This is what keeps existing clients and attracts new ones.

Agencies can't be faulted for thinking of their own business; certainly, JWT's failure to is one of the reasons it became so vulnerable. But the critical issue is whether any of the individual operating agencies involved has achieved any greater competitive advantage.

The internationalization of the agency business, to be effective, still must show that it is but a means to a greater end: namely, giving clients greater leverage across worldwide consumer markets.

For coupled with agencies' internationalization is the realization that successful global marketing is not just extending the same program everywhere but doing the same spadework everywhere.

Even the success of Coca-Cola Co.—often cited as the model in global advertising—with one message everywhere is "deceptive," according to Barry Day, vice chairman of Coca-Cola agency McCann-Erickson Worldwide.

Speaking at the recent Third World Advertising Congress-Beijing '87, Mr. Day offered some words of caution.

The "complexity of advertising in the real global world as opposed to the theoretical world of the textbooks" requires taking "into account the genuine differences of nuance, the genuine variations of cultural behavior before you create the pattern of advertising concepts—variations that may even indicate you can't do it," Mr. Day said.#

Crain's International Newspaper of Marketing. In Two Sections. Section 1.

While Lt. Col. North actually hasn't endorsed Dry Idea, one agency exec suggested he'd rank high for the underarms deal. (Art by Gem Studio, New York.)

Ollie's follies could be ad hit

By LENORE SKENAZY

He's cool in front of a camera. He's engaging. Human. And his name recognition soars right off the charts.

Patriot or scoundrel, Ollie North has proved one thing for certain: He's got "E.P."—Endorser Potential.

Advertising Age asked several agencies to determine what Lt. Col. North would be best at endorsing. Many agency executives believe he could have quite a future in advertising.

"Despite the fact that I'm an ex-Marine myself, I think that Lt. Col. North would be an excellent spokesman for the Oscar Mayer bologna account," wrote Tom McElligott, executive creative director of Minneapolis' Fallon McElligott. "He seems to be a real expert on the stuff."

Since the public seems to love and forgive Oliver North, "I think he could endorse Chryslers," said Sean Fitzpatrick, exec VP-director of creative services at Campbell-Ewald, Warren, Mich., and creator of Chevrolet's

Quaker wins legal bout in cereal wars

By BETH AUSTIN

Quaker Oats Co. has won the first legal battle in what is shaping up as this summer's major marketing war.

At stake is Quaker's 68% share of the $500 million hot cereal market, threatened by General Mills' new Total Oatmeal.

In the latest skirmish, Minneapolis-based General Mills admitted in a federal consent decree that its use of a partial Quaker logo—the "Quaker Man"—on a package of its new hot oatmeal without full identification of the Quaker company name violated trademark law.

Quaker Oats Co.'s Quaker Man.

On another front, Chicago-based Quaker is launching a salvo at General Mills' marketing strategy, based on claims that Total Oatmeal, going on shelves this month, has "more nutrition than any hot cereal" (AA, June 29).

In the consent decree, filed simultaneously with a Quaker lawsuit in U.S. District Court in Chicago last week, General Mills agreed to use the complete logo and name in future comparisons, coupled with a disclaimer stating that Total Oatmeal is not a Quaker product.

In return, Quaker agreed to pose no legal challenge to distribution of 350,000 cases of Total Oatmeal already packaged and ready for shipment this month, provided that General Mills adds the notation "Registered trademark and product of The Quaker Oats Co." to 50,000 cases of product.

"The settlement of the dispute with Quaker is not disrupting our plans to keep on schedule with our Total Oatmeal introduction," a General Mills spokesman said.

Still under dispute are the basic claims that Total Oatmeal provides far more nutrition than Quaker's hot cereals. Unlike unfortified Quaker Oats, the Total line is sprayed with a mixture of vitamins and minerals that gives the product 100% of the required daily allowance of 10 vitamins and minerals.

In response, Quaker is boosting the vitamin fortification in one flavor in its seven-flavor Instant Quaker Oatmeal line.

All of the Instant Quaker Oatmeal flavors are vitamin-fortified, to about 25% of the RDA, but the Apple Raisin Walnut flavor will be super-fortified to equal or exceed Total Oatmeal.

The new super-fortified flavor, to be shipped this month, will require little effort on Quaker's part—but it defuses the product superiority claim at the heart of General Mills' $24 million Total Oatmeal introduction, handled by Saatchi & Saatchi DFS Compton, New York.

General Mills says it is waiting to see the new Quaker product on the shelves before it reconsiders its marketing strategy. Quaker is responding to the Total Oatmeal threat with a $45.6 million campaign by Jordan, Manning, Case, Taylor & McGrath, New York, which includes a 76% boost in TV spending over the next year (AA, July 13).#

Is Sorrell looking to buy more?

WPP on the move

By PAT SLOAN and LAUREL WENTZ

New York—WPP Group, which became the new owner of JWT Group last week, may be taking its first step toward raising new capital in the U.S., according to analysts in the U.K. financial community.

The funds could be used to finance future U.S. acquisitions or pay off some of the debt WPP took on when it acquired JWT.

Also last week:

- Saatchi & Saatchi Co. sold its 7% stake in WPP Group July 17 on the London Stock Exchange in response to heavy pressure from Saatchi client Procter & Gamble Co. and from WPP, concerned because JWT is a Unilever agency in 25 countries.

Sources said P&G was so concerned about the Saatchi shareholding in WPP that P&G Chairman-CEO John Smale made a personal call to Anthony Simmonds-Gooding, chairman of the Saatchi & Saatchi Communications division that controls Saatchi's ad agency holdings, to express his concern.

A Unilever spokesman in London said July 17, "Clearly, we're not unhappy with this development. It is acceptable."

Sources said the pressure on Saatchi from P&G became too great to withstand.

Previously, Interpublic Group

- Backer & Spielvogel, Ted Bates Worldwide finally merge. Page 52.
- DYR and HCM combine to form HDM. Page 52.
- Goodyear may stick with JWT, but others may leave. Page 53.

Last Minute News

Burger King reviews soft drinks

Miami—Burger King is reviewing its soft-drink allegiance. President Charles Olcott is expected to decide Aug. 1 whether to dump Pepsi-Cola USA when its contract ends next year and jump to Coca-Cola USA. Industry sources put BK's retail soft-drink sales over the next five years at more than $3 billion. PepsiCo's ownership of three major restaurant chains—which caused Wendy's to drop Pepsi last year—is being taken into consideration, a BK spokeswoman said. Separately, sources say BK's final decision on an agency for its $200 million account has been pushed back one month to October. The planned list of eight semifinalists so far includes New York agencies BBDO Worldwide; D'Arcy Masius Benton & Bowles; Jordan, Case, Taylor & McGrath; and Saatchi & Saatchi DFS Compton, as well as incumbent J. Walter Thompson USA *(see related story on this page).*

Lowe Marschalk wins Xerox work

Stamford, Conn.—Xerox Corp. last week assigned an estimated $15 million in advertising for its national marketing division to Lowe Marschalk, New York. The account previously was at Ted Bates Advertising, now part of the newly merged Backer Spielvogel Bates

Highlights

Seagram seeks ad discount 4

Joseph E. Seagram & Sons, the world's second-largest liquor marketer, wants newspapers to give distilled spirits the same special discounted national advertising rate extended to package goods. Under the Package Goods Rate Plan, national ad rates for food, drug, toiletries, household products and cosmetics marketers are being cut 30% during an 18-month test at 258 daily newspapers. The plan was conceived as a way to attract advertisers who don't use the medium heavily, and Seagram wants a slice of it.

Audi plots campaign drive 12

Audi of America is using dozens of owner testimonials in a new campaign to revive its image, damaged by publicity about possible problems with automatic transmissions. Audi pulled its national advertising in February to reformulate strategy and allow a cooling off from negative publicity about alleged problems of sudden acceleration in model 5000 sedans with automatic transmissions. The carmaker also has rebuilt sales by offering owners of 1984 through '86 5000S models rebates of $5,000 on the purchase of new 5000 models. The program, which ended June 30, produced Audi's second-highest sales month ever, 7,915 cars during June.

Sales sour for fruit teas 25

Fruit teas, introduced with heavy ad spending last year, are turning out to be lemons. Faced with a slow-growing iced tea market and continuing erosion of the convenience tea market by other soft drinks, three major package-goods rivals—Nestle Foods Corp., General Foods Corp. and Thomas J. Lipton Inc.—brought out fruit-flavor powdered iced tea mixes last year. But despite an estimated $24 million in ad spending for the three brands in their first year, fruit teas account for only 10% to 12% of the $400 million iced tea market. Lipton projected fruit teas would take at least 20% of iced tea sales.

Gourmet foods a la America 46

Gourmet foods, once associated with imported delicacies, are becoming Americanized. The 31,000 people attending last week's 33rd annual International Fancy Food & Confection Show in New York found an increasing number of American salad dressings, snacks and desserts interspersed among the Belgian chocolates, French pastry and Italian wines.

Aim campaign under fire 51

Comparative ads for Lever Bros.' Extra Strength Aim anti-cavity toothpaste, under fire from Procter & Gamble Co. and Colgate-Palmolive Co, were criticized by the National Advertising Division of the Council of Better Business Bureaus. The Lever spots, which pitted Extra Strength Aim against Crest and Colgate, were challenged by both companies.

Diamandis buying, or selling? 54

Offering key employees a piece of the action is a major part of Peter Diamandis' plan to run CBS Magazines after he buys it from CBS Inc. But insiders speculate he also may sell some of the sluggish CBS titles after the sale goes through.

INTERNATIONAL

Billions watch Tour de France 24

The prestigious monthlong Tour de France bicycle race through France is turning into a global sporting—and marketing—event. The race is being broadcast in 75 countries via 140 TV feeds. In the U.S., CBS holds the TV rights and will cover the finale July 26 on "CBS Sports Sunday."

Gold Lions at Cannes 34-36

Advertising Age presents frames of 27 of the 33 Gold Lion awards won in Cannes last month, with a description of the commercial and creative credits.

OTHER NEWS

J. Walter Thompson USA has borrowed an idea from sister agency Lord, Geller, Federico, Einstein in the continuing battle to revive sales of Miller High Life beer. At least three "Hill Street Blues" alumni are appearing in three new 30-second TV spots for High Life, in a campaign similar to IBM Corp.'s use of M*A*S*H characters. Page 12.

Procter & Gamble Co. is pushing its agencies to take more creative risks with print advertising. While P&G is not retreating from its traditional insistence that ads focus on product benefits, its agencies say they are being "encouraged" to develop more dramatic creative executions that hold readers' attention and invite their involvement. Page 21.

Xerox Corp. this week launches an estimated $20 million international corporate ad campaign that for the first time adopts an integrated approach to a range of products. The effort is themed "We document the world," and was created by Ted Bates Advertising, New York. Page 49.

Cahners Publishing Co.'s purchase of *Variety* could help push the largely business-to-business magazine publisher further into consumer markets. Newton, Mass.-based Cahners last week agreed to acquire both the daily and weekly editions of *Variety*, the 82-year-old entertainment business newspaper, for an estimated $40 million to $60 million. Closing is expected by mid-August. Cahners officials say they will use *Variety* as the nucleus of a new entertainment division. Page 53.

SPECIAL REPORT

***Newspapers**—Afraid of becoming irrelevant to readers and dispensable to advertisers, the industry is promoting change more aggressively than ever before. Splashy graphics, flexible printing schedules, minority hiring and rate cuts for national advertisers are headlining their attempts. Starts after Page 28.*

Personal care gets activity from Colgate

By PAT SLOAN

New York—Colgate-Palmolive Co. will undertake its first major personal-care initiative in several years when it introduces Lornay, a a product for sensitive skin, in January.

Also, industry sources said the company's Colgate Venture Co. subsidiary will introduce in September New Again, a blood-stain remover that will be sold in the feminine hygiene department of mass-market stores. The subsidiary is concentrating on entrepreneurial/-specialty niche marketing and also plans an expansion of its Maniac teen fragrances into a collection of personal-care products for teen-agers.

> *"Though these products aren't now significant in size, they are all meaningful in direction."*
>
> **—Analyst Jay Freedman**

"Though these products aren't now significant in size, they are all meaningful in direction," said Jay Freedman, analyst with Kidder Peabody.

Lornay is an example of "one of the ways Colgate has come up with to penetrate the personal-care market," he said. "Four years ago they tried to do that with shampoos, but obviously they didn't succeed, since the products aren't now in distribution."

Sources also said Colgate plans to build Lornay into a global brand.

Although Colgate won't comment on Lornay, sources close to the company said it is being developed by consultant Richard Barrie, a former president of Faberge, which was founded by his father, George Barrie.

Lornay's agency is HDM, formerly HCM, here. Mr. Barrie left Faberge after it was sold to McGregor Corp.

Palmolive Laboratories, a division of Colgate Venture Co., reportedly is working on its own skincare product and 15 other products. But New Again, which will be marketed by Palmolive Laboratories, is its first national effort.

New Again has been assigned to Kornhauser & Calene, making it the shop's first Colgate assignment. Stuart Gellis, national sales manager, said national print advertising will be used for the introduction. However, K&C also is testing radio for the brand.

Mr. Gellis said the product was tested in hospitals. And though it works on many stains and any type of blood stain, it is being positioned specifically to remove menstrual blood.

"Colgate Venture Co. is specializing in niche positioning," Mr. Gellis said. "We don't want to be sold in the detergent and spot-remover section of the store. Stores like it because it won't splinter the category. It represents all plus dollars."

Mr. Gellis would not comment on Maniac or other Colgate Venture Co. projects. However, retail sources said Maniac no longer is being tested in upstate New York. Instead, they indicated, the teen fragrance line is being expanded into other grooming products and will be put into a mid-Atlantic test.

If it fares well in test, it will be introduced nationally during fall 1988. DePalma & Hogan handles.

Colgate Venture Co. also continues to test Cleaning Dimensions stores in Austin, Texas; Feliners cat box liners; and Teledisc Music.

Sources said the new businesses, when introduced nationally, are expected to range in size from $10 million to $90 million.#

Security Pacific taps Hal Riney

Los Angeles—Security Pacific National Bank appointed Hal Riney & Partners, San Francisco, to handle its $10 million retail banking account, sources say. The account was handled in-house. D'Arcy Masius Benton & Bowles, Ketchum Advertising and J. Walter Thompson USA, all Los Angeles, also competed.

DDB Needham Worldwide's media buys in August, but the first major new creative work will not break until next summer.

West Coast News

Sea World of California, San Diego, hired D'Arcy Masius Benton & Bowles, Los Angeles, to handle its $4 million account, after a review involving DYR, Los Angeles; N W Ayer, Irvine; Franklin & Associates, San Diego; and Salvati Montgomery Sakoda, Santa Ana. The account change follows the decision of Sea World's parent, Harcourt Brace Jovanovich, to transfer the advertising responsibilities for its several aquatic theme parks to local agencies. VP-Marketing Ron Yeakley said DMB&B will begin handling Sea World of California's Western division is in contact with several southern California agencies specializing in hispanic marketing concerning a possible acquisition, informed sources say. In addition, the agency is expected this week to sign its buyout deal with Rancho Cordova-based Girvin, Conrad & Girvin.

Union Tribune Publishing, San Diego, named Franklin & Associates its agency on the $850,000 *San Diego Union-Tribune* account, after a review involving 22 local agencies. WFC, San Diego, which closed, is the former agency.#

Special Report

Ted Carr

Stretching to deliver readers' needs

By Belinda Hulin-Salkin

Affordable, accessible and essential, the daily newspaper for decades was America's mass medium. But today, battered by other media and changing demographics, the newspaper is in danger of wearing down to a Sunday-morning option.

With sophisticated graphics, target marketing and advertiser incentives, the industry is trying to regain its preeminence. Although some newspaper executives wonder whether it's too little too late, no one is sounding the death knell yet.

Two-thirds of all American adults still read a newspaper every weekday; 86% read a paper at least once a week. Newspapers are purchased regularly in 74% of all U.S. households, reports the Reston, Va.-based American Newspaper Publishers Association.

Newspaper readers come in all shapes, sizes, income brackets, education levels, age groups and ethnic backgrounds. They live in cities, suburbs, towns, resorts and rural areas. By all demographic standards, the newspaper is a solid mass-market medium.

But, says Bill Baker, group VP-news for Miami-based Knight-Ridder, "These days it takes so much effort and so much money just to keep circulation about even. It's an enormous selling job. And in spite of it, overall circulation and household penetration have been going down."

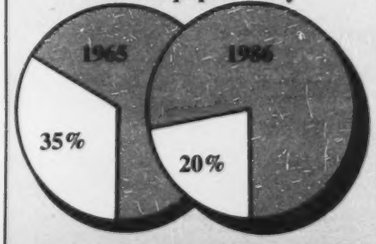
The circulation decline hasn't been dra-

(Continued on Page S-2)

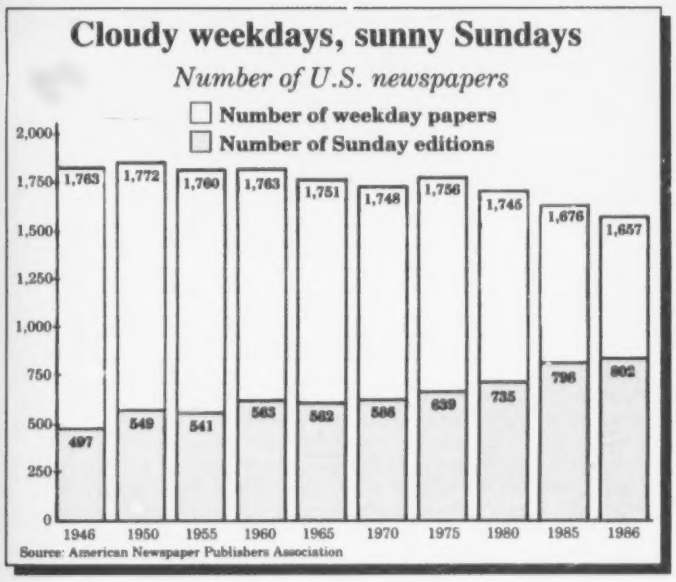
Belinda Hulin-Salkin is a frequent contributor to Special Report who writes regularly about media topics.

Unless otherwise noted, all circulation figures used in this Special Report are weekday averages for the six months ended March 31, as published in Audit Bureau of Circulations' FAS-FAX report.

Number of Americans reading two newspapers daily



Source: Newspaper Advertising Bureau



Delivering readers' needs

(Continued from Page S-1)

matic. According to the American Society of Newspaper Editors, overall daily newspaper circulation dropped 0.4% last year to 62.5 million. That loss follows a 1985 decline of 0.5%. Household penetration has slipped 10% during the last decade, a situation attributed to the increasing number of single-person households in the U.S.

Since 1965, total morning and evening circulation has hovered between 60 million and 63 million. Publishing executives blame the mid-'70s energy crisis and rising newsprint costs for initiating a circulation slump. But 10 years later there's been no real recovery, despite a larger group of potential subscribers.

Industry observers say many factors have contributed to dailies' lackluster performance. Competition from broadcast and cable TV and radio has intensified. Magazines continue to vie for reader attention. In large urban markets, observers say many newspapers don't address the concerns of poor or ethnic populations—and in some areas, illiteracy is the real concern.

Lifestyle changes also have had an impact: According to recent studies, many former newspaper subscribers say they don't have time to read a paper every day.

"We got into trouble because we didn't pay as much attention to the product as we should have and we didn't pay as much attention to service as we should have," says Reg Murphy, president and publisher of Times Mirror Co.'s *Baltimore Sun*.

Mr. Murphy, who also chairs the Readership & Retention Committee of the Newspaper Advertising Bureau's Future of Advertising project, says publishers need to learn more about what readers want from a newspaper. In addition, he says newspapers should be delivered at the readers' convenience, even if that means altering press schedules.

> ***"More people have white-collar jobs, and get off at 5, 5:30 or later. They have more time to read in the morning."***
>
> **Stuart Tolley**
> **NAB**

"It's taken newspaper editors and publishers a while to understand that they aren't the readers' first source of news," he says. "On breaking stories, radio will always get the information out first. Meanwhile, not enough attention has been paid to the wide variety of interests that people bring to newspapers.

"Think of each special interest as a 10% block of the paper: sports, comics, news, business, features . . . each of these is worth 10%. If a person is interested in only one 10% block of the paper, you have an occasional reader. With two 10% blocks, you get a regular reader. And with three blocks, you've got a subscriber.

"For years the industry ignored those special-interest segments. Instead we thought, 'There is a ninth-grade graduate out there that needs to be told certain things,' " he says.

Burl Osborne, president and editor of A.H. Belo Corp.'s *The Dallas Morning News*, agrees that more attention must be paid to reader interests and needs. "Sometimes we all behave like pamphleteers," he says. "We put out newspapers that we think are good and we don't bother to see what the reader thinks of it."

Mr. Osborne recently wrote a manual called "Readers: How to gain and retain them," under the auspices of the Future of Advertising project. Without giving a prescription for individual publishers, the book raises questions concerning

(Continued on Page S-4)

Six million Michiganders have one thing in common. They don't read the Detroit papers.

If you think you can cover all of Michigan by buying only the Detroit papers, you've underestimated us. We're Booth, 8 great daily newspapers. And, we reach a most valuable segment of those six million Michiganders. Valuable in size and significant in buying power. It's called Booth, Michigan and it's America's 10th largest metro market. The 9th largest market of households with an income of over $25,000 a year. You can reach this important market–a market whose mobility is distinctly upward–by calling Booth Newspapers at (313) 540-5600.

You get 8 newspapers at a 15% discount with just one call. One order. One bill. Represented nationally by Newhouse Newspapers.

Delivering readers' needs

(Continued from Page S-2)

readership, the marketplace, newspaper pricing, distribution, promotion and the product itself. Throughout, Mr. Osborne argues that the best way to improve newspaper circulation and penetration is to improve quality—as perceived by readers.

"We want people to feel they have to read the paper—to feel intellectually naked if they don't read it," he says.

Building a franchise with readers in certain high-interest areas such as sports or business might be one way to hold readers, Mr. Osborne suggests. Other executives say improved design and top-flight staffing can be a draw. However, Mr. Osborne warns that such changes—expensive and slow to show results—should be considered an investment in the future.

In their zeal to sign up new subscribers, newspaper publishers in recent years have increased use of all kinds of ad campaigns, promotions and incentives. The ASNE new-subscriber study tends to support what many observers have been saying all along: Gimmicks and high-pressure selling don't build a loyal circulation.

"It's like a farmer who grabs a fresh cow plot and throws it against a barn door . . . some of it sticks and some of it doesn't," says John Morton, a newspaper analyst for Lynch, Jones & Ryan, Washington. "Promotions and contests tend to attract marginal readers, people who weren't attracted by the newspaper itself. Eventually, they move on."

Dorothea Coccoll Palshow, VP-circulation of *The Wall Street Journal*, agrees. "We don't inflate our cover price so we can offer low-price subscriptions and we don't sell the product with clock radios," she says. "By avoiding incentives, we get individuals to make a commitment to the product. We want quality circulation growth."

The New York-based Dow Jones & Co. property is up 2% in circulation this year, to slightly more than 2 million, and the paper expects to benefit from the aging of the baby boom, given the average *Journal* reader's age of 43. The paper supplements its "Daily diary of the American dream" TV spots, via Fallon McElligott, Minneapolis, with targeted direct-mail pieces. The direct-mail campaign offers no free trials, no discounts.

Other publishers argue that the few subscribers retained through promotions make the effort worthwhile. "The people who drop out weren't worth getting. But that's simply the process you go through to expand your audience," says David Els, circulation manager for *The Christian Science Monitor*, Boston. "Thirty percent of our promotion subscribers will stick with the program. We got them because we provided an incentive for them to try a copy."

Mr. Els says publishers ultimately will have to fight the circulation battle by finding new ways to reach readers and capture their attention. In the past year, the *Monitor* has boosted its circulation from 156,700 to 186,200. Mr. Els largely attributes the increase to direct-mail promotions; he says the paper sent out some 4 million pieces of mail last year. Promotions have included half-price sales and one-month free subscriptions; earlier this year, the *Monitor* tested a clock premium.

Like *The Wall Street Journal*, *The Christian Science Monitor* is a secondary read for most households, making it a particularly tough sell. The number of Americans who say they read two papers a day has dropped from 35% in 1965 to an estimated 20% today, according to NAB. In some cases, the switch from two papers to one hasn't been voluntary. Two-newspaper cities are a vanishing breed. In 1980, there were 1,745 newspapers in the U.S.; last year the number had dropped to 1,657.

Although evening newspapers still comprise the lion's share of that total, there's been a definite trend toward morning papers.

Big spenders.
Tampa Bay is home to some of the biggest spenders in Florida. In '86, St. Petersburg-Tampa-Clearwater residents rang up $11.5-billion in total retail sales, making this metro area second in the state and third in the entire Southeast.
If you want some big spenders to spend some time with you, invest in the biggest and best newspaper in Tampa Bay, the St. Petersburg Times. Tampa Bay's most popular paper leads its closest competitor by nearly 60,000 copies daily and more than 68,000 on Sunday!*
So start thinking big. Big spenders, big audience, big profits. Call your St. Petersburg Times representative at 813/893-8249 today!
*ABC, 12 months ending 12/31/86.

Homework pays off in future readers

It's a newspaper publisher's dream: A 5-year-old kindergarten student runs into the house after a hard day at the playground. He kicks off his shoes, grabs a cookie and demands, "Where's my newspaper?"

To ensure future growth, daily newspaper executives are trying to build a franchise with future subscribers. Anyone who stands taller than an upright front page is fair game.

"If we can acquaint students with the value of a newspaper at an early age, then there's a much better chance that they'll be readers when they grow up," says Betty Sullivan, assistant director of the Reston, Va.-based American Newspaper Publishers Association Foundation. To that end, the foundation sponsors the Newspaper in Education program in cooperation with local dailies. NIE works through schools to encourage the use of newspapers as a classroom teaching aid.

NIE specialists say aspects of a newspaper can be applied to virtually every subject at every grade level. Comics can help kindergarten students identify words, percentage-off ads offer math lessons, and news stories are raw materials for current events, civics, geography and history lessons.

■ *Education programs prove a valuable lesson for daily newspaper executives*

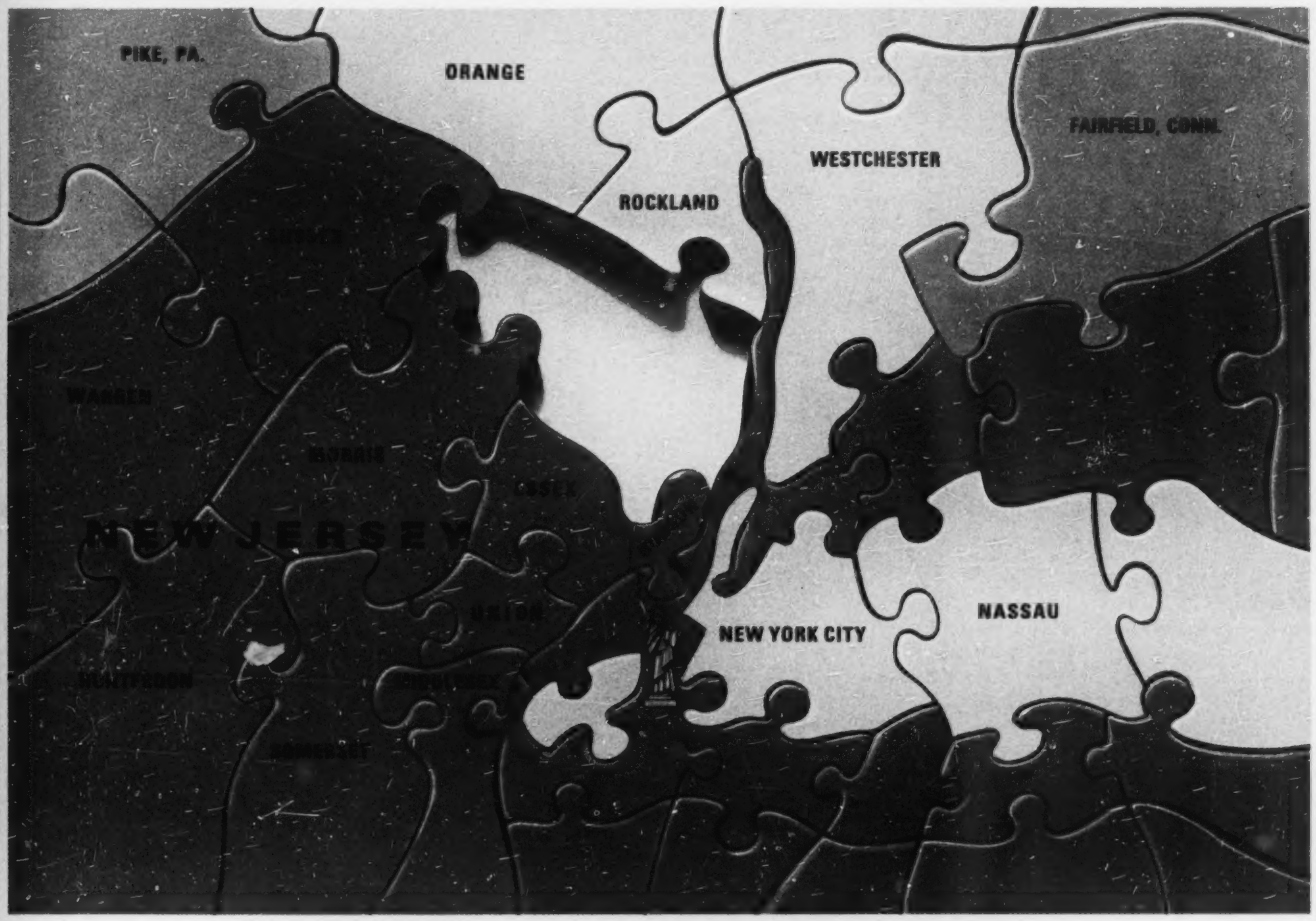
More than 700 newspapers across the country sponsor NIE programs, an increase of nearly 30% over the last three years. Individual programs range from bulk-circulation discounts to teacher-training programs backed by a full staff of NIE representatives.

Although most publishers consider their NIE efforts a community service, a 1985-86 ANPAF survey shows 83% of participating papers believe the program cultivates newspaper readership.

"It's the attitudes of teachers and parents that determine a student's attitude toward newspapers," says Patricia Houk, manager of education services for Long Island, N.Y.-based *Newsday*. "Children who come from families where newspapers are read in the home tend to be more likely to read the paper themselves. But the habit can also be learned at school."

Ms. Houk and *Newsday's* nine-person education services staff support NIE programs in about 1,200 New York area schools. The paper's specialists conduct teacher workshops and provide teaching aids for participating schools. Newspapers are provided to students at half

(Continued on Page S-8)



Is there a missing piece in your media plan?

Trying to put together a media plan for the New York ADI can be a puzzling experience if you're missing a vital piece of the market. Only one newspaper lets you complete your media picture by adding the $20.7 billion in northern New Jersey purchasing power wielded by Bergen/Passaic residents: The Record, New Jersey's largest evening newspaper.

The Record reaches more adults in the Bergen/Passaic market than any other newspaper, and assembles the readers with the greatest spending power. In fact, with The Record you have access to a market whose population of 1,293,400 places Bergen/Passaic 33rd in the nation and is comparable to such markets as San Jose and New Orleans.

With the second highest personal employment income in America, Record readers can afford to indulge in expensive vacations, new cars, financial services, and all of life's luxuries.

And indulge they do. Last year, for example, the average household in the Bergen/Passaic market spent $1,583 in apparel and accessory stores alone, placing it first among the top 50 markets in the entire nation. With a whopping $10.1 billion in total retail sales, this impressive market is 29th among the 317 markets across America.

Sixty-five percent of The Record's affluent audience cannot be reached regularly by any other newspaper. The Record's unique blend of award-winning journalism, full-color graphics and powerful demographics gives advertisers the one forum that fits the life style of Bergen/Passaic residents perfectly. The Record. In the Bergen/Passaic market, it's the one sure way to get a piece of the action.

The Record

Readers

(Continued from Page S-4)

In 1980, there were 387 morning and 1,388 afternoon papers in the U.S. Last year, 499 papers were delivered in the morning, 1,188 in the afternoon. Since 1985, 17 papers have moved to morning distribution, and 32 have dropped from the afternoon roster.

Aside from afternoon papers that have folded, those that switched to a morning schedule may be responding to American lifestyle trends.

"There's been a change in the structure of the American work force," says Stuart Tolley, NAB VP-director of research. "When more people had blue-collar jobs, an afternoon paper was appropriate. People went to work very early and came home early. Now more people have white-collar jobs, they don't start work until 9 and get off at 5, 5:30 or later. They have more time to read in the morning."

Readers and advertisers tend to favor morning papers; despite the large number of afternoon papers, morning circulation topped 37.4 million in 1986, while total afternoon circulation was 25 million, according to ANPA.

The one bright spot in recent newspaper circulation history has been the growth of Sunday newspapers. Since 1980, 67 papers have added Sunday editions, boosting circulation from 54.6 million to the current 58.9 million. Sunday circulation has increased 100,000 in the last year.

According to Simmons' 1987 National Study of Local Newspaper Ratings, 72% of the total adult population of markets studied read a Sunday paper, as compared to 67% for weekday papers. "Sunday papers cover a broader range of interests," says Kay Schultz, major market research director for New York-based Simmons Market Research Bureau. "And of course, on Sundays people just have more time to read."

It all comes back to that familiar refrain: Fighting for a slot on the consumer's sched-

(Continued on Page S-8)

Homework pays off

(Continued from Page S-6)

price. To get students more involved with the paper, *Newsday* occasionally sponsors special events, such as a mock election during the last New York governor's race. Students had to register to vote and cast their ballots. After election day, *Newsday* ran an article giving the results of the student ballot.

The New York Times, New York Daily News and *USA Today* also conduct NIE programs in the New York metropolitan area. "It's competition for us, but it's great for the students," Ms. Houk says.

A recent New York Board of Regents decision gave all NIE programs a boost: Now state textbook funds can be used to purchase newspapers for New York classrooms.

Edward De Roche, dean of the University of San Diego school of education, says that showing teachers how to integrate newspapers into regular classroom studies is essential to the success of NIE programs.

"We think using the newspaper is one way to bring some relevance to the classroom," he says. "The programs help youngsters realize that if they're going to be knowledgeable citizens, they're going to have to read a daily newspaper."

"There's also a transfer effect," he says. "Students who use the paper in school tend to read the paper as adults."

According to a Simmons Market Research Bureau study of the teen market, 62% of all teen-agers read a daily paper. However, other industry studies show that most adults don't begin to subscribe to a paper until age 27. The numbers suggest that between their teen years and their late 20s, most young adults read dailies sporadically.

College students do read campus publications. One Simmons study shows that 51.8% of all students read their school paper, and several magazines have had success with campus editions.

Since 1947 *The Wall Street Journal* has tried to establish an on-campus presence with its own Newspaper-In-Education program. According to Brian Moody, Educational Service bureau manager for *WSJ* parent Dow Jones & Co., about 7,500 institutions currently participate.

"We provide students with a tool to supplement their textbook education with real-life applications," Mr. Moody says. "Textbooks are dated and they take years to produce. We can add relevance to an economics lesson."

The *WSJ* program targets business professors who might use the paper in their classes. It provides discounted student subscriptions as well as special guides to teach students how to use the paper.

According to Mr. Moody, the median age of student subscribers is 23; 40% are female and most are in their junior or senior year of college. And 16% of *WSJ* college subscribers become regular subscribers later.

Readers

(Continued from Page S-6)

ule. According to a 1986 Simmons study, the average adult reads three newspapers a week, down slightly from 1985. In contrast, TV viewing has risen from 22.9 hours a week in 1985 to 24.3 hours a week last year.

In addition to devoting time to other media, consumers have a full agenda of personal activities. The "newspapers stacking up unread" syndrome has driven many subscribers to switch to the occasional newsstand purchase. Publishers hope to fight that trend or find ways to measure and qualify regular newsstand readers.

"The first thing we have to do is concede that it's true . . . many people don't have time to read a newspaper every day. They're not lying," Mr. Murphy says. "We ought to stop trying to make them feel guilty about not getting through the paper every day.

"Then we need to make the paper more compelling, so people will feel that the time they do spend with the paper makes getting it worthwhile."

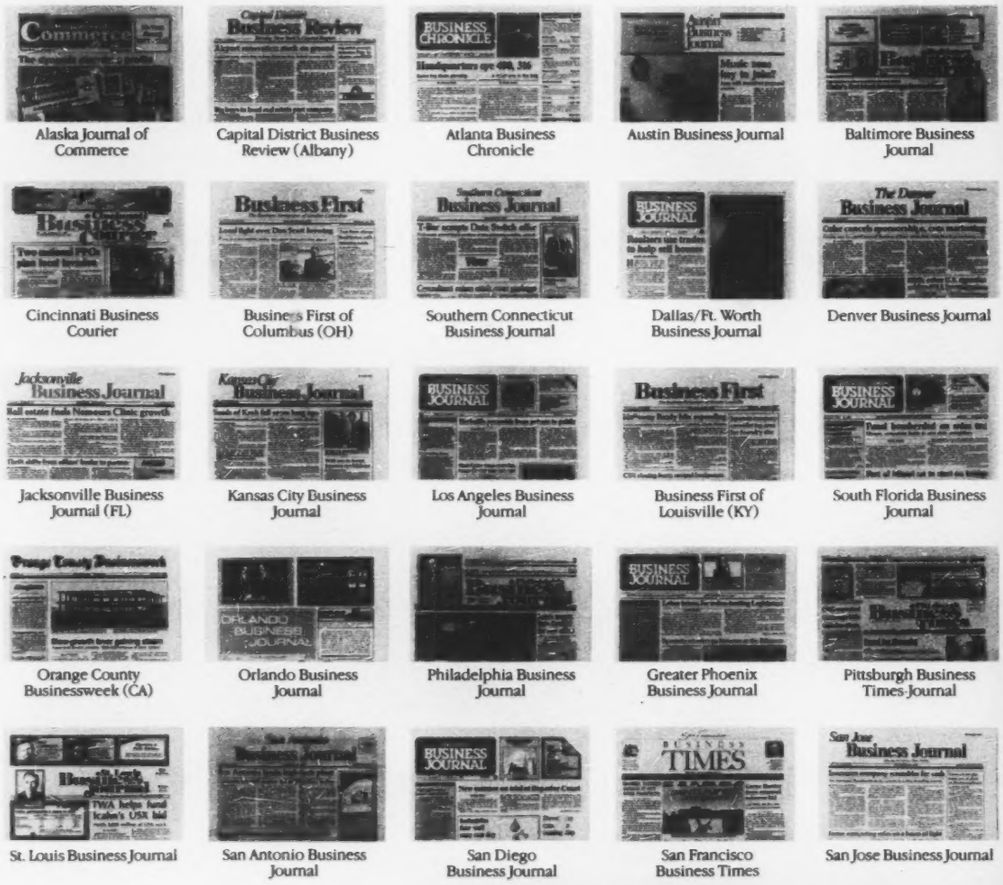
Publishers fight high dropout rate

Newspaper editors' concern about a quality product's importance in maintaining circulation may be a moot point. Although 90% of the respondents to a 1987 study rated their newspapers "good" or "excellent," those people were *former* subscribers.

The study, titled "Love us and leave us: new subscribers one year later," was conducted by the Readership & Research Committee of the American Society of Newspaper Editors. It tracked 1,745 new subscribers to nine daily papers in small, medium and large markets.

According to Bill Baker, group VP-news for Miami-based Knight-Ridder and chairman of the committee, researchers hope that analyzing attitudes among new subscribers can improve circulation retention.

"There's a lot of churn in



TRIED

Nobody wants to gamble media dollars on new publications that are untested and unsure. That's why THE NETWORK of City Business Journals is a clear and certain media choice. Because although the name is new, its performance is tried and true. And its effectiveness for reaching corporate decision makers, in their own local business environment, is second to none.

THE NETWORK is comprised of 50 well-established, well-read weekly tabloids that focus on local business news—American City Business Journals, which now includes the former Scripps Howard Business Journals, plus other quality affiliated publications.

In all, THE NETWORK covers

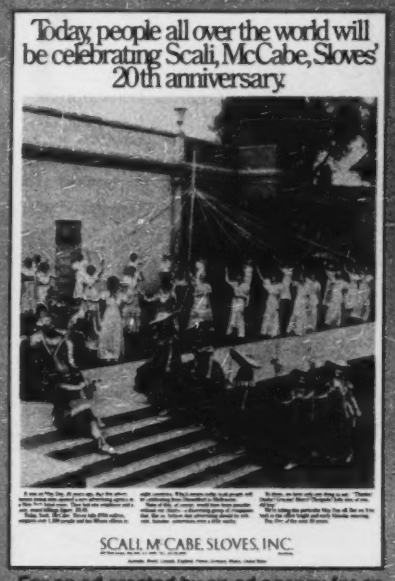
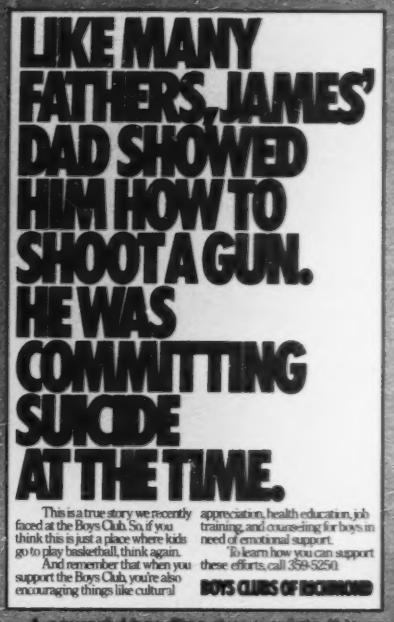
BEST OF PRESS



For an ad created by an ad agency for an ad agency, this one, proclaiming New York-based Scali, McCabe, Sloves' 20th anniversary last May 1, is pretty good. Creative director: Sam Scali; copywriter: Larry Cadman; art director: Earl Cavanah; photo: stock.

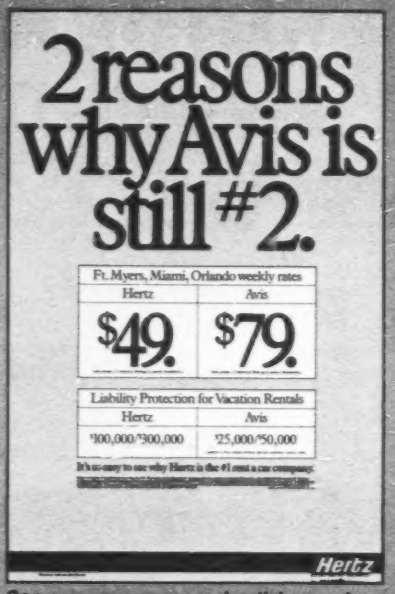
QUICK! OFF THE TOP OF YOUR HEAD. WHICH BATTERY STARTS THE MOST CARS AT INDY?
It's the same battery that has started more winners at Indy 500 over the past two decades than any other. And every Daytona 500 winner since 1978. The same powerful Sears DieHard* battery that has earned the trust of more people like you than any other
Things move for you when you're at Sears
replacement battery.
SEARS

A combination of an interesting graphic and a headline that complements it makes this ad work for Sears, Roebuck & Co.'s DieHard batteries, via Ogilvy & Mather, Chicago. Creative directors: Bill Waits, Tony De Gregorio; copywriter: Bill Waits; art director: John Gottschalk; photographer: Jim Hall of Lamb & Hall.



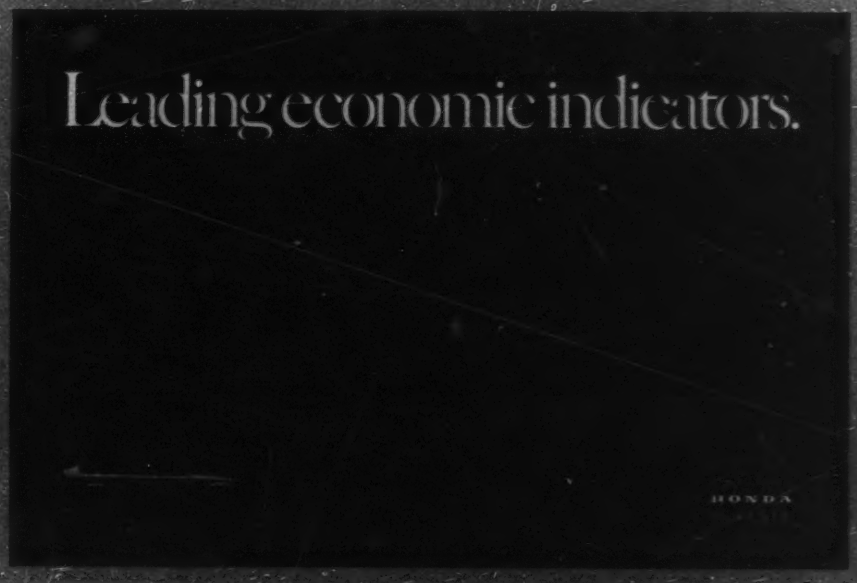
LIKE MANY FATHERS, JAMES' DAD SHOWED HIM HOW TO SHOOT A GUN. HE WAS COMMITTING SUICIDE AT THE TIME.
This is a true story we recently faced at the Boys Club. So, if you think this is just a place where kids go to play basketball, think again.
And remember that when you support the Boys Club, you're also encouraging things like cultural appreciation, health education, job training, and counseling for boys in need of emotional support.
To learn how you can support these efforts, call 358-5250.
BOYS CLUBS OF RICHMOND

A powerful headline drew us into the public service ad for the Boys Clubs of Richmond, from the Martin Agency, Richmond, Va. Creative director: Barbara Ford; art director: Wayne Gibson; copywriter: Andy Ellis.



Some say newspaper advertising works best when it's short and to the point. The headline here, from Scali, McCabe, Sloves, New York, will catch the eye of just about anyone who's heard the famous Avis slogan, and the copy is quickly and easily absorbed. Creative director: Sam Scali; copywriter: Jamie Shevell; art director: Carl Stewart.

Best of Press selections are made by a committee of three: Hank Simons, VP-creative director of the Newspaper Advertising Bureau; James Dunaway, VP-information at the bureau; and William F. Gloede, Advertising Age's newspaper industry reporter. National System Inc., St. Louis, provides tearsheets to the Newspaper Advertising Bureau for much of this work. Agencies, clients and newspapers are invited to submit ads for review. Submissions should be sent to Mr. Gloede in AA's New York bureau.



Time was when you'd have to be crazy to try to run a color ad like this in a newspaper. But in 1987, in *USA Today*, it can make you feel like you're behind the wheel of a new Honda Civic CRX HF. Rubin Postaer & Associates, Los Angeles, topped the illustration with a good headline and strengthened it with short, informative copy. Creative director: Larry Postaer; copywriter: Carole Larson; art director: Jason Wong; photographer: Jay Ahrends.

Ad spending rises 8.3%

NEW YORK—April advertiser spending in major-market newspapers in 16 categories rose 8.3% from April 1986 to $312.6 million, according to the ADVERTISING AGE Flash Report of Newspaper Advertising Investments.

Although all but four categories showed increases, the magnitude of the declines in those four categories dampened what would have been a strong month.

The overall increase was led by three major categories: food stores, up 27.8% to $37.6 million; general-merchandise stores, up 14.6% to $47.1 million; and new passenger cars, up 47.9% to $27 million.

The big gains were partially offset by drops in spending by department stores, down 1.8% to $90 million, and cigarette marketers, down 69.9% to slightly more than $2 million.

Among other categories showing gains were amusements, up 2.7% to $29.6 million; computer stores and supplies, up 5.7% to $4.6 million; radio-TV-phonographs-records, up 3% to $18.8 million; cameras, photo supplies and services, up 91.3% to $470,582; computers, equipment and services, up 7.8% to $3.8 million; public service utilities and communications, up 9.6% to $6.6 million; publishing and media, up 24.3% to $14.2 million; airlines, up 1.3% to $14.7 million; and banks and trust companies, up 20.6% to $12.4 million.

Other declining categories included alcoholic beverages, down 25.7% to $1.5 million; and stock, bond and investment houses, down 7.7% to $2.2 million. The Flash Report, prepared by Media Records here, is based on SAU inch measurements in 27 daily and 23 Sunday newspapers in 15 top markets.#

FLASH REPORT: Newspaper advertising investment for April

April 1987	DOLLARS		CHANGE	
CATEGORIES	1987	1986	ACTUAL $ G OR L	% G OR L
Amusements	$29,617,611	$28,829,917	+787,694	+2.7

Home video ads get hot

By WAYNE WALLEY

LOS ANGELES—The home video industry will explode as one of the hottest ad categories during the fourth quarter, when advertising and promotional spending will top $100 million.

Big players such as Walt Disney Home Video, Paramount Home Video and RCA/Columbia Pictures Home Video are doubling and tripling ad budgets and slashing retail prices as they anticipate industrywide sales this year will double to 30 million cassettes. Smaller companies, such as Embassy Home Entertainment, are following suit.

Virtually every major competitor in the fast-growing $5 billion videocassette market waged a major ad battle in the fourth quarter last year (AA, Aug. 18, 1986), but this year's war is likely to dwarf previous efforts.

Most companies have budgeted $2 million to $18 million for the fourth quarter alone, compared with 1986 annual ad budgets of $1 million to $6 million.

Holiday gift-giving has made the fourth quarter the most crucial for sales.

Marketers of theatrical videocassettes typically split their budgets evenly between advertising and promotion.

Home video marketers in the past have concentrated on point-of-purchase materials and ads in trade or video buff magazines. Few, if any, companies spent more than $1 million for advertising and promotion in 1984 or 1985.

With videocassette recorder household penetration up—the Electronic Industries Association predicts more than 50% of all U.S. households will have a VCR by the end of the year—home video companies believe it makes sense to increase spending on TV, radio and print campaigns, as well as in-store promotions.

Burbank, Calif.-based Walt Disney Home Video, for example, will give the release of "Lady & the Tramp" the type of support

(Continued on Page 71)

Disney has big ad plans for its upcoming video release of "Lady & the Tramp."

Collision course

Stakes high in people-meter war

By JACK HONOMICHL

Imagine two powerful research trains racing toward each other on the same track. Each is hauling boxcar-loads of never-before-available data about how Americans relate to TV programming.

In fact, those two trains—AGB Research PLC and Nielsen Media Research—will collide on Sept. 1, and that collision will rattle big-time advertisers, their agencies and the media research community for years to come.

So far, reactions are confused. Few people know the full story, which has dribbled out in bits and pieces over three years. Skeptics who have an immunity to false-start announcements from the electronic media research industry have taken an "I'll worry about it when it actually happens" attitude.

Well, it's time to start worrying.

One train, the "AGB Innovation," is owned by the fourth-largest research organization in the world and the leader in TV audience measure-

Saatchi ups ante in West

By JON LAFAYETTE

Saatchi & Saatchi Co. is about to increase its clout on the West Coast.

It will create one of the West Coast's biggest ad agencies when it merges Cochrane Chase, Livingston & Co., the largest shop in Orange County, Calif., with Backer Spielvogel Bates Worldwide's office in Huntington Beach.

The new shop's billings will exceed $200 million, sources said.

Also, BSBW soon could be winning a major new global assignment. Industry sources say Philip Morris Cos., a Backer & Spielvogel client in the U.S., is considering giving BSBW a tobacco assignment involving about 20 countries. BSBW's U.S. arm is called Backer Spielvogel Bates.

Newport Beach-based Cochrane Chase, Livingston was founded in 1966 and acquired in June 1984 by what was then Saatchi & Saatchi Compton. The agency reported billings of $78.5 million last year. It has the Southern California Chevrolet Dealers account, which would appear to be a conflict with B&S' Hyundai business.

Michael Roche, senior VP-general manager of BSBW's Huntington Beach office, is expected to be put in charge of the combined operation. Sources said Cochrane Chase, chairman of CCL, plans to retire within a year.

BSBW was formed two weeks ago through a merger of Saatchi-owned B&S and Ted Bates Worldwide.

After its agency consolidations, Saatchi & Saatchi is getting ready to flex its organizational muscle.

Anthony Simonds-Gooding, chairman of Saatchi & Saatchi's Communications Division, last week met with securities analysts and described the way the company's vast holdings are now organized.

Mr. Simonds-Gooding said

Last Minute News

ANA sues over Florida ad tax

NEW YORK—The Association of National Advertisers, as expected, filed suit last week against Florida's 5% sales tax on advertising. The suit, filed in state court in Tallahassee, charges the tax violates the free speech, due process and commerce clauses of the U.S. Constitution and the free speech guarantee of Florida's constitution *(see related story on Page 3)*. "The law truly is a counterproductive piece of legislation and extremely detrimental to the state of Florida and its citizens," said ANA President DeWitt F. Helm Jr. A Wharton Econometric Study has predicted the state will lose $2 billion in revenue and 46,000 jobs by July 1, 1989, two years after the tax took effect.

Four finalists vie for Arby's

ATLANTA—Finalists for Arby's $10 million-to-$12 million account are Ammirati & Puris, New York; W.B. Doner & Co., Baltimore; Levine, Huntley, Schmidt & Beaver, New York; and Hal Riney & Partners, San Francisco. Backer Spielvogel Bates Worldwide, New York,

Highlights

Raisin' sales in the U.K. 4
The singing, dancing Claymation raisins are crossing the Atlantic in their first international campaign, breaking in the U.K. next week. "Late Night," the original U.S. raisin spot, has been adapted to include a box of Sun-Maid raisins.

Buick eyes bigger budget 12
The Buick Regal, the first car to come out of General Motors Corp.'s $5 billion GM-10 program, will get the bulk of Buick's media weight in the 1988 model year. Buick spent about $90 million on advertising for '87 models and hopes for an increase for the '88 lines.

New image for American Greetings 28
American Greetings Corp. has a new image it hopes will increase awareness for its product and keep people from going to rival Hallmark Card stores. The campaign stresses the convenience of its retailers just as Hallmark unveils several new product lines aimed at luring card buyers into its own stores.

Shampoo spending faces brush-up 48
Ad spending for shampoos and conditioners is expected to bounce back this year but still won't approach 1984's high of $205 million as companies continue to favor promotional marketing at the expense of measured media.

Canon to revolutionize 'work processor' 52
Canon USA is about to create a whole new market segment in office automation by crossing a personal computer with an electronic typewriter. Canon categorizes the new product, called the Canon Cat, as a "work processor."

Simple recipe nets cheese account 62
DDB Needham Worldwide's strategy for picking up its first dairy business, a $22 million cheese account, came from a lesson in Advertising 101: make the message simple, make it often. The national dairy board was wooed by the shop's simple "Don't forget the cheese" campaign.

Toshiba bows to U.S. 63
Toshiba Corp. apologized to the American public last week in a page ad that ran in several major newspapers. The ad said "Toshiba Corp. extends its deepest regrets to the American people," and expressed the "shock and anger" company officials shared with the U.S. over the illegal sale of high technology to the Soviet Union by Toshiba Machine Co.

Hamburglar on prowl at Sears 64
Sears, Roebuck & Co. is putting some "character" into its multimedia campaign promoting the arrival of the McKids clothing line in its stores. Several McDonaldland characters, such as the Hamburglar, are featured in the TV spot.

INTERNATIONAL

Kremlin showing a new face 44
It would have seemed impossible just three years ago, but today the Kremlin—long a Cold War symbol—is giving its traditional gray visage a new look. However, unlike Western political leaders who might rely on advertising and PR experts to project a new image, Mikhail Gorbachev is relying on a select group of top government leaders, as well as his wife, Raisa.

Coke returns to Persian Gulf 61
Coca-Cola Co. is following Ford Motor Co. and Colgate-Palmolive Co. back into the Persian Gulf after an absence of nearly 20 years. The U.S. marketers were among those ousted by the Arab boycott against companies doing business with Israel, a boycott that has been relaxed unofficially.

OTHER NEWS

Hyundai Electronics America picked D'Arcy Masius Benton & Bowles to introduce the first Hyundai brand personal computer in the U.S. this fall. DMB&B, San Francisco, will handle what is expected to be a $5 million account for the rest of this year and as much as a $15 million account next year. The shop was a late entry to the review. Page 6.

It's been a quiet summer on the new-brand front in the cigarette business as major marketers concentrate on bolstering share of existing brands and fighting off-price competition. Loews Corp.'s Lorillard is looking to better its competitive position by extending its Newport brand while trying to breathe life into its True brand. Lorillard last week began testing Newport Stripes in two markets. Page 48.

Advertising and media representatives hope their appearances before the tax-writing committees of Congress cultivated enough opposition to changing the deductibility of advertising to overcome a handful of legislators who favor the idea. Page 49.

The TV movie marquee will shrink considerably this fall. Movies, which occupied as many as five nights a week in the 1986-87 prime-time TV season, will figure in ratings battles on just three nights this season. Page 53.

SPECIAL REPORT

***Direct Marketing**—Many industry experts regard non-profit marketing as the leader in the industry's evolution. Accounting for about 21% of third-class mail in 1985, non-profit appeals are produced by state-of-the-art technology. Special Report takes a look at the fund-raising campaigns and techniques used by charitable and political organizations and institutions of higher education. Starts after Page 28.*

BJK&E plan includes stock sale to clients

By JON LAFAYETTE

NEW YORK—In an unusual move, Bozell, Jacobs, Kenyon & Eckhardt may sell minority equity interest in the agency to its clients.

Charles Peebler, ceo of BJK&E, said that under his agency's unique proposed management buyback from parent Lorimar Telepictures Corp., some clients could invest in the agency and their investments might include equity participation.

Although the buyback deal has not been completed, Mr. Peebler stressed that the agency's management is in a position to arrange the purchase of a majority stake in the agency.

In many leveraged buyouts, management is given a small equity stake while an investment company arranges financing and purchases a controlling interest.

Merrill Lynch & Co., a BJK&E client, is representing agency management in the deal. The broker is considered to be one client that most likely will invest in the agency, though the company's policy is not to comment on deals before they are completed.

Other clients that may be considering an investment in BJK&E are Chrysler Corp. and AMR Corp., parent of American Airlines.

Lorimar Telepictures last month announced plans to restructure by selling some of its TV stations and was considering selling its ad agencies.

The price tag for BJK&E could reach $100 million. Lorimar paid $21 million for Kenyon & Eckhardt in August 1983 and $41 million for Bozell & Jacobs in 1986.

Another $10 million of Lorimar's money went to acquire or increase BJK&E's equity in agencies in Germany, Italy, the U.K., the Netherlands, Belgium, Australia, Hong Kong and Singapore.

In addition to BJK&E, Lorimar owns Poppe Tyson, a business-to-business shop.

Mr. Peebler said he expects Poppe Tyson to be included in the package his management group will buy from Lorimar.

London-based WCRS Group last week reportedly contacted Lorimar and presented itself as a potential buyer for BJK&E.

Mr. Peebler, who said WCRS executives have not contacted him, added he understands three or four companies approached Lorimar about BJK&E.

Donald Creamer, chairman of WCRS North America, said his company is not interested in making an offer for BJK&E.#

Jerry's Cannes vote angers S. Africa shops

By DES KILALEA

JOHANNESBURG—Jerry Della Femina, chairman of Della Femina, Travisano & Partners, has the South African ad community steaming over his behavior as jury president at the recent International Advertising Awards Film Festival in Cannes.

South African agencies are demanding refunds of their $5,000 in costs after the controversial U.S. adman said he automatically gave their entries no points during the judging.

Mr. Della Femina told ADVERTISING AGE, "When the work of Hunt Lascaris TBWA, Lindsay Smithers-FCB, McCann Group , J. Walter Thompson and Young & Rubicam came up, I automatically gave every commercial a zero score even before it was shown. Just prejudiced, I guess" (AA, June 29).

The comment drew cries of outrage here.

"These actions of the jury president were nothing short of unfair," said Reg Lascaris, managing director of Hunt Lascaris. "Just as all Germans were not Nazis, all South Africans are not racists.

"Most advertising agencies are equal-opportunity employers. If that's the treatment we get, it's going to be very hard for the people who are trying to promote change.

"The entrants expect impartiality from the judging panel. If we were to be discriminated against, we should have been informed before our money was accepted."

While there has been unconfirmed talk that one agency is thinking about legal action, each shop is demanding its money back for registration fees and for delegates who attended.

"We enter to give our creative people international experience, but we are not going to throw 10,000 rand [$5,000] away if we are not judged fairly," said Tim Bester, chairman at McCann.

Mr. Della Femina, reached by telephone last week, said, "I chose to hurt them. Abstaining would mean I did not feel strongly one way or the other." He said he voted against all the spots without knowing the agencies' hiring practices. But he added, "I will personally apologize and pay back [entrance fees] to any agency whose commercial I judged that can prove it has a black board member."#

Julie Skur Hill in Chicago contributed to this story.

Coca-Cola recall rebounds

By SCOTT HUME

June was a month for surprising comebacks in advertising awareness as Coca-Cola regained the No. 1 spot and Burger King Corp. returned to the top 10 after a year's absence.

Coca-Cola's reclamation of the title as the month's best-recalled advertising is an especially sweet victory because it dislodged rival Pepsi-Cola from the position it had held during the two previous months.

Helping put Coca-Cola back in the top spot was an especially strong vote from men. Last month, men represented 59% of those respondents who said Coca-Cola's advertising was the first that came to mind from all they had seen, heard or read in the previous 30 days. In May, Coca-Cola's recall score had been slightly skewed to women (48% male, 52% female).

Coca-Cola last month also did better with consumers ages 35 to 44, a group that in the past has been more likely to recall Pepsi's ads first. In June, Coca-Cola advertising received more first mentions from this age group than did any other advertiser.

Surprisingly, Pepsi did very well when the 1,000 adults polled were asked specifically to name the first soft-drink advertising that came to mind. To that question, 39.2% of respondents named Pepsi, 28.1% named Coca-Cola. Diet Coke ranked third with 2.8% of first mentions.

Pepsi's score in the soft-drink category was 2.9 percentage points better than its 36.3% share of first mentions in May. Coca-Cola's June share was 2.8 points below its 30.9% in May.

Burger King managed to increase its recall score on both the unaided (top 10) and category-specific questions. BK's "The best food for fast times" slogan finally may be catching on, which is good news for embattled J. Walter Thompson USA, New York, as it tries to retain the account.

In addition to making the list of the 10 best-recalled ad campaigns for the first time in a year, BK's advertising made up some lost ground in the fast-food category. Oh, sure, McDonald's Corp. retained the No. 1 spot when 41.1% of respondents said that was the first fast-food advertising that came to their minds. But BK's 14.1% share of first mentions was a 4.2 percentage point improvement over its 9.9% share in May. Wendy's International was third last month with 9.9%.

AdWatch is a joint project of ADVERTISING AGE and SRI Research Center, Lincoln, Neb.

Ad awareness is measured by asking a nationally projectable sample to name the advertising that first comes to mind of all seen, heard or read in the previous 30 days.

Consumers are queried on the first ad they recall overall, as well as in a variety of product areas. During June, 1,000 consumers were polled by telephone.

AdWatch Survey of Commercial Awareness Top 10 in June

One thousand people were asked: Of all the advertising you have seen, heard or read in the past 30 days, which advertisement first comes to mind? *Source: SRI Research Center Inc., Lincoln, Neb.*

Rank 6/87	Rank 5/87	Advertiser	Agency
1	2	Coca-Cola	McCann-Erickson
2	1	Pepsi-Cola	BBDO Worldwide
3	6	Budweiser/Bud Lite	D'Arcy Masius Benton & Bowles/DDB Needham
4	3	Miller/Miller Lite	J. Walter Thompson/Backer & Spielvogel
5	8	McDonald's	Leo Burnett
6	4	California Raisins	Foote, Cone & Belding
7	9	Bartles & Jaymes	Hal Riney & Partners
8	—	Burger King	J. Walter Thompson
9	7	Chevrolet	Campbell-Ewald
10	—	Pampers	D'Arcy Masius Benton & Bowles

Those changes in advertising awareness that are deemed statistically significant by adWatch researchers are attributable to more than sample variation.

Also making a comeback last month was Apple Computer. Although it didn't make the top 10 in unaided recall, it did regain the top spot in specific computer-advertising awareness. IBM Corp. had been No. 1 for the two previous months largely on the strength of heavy media spending for its new personal business computer.

But last month, Apple, which lately has renewed multimedia advertising for its Macintosh line, saw its share of first mentions rise 5.6 points to 27.2%, easily outdistancing IBM's 23.6% share and third-ranking Radio Shack's 1.6%.

Apple received a significant amount of specific recall for several of its lines. Advertising for the Macintosh line came to mind first for 3.1% of the sample, for example, and its Apple IIC and IIE models also were specifically named.

IBM's advertising continues to get higher recall than any other from respondents in the highest income bracket ($60,000 or more).

In other significant changes in the June survey:

- Awareness of Ralston Purina Co.'s Purina **pet foods** increased 3.5 points last month to 10% of first mentions, good enough for the top spot. Alpo Pet Foods was second with 9.2% and Kal Kan Foods was third with 6.5%.
- Goodyear Tire & Rubber Co.'s awareness score rose 4.2 points to 22.8% as it held on to the top spot in the **tire** category. It stayed ahead of No. 2 Michelin Tire Corp., which also improved its showing. Recall of its advertising rose 2.7 points to 17.4% of first mentions. Firestone Tire & Rubber Co. was third with a 5.9% share.#

Raisins dance in U.K. to promote Sun-Maid

By LAUREL WENTZ

LONDON—The singing, dancing Claymation raisins, created by Foote, Cone & Belding for the California Raisin Advisory Board, are crossing the Atlantic in their first international campaign, breaking in the U.K. next week.

"Late Show," the original U.S. raisin commercial featuring the finger-snapping conga line of hip raisins in sunglasses and sneakers, has been adapted to include a box of Sun-Maid raisins.

Parent Sun-Diamond Growers of California is adapting the generic raisin campaign because Sun-Maid is the only California raisin sold in the U.K. Sun-Maid, with a 15% market share, also is the largest single raisin brand in the U.K., where 47% of raisin sales are from own-label supermarket brands.

Michael K. Cassidy, Pleasanton, Calif.-based director of sales-international of Sun Diamond Growers of California, said the company worried briefly about using Marvin Gaye's version of "I Heard It Through the Grapevine" in the U.K.

The same music has been used recently for an enormously popular Levis 501 jeans spot by Bartle Bogle Hegarty and then for a Carling Black Label beer spot by WCRS Mathews Marcantonio. The beer commercial was a parody of the Levis spot.

The $1.6 million raisin campaign will run on U.K. television in August and September, then return in a second burst in November and December.

Sun-Diamond is looking at other export markets to break the raisin ads. But initial tests in Germany, where advertising rarely is humorous, "bombed," Mr. Cassidy said.

Company executives said Germany still might be considered and that pan-European satellite TV channels, such as Rupert Murdoch's Sky Channel, could be used to reach Sun-Maid's big Scandinavian market, where advertising still is banned on most domestic channels.

The second U.S. spot, called "Lunch Box," in which a construction worker's lunch box is transformed into a Las Vegas-style entertainment venue for crooning raisins, will not be used in the U.K. because a Sun-Maid package shot cannot be inserted easily, said Frank R. Morgan, director of international marketing for Sun-Diamond.

In the U.K., Sun-Diamond will tackle prunes next with a free sample pack attached to Sun-Maid raisin drums this fall. The promotion is backed by an $800,000 ad campaign by FCB.

The company also is launching Diamond walnuts in the U.K. with an $800,000 poster and radio campaign by FCB this summer.#

American wins its wings

Delta takes second in AA poll

By Robert Goldsborough

The word "favorite" gets thrown around a lot in airline advertising, but judging from the results of a new poll of frequent-flying readers of ADVERTISING AGE, only two U.S. carriers—American Airlines and Delta Air Lines—appear to have a claim to the word.

These two were the overwhelming choices of our respondents, based on replies to a coupon that ran twice in May editions of AA and asked readers to name their three favorite airlines, as well as their least-favorite carrier. American, the clear winner, was listed as favorite on more than 30% of the votes cast, while Delta was selected on nearly a quarter of them. Combined, the two were listed first on 55% of the responses.

In all, AA received 301 replies, 65% more than were counted in a similar poll in 1985.

This year's comments contain a high degree of overall dissatisfaction with domestic carriers—an attitude that also has been reflected in the record number of complaints the federal government has received this year about flight delays, cancellations, overbookings, lost or damaged baggage and generally poor service.

Fort Worth-based American, second to Delta in a photo-finish in the 1985 poll, blew by its Atlanta rival this year, scoring a total of 430 points (three for a first-place mention, two for second, one for third) to Delta's 377. United Airlines finished a distant third, as it did two years ago. (It should be noted that the poll was conducted before the recent mishaps that have plagued Delta.)

As in 1985, Miami-based Eastern Air Lines stands as the least-favorite carrier, getting that dubious mention on 22% of the ballots (as compared with 27% in 1985).

This time around, travelers spread their dissatisfaction more widely than in '85, voting thumbs-down to Continental Airlines (14.6%), Northwest Airlines (12.3%), United (7.3%) and Trans World Airlines (5.6%).

In all, 41 carriers received mentions from respondents, representing 34 states, D.C., the U.K., the Netherlands and two Canadian provinces.

These readers said they take an average of 39.3 flights per year (28.5% said they take 50 or more flights annually, 22% fly 25 to 50 times, and 49.5% fly less than 25 times).

These primarily business travelers were asked to base their ratings on convenience of schedules, ease of ticketing, on-time performance, overbooking, baggage handling, cleanliness of equipment, attitudes of personnel, safety procedures, onboard services (food, drink, reading materials), seating configurations and frequent-flier programs.

American emerged as the clear winner in large measure because of its perceived strength in three areas: overall service, on-time performance and its frequent flier "AA Advantage." The American frequent-flier program was mentioned far more often than that of any other carrier.

If one word could best describe runner-up Delta's image in the eyes of our survey participants, it would be "friendly." Fully two-thirds of those picking Delta as their favorite airline singled out the warmth of its personnel, with "courteous," "caring," "polite" and "pleasant" appearing frequently. "Delta employees seem to love their job" is how one Californian responded.

The nice things said about these two airlines is basically the good news in the AA survey. Now for the bad.

Frequent-fliers in the advertising business are just plain angry with air travel in general. In the open-ended portion of the ballots where write-in comments were encouraged, the great majority were of a negative nature (10 respondents refused to pick any airline as "favorite," preferring to accentuate the negative, and one termed the phrase "favorite airline" an "oxymoron"—a figure of speech of seemingly self-contradictory content).

Almost all of the voters listed more than one reason for their dissatisfaction with specific airlines or with the industry in general. Leading the parade of complaints was lateness and/or flight delays, which appeared on 32% of all the returns, with employee attitudes second at 25% (and more than one-third of these used the word "rude" to characterize airline personnel).

Other areas of dissatisfaction were overall poor service (22%), dirty equipment (9%), cancellations (7%) and food (6%). Interestingly, three traditional airline bugaboos—overbooking, lost or damaged luggage and safety—were barely mentioned as concerns by our readers.

Most readers treated this survey as strictly a rating of airline "brands," with little mention made of conglomerates that own more than one carrier.

Responses were divided into ADVERTISING AGE'S four geographic regions, but there was little variation in popularity from region to region, with American and Delta making strong showings throughout. Even Winston-Salem, N.C.-based Piedmont Airlines, the regional carrier with the strongest support, scored almost equally in the South, East and Midwest.

On a popularity/unpopularity scale, American's first-place mentions outpulled its "least-favorite" ones by more than 14 to 1. Delta had a similar ratio, while Piedmont had roughly a 7-to-1 positive showing.

American was only slightly ahead of Delta in popularity among those who fly 50 times or more per year, and the two were tied in the 25-to-50 flight category.

It was in the less-than-25 flights slot that American piled up its substantial margin with AA readers. On the downside, Eastern was the least-favorite carrier in both the East and South, while Continental got the most negative mentions from the West. Northwest Airlines had the most negative mentions in the Midwest. Eastern also was least favorite in all three categories of flying frequency.

Although most readers limited their comments to the space on the ballots, a few wrote addendums chronicling specific grievances.

The most extensive of these was a two-page letter from an account executive in the Los Angeles office of a major advertising agency. Noting that he flies about 100,000 miles a year on 75 flights, he went into great detail on his preferences and unhappinesses, ending with a comment that many other air travelers probably would echo:

"I really wish Amtrak were larger and faster!"

Favorite U.S. airlines

	Total points	1985 rank
1. American Airlines (102)	430	2
2. Delta Airlines (74)	377	1

Campbell vs. Lipton

Dry-soup war brewing

By JUDANN DAGNOLI

Competition will soon come to a boil in the $475 million dry-soup segment as Campbell Soup Co. cooks up trouble for Lipton Cup-A-Soup.

With its September introduction of new Campbell's Cup, an instant, single-serve soup mix, the Camden, N.J.-based marketer throws its second product entry at Thomas J. Lipton Inc.'s overwhelming lead in the segment.

Although the leader in the total $1.7 billion soup market, with a 65% share via its canned lines, Campbell has a negligible share of the dry segment.

Campbell will not disclose its marketing or advertising budget for the new five-variety Campbell's Cup, but the company is expected to spend heavily to make inroads against Lipton's 90% share of the dry segment.

In 1985, when Campbell introduced Campbell's Quality Soup & Recipe Mix, its first major bid against Englewood Cliffs, N.J.-based Lipton, Campbell spent $20 million for advertising in what was hailed as the most aggressive soup introduction in its history (AA, July 15, 1985).

Advertising for Campbell's Cup breaks September 9, via Backer Spielvogel Bates Worldwide, New York. TV, print and couponing will be used.

Campbell has been working to upset Lipton's dry-segment leadership at least since 1979, when it first began testing a similar soup—also called Campbell's Cup—in Albany, N.Y. That product was packaged in individual-serve plastic containers packed four to a box, and prepared by adding boiling water to a cup. The test was discontinued in the early 1980's.

Campbell's second foray into dry soups was the Quality Soup & Recipe Mix six years later. That mix is multiple-serve, packed in envelopes and prepared on a stove rather than pouring boiling water in a cup.

Initially marketed as Comin' Home soups in test, the name was changed for the national rollout.

However, the Quality Soup & Recipe Mix line sales "have not been as great as we had hoped," a Campbell spokesman said.

While the market for condensed soups has been growing only 2% a year, dry soups now account for 27.5% of the total soup category, more than double the 13.3% share the category held 10 years ago.

In trying to increase sales in the relatively stagnant canned segment, Campbell has been augmenting its extensive line with value-added soups such as its Creamy Natural and Home Style soup lines.

Campbell's measured media spending in

Chiat/Day confident of win

Nissan in neutral

By JENNIFER PENDLETON

A decision on the Nissan automotive account review remained unresolved July 31, but finalist Chiat/Day appeared confident it will succeed William Esty Co. on the $150 million account.

Chiat/Day Chairman Jay Chiat and President Lee Clow led the agency's presentation team July 30 in Los Angeles. Tatham-Laird & Kudner, Chicago, pitched July 29.

Los Angeles-based Chiat/Day has been increasing its staff in anticipation of the win.

A decision may be made today.

Nissan's agency search, conducted by the Canter, Achenbaum, Associates consultancy, apparently did not go smoothly.

After Ogilvy & Mather, one of the finalists selected by the Canter team, withdrew from the competition, there were reports it did so because the huge account would only return an 8% commission.

Efforts to confirm the report were unsuccessful as Carson City, Calif.-based Nissan; New York-based Canter, Achenbaum and others connected with the review either did not return phone calls or refused to comment.

Other sources said Ogilvy's departure embarrassed and upset Nissan, and that the company ordered Canter, Achenbaum back to the calculator to work out a satisfactory compensation formula.

One report claimed the new formula was closer to 13.5%; another source said the new formula involved a guaranteed profit.

Originally, sources close to the review said, the Nissan compensation formula worked out—depending

Grocer 'fee' hampers new-product launches

By LAURIE FREEMAN and JANET MEYERS

The Utah ice cream maker had visions of a hot market in California, but his dreams melted when two 30-store chains demanded $20,000 each to put his frozen novelties in their freezers.

The president of the ice cream company refused to pay these "slotting allowances."

"As a small manufacturer, I can't compete with the giants like General Foods who can pay these large slotting allowances," said the company president, who asked not to be named for fear other California retailers might demand even higher slotting allowances.

Slotting allowances, also known in the grocery industry as stocking allowances, introductory allowances or street money, are the admission fee demanded of many marketers—large and small—who want to squeeze their products onto crowded supermarket shelves.

Requiring payment for shelf space is another sign of the growing power retailers are gaining over manufacturers.

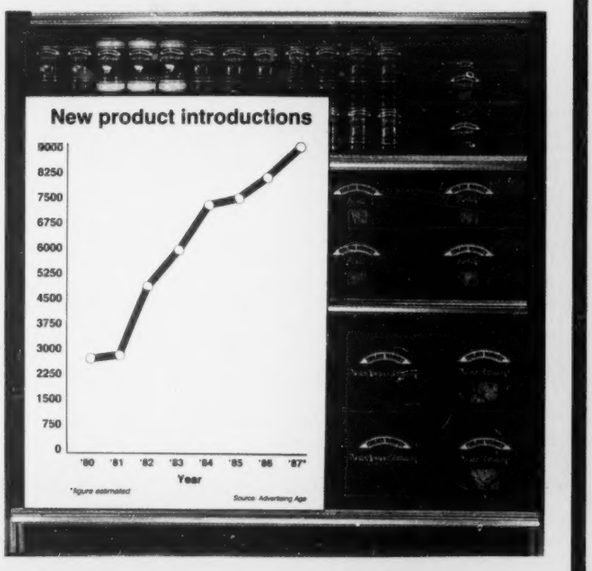
The money, which primarily comes out of a marketer's trade promotion funds, could represent as much as one-third or even one-half of the $19 billion expected to be spent on trade promotion this year, industry observers report.

Trade promotion expenditures have more than tripled from the $6 billion spent in 1980. Donnelley Marketing's 1986 survey of promotional practices showed that trade promotion increased from 34% the total marketing expense (also including consumer promotions and media advertising) in 1978 to 37% last year.

Manufacturers complain they are not given enough time on the shelves to recoup these slotting costs. The Utah ice cream executive, for example, said the payment wouldn't be so bad if retailers kept his products in the freezer more than three to six months, which appears to be the average for the industry these days.

Retailers say the fee covers entering new-product information into computers; finding space in the warehouse; redesigning store shelves; and notifying individual stores about the latest new product of entry. And the retailers say they want to turn their buying

(Continued on Page 60)



Highlights

Diaper introductions cover market 4

Procter & Gamble Co. will be marketing two new versions of Pampers disposable diapers besides the Luvs Deluxe that made its debut in late June. P&G's only major competitor in the $3 billion category, Kimberly-Clark Corp., is said to be readying a new Huggies version for national distribution by yearend. Five years ago, the two marketers offered single versions of their diaper brands. After line upgradings and extensions, with multimillion advertising and promotional campaigns, things aren't over.

Barton moves to stop Corona rumor 6

Barton Brands last week publicly and nationally addressed a false rumor that its beer, Corona Extra, imported from Mexico, is contaminated with urine after attempts to quash the whispering campaign on a market-by-market basis failed to halt its spread. If last week's extensive news coverage of Barton's predicament doesn't kill the rumor, the company, which spent only $1 million on advertising for Corona last year, may buy ads to make its case.

Langer touches pregnant market 22

Baby boomers may be having fewer children, but that hasn't stopped a spate of marketers from introducing skincare products for pregnant women. This month, a Kentucky pharmaceutical company will attempt to succeed where others have failed. Langer Laboratories is rolling national Touch of Life, a line of skincare products for pregnant women. The company hopes to capture some of the $580 million women spend on personal body-care products during and after pregnancy.

Regionals arm against national invasions 24

"Regional" strategies are gaining favor with some of the nation's biggest national marketers, and independent regional companies are refining their tactics to meet the threat. Strong regional companies have devised marketing strategies with the thought of defending their turf against the likes of Pizza Hut, General Foods Corp. and Frito-Lay. The regionals are counting on homespun brand preferences and established distribution networks to keep the Goliaths at bay.

Pantera's bites into Pizza Inn 27

The pizza war escalated last week when feisty Pantera's Corp. took over Dallas-based Pizza Inn, the nation's fourth-largest pizza chain. Industry sources believe the smaller chain's aggressive marketing strategy will put the ailing Pizza Inn back on track. Pantera's anticipates returning the 700-unit Pizza Inn to profitability within 90 days. Pantera's acquisition could produce even greater competition in Pizza Inn's markets.

INTERNATIONAL

Brazilian marketers bare lingerie ads 42

Americans who might be taken aback by the sight of live models in TV brassiere commercials would find Brazilian spots an eye-opening experience. The use of real-life models and erotic fantasies is working wonders for Hope underwear in Brazil. A spot now running on prime-time TV, part of a $1 million campaign that includes print ads featuring nude models, has helped bring Hope's bra sales to 180,000 a month in the four months since the line was launched.

West slow to accept Japan's style 42

Japan's distinctive style of advertising—emphasizing emotion rather than facts—is gaining influence in the West, agency executives in Tokyo agree. But many do not believe Dentsu's Grand Prix win this year at the International Advertising Awards Film Festival at Cannes, by itself, is a sign that Japanese advertising has "arrived" in the West.

OTHER NEWS

A year ago, Riunite wine marketer Banfi Vintners was plagued by wine coolers, a weakened American dollar and imported wine-tainting scandals. The result was plunging Riunite sales. But now Banfi is rebounding. Analysts attribute the turnaround to a new line of Banfi products, fruit-flavored Riunite. Page 12.

The U.S. is heading for the kind of oil crisis that drove up energy prices in 1973 and 1979, said Chrysler Corp. Chairman Lee Iacocca. Although the first crises rocked the domestic auto industry, allowing importers of fuel-efficient cars to gain big chunks of the U.S. market, he said the U.S.' Big 3 carmakers are better prepared for another crisis. Page 27.

British Airways has not decided whether to maintain the identity of British Caledonian Airways if British Airway's planned takeover of its smaller rival gains U.K. government approval. Early indications are that the carrier's identity will survive. That would be good news for BCal agency Winius-Brandon, which handles BCal's $11 million U.S. account. Page 30.

The September issues of the major fashion titles always are thick with ads, as they signal the start of the fall retailing and advertising seasons. But this year issues will be especially weighty. *Vogue*, traditionally the largest of the bunch, will carry 618 ad pages out of a total 832 pages, both records. Page 61.

SPECIAL REPORT

Financial Services Marketing—*As the lines between financial services providers continue to blur, products and services are becoming more homogeneous. To cut through the clutter and counter the competition, marketers are refining campaign strategies, boosting ad dollars and meeting the money game's challenges head on. Starts after Page 32.*

ABC stations sub football in prime time

By BRIAN MORAN

NEW YORK—Six top ABC-TV stations will broadcast National Football League Sunday night games this fall in a move that will boost the stations' fortunes but hamper the struggling network.

Last week, WABC-TV here acquired the broadcast rights to the opening game of the NFL's cable TV package on ESPN, a Nov. 8 matchup between the Giants and the New England Patriots.

Cable net ESPN is 80% owned by Capital Cities/ABC.

In early July, ABC's WLS-TV, Chicago, picked up the TV rights for the Dec. 6 game between the Bears and the Minnesota Vikings.

The other markets where ABC's Sunday night schedule will be preempted in favor of football are Boston, Denver, Miami and San Diego.

Other over-the-air clearances for the ESPN package include NBC affiliates in Dallas and Minneapolis; CBS affiliate WUSA-TV in Washington; Fox Broadcasting affiliate KTTV in Los Angeles and independent stations in San Francisco and Seattle.

As part of its three-year, $153 million deal to carry NFL games on cable TV, ESPN had to sell over-the-air TV rights in participating teams' markets. As of last week, ESPN had deals for broadcast coverage in 12 of 13 markets involved.

Capital Cities/ABC's decision to allow its own stations to pre-empt the network is significant on several fronts.

It is virtually unheard of for a network to be pre-empted by company-owned or affiliated stations. It is especially noteworthy when it occurs on a critical night like Sunday during the fall when the network is trying to build its schedule.

However, the NFL situation is clearly an unusual case. The advertising market for football has exploded (AA, July 27) and Capital Cities/ABC may now be regretting its decision to cut back on its network TV NFL schedule.

ABC's "Monday Night Football" dropped "Special Edition" games on Thursday, Friday and Sunday nights for 1987 and retained 16 "MNF" games, plus four preseason telecasts. Cap Cities/ABC in essence shifted its non-Monday "specials" to ESPN for 1987.

Also, by pre-empting the network in its own markets on an important night, Capital Cities/ABC is saying the station group is more important than the network.

The impact on ABC's network Sunday schedule is likely to be negative. Most ad agency excecutives expect ABC's Sunday schedule to finish a distant third to NBC and CBS.

Except for 7 p.m. to 8 p.m. (ET), when "The Disney Sunday Movie" runs, ABC has completely rebuilt Sunday night. Two new shows—"The Dolly Show" and "Buck Rogers"— will run from 9:00 p.m. to 10:00 p.m. "Spenser: For Hire" has been shifted opposite CBS' powerful "Murder, She Wrote." The ABC series probably is looking at its last season.

While the ABC network will suffer, the move is a boon for ESPN and its advertisers.

When ESPN signed its landmark NFL deal last March (AA, March 23), there was much speculation about where—or even if—ESPN would be able to sell broadcast rights.

There was a perception ESPN would get unattractive games and that the strongest stations in many markets would be loath to pre-empt their Sunday evening lineups.

Further, the NFL ad market was extremely weak last year and many industry observers said there would not be enough ad money—local or

N W Ayer, Rubin dropped

Northrop adds DDB to finalists

LOS ANGELES—Northrop Corp. added late-entrant DDB Needham Worldwide, here and New York, to the list of finalists for its $5 million account.

Others competing include: Backer Spielvogel Bates Worldwide, Huntington Beach and New York, and Ketchum Advertising.

Dropped from the review: N W Ayer, here and New York, and Rubin Postaer & Associates. A decision is expected at the end of August. Lord, Geller, Federico, Einstein, New York, is the previous agency.

Klein/Richardson partner Glenn Richardson, 43, will leave the Los Angeles-based agency at an unspecified time later this year. The exec VP-client services director of the Beverly Hills-based agency wouldn't discuss future plans. President-Creative Director Niel Klein, 48, said the agency will continue under the K/[illegible] name.

Ken Kaess, 33, DDB Needham, Los Angeles, senior VP-management supervisor on the Cigna Corp. business, left the agency for the new post of VP-development of children's programming, New World Pictures. Bruce Miller, 34, also a senior VP-management supervisor at DDB, will assume Mr. Kaess' responsibilities.

West Coast News

Avery Label Business Systems Division, Azusa, Calif., awarded its estimated $400,000 account to Robert McKim & Co., Los Angeles, last week from Cochrane Chase, Livingston & Co., Newport Beach.#

Corona fights bad-beer rumors

By SCOTT HUME

CHICAGO—Barton Brands never has spent heavily on advertising for its Corona Extra imported beer because it hasn't been necessary.

That may have changed.

Barton last week publicly and nationally addressed a false rumor that Corona, imported from Mexico, is contaminated with urine, after attempts to quash the whispering campaign on a market-by-market basis failed to halt its spread.

If last week's extensive news coverage of Barton's predicament doesn't kill the rumor, the company, which spent only $1 million on advertising for Corona last year, may buy ads to make its case. No such advertising was planned at press time, but a spokesman said Barton has considered buying space to run reprints of favorable news stories.

The rumor first circulated two months ago in Reno, Nev., allegedly by Luce & Son, a beer distributor there that handles leading import Heineken.

Barton filed a $3 million federal suit against the distributor in Reno. It was settled out of court with Luce & Son making a public declaration that Corona was not contaminated.

But the rumor—and the damage to sales it caused—still spreads, partly fueled by news reports.

When the Gannett Co.'s *Reno Gazette* reported the settlement of the suit, other papers in the Gannett chain picked up the story.

Barton last week began a nationwide public relations effort to confront and defuse the whispering campaign. It provided video PR releases to TV stations, which included footage of Barton VP-General Manager Michael Mazzoni denying the rumor, and footage of the Corona brewery in Mexico City.

"We didn't want to go public at first, for fear that it would only spread the rumor to areas where it hadn't hit," said Steve Dubin, account executive at Barton's PR agency, Ruder Finn & Rotman. "And I think we were wise in holding off as long as we did. But by last week the rumor had become rampant enough that we decided it was wise to meet it head-on."

Like Procter & Gamble Co.'s rumored connection with satanism, said to have been confirmed on "Phil Donahue," Corona's supposed "problem" was being falsely reported to have been featured on CBS-TV's "60 Minutes."

Corona sales have been hurt, especially in Western states, although Mr. Dubin would not confirm reports of up to 80% dropoffs in some markets.

The contamination rumor catches Corona in the midst of one of the beverage industry's most remarkable growth patterns. From U.S. sales of 5 million 2.25-gallon cases in 1985, Corona jumped 170% to 13.5 million cases last year, making it the No. 2 import behind Van Munching & Co.'s Heineken, which grew 3.5% last year to 35.7 million cases.

But while Van Munching spent $7 million last year on advertising for Heineken through SSC&B:Lintas, New York, with more than half of that spent on TV, Barton barely spent $1 million on print ads and radio spots for Corona, via HDM Dawson Johns & Black.#

Eatery ad hits gossip

KANKAKEE, ILL.—Fear of acquired immune deficiency syndrome in a mid-size Illinois town prompted a restaurant to air a radio spot that attempts to squelch a rumor one of its employees might have the disease.

The 60-second spot, which is scheduled to run on three stations through Aug. 8, features two women talking about going to eat at Leo's Restaurant.

"Haven't you heard the rumor?" asks one women. The other women responds by saying the rumor isn't true and that the restaurant still has great food.

The commercial ends with the two agreeing to eat at Leo's. AIDS is never mentioned.

Leo Girard, owner of Leo's, said he wrote the commercial after realizing that the rumor was affecting business.

"Enough people are aware of it that business has been down," he said.

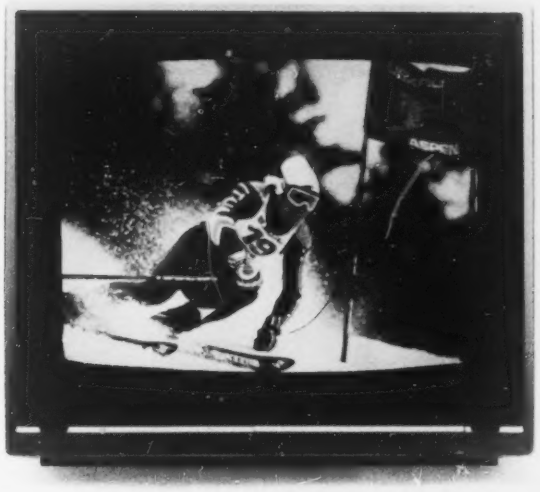
"We felt it was the most direct approach without creating fear that was already in the community," said Lou Anne Lenzie, copywriter for WKAN-AM, one of the three stations running the spot. The other stations are WLRT-FM and WBUS-FM.

"Leo's was virtually empty at lunch last week," Ms. Lenzie said.#

CORRECTIONS & CLARIFICATIONS

- Columbia Pictures, not MCA Inc., hired McCann-Erickson, Los Angeles, to handle its estimated $40 million account (AA, July 27, P. 71).
- In the Sports Marketing Special Report (AA, July 13), P. S-1, the weighted metered market ratings for the Academy Awards and NCAA championship game from 9 p.m. to 10 p.m. (ET) were a 29 rating, 43 share and 18 rating, 26 share, respectively. The Oscars drew nearly twice the audience based on weighted metered market averages.

Also, in the chart on P. S-2 the AFC playoff game between the Patriots and Broncos pulled a 24.6 rating, according to NBC. Omitted from the chart were the AFC championship game, with a rating of 28.4, and World Series games 1 and 2, with ratings of 25.5 and 24.2, respectively.#



Freeze. Frame.

Introducing the fastest, easiest way to get quality prints and slides from video.

Now you can capture the moment, freeze it, and frame it. All with the touch of a button. With the new FreezeFrame Video Image Recorder from Polaroid.

FreezeFrame produces sharp, instant color prints and color or black and white 35mm slides from virtually any video source. And it delivers a finished picture that is far superior in quality and resolution to direct screen photography or thermal video image recorders.

System includes Video Image Recorder, control console, and print film camera adapter. 35mm camera adapter optional.

FreezeFrame can be used in broadcast, production and advertising to proof, edit, storyboard, or reference.

It can also be used to pull a print off a just-breaking news story.

The FreezeFrame system includes a Video Image Recorder, control console, and print film camera/adapter. And the system connects easily to video cameras, professional VCR's, laser disc players and computer graphics systems.

New FreezeFrame from Polaroid. It's fast, easy and at $1,899*, very affordable.

To find out how FreezeFrame can help you, call toll-free 800-343-5000 8 a.m. to 8 p.m. Eastern Time.

Or fill out and return the coupon. We'll give you the full picture and show you just how easy it can be to capture the moment on FreezeFrame.

For more information, mail this coupon to Polaroid Corporation, Dept. 678, P.O. Box 5011, Clifton, NJ 07015.

DIRECT MARKETING

Spiegel, Sears try new ideas

By LAURIE FREEMAN

CHICAGO—Spiegel Inc. and Sears, Roebuck & Co., hot for new avenues of revenue, are introducing innovations in their catalogs.

Spiegel is enlisting paid advertising while Sears is launching "Changes Volume II," a new contemporary women's catalog.

Oak Brook-based Spiegel last week began mailing two specialty catalogs—"Perspective" and "American Hits"—with three paid ad pages featuring toiletries, cars and exercise equipment (AA, July 27).

Catalog ad sales aren't new, but as more big-name merchandisers such as Spiegel begin tapping the market, advertisers are expected to show more interest.

The 52-page "Perspective" book, a "high-fashion" catalog, is being sent to more than 1 million upscale women, who will see ads for Jones New York fashions, L'Oreal Visuelle makeup and Lubriderm lotion. "American Hits," aimed at a "young leisure lifestyle," includes ads for Avis, Bally Lifecycles and Chevrolet's Beretta.

CAS Ltd., New York, is handling ad sales for Spiegel and for Bergdorf Goodman, Bloomingdale's and Camping World.

A CAS official said these companies are eager to attract the additional revenue source.

Spiegel charges $26,950 for a color page in "Perspectives" and $23,100 for a color page ad in "American Hits."

Meanwhile, Sears this month begins mailing "Changes Volume II," a women's contemporary sportswear catalog, to both Sears credit-card customers and noncustomers nationwide.

Sears, which is making efforts to become more of a specialty retailer, is hoping to build on the "Changes" catalog series to help upgrade its image and expand its customer base.

"Changes" was tested last spring in Chicago, Miami and Orlando, Fla. The catalog's appearance and merchandise is similar to Spiegel's specialty books.

"The fashion-conscious shopper represents a significant market in today's retailing environment," said Tom Royal, Sears national catalog manager. "With so many women working, there's no longer time for shopping as there once was. Yet the need for contemporary looks at affordable prices still exists, and 'Changes' is one of the avenues we're taking to custom-fit a product assortment to a current lifestyle," he said.

Chicago-based Spiegel joins a growing list of catalog marketers turning to paid advertising as a way to boost revenues.

The merchandise featured in the "Changes" catalog series is picked and named after a European company.

The European-designed apparel featured in the specialty catalog is not available in Sears stores or in the standard catalog.

If consumer response warrants, the best-selling "Changes" garments could be offered through the general Sears catalog, Mr. Royal said.

The "Changes" catalogs complement Sears' general catalogs by offering international styling "at very competitive prices for the more contemporary segment of the fashion-buying market," Mr. Royal said.#

12.5 million big spenders are putting their money on your brand

- Health & Leisure targeted coupon co-ops reach 50-65 year old high-trial, high-redeemers.
- Big spenders redeem high—up to 16%!
- Redemption rate is 3 to 5 times higher than FSIs and more than double the rate of mass mailings.

MARKETING BY MAIL

Winning ads don't always sell

By JOHN FRANCIS TIGHE

Ted Kikoler is a phenomenon among art directors. He doesn't believe in awards.

Which reminds me of something Steve Brown, the man direct marketers love to hate (he's a principal of Carter & Van Peel, Abernathy & Closther *et al.*) sent to me recently. It was a note from the late Paul Bringe, a direct-mail copywriter of considerable achievement:

"If you have ever entered your advertising, art work or direct mail in a contest and emerged a winner, you know how nice it feels to walk off with the honors. You should know, too, that the nice feeling is likely to be your only reward.

"Don't try to equate winning a contest with sales results. A contest prize in a creative field means that a number of judges—your peers, usually—liked your work. It does not necessarily mean that more bakers will buy your shortening or more plumbers will buy your hardware. Your hard-nosed customers won't automatically be impressed with the things that impressed your judges.

"If contest winning is important, then consider your market to be contest judges and plan to sell them," Mr. Bringe wrote. ". . . And be prepared, too, for highly successful promotions the contest judges pass up. With direct mail we don't really need a panel of judges. The marketplace is prosecutor, judge and jury, all in one."

Back to Mr. Kikoler, a Canadian art director specializing in direct mail. He dislikes awards and contests; his top priority is to *get people to read the copy!*

Obviously someone worth your respectful attention, which is why, in my next column, I will quote some of his proven graphic techniques to boost response.#

Mr. Tighe is a direct-marketing copywriter and consultant based in New York. He heads the Tighe Team.

United trims promotion unit

ELK GROVE VILLAGE, ILL.—Companywide cutbacks at United Airlines have dealt their latest blow to the promotion department, where employees and local-market promotional activity have been sharply reduced.

The 14-member department, previously reporting to VP-Advertising John Ruhaak, now is supervised by VP-Sales Development Chris Bowers, who will oversee a "significantly reduced" staff in his new post, a spokesman said. Mr. Bowers previously was VP-market management.

In another move, the advertising department under Mr. Ruhaak will now report directly to Exec VP John Zeeman, while three marketing VPs —including Mr. Bowers—will continue to report to Senior VP-Marketing James Goodwin.

Mr. Zeeman, 50, said to be a leading internal candidate for United's president-ceo post, couldn't be reached for comment.

The spokesman said "significant reductions" in the promotion department represent "more a streamlining of operations," adding United will now "concentrate on larger promotions and higher visibility activities, not a lot of smaller promotions." He declined to specify the number of departmental jobs cut.

The cuts follow parent Allegis Corp.'s plan to sell its Hertz Corp., Hilton International and Westin Hotel units (AA, June 15).# —*G.L.*

Special Report

John Figlar

Supermarket concept taking shape

By Denise Frenner

Besides being one of the catchier phrases to have taken hold in the 1980s, the "financial services supermarket" concept is getting closer to becoming a reality. A quick trip down the aisles of providers' offerings, with most of the necessary financial products situated under one roof, reveals why.

Brokerage houses, for example, offer checking accounts and money-market funds. Insurance companies market mutual funds, individual retirement accounts and some policies as investment vehicles paying competitive dividends. Banks offer individual retirement accounts and discount brokerage services, and hope further deregulation will allow them to handle insurance and securities underwriting.

If Congress responds to bankers' pleas to revamp the 1933 Glass-Steagall Act, which separates commercial and investment banking, the barriers between financial services institutions will further chip away. Competition will intensify, creating a greater need for providers to market and differentiate their products.

They're already expending considerable effort along those lines: Ad spending for the industry is booming. In 1986, financial services spending rose 21.9% to $1.73 billion, according to statistics from the New York-based Leading National Advertisers—which tracks dollars for network, spot and cable TV, network radio, magazines, newspaper supplements and outdoor advertising—and the Newspaper Advertising Bureau, New York.

Besides meeting the fiercely competitive marketplace head on, financial institutions are meeting challenges posed by regulation, deregulation and tax reform.

As the money game heats up, experts predict that the future holds more products and services, mergers and shakeouts aplenty, and increasing global competition.

Financial services & products

Banks play trump cards in credit fight

By Patricia Winters

In the 1970s Citibank, New York, came up with a great idea to increase its credit-card business. The nation's biggest bank launched a massive, national direct-marketing campaign to sell its Citibank Visa and MasterCard to consumers across the country.

Citibank was one of the first to go after the national market, and it enjoyed incredible growth. But hundreds of other banks joined in the battle years ago. And now, as anyone with a mailbox can attest, financial institutions coast-to-coast are battling it out for credit-card customers.

The problem: The market is saturated with plastic. The average American adult holds seven credit cards, amounting to some 802 million pieces of plastic, according to *The Nilson Report*, a Los Angeles industry newsletter. And most people aren't eager for a new card.

"That's as many people [in the market] as there are going to be," says Spencer Nilson, publisher of *The Nilson Report*.

■ *Citibank and others offer gifts and lower interest rates to build cardholder base*

But that doesn't mean Americans' penchant for easy credit has died. Indeed, while the number of cardholders is stagnant, charge card volume is growing. In 1986, bank credit cards, such as Visa and MasterCard, represented $143 billion in charge-card volume, up more than 10% from 1985, estimates Mr. Nilson. The result, he says, is that financial institutions "are all fighting for the same customer."

Clearly, it is a battle among the big boys. Smaller banks are trying to get a piece of the action, but predictably it's the biggest issuers of credit cards that are gobbling up the market. Mr. Nilson says 37% of all bank cards in the U.S. were issued by 10 banks, and that consolidation is growing.

"The nature of the competition has changed," says Dan Brigham, spokesman for San Mateo, Cal.-based Visa International, the industry leader in dollar volume and cards issued. "Years ago, the idea was to get the cards out there, but now it's to get a consumer to use your card and to use it more often."

The economics are simple. A bank makes money on credit cards through the interest it charges and on the annual fee. Hence, a bank's goal is to win more cardholders and entice them to charge more on its card. To achieve that goal, banks are doing everything from giving away free gifts to lowering interest rates to creating identities with special groups.

Among its many credit-card programs, Citibank recently launched "Citibank Free Gifts," a promotion in which customers can select items from one of seven levels based on their card usage. At the end of a six-month period, customers whose credit-card purchases total $750, for example, can select a gift from Level One. Charges totaling $1,500 entitle cardholders to select from Level Two. Gifts include a Sony Walkman, a two-day Hertz car rental certificate and a Canon 35mm camera.

Several banks, including Citibank, waive annual fees for customers who have an account or some other product with the institution. This month, Chicago-based First Chicago began a fee-saver program in which cardholders charging more than $2,400 annually automatically get their fee waived.

Others are offering variable rates. Marine Midland Bank, New York, charges a variable rate on its Visa and MasterCard set at 9% above the rate of its three-month certificate of deposit. First Chicago offers a variable rate set at 9.4% above the prime rate on its Mileage Plus First card, an affinity card tied to United Airlines. And First Fidelity, Newark, N.J. offers a rate that decreases slightly the more the customer owes.

A few are even dropping their fixed interest rates slightly, though analysts say the biggest banks will continue to charge rates that average 17% to 18%, particularly now that interest rates are inching upward again.

Still, in February, Chase Manhattan Bank, New York, reduced the rate on its 4.8 million accounts to 17.5% from 19.8%. Some smaller banks post rates in the 11% range. American Express Co., meanwhile, is marketing its new revolving credit card, the Optima Card, with an initial interest rate of 13.5%.

With heightened interest in credit cards on Capitol Hill—at press time, a battle over disclosure laws and interest rates is ongoing—some analysts believe Optima could set off a rate war. But Mr. Nilson says rate slashing won't ever be a universal response to increased competition.

"It's not like selling dresses, where you have a 50%-off sale one day and then end the sale the next day," he says. "You can't do that in the credit-card industry. It would take six months or more to bring a [fixed] rate back up. And that's very expensive."

Some banks even offer personalized credit cards with pastoral scenes of mountains and beaches, similar to those offered on checks. "We call these things bells and whistles," says Anita Hersh, senior VP and partner at Lister Butler, a New York consultancy specializing in financial services. "If packaged well, these promotions can be used to differentiate one bank card from another."

Most of these efforts are marketed via direct mail. But traditional advertising is coming into the picture for the newest and biggest wave in credit-card promotions—affinity marketing, whereby a bank ties its credit card to a promotional offer from another industry.

The most popular alliances right now are with the travel industry. Banks give charge-card customers discount points based on their charge volume toward frequent-flier programs, hotel visits and rental cars. In addition, the cards usually have lower interest rates and automatic bonus points. Some also have higher annual fees. These promotional tie-ins are actually an outgrowth of affinity marketing among nonprofit groups. For years, banks have offered cards with attractive benefits to such groups as labor unions, social clubs and alumni associations. Chase Lincoln First, Rochester, N.Y., offers gold Visa cards to members of the Sierra Club. The interest rate is lower than Chase's regular rate, and the club receives a percentage of the dollar volume charged by its members.

In June, Visa reported its card is involved in 350 affinity marketing programs, representing 15 million cardholders. MasterCard in May said its card is linked to 335 groups, representing 6 million cardholders. Among those who have linked up are Citibank and American Airlines; First Chi-

No Phoney Baloney.

Telemarketing programs that work boost direct sales as much as 700%.

Produce hundreds of screened and qualified leads.

Create marketing heros.

But let's be frank – there is a flip side to the coin.

A poorly run telemarketing program leads to missed deadlines – runaway costs – offended customers.

Things could get ugly in this scenario.

The $64,000 question – how do you tap the power of telemarketing and still sleep peacefully at night?

The proven answer – call CCI Telemarketing.

Our clients accept nothing less than absolute reliability, courtesy . . . and results. Companies like Citibank, IBM, Polaroid, Consumers Union . . .

No-nonsense professionals who turn to CCI for telemarketing expertise.

We'll do the calling. We'll consult and let you do the calling. Either way, you're going to have to make at least one call – to CCI.

Call us today. We'll send you case histories, brochures – even a reprint of the art from this ad, if you like.

We'll give you straight answers to tough telemarketing questions. You'll learn more about us, and we'll learn more about you.

It'll be fun. Call.

Trump cards

(Continued from Page S-10)
cago and United Airlines, Westin Hotels and Resorts and Hertz Rent A Car; and Marine Midland Bank and Continental Airlines Corp.

Banks issue special cards for most of these programs. First Chicago, for example, has a Mileage Plus First card for its program with United Airlines. MPF is backed by print, radio and a direct mail effort via Haddon Advertising, Chicago.

MasterCard, meanwhile, has developed its own affinity marketing program called Master Plan For Travel. It offers travel awards from American Airlines, Sheraton Hotels and National Car Rental. Its program doesn't require a special card and is backed by print ads created by former agency William Esty Co., New York.

Banks are fond of affinity programs because they generate new customers and increase card usage. But many industry observers wonder when this market, too, will be saturated. "That's the big question mark around affinity marketing," says Ms. Hersh. "I see saturation coming, and I see it coming fast."

American Express, New York, has a similar opinion. While AmEx has been offering similar travel-related promotions for years, the company says it hasn't and won't step up its promotional activity in response to affinity bank cards. Edwin Cooperman, president of AmEx Travel Related Services U.S. Consumer Card Group says, "Consumers are beginning to see all of these promotions as alike; to some degree it's to our benefit."

But not everyone feels that way. Says Mr. Nilson: "It's a marketing effort and you use it while it works. Banks can't just sit back and hope someone will use their cards." AA

As rules change so do IRA marketing plans

By Nancy Zeldis

Advertising for individual retirement accounts may not have hit the level observers were expecting during the 1987, pre-tax reform selling season. But big banks, brokerage houses and insurance companies plan to put a modest shine to IRA marketing in the months ahead.

Promotional spending will go toward a revised, more sophisticated strategy for the $300-billion nationwide market, now that an estimated 30% of the IRA/Keogh-buying public, ineligible for upfront deductions due to tax reform, may slip away. "Retirement income protection" will replace "tax shelter" as the buzzwords of 1988.

With or without deductibility, however, IRAs appear to be a prime choice among consumers as a means of saving for retirement. In one recent survey, New York-based Citibank, the nation's largest holder of IRA deposits, found that 60% of those ineligible to deduct their IRAs said they will continue making contributions.

"This past season we sold the 'last chance' IRA," says J. Scott Rasbach, manager-product development for Institutional Pension Consultants, New Brunswick, N.J., a bank and brokerage consultancy. "Now we've discovered that bankers who cried, 'the gravy train is ending,' aren't necessarily right. There's definitely a market if you sell the IRA as a retirement income plan."

Most institutions indicate their 1988 IRA ad campaigns and budgets aren't yet finalized. Some say they're going primarily after market share of existing accounts over soliciting new ones. And direct mail, many say, will be the preferred marketing tool.

In December, First National Bank of Chicago will launch a direct-mail campaign informing existing customers of the bank's IRA investment vehicles. "Our strategy will be to provide a wider IRA product line, including CDs, mutual funds, stocks, and precious metals," says Product Manager John Tomick.

Sources at New York-based Equitable Life Assurance say the company's November IRA marketing push is definitely going towards direct response. A spokesman for New York-based Dean Witter Reynolds, which increased its IRA investments 22% between March 1986 and March 1987, says the company will market IRAs via direct mail and telemarketing during tax season.

"Direct response tends to be a more efficient way of generating business from existing customers, especially with IRAs," says Richard Baxt, VP, Citibank's Tax Shelter Center, New York. Indeed, IRA holders say the techniques that best attract their attention are brochures and letters, according to Market Facts Inc., a Chicago-based research company.

Mutual funds' growth as an IRA investment vehicle continues to outpace that of others, reports Market Facts. But giants like Citibank aren't discouraged. They have created links with the stock-and-bond markets. This year, Citibank put together four different investment portfolios for its Portfolio IRA: equity, balanced, income and short term. "If you expect to do well," says Mr. Baxt, "you have to have a complete selection of options." AA

Meeting a taxing problem

By Denise Frenner

While H&R Block hasn't come up with specifics on how the new tax law will be worked into its traditional first-quarter media blitz, tax reform and the confusion surrounding it is the strategy behind this month's efforts for Block's Tax Training Schools.

"We're emphasizing that this is a good time to get tax training; things are so drastically changed that people need to go back to school," says Steven Dickey, marketing director at Kansas City, Mo.-based Block, the nation's largest income-tax preparation service.

The national campaign—consisting of one, 30-second direct-response TV spot airing in 20 metropolitan markets, direct-response newspaper ads appearing in virtually all markets, and direct mail—breaks Aug. 10. The two-week TV campaign was created by Kansas City, Mo.-based Bernstein-Rein; the four-week newspaper campaign and the direct mailing were handled in-house.

Mr. Dickey won't disclose the campaign's budget. But he says that for the TV and newspaper segments, the company isn't planning any increases over its standard 4%-7% annual hike of the past three years, because of tax reform.

Anticipating a higher response rate this year, the company has budgeted a larger-than-average increase for direct-mail expenditures. Block also has created a new direct-mail piece: an all-inclusive self-mailer, a departure from previous years' multiple-piece mailings.

"Last year, we mailed out 600,000 direct-mail pieces. This year, I'd suspect at least a 10% increase in response to our newspaper ads, TV spots and other promotional efforts, and that might be understating it," says Mr. Dickey. The company also foresees an increase over last year's 90,000 tax school students, and will be promoting employment with H&R Block during and after the 13-week course, which runs annually from September through December.

"We also are working with prior seasonal employees to get more of them to return," says Mr. Dickey. During the last tax season, Block employed about 40,000 tax preparers nationwide, according to Thomas Bloch, president-tax operations division. Mr. Bloch says the company currently is trying to assess next year's needs.

Block hasn't determined its traditional tax-season campaign's message, but Mr. Dickey says the primary strategy will center on tax reform. He's not sure if this campaign will stress confusion, as did one of last year's five TV spots. Critics have charged that the commercial unnecessarily pushed the panic button.

H&R Block is "cautiously optimistic" that the tax bill will help business, he says, "but we know [it has] pluses and minuses for tax preparers." AA

Tragedy's toll

Five admen perish in Canadian rapids

By SCOTT HUME

Eleven men journeyed to the Chilko River in British Columbia to share one another's company and celebrate their love for life; only six returned.

Killed when their raft overturned in the river's turbulence Aug. 1 were Robert V. Goldstein, VP-advertising, Procter & Gamble Co., Cincinnati; Richard O'Reilly, of Greenwich, Conn., who headed the ad industry's campaign against drug abuse; Stuart Sharpe and Gene Yovetich, both senior VPs and directors of account management at DDB Needham Worldwide, Chicago; and James Fasules, a retired DDB Needham executive.

The purity of their expectations when they left their homes on Wednesday, July 29, for the five-day excursion renders the five men's deaths all the more tragic.

"It was a chance for friends to get together, to trade stories, to fish, to float and most of all to have fun," said DDB Needham's Chicago's

Florida ad boycott support slips

By BETH AUSTIN

The advertising boycott of Florida is showing signs of decay, with Kimberly-Clark Corp. and Rust-Oleum Corp. heading back into the market and Beatrice Hunt-Wesson denying it ever left.

Many national advertisers blacked out network commercials, canceled print ads or pulled spot TV to protest the state's 5% sales tax on advertising, which took effect July 1.

Daniel Jaffe, senior VP, Association of National Advertisers, Washington, said he does not believe the companies' returns to the Florida ad market mean opposition to the tax is weakening.

"We have seen no diminishment in opposition," said Mr. Jaffe, whose organization has filed a suit charging the tax is unconstitutional. "Our members have been very much involved in urging us forward on the lawsuit, in a commitment to go all the way to the Supreme Court. . . . It would be very misleading to say, 'OK, the fight's over, Florida won.' I don't see any sign of that. I think a lot of companies are going to—very quietly, without press releases—make economic decisions about their advertising. Florida's in for a very rocky economic time."

Procter & Gamble Co., Cincinnati, which has the nation's biggest ad budget, remains committed to its decision to pull ads from Florida, as do a number of leading advertisers.

The list of companies holding firm in their decision to stop advertising in the state is shortening, however.

Earlier, Johnson & Johnson decided to stop blacking out its national TV commercials and to resume spot TV buys for its products (AA, July 27). New Brunswick, N.J.-based J&J, ranked 20th in U.S. ad spending last year, said it was unwilling to maintain its ad absence from the state because the tax now faces lengthy legal battles.

Following J&J's lead, Irving, Texas-based K-C will resume advertising in Florida Aug. 31, even though the company still opposes the ad tax. Director of Corporate Communications Tina Barry said the decision also was based on the company's belief that the issue will not be resolved quickly.

K-C canceled spot TV support for Huggies disposable diapers July 1 and ordered the TV networks to black out national commercials shortly thereafter.

Ms. Barry declined to discuss what impact nearly two months without TV advertising made on sales of Huggies' in Florida.

Beatrice Hunt-Wesson, following up on a statement made by parent Beatrice Cos., Chicago (AA, Aug. 3), denied it ever blacked out national advertising in Florida.

A spokesman for the Fullerton, Calif.-based unit said it never intended to pull its

Nissan drives ad hub West

By JENNIFER PENDLETON

LOS ANGELES—Nissan Motor Corp. USA's decision to hire Chiat/Day here to handle its $150 million advertising account marks the return of one of the country's largest advertisers to the West Coast creative community. It also is indicative of the region's growth as an important advertising center.

In the largest single account switch ever, Nissan chose the agency noted for some of the most creative campaigns of recent years over Chicago's Tatham-Laird & Kudner.

Nissan made the announcement Aug. 3, after securing approval from Tetsuo Arakawa, exec VP in charge of North American operations, based in Japan.

C/D replaces New York-based William Esty Co., which handled the business for more than 10 years.

Speculative creative work presented in C/D's pitch will be the basis of Nissan's 1988 campaign, expected to start in October. Joe Opre, director and general manager of advertising and sales promotion, refused to share details of the campaign, but acknowledged the slogan, "We've got a way to move you," is one theme under

(Continued on Page 59)

Jay Chiat believes his agency's creative reputation, and its marketing skills, helped win Nissan.

Last Minute News

HHCC gets Hyatt, joins Arby's review

CHICAGO—Hill, Holliday, Connors, Cosmopulos, Boston and New York, has won Hyatt Hotels' $16 million account. J. Walter Thompson USA previously handled. Also, HHCC has been added to Atlanta-based Arby's review of its $10 million-to-$12 million account *(see related story on Page 50)*. The agency's first work for the Hyatt chain, including a return to TV advertising for the first time since 1984, will break in October. HHCC beat out Fallon McElligott, Minneapolis; Ogilvy & Mather and Tatham-Laird & Kudner, both Chicago; and Young & Rubicam, Chicago and New York. The agency joins the Arby's review because Hal Riney & Partners, San Francisco, withdrew. Also in that review are Ammirati & Puris and Levine, Huntley, Schmidt & Beaver, both New York, and W.B. Doner & Co., Baltimore.

Fallon, W&K tail Porsche

RENO, NEV.—Porsche Cars of North America is in contact with Fallon McElligott, Minneapolis; Wieden & Kennedy, Portland, Ore.; and other agencies for its estimated $14 million account. Finalists will be named within two to three weeks. Tatham-Laird & Kudner, Chicago, and Jordan, Case, Taylor & McGrath, New York, also are likely contenders. Porsche will split with Chiat/Day, Los Angeles, Oct. 7, fol-

Navy's BBDO pick calms ad waters 4

The U.S. Navy's choice of BBDO Worldwide to handle its $12.6 million account closed a year of upheaval among four of the six major military advertisers and their agencies. More than $130 million in billings changed hands before BBDO won a five-year, fixed-fee contract with the Navy.

Marsteller dies at age 73 6

William Marsteller, who died last week at the age of 73, left an indelible mark on the communications business. The 73-year-old founder of Marsteller Inc., who retired in 1979 after selling his company to Young & Rubicam, was an early proponent of the integrated approach to advertising, public relations, research and promotion. He died in his Palm Beach, Fla., home after a brief illness.

Lever adds grease to margarine war 12

Lever Bros. has bought its way to the top of the $1.6 billion margarine category with aggressive acquisitions and hefty advertising, putting an end to Kraft's decades of dominance. But Kraft, facing the possible dethroning of Parkay as the top-selling brand, has shored up its position with its acquisition of Anderson Clayton Foods, marketer of Chiffon.

Cahners testing Beijing 22

Cahners Publishing Co.'s plans for a special magazine edition at an April trade show in Beijing may lead to more overseas ventures for the British-owned company. Following successful expansion into Europe, Asia and South America by McGraw-Hill, CW Communications and others, Cahners will enter the Chinese market next spring with a special edition of its U.S.-based *Electronic Business*

'La Bamba' making waves 41

"La Bamba," originally touted as a "summer sleeper" at the box office, is likely to increase Hollywood's interest in the hispanic market. In the largest effort of its type aimed at the hispanic movie audience, Columbia Pictures spent more than $250,000 for Spanish-language advertising and released 77 Spanish-language dubbed or subtitled prints of its recently released "La Bamba" across the country.

Arby's beefs up sales 50

Sales and profits are sizzling at Arby's at a time when the fast-food industry is fizzling. This year, Arby's, the nation's No. 13 fast-food chain in terms of sales, says comparable store sales will increase 5%, contrasting the industry average growth of about 1% to 2%.

INTERNATIONAL

Publishing acquisitions getting tougher 23

American-style unfriendly takeover battles for leading publishers are emerging in Europe, raising questions about the future of several major publishing groups in the U.K., the Netherlands and West Germany.

McDonald's considers a U.K. salad line 36

McDonald's Corp. may expand its prepackaged salad line to the U.K. following successful introductions in France and West Germany. A decision on this is expected within the next two months.

Australian TV channels changing hands 36

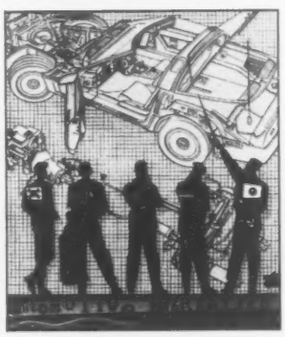
A takeover move early this year by Rupert Murdoch has touched off a series of deals that soon may create three defined TV networks in Australia. Media analysts in ad agencies and brokerage companies believe national networking likely will emerge within the next few months.

OTHER NEWS

It's hard to miss her as she races by, plastered on the side of a Chicago city bus: a pig dressed as the infamous Vanna White under the headline "Squeal of Fortune." Her puzzle partially spells "Wisconsin State Fair, Aug. 6-16" and is one of several humorous ads created by the fair's ad agency, William Eisner & Associates, Milwaukee. Page 34.

A public hearing for the proposed joint operating agreement between the *Detroit Free Press* and *The Detroit News* began last week, 16 months after the two unprofitable newspapers agreed to combine their business operations to end losses caused by intense competition. In opening statements, a lawyer for the group challenging the JOA said the newspapers have sacrificed profitability in an "irrational" and "maniacal" battle for dominance. But the newspapers' lawyer said survival and pursuit of dominance are synonymous in the competitive Detroit market. Page 53.

SPECIAL REPORT



***Automotive Marketing**—The seemingly unending war between U.S. and foreign automakers has reached a truce—temporarily. The peace is based in the growing internationalization of automotive production and marketing, and the increasingly hostile economic environment confronting Japanese importers. Joint ventures and the influx of imports marketed by domestic automakers have opened up new channels of cooperation. And as U.S. producers pick up production tips, Japanese importers are being schooled in U.S. merchandising and marketing strategies as they move inventories. However, angry signals are on the horizon, and analysts speculate the delicate peace will be shattered by an impending price war. Starts after Page 29.*

AGB exec jumps ship to Nielsen

By VERNE GAY

NEW YORK—AGB Television Research President Joseph Philport abruptly resigned last week to join archrival A.C. Nielsen Co., a symbolic and tactical setback for the British company trying to establish a beachhead in U.S. national TV research.

The switch was particularly surprising because the companies have been engaged in a long-standing feud here and in the U.K.

The companies, engaged in a showdown struggle to establish a successful research business based on people meters, have had mixed success to date.

CBS-TV and ABC-TV have canceled Nielsen because of concerns over the company's conversion to people meters this fall, while AGB has signed only CBS for its people-meter service.

Most industry experts say it is critical to the success of either service to sign up all three.

Mr. Philport's timing also raised questions because AGB's people-meter service is less than three weeks away from start-up. He was the driving force behind AGB's efforts to sell the service to ad agencies, the Big 3 networks, cable networks and syndicators.

People meters are hand-held devices that will replace Nielsen's diary meter-based system of recording viewer demographics.

The resignation "was absolutely a surprise," said Michael Poehner, who joined AGB in June as ceo and took over as president last week. "It will hurt us in the short term."

In a phone interview from his home here, Mr. Philport disputed the idea that his timing posed a problem for AGB and a coup for Nielsen.

"For me, the timing made sense," he said. "I was at AGB from the period of conception to the development of the service. . . . AGB does have a good management team in place, so the initial reaction [of the industry] exceeds the reality. My timing was something I had to consider and there really *wasn't* any good time."

Mr. Philport was named senior VP-director of market development at Nielsen. At AGB he was replaced by Mr. Poehner, 40, who joined the company in June after a 17-year career at IBM, leaving as director-Mid-range Systems, IBM Information Group.

The former AGB exec said he would not be in direct competition with AGB but would concentrate on new-product development for Nielsen.

Mr. Philport's position appeared to become tenuous when Mr. Poehner joined AGB. Mr. Poehner was made head of operations and charged with building AGB's data communications network to clients. Mr. Philport was involved in sales only.

Then, in July, Mr. Philport hired Barry Kaplan, a former Ted Bates Advertising research executive, to handle sales and marketing.

Mr. Philport's resignation raised questions about AGB's future because agency and TV sources say only one service—either Nielsen or AGB—may survive the battle.

The TV networks are resisting the "coexistence" of AGB and Nielsen because of the added cost and because it would complicate program planning and sales strategies.#

JWT bid falls short

Cruiseship line hires Goodby

SAN FRANCISCO—American Hawaii Cruises, a cruise line operator based here, appointed Goodby, Berlin & Silverstein to replace Keye/-Donna/Pearlstein, Los Angeles, on what it claims is a $3 million-to-$4 million account.

GB&S won the account over late entrant J. Walter Thompson USA, San Francisco, in the finals of a review involving several shops here.

West Coast News

Richard Russo, 35, senior VP-associate creative director, Della Femina, Travisano & Partners, New York, this week transfers to the agency's Los Angeles office as senior VP-creative director. Mr. Russo succeeds Jim Weller, who has taken a senior creative position with Hal Riney & Partners. Mr. Weller will be based in Los Angeles, where the Riney agency intends to open a branch office.

California has hired Gene Stone, 35, consulting editor of *Los Angeles Times Magazine*, as its editor in chief. Mr. Stone succeeds Harold Hayes, who left the Los Angeles-based monthly early in the year. Mr. Stone, who starts next month, was a senior editor at *Esquire* from 1982 to 1984. He also was a West Coast editor for Simon & Schuster.

DDB Needham Worldwide, Los Angeles, promoted Jeri Moore, senior VP-director of research and planning, to director of account services and planning, a new post. Observers say Ms. Moore is a leading contender to become agency president. President Alan O. Pando is slated to succeed Montgomery McKinney as chairman.

Robert Kuperman, previously exec VP-exec creative director there, had been in line for the top spot at the DDB Needham office before he left for Chiat/Day (AA, July 27).#

International truce only temporary

By Beth Bogart

Pull in the Stars & Stripes, haul down the Rising Sun, unfurl the white flag—but don't hoist it too high.

The battle between U.S. and Japanese automakers has reached a temporary truce, largely because of the rapid devaluation of the dollar against the yen and increased joint ventures. But those factors have set the stage for a new battle—a price war—by the 1990s.

The dramatically improved position of the domestic auto industry—resulting in better labor relations, lower costs and higher quality—helped bring about the armistice. "The automotive industry has witnessed a substantial reduction of tensions bilaterally," says John Mathieson, director-international policy center at SRI International, Arlington, Va.

The rhetoric coming from domestic manufacturers and Capitol Hill suggests that protectionist sentiment has peaked. Although Congress probably will pass a trade bill this fall—the Senate and House already passed versions—the final legislation probably will soften the more extreme provisions. A likely target is the Gephardt amendment, which mandates retaliation against nations that run big trading surpluses with the U.S.

The final bill is likely to focus on export promotion as opposed to import containment, Mr. Mathieson says. "We're working on a bill that the president can sign," says Senate Finance Committee staffer Bob Maddox; President Reagan has promised to veto any bill that violates his free-trade philosophy.

Recent reports showing that the nation's trade deficit appears to have peaked also are contributing to the diminished interest in pu-

(Continued on page S-2)

'87 sales a junkyard? Analysts ease off

By Gene Ely

It's been a bum year for car sales so far. But now there's at least one consolation: The panic talk apparently is over.

Analysts, after fitfully scaling down their estimates through spring, are unified in pegging 1987 sales at around 10.2 million cars, about 9.7% down from 1986's record-breaking 11.3 million cars, according to Bala Cynwyd, Pa.-based Wharton Econometrics. Sales in 1988 are expected to match 1987's.

Despite domestic manufacturers having 1.9 million unsold cars at the end of June, up 2.3% from a year ago, and a 75-day inventory vs. a 63-day supply last year, some analysts now are arguing that 1987 isn't such a bad year after all. Often overlooked in the car sales tally, says Maryann Keller, VP, automotive analyst, Furman Selz Mager Dietz & Birney, New York, are light trucks bought for use as passenger vehicles. Light trucks continue to sell well, up 2.8% over 1986, which was up almost 5% over the previous year.

Because buying trucks as passenger vehicles represents an expensive, essentially discretionary purchase, consumer optimism may be at far higher levels than nay-sayers suggest. "People who have money are still spending money, and many are buying trucks," says Ms. Keller.

But the long-term outlook, at least for domestic automakers, remains grim. Even with Japanese car sales in the U.S. slowing, analysts are predicting continuing market share losses for domestic producers as a group.

Gene Ely is a Hackensack, N.J.-based free-lance writer.

■ *Though light-truck gains remain a bright spot, long-term domestic outlook is dimmer*

Total imports will reach 3.24 million this year, up from 3.05 million in 1986, predicts Thomas O'Grady, president, Integrated Automobile Resources in Wayne, Pa. Japanese import sales will slide to 2.1 million units, some 200,000 cars under their allotment, from 2.37 million in 1986.

Ronald Glantz, an industry analyst with San Francisco-based Montgomery Securities, predicts imports will command a 31% U.S. market share in 1988, up from 29.8% this year, and will reach 38% by 1990. The number of so-called immigrants—cars built in the U.S. by foreign producers—will leap as a slew of new plants come on-line, leading Mr. Glantz to predict that by 1990 imports and immigrants combined will reach 43%.

Of the Big 3, General Motors Corp. will lose the most, he says, sliding from a 41% market share last year, to 37.5% this year to 30% by 1990. Chrysler Corp. will gain slightly next year, while Ford Motor Co. will slip, Mr. Glantz says.

While praising Ford and Chrysler, he slams GM for high costs, indecision and lack of vision. "GM hasn't established what it wants to be," he says. "People at the top are not really as product-oriented as they should be."

The company suffers from too much second-guessing, says Mr. O'Grady. "They may need the sort of monstrous hemorrhaging or shakeup that Ford and Chrysler went through. They just don't seem hungry enough."

The first signs of bleeding are most apparent at the bottom line. GM's profits will decline 24.3% in 1987, Mr. Glantz predicts, while Ford and Chrysler will be up 38.4% and 13%, respectively. The combined profits of the Big 3 and American Motors Corp. will be up 10.2%, he says.

As widely reported, 1987 car sales initially were hurt by the loss of sales tax deductions. Prodded by much-touted incentives, consumers flooded showrooms last fall, effectively borrowing car sales from 1987.

Sales in December were running at a 9.6 million annual rate; in January they dropped to a 5.1 million rate. "A lot of people underestimated how big that buy-in-advance effect was," says Edward Sullivan, director-automotive services at Wharton Econometrics, which

(Continued on Page S-4)

Truce only temporary

(Continued from Page S-1)

nitive measures.

Not only has protectionist passion eased on Capitol Hill, but concern has shifted from the automotive industry to more embattled industries, such as electronics and capital machinery. Even General Motors Corp. has modified its traditional anti-protectionist stance to support President Reagan's retaliatory tariffs on Japanese semiconductors.

"There's a feeling that the American automotive industry has recovered, as well as that other sectors are witnessing more blatant protectionism in Japan," Mr. Mathieson says.

Lee Iacocca, Chrysler's chairman, indicates that protectionist sentiment would rise again in Congress if foreign nameplates garner 35% of the U.S. market. In fact, domestic producers still are pushing legislation that would blockade Japanese inroads; Chrysler suppliers were urged to lobby for the Gephardt amendment.

The issue has become muddied now that the Japanese are manufacturing more cars in America. These facilities still rely heavily on Japanese parts—currently an estimated 70%—but they are not subject to import quotas because the autos are assembled in the U.S.

The so-called voluntary quota, which limits Japanese imports to 2.3 million cars annually, is not likely to be reached again, says Van Bussman, assistant corporate economist at Highland Park, Mich.-based Chrysler Corp. He expects the Japanese to import no more than 2 million cars this year, and less than 2 million in 1988.

But that doesn't mean they are sacrificing U.S. market share. Japanese car-makers, including both imports and U.S.-assembled cars, increased their share of the U.S. car market from about 25% in 1985 to 29% in 1986, says one analyst. Their 1987 share may climb as high as 32% as many expand or build U.S. plants. By 1990, Japan should be capable of manufacturing some 2 million cars annually in the U.S. Add that to the 2.3 million cars and more than 900,000 trucks they can import, and their U.S. total could hit 5.2 million.

Ford Motor Co. executives recently called for reducing the import quota to less than 2 million to account for the homegrown "imports." Both Ford and Chrysler also suggest that the system should measure and include the value of imported Japanese parts.

Government action on the latter issue currently appears unlikely. "Legislators have an easier time dealing with cars exported by the Japanese than with parts," says Jim Arbury, an aide to Sen. Donald Riegle (D-Mich.). "When it comes to parts, people outside Michigan don't think about it much."

Even in Michigan, domestic producers concede that the strong yen has helped "level the competitive playing field, with U.S. companies more or less competitive with the Japanese in the manufacturing sense," says Mr. Bussman. Ford and GM spokespeople concurred with his assessment. "Chrysler is much less in the position we were in three or four years ago in terms of needing government action."

Chrysler also is embarking on a joint venture with Mitsubishi Motors Corp. along the same lines as New United Motor Manufacturing Inc., a GM-Toyota Motor Corp. joint venture, further reducing the acrimony. "When you're really struggling for your very survival, it's hard to be on buddy-buddy terms with the person who could wipe you out," Mr. Bussman says. "But when it appears you're in a fairly secure economic position, it's easier to do joint ventures and be more relaxed about your competition."

But while Detroit's protectionist passions may have cooled, "there is no doubt that the Japanese are extremely concerned about a revival of protectionist sentiment in the U.S.," says Edward Sullivan, director-automotive services at Wharton Econometrics, Bala Cynwyd, Pa. "If political tensions increase protectionist sentiment, the Japanese can shift their supply to the U.S. market via these plants, which currently are only operating at about 85% capacity."

Japanese automakers' growing U.S. manufacturing capacity is expected to create unprecedented competition among car makers by 1990, as supply outstrips demand. At that point, major price wars are likely, say several analysts, and the primary battles will be waged in sticker prices, not in rebates and discount financing.

"There's no doubt the market is going to be very price sensitive," says Doug Mahin, group VP-sales at Pennsauken, N.J.-based Subaru of America. One estimate is that the price of compacts currently selling for more than $8,000 could decline by perhaps $1,000.

Although sticker prices have not yet dropped dramatically, import dealers have suffered the first casualties. The additional dealer profit of $700 to $1,000 that many customers used to pay for Japanese cars has "virtually disappeared," says Mr. Sullivan. He predicts that the yen will continue to appreciate, to about 135 yen to the dollar by 1990, adding further pressure to the price war.

The primary front will be in the area of the small car market, particularly with increased competition from low-cost mod-

'87 sales

(Continued from Page S-2)
estimates that 400,000 vehicles were sold as a direct result of changes in sales tax deductions.

Less noted, though, were two other tax reform-created dampers: elimination of capital gains and investment credits. May is traditionally the beginning of the spring buying season, with down payments funded by tax returns. This May fewer filers received returns, "all but eliminating that spring buying season," says Mr. O'Grady.

Viewing the remainder of 1987, analysts see one possible glitch: a probable mid-September auto workers strike to protest the outside purchasing of auto parts led by Chrysler.

As a result automakers will drop consumer incentives in mid-August to build inventories in the event of a walkout, reimposing them with a vengeance after the issue is settled.

A more remote threat is the possibility of a recession. Most economists see 1989-90 as the next slump, coinciding with the next presidency, historically a time of recession.

But Lawrence Chimerine, Wharton Econometric's president, says there's a one-in-three chance of a recession in the next 12 months if already debt-laden consumers retrench and if U.S. trade suffers. "If it wasn't for the U.S.' better trade performance," he says, "we'd be in a recession already."

In assessing the 1987 downturn, analysts distribute blame on a number of factors. One factor behind the domestics' dilemma is a continuing image problem concerning quality. Despite recent gains, especially by Chrysler and Ford, consumers have long memories. As Ford was hurt in the mid-'60s by quality problems that occurred five years earlier, Mr. Glantz says, GM is now taking a beating for its poor quality cars of the early '80s.

Price increases are cited as another factor. Domestic automakers hiked wholesale prices an average 6.6%, or $700, following Japanese import price hikes of $1,300 last year.

Mr. Glantz says lesser hikes would have been matched quickly by the Japanese and the domestics would have made less without increasing market share.

Another factor no one disputes is the morass of incentives. They don't create new sales but delay them, analysts say. Consumers now figure discounts into their purchase plans, no longer rushing out to grab the first deal.

"Incentives are good for clean-ups," Ms. Keller says. "The dealer who is stacked up can get rid of cars. But they don't boost demand over an extended period."

Incentives also have been used to swing market share, she says. "The trouble is, in this market where everyone is struggling for market share, it becomes a tit-for-tat situation, and they cancel each other out."

The incentive problem has been elevated by the offers' increasing complexity. Rather than last year's straightforward discounts or low-interest deals, incentives now are so hinged with contingencies, say analysts, that consumers are confused.

"[Consumers] have to look at an incentive and immediately see the advantage," Ms. Keller says. "It's hard for people to believe they're getting a real deal."

Incentive apathy has hit within the ranks as well, Mr. Sullivan says. A recent Wharton study found auto salespeople often didn't know which of their cars carried incentives, and that those models that did were given them because "they are dogs."

Incentives have to become more value-added to change not only the "dog" car imagery but to stop the market share swap syndrome. Value-added incentives can't be copied by the competition because they are too specifically tailored to a product, says Joe Flanagan, president of Chicago-based Impact, Foote Cone & Belding's sales promotion subsidiary.

> ***"People who have money are still spending money."***
>
> **Maryann Keller**
> **automotive analyst**

The success of the straight rebate/low-interest financing incentives is perhaps the primary factor in this year's sales slowdown.

Last year's incentive-induced record sales simply were the finale of a four-year stellar performance. Citing the huge numbers of recent car purchases, analysts say that pent-up demand has simply been fulfilled.

"People have bought, year to date—if you include lightweight trucks—60 million vehicles for personal transportation over the last 4½ years. That's an all-time record for any period," Ms. Keller says.

In the process, they have accumulated a huge debt. "In the past several years, a larger portion of consumer spending has been funded by borrowing than ever before," says Mr. Chimerine. "Consumers are borrowed up and spent out."

In addition car loans are being paid off in four and five years, rather than two or three as was more common previously. "Consumers are simply going to be out of the market longer," Ms. Keller says. "They've got a relatively new vehicle in the driveway, and they are not going to buy again until they pay up on the old one."

Mr. Sullivan isn't so sure demand has declined greatly. He's predicting full-year sales of 10.2 million, with the remainder of the year experiencing an annualized rate of 10.5 million or 10.6 million, about what analysts were predicting for the full year back in January before all the panic talk. Overall, his figures suggest consumers are both willing and able to buy.

In March some 66% of those polled by the University of Michigan said they felt now was a good time to buy a new car. And while this is down from 73% a year earlier, it is still a healthy figure. Moreover, interest rates are about even with those in '86, running at an annualized rate of 9.4%, against 9% for 1986 and 9.5% for 1985.

Mr. Sullivan admits that debt is at an all-time high but also says no one knows the absolute debt threshold. Although credit-card spending is rising, he says, "that doesn't mean I can't take out more loans. Presumably, I have more cash in the bank, so it's just trading one asset for another.

"The consumer debt burden hasn't been pushed to the threshold yet. There's still room for it to grow," Mr. Sullivan says. "We're saying it has hindered auto sales a little bit; it hasn't caused an outright retrenchment.

"You can't say it's been a bad year," he says. "You just can't say it's been as good as last year." AA

els imported from Brazil, Korea, Yugoslavia and other countries. Chevrolet recently introduced a version of its Isuzu-built Spectrum at a price of $6,495, $917 less than the previous base price.

Japanese automakers' most common response to the dollar-yen relationship has been to raise prices, however. In June Mitsubishi raised the retail price of its passenger cars an average of $227. Last month American Isuzu Motors raised its car prices an average of 1.5% and its truck prices 3.7%, and Hyundai Motor Co. upped the cost of its 1988 Excel an average of 3% or $225.

Chrysler jumped on the opportunity to point out Japan's current pricing problems in a spread ad that trumpeted the "good news" that Japanese manufacturers have increased their prices by 20% over the past two years while American cars' stickers have only gone up 8%. The "better news," according to the ad, was that Chrysler's prices went up 4.3% compared with Ford's 8.3% and GM's 8.7%.

Some observers scoff at the domestics' self-congratulatory response to a worldwide economic situation that has given them a price advantages. They could have made even more impressive sales gains had they not increased their prices even 4% or 8%, they say.

"For the last five or six years, the U.S. automakers have been saying with a single voice, 'Give us a level playing field' so we can compete with the relative labor costs that favored the Japanese," says George Levy, editor, Detroit-based *AutoWeek*, a sister publication of ADVERTISING AGE. "Now that the level playing field has been handed to them, they haven't taken advantage of it; all they've done is continue to raise their prices." AA

Captives break importers' bonds

By Janice Steinberg

It sounds like the start of an automotive tall tale: "Hey, did you hear the one about the car designed in Japan, built in Mexico and sold by a U.S. company?" The Japanese-Mexican-U.S. hybrid is no joke, however. Designed and engineered by Hiroshima-based Mazda Motor Corp., produced at Ford Motor Co.'s plant in Hermosillo, Mexico and introduced this March in the U.S. by Ford's Lincoln-Mercury division, the Mercury Tracer is one of the latest signs of the growing globalization of the automotive industry.

After initially staggering under the import barrage, Ford, General Motors Corp. and Chrysler Corp. have joined forces with many of their foreign competitors. The resulting captive imports and joint ventures accounted for 6.1% of the Big 3's 1986 U.S. auto sales, and 4.3% of all 1986 car sales in the U.S. J. David Power III, president, J.D. Power & Associates, a Westlake Village, Calif.-based automotive research company, projects they will account for 8% of the 1991 U.S. market.

Janice Steinberg is a frequent contributor to Special Report.

Broadly defined as cars produced in another country and imported by a U.S. marketer, which then puts its marque on them, captive imports are the most common of the international arrangements. In 1986 the Big 3 marketed eight captives; so far this year the number is up to 12.

Captive imports are spurred first and foremost by consumer demand, says Tom Mason, Warren, Mich.-based marketing manager for Chevrolet passenger cars. "We will go anywhere in the world to satisfy the American automotive public at a Chevrolet dealership. If a segment of the public prefers Japanese-built automobiles, we will sell them those kinds of cars."

Captive imports also help fill niches—particularly for inexpensive, entry-level cars—without waiting three-to-five years for products to be developed, Mr. Mason says.

Although GM's Pontiac division has the most recent addition—a Korean-built $5,995 LeMans was introduced this June—Chevrolet leads the other GM divisions in captive importing. Since summer 1985 Chevrolet has sold the Suzuki Motor Co.-made Sprint and the Isuzu Motors Ltd.-produced Spectrum at base prices of less than $8,000. The Chevrolet Tracker, an upscale version of the Suzuki Samurai, will be introduced in fall 1988.

Like Chrysler and Ford, which both own pieces of foreign manufacturers, GM holds 5.3% of Suzuki, 38% of Isuzu and 50% of LeMans manufacturer Daewoo Motor Co.

And then there's NUMMI. New United Motor Manufacturing Inc. in Fremont, Calif., is a 50-50 partnership between GM and Toyota. It pairs Japanese management and American workers to produce 600 Chevy Novas and 650 Toyota Corolla FXs and Toyota Corolla FX16s daily, says Michael Damer, NUMMI community relations spokesman.

Company research shows that NUMMI's first offering, the 1986 Nova, was GM's No. 1 model in terms of overall product satisfaction, he says. Bill Fuller, media relations manager at Torrance, Calif.-based Toyota Motor Sales, USA, says the operation proves that cars built in the U.S. can achieve the same quality standards that have come to be associated with Japanese production.

The proof of that notion can be found in Nova's 1986 sales of 170,507 units, up from June to December 1985's figure of 35,594. GM is encouraged to the point that it is embarking on a second joint venture, opening an Ontario-based plant with Suzuki in November 1988.

Chrysler has not ignored NUMMI's success, launching Diamond-Star Motors in Bloomington, Ill., a joint venture with Mitsubishi Motors Corp. The first product, a two-door sports coupe, will be released in 1989, says Robin Skiles, Diamond-Star PR manager. In 1990, Diamond-Star will introduce a four-door compact sedan. Chrysler and Mitsubishi will split all production 50-50.

Diamond-Star is the latest chapter in a long relationship between the two automakers. Chrysler, which owns 24% of the Japanese company, brought in Mitsubishi products as the first captive imports in 1971. Its Mitsubishi line now includes the Chrysler Conquest, Dodge and Plymouth Colts, and Dodge and Plymouth Colt/Vistas. They accounted for more than 11% of Chrysler's January to May 1987 auto sales, the largest share of sales commanded by captives among the Big 3.

Chrysler also leads the Big 3 in total imports. Chrysler imported 219,000 vehicles in 1986, including the Mitsubishi-made Dodge Ram 50 and Raider trucks as well as passenger cars, making it the fifth largest importer behind Toyota, Nissan, Honda and Mazda. Chrysler also is developing a luxury sports coupe to be introduced next year in conjunction with Maserati, of which Chrysler owns 15%.

Ford has been the slowest of the Big 3 to get involved in imports. In 1986 the Lincoln-Mercury division sold only the Mercury Merkur XR4Ti, which accounted for less than 1% of its U.S. car sales. This year the company added the Merkur Scorpio and the Tracer to its Mercury line, and introduced the Ford Festiva, which is designed by Ford, engineered by Mazda and built by Seoul-based Kia Motors Corp. Ford owns 25% and 10% of each company, respectively.

Ford takes a different approach with its Mercury imports. Merkurs are built by Ford of Germany; although designed by Mazda, the Tracer is manufactured at a Ford-owned plant in Mexico.

"They're pure Ford," says L.R. Windecker, manager-public affairs, Dearborn, Mich.-based Ford research and analysis. "We don't buy anything built by somebody else."

(Continued from Page S-8)

non-GM franchises, helped develop Saturn's distribution plan and franchise agreement. Although the 16 have not been guaranteed a Saturn franchise, late this summer they will select the first dealers, to be announced early next year.

Dealers will be selected based on their commitment to customer satisfaction and will be monitored constantly. Any dealer may be selected to carry Saturn, but Mr. Hudler says more than 75% probably will be GM dealers.

After passing a selection process that involves two questionnaires and a visit from a Saturn inspection team, dealer candidates will be invited to company headquarters. They will sit down with corporate personnel and develop a dealer-specific marketing plan. If both parties agree on the plan, an agreement will be finalized.

Dealers also will serve on a high-level strategic planning team, and will be consulted on proposed changes in the franchise agreement. The approach hardly seems revolutionary, but Frank McCarthy, exec VP of McLean, Va.-based National Automobile Dealers Association, says it is. "For years, we've been asking manufacturers to involve dealers in decision-making. Dealers meet customers every day and getting their comments would be very valuable."

But the plethora of entry level cars has forced Saturn to re-think the product. The Saturn of 1990 is expected to be sportier, more upscale and higher priced than originally planned.

In addition, the entire Saturn project has been a victim of GM's corporate-wide cost-cutting. The initial production run was scaled down from 500,000 cars annually to 200,000.

And Saturn is no sure-fire thing. With GM's profitability sliding, Chairman Roger Smith has said he doesn't know if Saturn will work. Whether GM's clean sheet approach to auto production is written in red or black ink will not be determined for two years.

NDI shoots down tradition in true Western style

In a concrete building nestled into the San Diego hillside, East meets West. The East, represented by the building's design and its owners—Nissan Motor Co.—runs head-on into Western thought, complete with its history of industrial design and disdain for tradition.

Welcome to Nissan Design International, an institution founded in 1980 to take the best of both worlds.

When Takashi Ishihara—then president, now Nissan chairman—offered Gerald Hirshberg a job as NDI's director-design, Mr. Ishihara told him Americans were both unpredictable and disrespectful of tradition. "In Japan, we're orderly, predictable, rational. We are honor-bound to tradition. We change at reasonable, predictable speeds. We can deliver quality, efficiency, excellence, and you can deliver this audacious energy," Mr. Ishihara said.

Mr. Hirshberg does not seem to have missed a delivery. "Innovation is thumbing your nose at tradition," he says. "It's saying, 'Hey, I can do it better. I can throw out your way.' It's in a way connected to a destructive impulse. Kids know you have to knock down blocks so you can build them up again. The Japanese don't like to knock down blocks."

Working with a small team of designers, engineers and industrial sculptors, Mr. Hirshberg, formerly a designer at General Motor's Pontiac and Buick divisions, delivered dramatic redesigns of the company's light truck and Pulsar. NDI also designed the four-wheel-drive Pathfinder and restyled the 300ZX.

The truck, dubbed the Hardbody, was NDI's first product. It departs from the light-truck norm by emphasizing the cabin rather than the hood or the truck bed, and featuring "sophisticated rather than typically crude truck forms," Mr. Hirshberg says.

Introduced in January 1986, the Hardbody won design awards, but its sales proved disappointing. "We hoped to sell an average of 20,000 units a month," says Sheldon Payne, corporate product development manager at Nissan's U.S. headquarters in Carson, Calif. Instead monthly sales averaged 18,659 units from its introduction in January 1986 to May 1986. Hardbody sales were down to an average 14,750 per month from January to May 1987.

Mr. Payne attributes the slow sales to price factors. "Our cheapest truck is $6,999, Mazda's is $6,799, and Mitsubishi's is $6,499, which means a lot in a very price-sensitive market. Here we are with a fine product that is well-engineered and well-designed, and consumers are trying to get the cheapest thing they can.

"The problem wasn't the styling," he says. "We're very happy with the design."

Nissan's Hardbody won plaudits for design, but not sales.

Nissan's happiness with NDI extends to the Pathfinder, which was named "4x4 of the Year" by *4 Wheel & Off-Road* and by *Four Wheeler*. But of all NDI products, the redesigned

Break bonds

(Continued from Page S-12)

Mazda will take over Ford's Flat Rock, Mich., plant to produce both Mazdas and a small Ford specialty car that will complement the Mustang, Mr. Windecker says. Ford also is talking to Nissan Motor Co. about developing a new vehicle.

"The clear distinctions—this is a Ford or this is a Chevy or this is an import—just aren't so clear anymore," says Charles Brady, VP, analyst at New York-based Oppenheimer & Co.

Captive imports, he says, soon may be replaced by global component manufacturing and vehicle production. "The captive imports were a function of a macroeconomic setting where it was much cheaper to produce subcompacts outside the U.S. It is becoming as cheap or cheaper to produce those vehicles here."

Toyota is opening wholly owned factories in Georgetown, Ky., and Cambridge, Ont. It joins Honda and Nissan, which already produce cars in the U.S. Fuji-Isuzu also is planning a U.S.-based operation.

"I think you will see sourcing not only from Asia but from other parts of the world," Mr. Mason says. "I know this company [Chevrolet] is committed to the majority of its production base being in the U.S."

Japanese automakers probably would welcome a shift. They entered the agreements to gain volume customers and distribution channels, and then saw voluntary export restrictions prevent them from marketing the bulk of their exports. For example, Chrysler controls 72% of Mitsubishi's U.S. exports; only 28% go to Mitsubishi Motors of America.

No one expects a weakening of the alliances between the Big 3 and foreign automakers, however. While the value of the yen is making Japan a costly producer, areas including Korea, Taiwan and Latin America may fill any gap.

Regardless of what happens to captive imports, they say the joint venture is here for the long haul. "The best way to accommodate technology changes is through joint ventures," says Mr. Power. "The cost of inve ing in a new product is such that joint ventures make a lot of sense."

Our audience buys more soft

30% of all U.S. TV households watch WWF programming every month. That's a lot of thirsty people. They represent more consumers in the prime 12-34 age group than any soft drink can claim.

More good news: Our audience is evenly distributed over A, B and C counties. Household income figures accurately mirror the total U.S. TV audience. And here's the kicker:

We give advertisers more men 18-49 than the average network sports program. And we do it for

Harley-Davidson trades restrictions for profits

By Beth Bogart

Harley-Davidson Motor Co. revved back into profitability after four years of federally mandated protections from its Japanese competitors. It ended its rough ride back from the edge of bankruptcy with a dramatic request: that the government withdraw the tariffs a year before they were to expire.

Harley's request to the U.S. International Trade Commission to terminate tariffs on large Japanese motorcycles was "largely a philosophical gesture," says Kathleen Lawler-Demitros, director-marketing services for the Milwaukee-based company. "We thought it was important for the public to understand that *existing* legislation can be very effective in allowing American industries to regain competitiveness. We didn't ask for special help or new legislation; we just asked the government to implement existing provisions."

Some trade experts predict Harley's experiences could influence future Congressional trade debates, including those on a pending trade bill. "It certainly shows that in some cases temporary protectionism can help," says one congressional aide. "But it probably won't do much for the auto industry because there's a sense that they've had a temporary reprieve as well—the voluntary quota of 2.3 million cars.

"And Detroit is doing well," he says, "so why are they asking for a continuation? They should realize what a good PR move Harley made and follow suit."

That move currently does not seem likely. Although 1986 was Dearborn, Mich.-based Ford Motor Co.'s most profitable year, in January Harold Poling, Ford's president, called for stiffer restraints on Japanese imports.

The Harley example may not be viewed as being relevant for saving an entire industry, however. In 1903, when Harley started, 150 other American companies manufactured motorcycles. The company now represents the entire U.S. motorcycle industry and occupies only one niche in the market, selling high-powered cycles to serious bikers.

The Reagan Administration imposed the special tariffs in 1983, when Harley's share of the 700cc or larger motorcycle market had dropped to 12.5% from 21.2% in 1978, and the company was facing bankruptcy. The tariffs followed a sliding scale—adding 45% to the cost of comparably sized Japanese imports the first year and declining to 10% by April 1, 1988—to give Harley time to implement planned manufacturing improvements.

Harley introduced such practices as just-in-time manufacturing, in which parts are made only when needed, and statistical process control of operations, which minimizes production errors. The company downshifted the percentage of defective bikes from about 50% to less than 2%. "There has been strong employee involvement to shore up quality," Ms. Lawler-Demitros says.

Harley also took a close look at marketing, deciding to build on its "greatest strength, our closeness to our customers," she says. Harley was the first manufacturer to endorse demonstration rides, something all of its competitors now do; was the first to start a motorcycle club, which now has 73,000 members; and emphasizes that "dealers, management and all levels of employees" are motorcycle riders, Ms. Lawler-Demitros says.

By 1986, the company had met its goal so successfully that Harley had recaptured 19.4% of the market share and posted its first profit in five years. In March Harley asked that the tariffs be lifted.

Also by March, the international economic situation had changed dramatically. The dollar had fallen more than 50% against the yen in the last 18 months, keeping Japanese manufacturers from reducing prices with or without tariffs.

Harley's competitors reacted in much the same way to the tariff as did Japanese carmakers to the "voluntary" quotas. Honda Motor Co. and Kawasaki Motors Corp. established U.S. motorcycle assembly facilities, which are exempt from import restraints.

Harley's request, in the end, was largely symbolic. "The tangible benefits of asking the ITC to terminate tariff aid were fairly inconsequential," says Ms. Lawler-Demitros. "We wanted to acknowledge all the people who helped us put them in place." AA

Harley hogs business

Share of market, 700cc or larger engines before and after import tariffs

This data has been provided by Media Records for exclusive publication in Advertising Age and may not be reprinted or published in any form without explicit permission from Media Records. All newspapers represented are subscribers to Media Records. For those newspapers that subscribe to Media Records National Advertising Reporting Service. Total Advertising data shown has been supplied by the publisher to Media Records and included in this compilation. All publisher supplied figures are converted to MRCS SAU inches by Media Records. These newspapers are indicated with an asterisk (*).

REPORTING METHODOLOGY

Media Records continues to measure in linage but due to the introduction of the SAU 6 column format Media Records has designed and developed a methodology with the approval of our subscribers, the INAME Measurements Committee, The ANPA-NAB Working Committee, The AAAA Newspaper Committee, and other industry groups.

The approved methodology is titled The Media Records Conversion System (MRCS) and is based upon the printed page area of each product of the newspaper and is a five step approach as follows:

1. Measure Printed Page
   Width and Depth in Inches
2. Determine Square Inches of Page
   Multiply Width by Depth Inches
3. Determine the Number of SAU Inches of Page
   Divide the Square Inches by 2.0625 (SAU Inches)
4. Measure the Total Lines of the Page
   Multiply Column Depth Agate Lines by the Number of Columns on the Page
5. Determine the Factor for Converting Measured Lines to Reported SAU Inches
   Divide the Total Lines of Page by the Number of MRCS SAU Inches of the Page

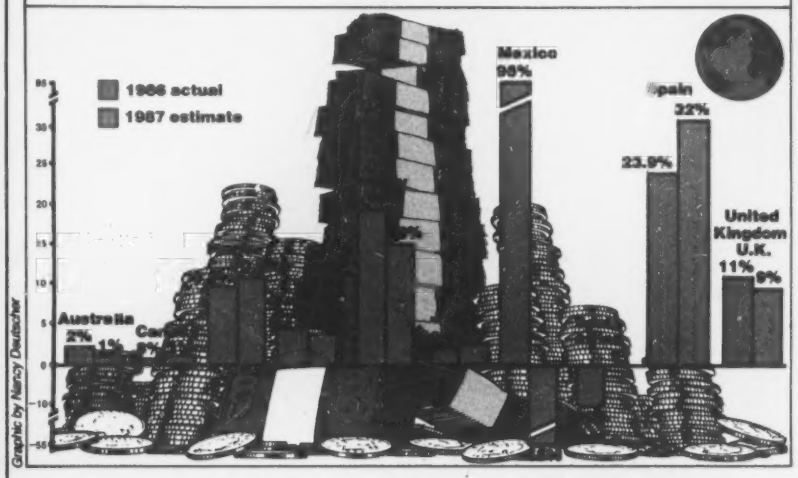
Worldwide ad spending growth

Global survey shows 1987 real ad spending growth higher than last year in Spain and France, and higher than previous estimates in major markets. Source: ADVERTISING AGE.



Beating U.S.

Foreign ad spending registers hefty gains

By JULIE SKUR HILL

International ad spending growth is outpacing the U.S. and will continue to do so for many years, industry sources say.

Traditionally, non-U.S. ad spending growth lagged behind the U.S., and agencies maintained many unprofitable foreign offices to serve clients—not to make money.

But the profit picture is changing. Publicly held U.S.-based agencies and advertisers continue to report stronger growth outside the U.S. than domestically.

Some forecasters predict that ad spending growth outside the U.S. this year will be twice the U.S. rate. That is translating into big U.S. profits because of the weak U.S. dollar compared with other currencies. But the dollar's weakness is only part of the reason for the bright international picture.

Economic improvements in South

(Continued on Page 46)

Ex-Bates team targets Ogilvy

By JON LAFAYETTE

NEW YORK—John Hoyne, former head of Ted Bates Worldwide's international unit, told ADVERTISING AGE he owns 80,000 shares of Ogilvy Group stock and may buy more.

Those shares represent less than 1% of the company, and are worth about $2.6 million.

Sources close to Mr. Hoyne and a group of ex-Bates executives who also are accumulating Ogilvy shares indicated that a formal takeover bid likely will start next month. But the group offered no official timetable.

Mr. Hoyne, reached in the Caribbean last week, called his investment a "minor position" and added that Ogilvy "is a good company. I hope it will do better."

The Ogilvy developments came last week as Chicago-based Foote, Cone & Belding Communications also resurfaced as the subject of a takeover rumor.

Both agencies have vowed to fight any takeover attempt.

In a memo Aug. 13 to the agency staff, Ogilvy Chairman William Phillips said management had heard the takeover rumors but "we have not been approached.

"Naturally, we will resist this with all available means," Mr. Phillips said in the memo. "We have already taken a number of steps to protect our clients, our shareholders and you."

He said, "As one of the strongest and best-regarded worldwide agency groups, we are confident that we will remain independent."

Rumors surfaced last month that Ogilvy management was considering its own plan to take the company private. Such a management buyout could be pursued as an alternative to a takeover led by outsiders.

One observer noted that James Robinson, chairman of American Express Co., one of Ogilvy's most important clients, likely would have a major voice in what happens to the agency. AmEx owns the investment banker Shearson Lehman Brothers.

Industry observers said it would take a bid of at least $50 a share, or more than $700 million, to take over the company.

Ogilvy Group consists of Ogilvy & Mather; Scali, McCabe, Sloves; Cole & Weber; and research, PR, promotion and direct-marketing subsidiaries.

The Bates group is expected to work with investment bankers from Lazard Freres, which advised the group on its unsuccessful bid for JWT Group and offered to put up capital.

Mr. Hoyne began leading a group of former executives of Bates, including ex-Chairman Robert Jacoby, in accumulating Ogilvy shares on the open market shortly after the group's bid to acquire JWT was rejected, according to one member of the group.

British-based WPP Group eventually acquired JWT.

Before the JWT takeover, an unsolicited offer for an ad agency had been unthinkable, but now the spirit on Madison Avenue is that any publicly held agency is vulnerable.

The Bates group's plan, said a source close to the situation, is to continue acquiring Ogilvy stock and bid for the agency holding company. If the bid is successful,

Last Minute News

Ogilvy stock gains 6 points

NEW YORK—Amid takeover rumors, Ogilvy Group stock closed the week at $43 a share, up 6 points for the week. On Aug. 14, the stock rose 4 points. O&M client Kimberly-Clark said the rumored takeover attempt *(see story above)* "is a matter of great concern to us because of our great respect for Ogilvy & Mather's management." Polaroid, Ford, Campbell Soup Co. and AT&T generally expressed support for O&M's current management and said they would examine any changes closely.

JWT gets more Tenneco work

LINCOLNSHIRE, ILL.-Tenneco Automotive named J. Walter Thompson Co. as worldwide agency, adding an estimated $28 million in billings to the $20 million the agency already handles. J. Walter Thompson USA's Detroit office, which already handles Walker Manufacturing, Monroe Auto Equipment and Brake Pro for Tenneco Inc., takes over as agency of record for all North American retail, adding Speedy Muffler King and regional muffler chain Car-X Service, formerly handled by SSC&B:-Lintas Worldwide, New York. JWT subsidiary Enterprise Advertising Associates, Toronto, will coordinate in Can-

American to address flight safety

By JENNIFER LAWRENCE

DALLAS—American Airlines will become the first carrier to target consumer concerns about flight safety in a network TV campaign starting in two weeks.

The Fort Worth, Texas-based airline, the nation's third largest, also becomes the first airline to base a network campaign on airline performance problems that have plagued the industry since last spring. Earlier, on-time performance problems have been addressed in print ads only.

American's willingness to address flight safety is significant. In the past, airlines tacitly agreed to steer away from safety claims.

Long considered an innovator in the industry, American intends to maximize its established quality image by get-

Wisconsin eyes tax on advertising

By STEVEN W. COLFORD

Following Florida's lead, a special commission appointed by Wisconsin's governor is considering an expansion of the state's 5% sales tax to include advertising and other services.

The extent to which such a tax would affect national advertising appearing in the state—the most controversial feature of Florida's ad tax—is unclear.

The 23-member commission, appointed Feb. 9 by freshman Republican Gov. Tommy Thompson, is due to make its final report to the governor Sept. 1.

The report is expected to endorse a sales tax on professional services, said Steve Loucks, director of government relations for Wisconsin Manufacturers & Commerce.

The governor has taken no position on expanding the sales tax, said News Secretary Jim Soyer.

Mr. Loucks, however, said he believes Gov. Thompson would veto such tax-expanding legislation.

State Rep. David Clarenbach, a Democrat, two weeks ago introduced a bill that would extend the sales tax to most professional services, including advertising.

An aide to Rep. Clarenbach said the legislation has been introduced and defeated in past years. The aide said the same thing could happen this year, largely because the bill is part of a broad economic relief package designed mainly to benefit farmers and the poor.

However, the aide and Mr. Loucks both said the idea of taxing advertising and other services is gaining bipartisan legislative support. Mr. Loucks said Republican Sen. Joseph Leean is expected to

Labatt push set for U.S.

Brewer targets Molson

By PATRICIA WINTERS

Labatt Brewing Co., fresh from trouncing Molson Breweries in a Canadian marketing battle, is carrying the skirmish south.

Labatt Importers, the Darien, Conn.-based subsidiary of the Canadian brewing giant, has repositioned its Labatt's beer line in the U.S., changed the packaging and rolled out a new light beer—Labatt's Blue Light—to replace Labatt's Light.

The new Labatt's line is supported by a $10 million advertising and promotion budget, up more than 100% since 1985, said Warren Field, Labatt's marketing manager.

Labatt also is expanding Schooner Canadian beer along the East Coast, from New England test markets, and holds the licensing rights to import Moussy, the No. 1 imported non-alcoholic brew in the U.S., and Quenchette, the No. 1 imported wine cooler in the U.S.

Moussy previously was marketed by White Rock Products Co., White Stone, N.Y.; Quenchette, by Locon Inc., Norwood, Mass.

The Marketing Continuum, Dallas, handles Quenchette; Geers Gross Advertising, New York, handles Moussy.

The U.S. push is part of an overall expansion effort by Labatt to boost sales and profits (AA, Nov. 24). After a neck-and-neck battle with Molson in Canada, Labatt has secured the beer lead there with an estimated 41% market share. Molson has an estimated 34%.

"There are about 22 million people in Canada, and the [beer] market is flat," Labatt's Mr. Field said.

There are about 220 million people in the U.S., he added, and imports are growing rapidly. "It doesn't take long to figure out where the potential is to grow."

Beer is not the only field in which Labatt is expanding in the U.S. In the past two years, its London, Ontario-based parent, John Labatt Ltd., has increased U.S. sales by 400% to about $960 million, mainly through an acquisitions binge.

Since 1985, Labatt has purchased Johanna Farms Inc. and Tuscan Farms, dairies that supply yogurt and other products, and food companies such as Chef Francisco and Pasquale Foods. Labatt Ltd.'s total sales were $3.2 billion for the year ending April 30, up 18.8% from '86.

Labatt Importers' mission is to topple in the U.S. its Canadian competitors, Molson, imported by Martlet Importing Co., North Hills, N.Y., and Moosehead, imported by All Brand Importers, Avon, Conn.

With 4.6 million cases, Labatt's is this country's sixth-largest imported beer, following No. 5-ranked Moosehead, with 6 million cases, according to the newsletter *Beer Marketer's Insights*.

Molson is the U.S. market leader in the Canadian segment and the

Labatt Importers has repositioned its Labatt's beer line in the U.S.

No. 3 import brand overall, at 13.6 million cases, behind Heineken and Corona Extra.

To prepare for its U.S. onslaught, Labatt has developed a national distribution network, from a few regions comprising primarily Canadian border states; started a marketing department to create national programs; and doubled its sales force.

Labatt also consolidated operations to Darien from Buffalo, N.Y., and switched advertising agencies, to Hill, Holliday, Connors, Cosmopulos, Boston, from Tracy-Locke, Dallas.

HHCC's mission is to reposition the Labatt's line to an upscale, image beer from a price beer, targeting the typical imported beer drinker: men aged 21 to 35. As a result, Labatt is running a spot TV, print and radio campaign around the theme of Labatt's Canadian nickname, Blue.

Labatt faces a tough road. Although the Canadian import market is expanding again—up 10% in the first five months of '87, according to *Beer Marketer's Insights*—leader Molson is attacking the market aggressively.

Two months ago, Martlet broke its first national TV campaign for Molson, spending an estimated $8 million, via Saatchi & Saatchi DFS Compton, New York.

And, like all the other import marketers, Labatt also must battle the phenomenal growth of Barton Brands' Corona Extra. Corona last year unseated Molson as the U.S.' No. 2 imported beer overall, as sales grew 170% to 13.5 million cases, according to *Impact*, an industry newsletter.#

Saatchi's Calif. merger plan off

By JENNIFER PENDLETON

The planned merger of southern California's Saatchi & Saatchi Co. units—Cochrane Chase, Livingston & Co. and Backer Spielvogel Bates (AA, July 27)—is off.

"It looked interesting going in, but there were a number of standing account conflicts," said Michael Roche, general manager of BSB's Huntington Beach office. Those included BSB's Hyundai Motor America and Avis accounts and Newport Beach-based CCL's Southern California Chevrolet Dealers Association and Dollar Rent A Car Systems accounts.

"When we looked at our future, both with existing clients and new business, it didn't seem like the right thing to do," Mr. Roche said.

"When we looked at the numbers on the merger, it just didn't make sense," added BSB Chairman Carl Spielvogel.

CCL Chairman Cochrane Chase refused to elaborate on the reasons behind the reversal.

Earlier, Saatchi sources said Mr. Roche would head the western operation and that Mr. Chase would retire within a year. Mr. Chase said last week he has no plans to retire.

It doesn't appear that client pressure figured into the decision. "We were in favor of it," said Jack Collins, Hyundai director of marketing. "We felt it would be better for our business in terms of building up the agency, internal development and the nature of assignments for personnel."

Chevrolet association and Dollar Rent A Car sources said they weren't involved in the decision.

The combination would have created an agency with billings of about $120 million.#

West Coast News

Highlights

Carmakers' ad strategy in reverse 6
The new, sweeping incentive programs offered by U.S. automakers have partially boomeranged. Archrival import car dealers are reporting increased showroom traffic and sales as a result of the 1.9% annual percentage rate financing and rebates offered by General Motors Corp., Ford Motor Co. and Chrysler Corp.

Faberge probes new products 33
While Faberge Inc. shells out $700 million to acquire upscale cosmetics company Elizabeth Arden Inc., its mass-market beauty division, Faberge USA, is planning five major new-product introductions. At the same time, Arden likely will review agencies and raise ad spending.

Colgate scrubs up soap market 42
Colgate-Palmolive Co. is buying a leadership position in the liquid-soap market with its proposed acquisition of Minnetonka Corp.'s Softsoap brand and related product lines.

Goldstein honored at memorial 45
Robert V. Goldstein, Procter & Gamble Co. VP-advertising, was remembered by family, friends and colleagues as a "man for all seasons" during a memorial service Aug. 13 at Adath Israel Synagogue in Amberley Village, Ohio.

INTERNATIONAL

Dow's Ziploc bags debut in Brazil 30
Dow Chemical Co. stepped up activities appealing to the Brazilian consumer and began marketing Ziploc food bags in Brazil after a successful test in May. The company also markets the bags in Panama and the Caribbean and plans to expand throughout Latin America by the year 2000.

OTHER NEWS

Several more cigarette marketers have agreed to stop using the word "free" in advertising their 25-pack cigarettes, in light of long-running discussions with the National Advertising Division of the Council of Better Business Bureaus. Page 12.

Black & Decker Corp. in October will advertise its power tools, in part using money it saved by ending its rebate programs. At the National Hardware Show in Chicago last week, B&D introduced 35 power-tool products ranging from cordless screwdrivers and glue guns to weed trimmers and electric lawn mowers. Page 37.

Donald Kummerfeld already has set up a list of priorities for his new job as president-ceo of the Magazine Publishers Association, effective Sept. 1. Mr. Kummerfeld wants to make sure the MPA does the best possible job in representing the industry's interests. Page 42.

S.C. Johnson & Son's first campaign for Check-Up anti-plaque toothpaste advances the brand's light approach to the fight against gum disease, shunning the more clinical positionings being used by competitors. The estimated $6 million campaign, breaking today, is the first from Johnson. Page 42.

AdWhirl

Even as **Ed McCabe**, president of New York-based **Scali, McCabe, Sloves**, was dropping out to "follow his dreams," the adman in him was singing a promotional tune. Writing in the July issue of **Esquire** of his participation in the grueling 8,000-mile Paris-to-Dakar auto race, McCabe notes that on the hood of his custom, Jeep-like Mercedes was former client **Frank Perdue's** message: "Perdue fresh young chicken." On the sides were the names of "all the people who had helped us," with the word "Thanks" in red paint, and the Nikon name "splashed across the back." Unfortunately, McCabe and photographer **Carolyn Jones**, his girlfriend and co-pilot in the race, failed to become the first Americans to drive a car across the finish line. They ran out of gas in Niger, somewhere between Arlit and Arbre Thierry Sabine. McCabe also showed up in another magazine, the July 6 issue of **The New Yorker**, in an "Annals of Advertising" piece on Scali, McCabe, Sloves' work for **Perdue Farms.**

What does Wall Street think of **Alan Greenspan**, the new chairman of the Federal Reserve Board? That was a question reporters had at **Merrill Lynch's** annual media luncheon, after Greenspan's appointment. Asked his opinion during an informal question-and-answer period, **William Schreyer**, Merrill Lynch's president, noted in jest that Greenspan already has one advantage: "I'm told he doesn't hold a Ph.D. I understand he has an M.A., and for an economist that's pretty good. It might be a plus."

More often than any other programmer, **Brandon Tartikoff**, NBC Entertainment's president, refers to series' popularity in Port Washington, N.Y.-based **Marketing Evaluations'** TvQ likability ratings. Lately, he's been calling "Rags to Riches" NBC's next slow-growth hit, because, he believes, its Nielsen ratings eventually should catch up to its strong TvQ performance (No. 6 among all series).

For **Bill Reed**, the Lexington, Ky., entrepreneur who has been marketing Kentucky bluegrass seeds in small bags labeled "grass," the famed Long Island garbage barge's search for a dump site would have been no problem. If he had his way, Reed says, he would have packaged the barge's contents in small bags and then sold them to the public. "Some serious product festoonery would surely work here," he believes.

Bronson

NBC
Tartikoff

Peter Gerald, New York-based voice-over talent heard on TV and/or radio commercials for such accounts as Zayre Corp., Glenbrook Labs' Panadol, B. Altman's stores, Mobil Chemical Co.'s Cinch Sack and Menley & James' Contac caplets, recalled recently in this, the 25th anniversary year of the James Bond movies, that he nearly got the chance to portray secret agent 007—on radio. In the mid-1960s, he said, producer **Lee Bowman, Colgate-Palmolive** via **Ted Bates Co.**, New York, asked him to play that role on a planned series of Bond radio dramas—until Colgate decided to drop out.

Katie Ford Balazs, VP-creative director of New York-based Ford Models, has a new business, a PR and advertising shop for fashion, beauty and leisure-time marketers. Called **Beh-Balazs**, it's a partnership with **Pat Beh**, who just set up an in-house ad agency for Karl Lagerfeld Womenswear. Among B-B's assignments to date are editorial projects for fashion magazines and product work from Clairol and The Surf Club.

Numerous film sequels are on their way to theaters, but **Cannon Group**, Los Angeles, seems gripped by sequel fever more than most. It released "Superman IV" last month, slated **Chuck Norris'** "Braddock: Missing in Action III" for fall and **Charles Bronson's** "Death Wish IV" for January, with "Spitfire: Delta Force II" also in the works. **Columbia Pictures**, meanwhile, plans "Karate Kid III" for 1988 and "Ghostbusters II," date uncertain.

Kelly Hu, better known as Miss Teen USA 1987 (one of **Procter & Gamble's** three TV pageants), has landed one-shot acting roles on **CBS'** "Magnum, P.I." and **ABC's** "Growing Pains" this fall.

Singer/songwriter **Terry Cashman**, best known as the late **Jim Croce's** songwriter and record producer and as the singer/composer of "Talkin' Baseball," now is executive producer of "Sport Baseball Video Magazine," a series of home video specials. A longtime baseball trivia buff, Cashman, prior to his music career, was a pitcher in the Detroit Tigers farm system.

For **Joan Collins**, her new lingerie commercials are a case of art imitating life. Come October, when the 15-second TV spots begin airing nationally, Collins will be seen purring into the camera, "Despite all the rumors, romance still lives." But don't jump to the conclusion that the "Dynasty" star is alluding to her own messy divorce from Peter Holm. "I wrote the line before we knew she was involved in the whole thing," said Bert Miller, president, Jason, Jared & Miller, agency for the Joan Collins Lingerie Collection from Sanmark-Stardust here.#

Written by Pat Sloan and Stuart J. Elliott from AA bureau reports.

Foreign spending beats U.S.

(Continued from Page 1)

Africa and Mexico have resulted in bigger ad spending gains.

Also, new private TV channels are giving a boost to a few European countries' ad spending this year.

In France, where this trend is furthest along, ad spending will be up 10.8%. In Spain, which entered the European Economic Community last year, ad spending is likely to increase 32% this year, compared with projections just eight months ago of 8.5% growth.

That also compares with expected real ad spending growth in the U.S between 3% and 5% this year, industry experts said.

Western European ad spending growth will outpace the U.S. for many years, said John Eger, president of Worldwide Media Group, a New York-based consultancy.

"We expect double-digit [real] growth until the 21st century in the top 10 countries in Western Europe," he said. "But the U.S. may never see double digits again. It's too developed."

Philip Geier, chairman at Interpublic Group of Cos., New York, said, "After inflation, in real terms, you definitely will not see double-digit growth in the U.S. Western Europe will continue to grow at a much faster rate."

Clay Timon, worldwide advertising director at Colgate-Palmolive Co., said, "Expected GNP [gross national product] is greater in Europe than in the U.S. over the next couple of years. Looking at that alone, you can expect European spending to be better than U.S."

Robert Coen, senior VP-director of forecasting at McCann-Erickson Worldwide, predicts a 16% increase in overseas ad spending during 1987, up from an earlier forecast of 13%. Mr. Coen said 1986 ad spending outside the U.S. increased 26% (AA, Feb. 23).

U.S. spending is expected to grow 7.5% this year, without inflation factored out, compared with 7.8% last year, Mr. Coen said.

In 1988, Mr. Coen expects 9.5% growth inside the U.S. and 10% outside the country.

An AA survey of international markets turned up a mixed, but generally bright, picture:

EUROPE

The single biggest reason for growth in European ad spending is the increase in commercial TV time due to new private channels. "This market is really waking up now," said Fernando Antolin, media director of Spain's leading advertiser, El Corte Ingles, a department store.

> *"We expect double-digit growth until the 21st century in the top 10 countries in Western Europe."*
>
> **—John Eger**
> **Worldwide Media Group**

Along with increased TV spot time, Spain's triple set of elections in June added 7% to 8% to the year's total spending.

Last year's entry into the EEC prompted several new-product launches by U.S. and European companies, said Alfredo Garcia Valdez, president of McCann-Erickson Group Spain, Madrid.

Italy will see 15% spending growth this year, slightly higher than previously expected but down from an 18% increase last year.

"Italy has very good, very solid increases, in part because of growing TV time," said Norman Vale, senior VP and managing director of Grey International, New York.

"The state is spending, which is very new," said Gianni Cottardo, chairman of the Association of Full-Service Advertising Agencies, Milan. "The state has large campaigns going or planned for promotion of wine, railways and AIDS information."

Although France's spending estimate for 1987 has increased only slightly from earlier estimates, the 10.8% growth is considered very healthy. In 1986, ad spending grew 9.5%.

Increased TV time and campaigns for the privatization of nearly 10 government-owned companies have fostered spending.

"Corporate advertising is growing in France when compared with 1986, as well as financial advertising, due to the new interest of the French in the stock exchange and the growing number of companies on the second market," said Pierre Roth, manager of Delta Marketing Research, Paris.

In the U.K., where spending grew 11% last year, a 6% increase was expected earlier.

But the re-election of Prime Minister Margaret Thatcher has provided stability for the British economy, ad executives said, and now, 9% growth is foreseen.

West Germany, where previously 0.7% growth was expected this year, now looks forward to 3% growth.

"Germany is picking up economically," said Willi Schalk, BBDO Worldwide's president-chief operating officer.

After years of stagnation, "the big soapers here—Henkel, Procter & Gamble and Lever Bros.—have been extremely active with new-product introductions, particularly with all the new liquid detergents," a West German advertiser said.

SOUTH AFRICA, LATIN AMERICA

Earlier this year, South African ad spending was predicted to fall by 6%, but the latest estimates show spending will remain at the same level as last year. "For the first time in three years [spending] volumes look like they are being maintained," said Dick Reed, managing director of Media Shop, a Johannesburg media-buying company.

This is due in part to the increase in South African TV channels to six from three in three years.

As companies like General Motors Corp. and IBM Corp. pull out, the repositioning statements of the new companies, along with corporate responsibility statements, have created a spending boomlet.

In Mexico, inflation was expected to hit 150% in 1987, meaning a 75% drop in real ad spending. But inflation has slowed to about 130%, so the drop will be only 55%, partly because of the government's lifting of price controls and other anti-inflationary moves.

"The economy is stabilizing and a bit of confidence is coming back," said Bill Peniche, president of J. Walter Thompson de Mexico, Mexico City.

ASIA/PACIFIC, CANADA

The low growth rates earlier predicted in Japan, Australia and Canada still ring true.

Japan, still stinging from the strong yen, now has expectations ranging from 2% to 4.5% growth this year. Earlier, 2.1% was expected.

"Although traditional manufacturing sectors are relatively less active, this is more than made up by spurt in new industries and services," said Satoshi Watanabe, executive director of the Japan Advertising Federation, Tokyo.

A soft economy in Australia permitted spending to grow only 2% there last year. Although the first six months of 1987 saw a drop of 1%, a 1% increase is expected by yearend.

"Australia's bicentennary spending for 1988 should help oil the wheels of industry, and the government's announced tax cuts should put more disposable dollars in the retail sector," said Gawen Rudder, group marketing director at Mojo MDA, Sydney.

Like Australia, Canada expects 1% ad growth. Canadian spending grew 0.8% in 1986.

"I don't see any great action up there," Grey's Mr. Vale said.

"A lot of ad spending is going into new media opportunities and new areas outside the conventional media," said John Foss, president of the Association of Canadian Advertisers, Toronto.

The government's proposal to ban tobacco ads in newspapers by Jan. 1, 1988, and in magazines and outdoor media by Jan. 1, 1989, would hurt the ad scene further.#

Correspondents from AA international bureaus also contributed to this report.

Gillette slashes rollouts

Moves to fight takeover

By LISA E. PHILLIPS

Gillette Co., fighting a takeover by Revlon Group, is curtailing its new-product introductions for the rest of 1987 and possibly some planned for 1988.

"They need the cash flow, and they want to boost earnings" to keep shareholders happy with management, said Andrew Shore, analyst at Shearson Lehman Bros., New York.

Top executives at Gillette have devoted much of their time to coping with the several takeover attempts by Revlon's chairman, Ronald Perelman, a company source said.

The third and latest such attempt came last week, when Mr. Perelman offered $47 a share, or $5.4 billion, for the Boston-based razor and toiletries marketer.

One of the new products shelved for now reportedly is an innovative home permanent. Called H-12, it is said to be the first odorless solution that colors hair as it sets curl.

H-12 was scheduled to roll out this summer, accompanied by "a huge media blitz featuring a famous personality," Mr. Shore said.

While H-12 was to enter the $150 million home permanent market, it also would have been sold through beauty salons—a new distribution channel for Gillette.

Analysts estimated its introduction would have cost the company $10 million to $30 million, depending on the ad budget and other introductory marketing costs.

The company anticipated first-year sales of $10 million to $15 million for H-12, Mr. Shore said.

Another product introduction directly affected by Mr. Perelman's repeated takeover attempts is a ceramic-blade shaving system.

Originally scheduled for rollout this year, introduction has been pushed back twice—first to 1988 and then to 1989, said Lynne Hyman, analyst at E.F. Hutton & Co.

The blades are being developed in a joint venture with a Japanese company, Mr. Shore said. Ceramic blades reportedly are superior to conventional tungsten razor blades because they stay sharp longer and give a closer shave.

However, ceramic blades would be much more expensive than tungsten blades and would require heavy advertising and marketing expenditures to get consumers to switch from cheaper disposable razors. Disposables account for more than 50% of the

Hoyne hits snag

Wall St. puts Ogilvy in play

By JON LAFAYETTE and LAUREL WENTZ

The Ogilvy Group is "in play," Wall Street analysts say, but former Ted Bates Worldwide executive John Hoyne may not be the one to buy it.

Many securities analysts believe there is a good chance the group, which includes Ogilvy & Mather and Scali, McCabe, Sloves, either will be taken over, recapitalized or taken private in a leveraged buyout.

"Ogilvy is definitely in play," said Greg Ostroff, a Goldman Sachs analyst.

Andrew Wallach, who follows agency stocks for Drexel Burnham Lambert, estimated there is a 35% chance that such a move will happen in the next 12 months.

He said in a competitive situation, the takeover price for Ogilvy would be about $57 a share, or $800 million. Mr. Wallach also speculated that management can afford a leveraged buyout of the company at $54 a share.

J. Hoyne

Ogilvy's stock price did not rise sharply last week, indicating the market may doubt a bid is forthcoming.

Earlier this month, Mr. Hoyne, formerly head of Bates' international unit, said he had purchased 80,000 Ogilvy Group shares and may buy more (AA, Aug. 17).

But last week his takeover strategy hit a roadblock in London. Sources familiar with his

'Here to stay'

Gannett's 'USA Today' 5 years old

By WILLIAM F. GLOEDE

ROSSLYN, VA.—In the lobby of Gannett Co.'s steel-and-glass headquarters there's a bronze sculpture of a man sitting on a bench reading a newspaper.

Back in 1982, Gannett erected this monument to its new national daily newspaper, *USA Today*, almost before the ink on the paper's first edition had dried.

It was an overt expression of optimism, of Chairman Allen Neuharth's conviction that *USA Today* would succeed. And, as the paper reaches its fifth birthday next month, it looks as if it has.

USA Today officially was declared a success at a news conference in June, when John Curley, Gannett's president-ceo and *USA Today's* first editor, proclaimed it made its first-ever profit that month—$1,093,956. *USA Today*, he said, is "here to stay."

There were times during the previous five years

ALLEN NEUHARTH

Prince with a paper crown

By WILLIAM F. GLOEDE

Allen Neuharth is the kind of guy novelists create.

Without benefit of an Ivy League education, wealthy friends or powerful relatives, this South Dakota farmer's son has built one of the nation's largest media conglomerates from a relatively modest string of monopoly-market newspapers.

Along the way, the chairman of Gannett Co. has grown rich on Gannett stock, appreciating some 2,200% since 1967 if splits are factored in. Gannett has recorded 79 consecutive quarters of earnings increases, maintaining the momentum despite five years of heavy operating losses at *USA Today*, its national daily newspaper.

Now that his brainchild is beginning to break even, Mr. Neuharth, who gave up his ceo title at Gannett in 1985, has been traveling across the land with the *USA Today* BusCapade, to take the country's collective pulse.

Mr. Neuharth, who when talking about himself is given to understatement, says, "It has been pretty gratifying to see that there's hardly anyplace in the country where *USA Today* is not recognized."

The man who changed America's reading habits was born in Eureka, S.D., in 1924. He graduated cum laude from the University of South Dakota

Last Minute News

Gravy Train switches to Bayer, Bess

CHICAGO—Quaker Oats has assigned the Gaines Gravy Train dog food account to Bayer, Bess, Vanderwarker & Flynn here from Chiat/Day, New York. Spending was $7 million in 1986, but the budget is expected to increase to at least $12 million under Quaker's ownership. Quaker acquired Gaines through its purchase of Anderson, Clayton. C/D retains other Gaines brands. Separately, Quaker is reorganizing its U.S. & Canadian Grocery Products unit following the resignation of Hedric E. "Pete" Rhodes, 43, exec VP, U.S. Foods. He is succeeded by James R. Tindall, 41, cereals division president. Quaker will go from two to three operational groups and add a support-services group.

Arby's serves creative work to Doner

ATLANTA—Arby's awarded the creative assignment for its $9 million-to-$12 million account to W.B. Doner & Co., Baltimore. Doner's

Workshop kicks off

By BETH AUSTIN

NEW YORK—Consumer-product marketers must encourage innovation and take financial risks, but marketing efforts still must bring profits to the bottom line, says William D. Smithburg, chairman-ceo of Quaker Oats Co.

Mr. Smithburg is the keynote speaker at today's session of the 30th annual ADVERTISING AGE Creative Workshop at the New York Hilton.

This year's Creative Workshop, which opened Aug. 23, is expected to draw 900 people from 43 countries, including the first-ever contingent from the People's Republic of China.

In his address, Mr. Smithburg calls Chicago-based Quaker "a marketing-driven company. We firmly believe that the best way we can deliver value for our shareholders is by building strong, profitable brand franchises.

"Advertising obviously plays a big role in that process. In fact, our advertising and merchandising budget keeps growing from a little below 15% of sales five years ago to almost 22% of sales now.

"In our largest business—U.S. and Canadian grocery products—our A&M [advertising and marketing] spending rose 35% in fiscal 1987 to a record $663 million."

Although some people in the financial community may view the trend toward increased marketing spending merely as one more rising expense, Mr. Smithburg says, "A&M spending is what drives the strong increase in value we've been delivering to our shareholders for the last decade.

"So the shareholders should be glad we're making those investments in brand strength, because brand strength is closely tied to our profitability."

Mr. Smithburg outlines four steps to marketing success: market research; development of innovative, superior products; aggressive marketing strategies; and bottom-line profitability.

That last item is a key to a successful brand, he says. Although Quaker is more than willing to spend ad dollars on its products, that expense must justify itself within a reasonable amount of time.

"All too often, we have been in situations where financial success was assumed to go hand in hand with the name recognition produced by an aggressive marketing strategy," Mr. Smithburg says. "But buying market share for its own sake can often fail to deliver the necessary financial success.

"Another accepted philosophy is that of 'building a business,' a philosophy by which you could miss your financial targets year after year with promises of good returns somewhere in the distant future.

"But often there's no light at the end of that tunnel.

"In today's business environment, we can only invest for a relatively short period of time in products that do not translate into improved value for

P&G taps pair to take place of Goldstein

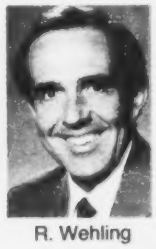
By LAURIE FREEMAN

As Procter & Gamble Co 's VP-advertising, the late Robert V. Goldstein liked to have his agencies' executives call him—day or night—to discuss whatever issue was on their minds.

"Bob encouraged us to call him. . . . Even if he didn't like what he was going to hear, he wanted us to call," one top agency executive said.

The "open-door" policy Mr. Goldstein promoted, and that P&G's agencies have come to expect, probably will not change under the dual advertising-management stewardship of L. Ross Love and Robert Wehling, named by P&G last week as Mr. Goldstein's successors.

L. Love



R. Wehling

Mr. Goldstein died Aug. 1 in a rafting accident on the Chilko River in British Columbia (AA, Aug. 10, *et seq.*).

Mr. Love, 41, was named general advertising manager, and Mr. Wehling, 48, was named general marketing services manager, a new post. Both were associate managers in the general advertising department.

General advertising managers traditionally move up to the post of VP-advertising at P&G.

Mr. Love, the highest-ranking black executive at Cincinnati-based P&G, has been with the company since 1968. A noted tennis ace who agency sources said "played to win," he will assume the principal duties of dealing with ad agencies and related industry-association activities, the company said.

Mr. Wehling, an avid reader and moviegoer, is responsible for P&G's media and programming services, and will add sales promotion and marketing services to his duties. The 27-year P&G veteran is a competitive marathon runner "who managed to finish the New York marathon the year [1984] an enormous number of runners dropped out because of the heat," a company source noted.

Both previously reported to Mr. Goldstein; they now will report to P&G Senior VP W. Wallace Abbott.

By naming two advertising managers, P&G is tacitly acknowledging that the role of VP-advertising has expanded beyond the reach of one person, agency executives said.

Messrs. Love and Wehling will oversee a U.S. advertising budget estimated by ADVERTISING AGE to be $1.4 billion. Also, they will operate in an advertising environment that has changed dramatically since Mr. Goldstein was named general advertising manager in 1979. He was elected VP-advertising that same year.

In recent years, P&G has had to cope with a media landscape far different from the years when network TV dominated consumers' viewing habits, and also with the age of agency megamergers.

P&G has reworked its internal structure, evolving from the strict brand-management system it created to one that has taken on many aspects of team management

Highlights

Curtain goes up on box office boom 4

Two years ago people predicted the end was near for theaters; now the box office is busy and competition for audiences is intensifying. Some industry observers claim the dramatic turnaround is due to more sophisticated marketing techniques, creative promotional stunts and new theaters. But those in the business say one factor stands out: the product.

Movement among travel magazines 26

Rivals are meeting the challenge of *Conde Nast's Traveler* as it gets ready to enter the competitive travel-magazine market. The first issue of Conde Nast Publications' new monthly began arriving in subscribers' mailboxes last week; other titles in the field are making their moves as the new magazine appears.

ITT continues ad blitz 48

ITT Corp. will start the second phase of its $9.5 million "It is ITT" campaign in mid-September. By now, of course, many people know "It is ITT," thanks to the company's June multimedia blitz. The campaign represents the first time ITT has concentrated its TV buying solely on Sunday shows, as well as the largest print campaign the company has ever introduced.

Calif. group seeks agency

Recycling effort

SACRAMENTO, CALIF.—California Glass Recycling Corp., an organization of glass manufacturers, is contacting 17 California agencies about a one-year, $1 million-to-$4 million project to encourage Californians to recycle glass containers.

Prompting the effort is a new state law that requires beverage distributors to contribute to a state recycling fund 1¢ for every aluminum, glass or plastic container put on the market. After two years, that fee will double or triple for industries that haven't shown a 65% recycling rate.

Sources said agencies contacted by CGRC include Chiat/Day, Ketchum Advertising, Sokol & Berman and Solem/Loeb & Associates, all San Francisco, and Phillips-Ramsey, San Diego.

California Prune Board, San Francisco, expecting a large crop this year, boosted its 1987-88 marketing budget by 37% to $6.5 million. The commodity board for the first time will supplement its national print advertising with a series of 10-second TV spots running in nine Eastern and Southern markets. Hal Riney & Partners handles.

Charles Demoney, 47, has joined MGM Grand Air, Los Angeles, as president-chief operating officer. Mr. Demoney previously held the same title at Denver-based commuter service Pioneer Airlines. He succeeds Timothy Collins, 39, who remains as a consultant to the start-up luxury carrier. MGM Grand, which last week began a $1.5 million TV campaign for its "Grand Class" service, will start flying Sept. 8. Admarketing handles.

West Coast News

Natural Nectar Products, Culver City, Calif., is introducing Fi-Bar, a granola-bar-style fiber snack, in supermarkets in California and Colorado. The initial regional rollout will be backed by a $2.5 million radio and print campaign starting in late September. Klein/-Richardson, Los Angeles, handles.

Making scents

Liz Taylor, Tiffany to drench fragrance market this fall

By PAT SLOAN

NEW YORK—There will be a strong scent in the air this fall when Elizabeth Taylor, Tiffany & Co. and a host of competitors introduce new fragrances.

But whether the scents bring the sweet smell of success or the sour odor of failure will be determined by the consumer, who lately hasn't been too kind to the fragrance industry.

In 1986, unit sales of women's fragrances dropped 3%, according to industry consultancy Allan Mottus & Associates. So far, 1987 has not produced a great rebound.

"Overall, I don't see that much change," said Nancy Hall, an analyst with Smith Barney. "But that doesn't mean there won't be opportunities for individual successes. If the trends were really that bad, there'd be no reason for successes like Calvin Klein's Obsession."

Larry Wechsler, president, Revlon Group's U.S. beauty company, predicted success for many marketers this season.

"The industry in general has been soft, but it's now beginning to show a little more energy," Mr. Wechsler said.

Behind those signs of renewed life in the $3 billion category are lower inventories at retail, which free

Papers to offer new discounts

By PATRICIA WINTERS

In yet another effort to win national package-goods advertising, a consortium of 17 newspapers, including *The Boston Globe* and *The Los Angeles Times*, is offering a streamlined group-discount ad rate.

New York-based Million Market Times Mirror Marketing (MMTM) has developed an 18-month test plan that offers a group buy of its 17 newspapers with a commissionable discount of 29% off the national ad rate.

MMTM executives said they want to eliminate "advertiser confusion" about the Package Goods Rate Plan, an earlier industrywide plan offering a discount rate to national package-goods advertisers (AA Dec. 15, *et seq.*).

Some 258 newspapers have adopted some form of the Package Goods Rate Plan, but the discounts vary and each paper has its own requirements for getting the discount. Some regional package-goods companies have used the various rates, but no national package-goods companies are known yet to have made major buys since the program began last June.

"It's difficult for advertisers and agencies to get a handle on the whole issue," said G. Kingsley Anthony, MMTM president, commenting on the Package Goods Rate Plan. His company's new plan, he added, "is an effort to offer uniformity among our own papers."

One reason for fragmented discounts is that an industrywide unified rate could be construed as rate fixing. MMTM noted that its program offers a 17-newspaper group discount of 29% for a 13-time buy, but the discounts by each paper vary if purchased independently.

For example, *The Los Angeles Times* offers a discount of about

Nestle claims 'breakthrough'

Coffee battle boils

By JUDANN DAGNOLI

The instant coffee wars are percolating again as Nestle Foods Corp. rolls out Taster's Choice Colombian Select, a freeze-dried 100% Colombian coffee it claims fills a totally new niche in the $4.8 billion coffee market.

The brand is being touted as a "breakthrough," providing the "full, rich flavor" of 100% Colombian coffee "with only half the caffeine."

But, since industry observers point out that all instant coffees are partially decaffeinated in the manufacturing process, Colombian Select's point of difference apparently is that it is advertising that fact.

Instant Colombian coffee is already offered by market leader General Foods Corp., with Yuban; Tetley Inc. with Brown Gold; and Nestle with its acquired MJB, a West Coast brand.

None are advertised as being partially decaffeinated.

The ad campaign for Taster's Choice Colombian Select starts next month, via HBM/Creamer, Pittsburgh. Although campaign details and spending figures are not available, a Nestle spokeswoman said TV and print support are planned.

White Plains, N.Y.-based Nestle, the No. 2 coffee marketer, last year spent $12 million in measured media for Taster's Choice regular and decaffeinated, Leading National Advertisers reported.

Premium-price Colombian coffee seems to be gaining ground with U.S. coffee marketers, who have been put in a profit squeeze by depressed coffee prices at retail.

Procter & Gamble Co., Cincinnati, No. 3 in the market with an overall 17.9% share, is planning to market a

Coast-conscious: Agencies work hard, but their styles differ

By JENNIFER PENDLETON

LOS ANGELES—East vs. West. Black and White. The agency business on the West and East Coasts in some ways is as different as Vanna White and Geraldine Ferraro.

"Here, when an agency competitor lands a new account, we make a habit of sending champagne," says Gerald McGee, exec VP-managing director at Ogilvy & Mather. "In New York, you'd send them a subway ticket and hope they got mugged."

But don't let the esprit de corps among western shops fool you. West Coast agencies are a lot closer than their New York counterparts, but that doesn't mean they don't compete. While agency chiefs all know one another and serve—cordially—on local industry committees, competition among them takes on "Conan the Barbarian" dimensions, Mr. McGee says. "They're a bunch of smiling sharks."

Senior-level West Coast agency executives who worked in New York earlier in their careers almost all say the same thing: The strug-

Test Marketing

New technologies restrict the risk

Once restricted to use by large companies in the high-velocity package-goods business, test marketing has opened sophisticated methodologies and facilities to most all types of marketers.

Non-package-goods companies now embrace the concept of risk reduction through test marketing, and many of these companies are using concepts and methods proven in the package-goods industry to test market their own products and services. Today, test marketing is often used as a vital tool for product development.

In 1987, Chicago-based Market Facts Inc. surveyed 140 market-research directors for large consumer-driven companies and got a 60% response.

The findings include:

- 51% of respondents said that, within the past year, they had used some test-market programs; 54% said they had conducted simulated (i.e., laboratory) market tests.
- 23% said that simulated test marketing had accounted for the greatest proportion of outside custom-research expenditures in the past year.

Comparing this year's results with comparable studies Market Facts conducted in 1978 and 1983 shows that acceptance of the "new technologies" and methodologies is an ongoing process.

For example, there is a growing interest and experimentation in capturing data in test panels via the use of small hand-held scanner devices that rely on consumers to record UPC codes on a meal-per-meal basis. This relatively new method of utilizing electronic data collection to increase coverage and accuracy is now being explored by several research organizations.

Experimenting with new technologies in test marketing probably will continue into the future as marketers strive to minimize the risk associated with marketing expenditures.

Testing juices up Slice's performance

By Jennifer Lawrence

From initial test marketing results in 1984, PepsiCo knew its juice-added Slice would be on the cutting edge of a new soft drink segment.

In three years, Slice has catapulted to the No. 6 soft drink trademark, posted $1 billion in annual sales and added three regular and diet flavors.

Much of Slice's meteoric success was because the Purchase, N.Y.-based company acted quickly on early test findings so the product could make its way to market before competitors capitalized on the juice-added concept.

The method Pepsi-Cola, PepsiCo's Somers, N.Y.-based division, used to test and roll out Slice illustrates the company's thirst for a successful lemon-lime soft drink. In the process, Pepsi-Cola created the juice-added segment that now represents about 5% of the $39 billion soft drink market, according to industry figures.

"Pepsi wanted to have a significant lemon-lime product," says Roger Adams, Pepsi USA director-marketing. "We felt that being a later entrant into the segment we needed a point of difference."

That point of difference was juice.

Pepsi's consumer research in the early 1980s indicated that consumers were looking for added value in products. Soft drinks had been busy removing caffeine and calories but had not introduced a "value-added" beverage. Pepsi chose to add value by adding juice—a popular marketing twist overseas.

■ Finding that value-added difference with other lemon-lime brands held key

Pepsi research also showed that consumers did not realize that lemon-lime soft drinks, while fruit-based, lacked real fruit juice—an important point to stress in Slice's advertising.

Even though Pepsi had a lemon-lime product, Teem, it was not seen as a strong competitor to Philip Morris Cos.' dominant 7UP and Coca-Cola's Sprite. Teem, weak in food-store sales, was far from a household name. To reposition the product would have been an uphill battle, Mr. Adams says.

Through focus-group research, Pepsi found a high degree of interest in a juice-added lemon-lime soft drink. Lemon-lime Slice development spanned 18 months, coming to a head in 1984.

Lemon-lime Slice, in both regular and diet versions, was put into test in June 1984 in Phoenix and Tulsa, Okla., Milwaukee and most of Wisconsin. Test marketing was handled in-house.

While in test, the lemon-lime soft drink category represented 12.7% of total market share, a distant second to the cola category. In Milwaukee, the lemon-line category was highly developed—a market condition that would truly test Slice's appeal. "We wanted to see how this thing would fly," says Mr. Adams.

Tulsa represented an "average" lemon-lime market while Phoenix was "below average" according to Pepsi. "The three markets had to be large enough to be meaningful but manageable," explains Mr. Adams. "We also wanted a good mix of lemon-lime development," he adds.

In all three markets, Slice was supported by a multimedia ad campaign via J. Walter Thompson USA, New York. The introductory "We got the Juice" tagline still is used in Slice ads, emphasizing Slice's "point of difference."

From the start, Slice was positioned against 7UP and Sprite. That approach still is used, although Pepsi has backed away to some degree from hard-hitting comparisons, according to Mr. Adams.

It was important to go head to head against 7UP and Sprite initially, because consumers were not aware those products did not contain juice, says Mr. Adams. Ad copy and the visuals emphasized Slice's fruit content.

Test results confirmed Pepsi's earlier findings that it was "easy to find acceptors, trial was good, there were non-triers and few negative signs."

After three months, early figures in Milwaukee, Phoenix and Tulsa came in from between 3.5% to 4.5% of the total soft drink market. Even the 3.5% share exceeded expectations, says Mr. Adams.

Besides besting share expectations, Slice also attracted consumers to its diet version—a development that Pepsi had not anticipated.

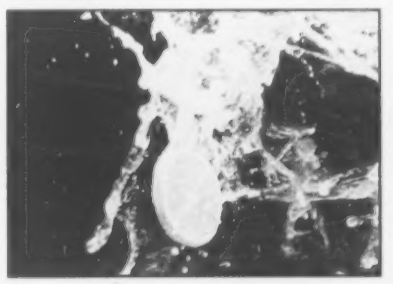
"The juice benefit in Diet Slice was strong," says Mr. Adams. "Typically diet versions represent about 25% to 35% of parent brand's sales. In Slice, we saw it was 50% for regular and 50% for diet.

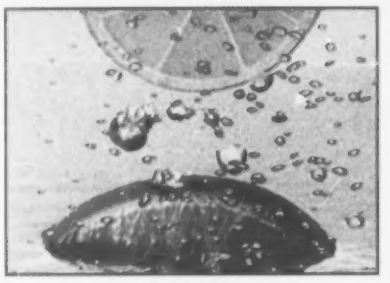
"We never would have gotten [that information] out of earlier market research."

After seeing the success of Diet Slice in test markets, Pepsi began advertising Diet

(Continued on Page S-4)

Commercials for Mandarin Orange Slice played up the juice benefit in the effort to tap the third-largest soft drink segment.





Diet Mandarin Orange Slice was expected to succeed because the juice benefit in Diet Slice was strong.

IN RHODE ISLAND YOU CAN TEST SOUP WITHOUT ANY SPILLAGE.

A company like Campbell's can't afford to be sloppy in test marketing. And they found a really neat test market in Rhode Island. There's almost no media spillage. It's an ideal demographic cross section of America. And as for cost efficiency, you can reach virtually the entire market through Rhode Island's only major newspaper. At an extremely low CPM.

So if you're looking for a market that's M, M! M, M! Good!, look no further. Call Bill Peckham at 401-277-7172 or write and ask for our free test market information kit.

Testing juices up Slice

(Continued from Page S-2)

Slice in separate TV spots in May 1985. Initial ads had included only a tag for the diet version.

Based on Slice's reception in its three test markets, Pepsi decided to expand into about another 15% of the country in fourth quarter 1984, bringing total distribution to 20%.

Most of the late 1984 expansion was concentrated on the West Coast—a highly developed lemon-lime market area offering a rigorous test for the fledgling product.

"We wanted to make sure Slice could stand up in that environment," says Mr. Adams. "Slice did very well so the decision came easily to continue rollout."

In January 1985, Slice began a gradual national rollout; by June it had reached its maximum distribution of 80% of the country. Bottler conflicts in the remaining 20% prevent Slice from achieving 100% market coverage.

But even before Slice reached maximum distribution, Pepsi knew it was onto something big. "We felt we had stirred up a category and achieved a large share in a short amount of time," Mr. Adams says. "We had to look around and see where our competition would come from.

"Since non-cola users are variety seekers and tend to be less loyal than cola users, we turned to Slice line extensions. We didn't know what competitors would do but we didn't want to wait. We had started a great new segment and we wanted to own its leadership."

In late 1984—only six months after Slice entered test markets—Pepsi began developing Mandarin Orange Slice to tap the third-largest soft drink segment, after colas and lemon-lime, according to Pepsi.

Pepsi was willing to commit development funds to ensure that an orange soft drink product would be ready, says Mr. Adams, who adds that the orange flavor was logical because of its "strong relationship to juice."

Diet and regular versions of Orange Mandarin Slice began testing in November 1985—the off-season for orange soft drinks.

This time Pepsi chose two well-developed orange soft drink markets: Hartford, Conn., and Phoenix. Pepsi wanted to determine if Mandarin Orange Slice moved more quickly in an established Slice market like Phoenix and whether it would take more time to develop the trademark in a new market like Hartford.

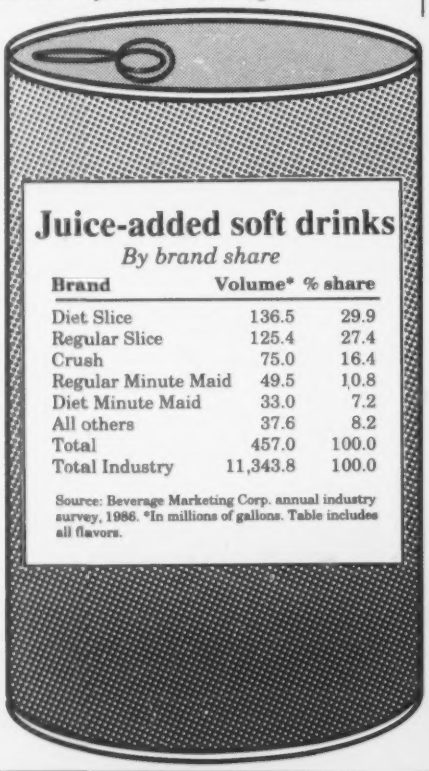
To the company's surprise, Slice's orange-flavor extension performed equally well in both markets.

Pepsi decided—based on results from its two test markets—to pursue Mandarin Orange Slice sales through a quick roll-out in the orange segment's off-season.

Spots for regular Slice recruited Cardinal shortstop Ozzie Smith. PepsiCo hopes the brand will reach a 4% share by yearend.

Rolled out gradually, beginning in January 1986, Mandarin Orange Slice achieved maximum distribution by July 1986. Slice and Mandarin Orange Slice are both available in 80% of the U.S., but not in all the same markets.

Part of the reason Pepsi pushed ahead with the rollout was Coca-Cola Co.'s simultaneous test of its Minute Maid juice-added orange soft drink.



Juice-added soft drinks

By brand share

Brand	Volume*	% share
Diet Slice	136.5	29.9
Regular Slice	125.4	27.4
Crush	75.0	16.4
Regular Minute Maid	49.5	10.8
Diet Minute Maid	33.0	7.2
All others	37.6	8.2
Total	457.0	100.0
Total Industry	11,343.8	100.0

Source: Beverage Marketing Corp. annual industry survey, 1986. *In millions of gallons. Table includes all flavors.

"Minute Maid was in test and it was clear to us that other orange competitors would do the same," Mr. Adams says.

"We had to weigh the benefits of doing extended testing vs. the risks of delay. In this case, we had a window of opportunity."

The aggressive strategy paid off. Mandarin Orange Slice now is the leading orange soft drink, according to Pepsi.

> ***"It was not a calculated decision to develop an apple or cherry cola soft drink. But it was a specific process for orange."***
>
> **Roger Adams, Pepsi USA**

Preliminary analysis does indicate that Mandarin Orange Slice has gained leadership position in the orange segment, according to Beverage Marketing Corp., N.Y., whose figures show the product could be approaching a 1.5% share of market.

While Mandarin Orange Slice was under development in 1985, Pepsi began looking at more flavor ideas in what Mr. Adams calls an "evolutionary process."

"We were looking for potential ideas and when we hit on something, we do more active development.

"It was not a calculated decision to develop an apple or cherry cola soft drink. But it was a specific process for orange," he says.

Pepsi however saw potential for an apple Slice and a cherry cola Slice. The company announced the new flavors to bottlers in February 1986 and gradually rolled Apple Slice and Cherry Cola Slice without prior testing.

"We made the decision to provide flavor variety," says Mr. Adams. "We wanted a broad-based trademark. We didn't put Apple Slice or Cherry Cola Slice in test because of the uncertain state of the competition."

Distribution of Slice's apple and cherry cola flavors began in May 1986 and rapidly expanded to 50% of the country. Now, like Slice and Mandarin Orange Slice, they are available in 80% of the country—though geographic areas do not necessarily overlap.

Slice's two newest flavors are doing "reasonably well," says Mr. Adams, adding that they provide variety and introduce new users to the Slice franchise.

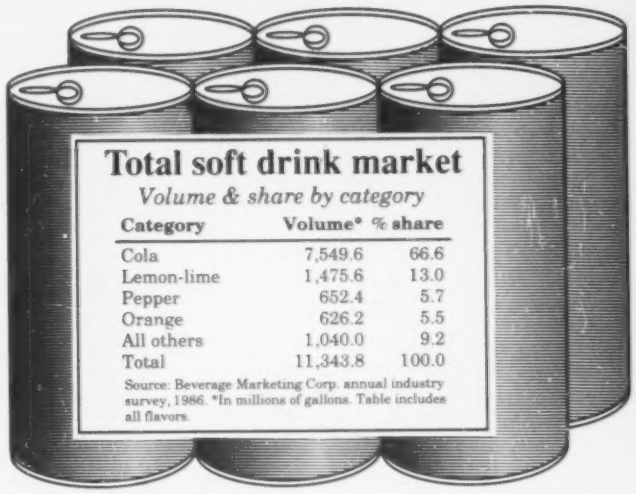
Pepsi has kept up a heavy ad schedule for its Slice flavor extensions, promoting them individually in TV, radio and print. Lemon-lime Slice spots also are tagged with the announcement of the new flavors. Pepsi also uses split 30-second commercials to advertise more than one flavor. Last year Pepsi spent about $32 million in measured media on its Slice line, via JWT, according to Leading National Advertisers.

While beverage analysts agree that Slice has been an overwhelming success, they point out that the apple and cherry cola flavors have led to a degree of cannibalization.

At the end of 1986, the total Slice line held a 2.5% share of the total soft drink market, according to John Maxwell, beverage analyst at Furman Selz Mager Dietz & Birney, New York. He believes Slice could reach a 4% share by yearend. Pepsi plans for Slice to achieve a 10% market share but the company declined to reveal its goal deadline.

Industry analysts say Pepsi's goal is a long way off. Nevertheless, they credit Pepsi for creating a whole new soft drink segment.

Manny Goldman, beverage analyst at San Francisco-based Montgomery Securities notes, "Slice has established a very substantial place in the sun. Pepsi has established a new soft drink brand and that, by the way, is not that easy to do." AA



Total soft drink market

Volume & share by category

Category	Volume*	% share
Cola	7,549.6	66.6
Lemon-lime	1,475.6	13.0
Pepper	652.4	5.7
Orange	626.2	5.5
All others	1,040.0	9.2

CAN YOU SPOT THE 3 THINGS WRONG WITH THIS ANIMATIC FRAME?

There are three reasons why this animatic may not be representive of the finished commercial and, therefore, may not provide a fair test of the commercial idea.

These three reasons, and others, are covered in Westgate's new, **free** booklet, "PRODUCING REPRESENTATIVE ANIMATIC COMMERCIALS".

The helpful guidelines suggested in this booklet are based upon Westgate's experience in testing several thousand animatic and finished commercials. Over 40 color frames taken from actual animatic commercials make this a useful guide for creating animatics that are truly representative of finished commercials.

AdWhirl

When adman **Don Potter** proposed, he wanted to give his beloved a sign of his affection. So the president of **Potter & Mack**, a Toluca Lake, Calif.-based agency, commissioned a 48-foot outdoor board with his marriage proposal on it. The board was mounted across from Fromin's Restaurant & Deli in Encino, where Potter's beloved, **Sue Mendelsohn**, is co-owner. Copy on the all-type board read: "Sue—Like bagels and lox, we belong together. So, marry me, already! Love, Don." "Sue said, 'If you ever propose to me, it had better be creative, Mr. Adman,' " Potter said. The creative approach paid off. Sue said yes.

Bijan, the exclusive and sometimes controversial clothier whose client list has included everyone from **Prince Charles** to **Warren Beatty**, evidently takes the maxim "The show must go on" quite literally. Recently, he was flying to Washington with his wife, model **Tracy Hayakawa**, to appear on **Larry King's** show when heavy rain prevented his private plane from landing. Bijan turned back to New York so he could hook up to King from a studio there. But when he got to New York the passengers weren't allowed to disembark. With airtime approaching, Hayakawa convinced the pilot to drop a ladder from which she and Bijan climbed down and then made a mad dash through the rain to a waiting car that got him to the studio on time. Ironically, it was heavy rain that also forced a last-minute change of plans in the couple's California wedding reception two months ago. Bijan had a garden reception all ready to go but then came a downpour that required the party plans be totally changed only five hours before the guests were due.

Get ready for another deluge of U.S. media coverage on **Pope John Paul II**, pegged to his U.S. visit in September. **NBC News** already has slated a news special for Aug. 25 prime time, and the Spanish-language **Univision** and **Telemundo Group** are among the TV networks planning extensive coverage of the nine-market tour. And, as happened on his U.S. trip in the late 1970s, there'll be a multitude of merchants hawking (unauthorized) papal souvenirs (AA, Aug. 10)—a phenomenon *Newsweek* labeled "a bonanza in bad taste."

When the feature-length cartoon "G.I. Joe: The Movie"

Johnson

Keillor

Levine

debuts Aug. 25 in home video, via **Celebrity Home Entertainment**, Woodland Hills, Calif., actors **Don Johnson** and **Burgess Meredith** will be among the name stars lending their voices to the characters. The feature had been planned for theatrical release this fall, but **Noel Bloom**, Celebrity Home chairman, said that thanks to the videocassette boom, the direct-to-VCR strategy should deliver an audience "as great as or greater than" would be attainable in theaters.

Though **Paul Hogan** has enticed Americans to travel Down Under, the Australian Tourist Commission has nixed using him in Japan, where it will concentrate instead on travel agents and promotions. It seems studies by psychologists and marketing experts suggested Hogan's style wouldn't fly in Japan. "There are a whole stack of danger signals that start flashing as soon as you think about putting Hogan on the air in Japan," says **Don Morris**, managing director of **Mojo MDA**, the tourist commission's Sydney-based agency. "The Japanese have an overt sense of humor. They like stark contrasts. Hogan's gentle lampooning has no role in a hierarchical society like Japan. Subtle or laconic humor just doesn't work." That argument's supported by the success pattern of " 'Crocodile' Dundee," Hogan's first feature film. The film's success in most parts of the world hasn't been duplicated in Japan. In any event, Australia needn't worry about its own popularity with the Japanese: the number of tourists from Japan is growing by 25% annually.

Burt Manning may want to keep the cash he's getting for returning to **J. Walter Thompson Co.** under his mattress. He's filed a lawsuit against financial manager **David Cogan**, claiming Cogan induced him to invest $549,000 in five tax-shelter limited partnerships from 1981 to 1983. In legal papers filed in U.S. District Court in New York, Manning claims that little of his principal has been recovered, he's received no tax benefits and various management and accounting companies in which Cogan is involved received undisclosed commission for selling those partnerships to Manning while they were supposed to be representing Manning's interests. Cogan was unavailable for comment but is said to have clients involved in show business and sports. He also represented several members of senior management at what was **Ted Bates Advertising**, some of whom were not surprised by Manning's complaint. But **Don Zuckert**, now president of **Backer Spielvogel Bates**, said Cogan "did represent me. He represented me to my satisfaction. My tax returns were always accepted without penalty."

Garrison Keillor, who shared his mythical Lake Wobegone with the world via radio and books, offers guidance and advice on personal letter writing in the latest installment of **International Paper Co.'s** "Power of the printed word" campaign. The ad, via **Ogilvy & Mather**, New York, is starting to appear this month in young-adult-oriented publications and college-level magazines.#

Written by Pat Sloan and Stuart J. Elliott from AA bureau reports.

Former A-B exec joins rival Miller

By SCOTT HUME

Joseph Martino, who resigned under a cloud from Anheuser-Busch earlier this year, has joined rival Miller Brewing Co.

Mr. Martino, 34, who had held

Joseph Martino, VP-planning for Miller Brewing Co.

the post of VP-sales at A-B, joined Miller in Milwaukee last week with the title VP-planning. His responsibilities will include strategic planning and competitive analysis.

He will report directly to Miller Brewing President-CEO William Howell.

The move puts Mr. Martino, who held several prominent sales and marketing posts during his eight years at brewing industry leader A-B, in a top post at the second-ranked brewery.

A spokesman for Miller said that "under the conditions surrounding Mr. Martino's departure [from A-B], the standard 'no compete' clause was not applicable."

Mr. Martino was one of three executives who resigned from St. Louis-based A-B in March amid what company officials called "an internal investigation into allegations of improper conduct by certain employees and suppliers" (AA, March 23). Dennis Long, president of A-B's brewery unit, later resigned as well (AA, March 30).

That investigation focused on allegations that A-B executives had received kickbacks or gifts from Hanley Worldwide, a St. Louis sales-promotion agency that had done extensive work with A-B. Hanley declared bankruptcy and closed in December 1985.

Mr. Martino repeatedly denied any wrongdoing and never has been charged with any illegal activity.

A graduate of Brown University and the Wharton School of Business, Mr. Martino joined A-B in 1979 after three years in brand management at the Betty Crocker division of General Mills, Minneapolis.

Beginning as product manager for the Michelob brand, he subsequently held the positions of senior product manager, senior executive assistant to Mr. Long and director of field sales.

In 1983, at age 31, he was named VP-sales, making him the youngest person to be named a VP in A-B's history.#

Fragrances

(Continued from Page 3)

buyers to order more fragrances, plus the excitement generated by some upper-crust women's fragrance introductions in select stores.

New men's scents for the mass market and some bold fragrance efforts by specialty stores also are creating optimism in the industry.

Tiffany will introduce its namesake fragrance next month, and the specialty store has big plans for the scent. Tiffany and its agency, McCaffrey & McCall, secured the rights to George Gershwin's "Rhapsody in Blue" from the Gershwin family and will use that as the theme of the print campaign that will support the launch.

It may launch a broadcast effort next year as well.

The fragrance will be introduced here in September with a "Rhapsody in Blue" concert followed by a dinner.

Until next year, the fragrance will be sold only through Tiffany stores. However, department stores already are asking for it.

In the mass-market segment, American Cyanamid Co.'s Shulton Group, Wayne, N.J., after watching Cosmair's Chaps and Coty's Stetson erode its Old Spice brand's market share, this fall is spinning off Night Spice.

Night Spice is positioned as a more romantic and slightly more expensive men's line.

Scali, McCabe, Sloves, New York, is handling the estimated $5 million in advertising for Night Spice. Ads are built around traditional boy-meets-girl romance themes.

Old Spice, which has been on the market for 50 years, is down to an 8.5% dollar share in drugstores so far this year from 11.2% in 1984.

Coty, though, has its own new brand set for the $1.1 billion men's segment. Coty will play to traditional/family values with Iron, a fragrance meant to suggest inner strength, integrity and dependability more than physical strength.

Ketchum/Hicks & Greist handles the $4 million-plus Iron account.

Besides Night Spice and Iron, the mass market this fall also will see introductions from Charles of the Ritz Group and Colonia at retail, and Avon Products through its door-to-door sales force.

Ritz is bringing out X'ia X'iang women's fragrance (AA, March 9), and Colonia, Orange, Conn., will introduce Dallas for men.

Avon, now marketing a knock-off of Old Spice called Brisk Spice, is rounding out its women's fragrance collection with Breathless, a romantic fragrance.

> *"Every year in department stores, there are one or two brands that are hot. . . . But those sales mean lost sales for someone else."*
>
> **—Colonia's John Mann**

For Avon, which will increase ad spending 15% for Christmas, the challenge was to create a sensuously positioned fragrance to fill a gap in the company's all-American product line without offending consumers or sales personnel, Avon Group VP-Marketing Phil Crosland said.

N W Ayer walked that fine line by creating a TV commercial where romantic tension builds between a married couple staying at a hotel.

Avon is not the only fragrance company showing caution in how it approaches the subject of sex these days.

"With all the concern about AIDS, many companies are being extra careful in how they treat sex in advertising," said one fragrance marketer who asked not to be identified.

Still, that doesn't mean sex is dead in the fragrance industry. While no company has equaled the sexual mathematics applied to Calvin Klein's advertising for Obsession, created in-house, others have tried their own offbeat ads, including one from Suzanne De Lyon Inc., Houston, whose Animale scent is depicted by a woman painted like a denizen of the jungle.

The advertising is being handled in-house.

One of this year's most talked-about fragrances is Passion. The fragrance, by Elizabeth Taylor for Parfums International, is handled by Ogilvy & Mather, the former agency for Animale. Ad spending will reach $10 million for the rest of this year and $15 million in 1988.

Passion promises to be one of this year's most successful new fragrances.

When the fragrance bowed at Macy's earlier this month, sales ran second only to Giorgio in its first week.

By the second week, Passion climbed into the No. 1 spot, lending some credence to Parfums International VP-General Manager Michael Horowitz' projection of $30 million in sales by the end of December.

To help the fragrance get there, Ms. Taylor will do everything from having tea with consumers who buy $200 special-edition bottles of her fragrance to quoting Shakespeare and Dryden in TV commercials.

In one 15-second spot, she quotes from Shakespeare's "Julius Caesar": "Passion, I see, is catching!" She adds at the close her own line, "I sure hope so."

Fendi, an upscale fragrance by Elizabeth Arden Inc., is another success story.

Introduced earlier this year, the fragrance is the leading seller at Bloomingdale's and is being introduced into additional select stores.

But the success of Passion and Fendi no doubt will come at the expense of other fragrances.

"Every year in department stores, there are one or two brands that are hot," said John Mann, Colonia VP-marketing services. "They make a lot of noise, and you read a great deal about their staggering sales. But those sales mean lost sales for someone else."#

Colgate slam-dunks P&G

Rolls national with new 'throw-in' laundry product

By LAURIE FREEMAN

Colgate-Palmolive Co., expecting to beat Procter & Gamble to the punch, is rushing an all-in-one "pouch" laundry product into national distribution.

P&G has been test-marketing a similar product under its Tide brand.

Colgate in October will introduce Fab 1 Shot, single-use packets that contain laundry detergent, fabric softener and an antistatic element, industry sources said. These sources believe the soapers' new convenience delivery package is the next hot battleground in the $3.25 billion market.

Colgate's packets are described as 4 inch-by-5 inch "fabric squares similar to a rosin bag used by baseball pitchers." The product apparently was not market-tested.

Although Fab 1 Shot's ad budget is not known, New York-based Colgate is expected to back the entry with a heavy ad blitz. It spent $30 million on its last big introduction: Palmolive Automatic, a liquid detergent for automatic dishwashers.

P&G's Tide Multi-Action Sheets, which combine detergent, whitener and fabric softener in one "quilted sheet," have been testing in the Quad Cities area of Iowa and Illinois, with ad support from Saatchi & Saatchi DFS Compton, New York (AA, June 30, 1986, *et seq.*).

Cincinnati-based P&G and Oakland, Calif.-based Clorox Co. also are testing "throw-in" pouches with detergent alone.

Sources said a TV campaign from FCB/Leber Katz Partners will show people tossing Fab 1 Shot packets into washing machines, with the action accompanied by the Harlem Globetrotters basketball team's theme song, "Sweet Georgia Brown."

Extensive print support also is planned.

Neither Colgate nor its agency would comment on the plans by press time.

In apparently beating P&G national, Colgate is hoping the move will pay off as well as it did for Palmolive Automatic.

The company, which aggressively has been seeking out new product niches, was the first to go national with a liquid detergent for automatic dishwashers. Within six months, Palmolive Automatic had locked up an estimated 18% to 20% share of what industry analysts say is the fastest-growing segment of that $500 million category.

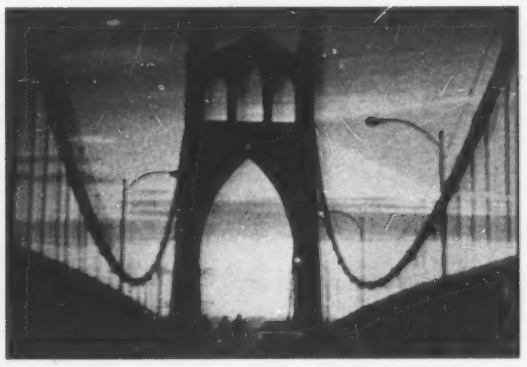
Colgate did not test-market Palmolive Automatic, handled by Young & Rubicam, before its national rollout.

"Colgate figures they'd rather be first than careful," said Jay Freedman, household products analyst with Kidder, Peabody & Co.

"This [pouch] is a new type of technology that other big companies have been testing to see if it's viable," he added. "Colgate decided to take the chance that it is."

Industry sources said P&G may be getting close to a national launch of Cheer Power Pouches, containing concentrated Cheer detergent. The product is testing in Atlanta and Denver. Leo Burnett USA, Chicago, handles.

Clorox has been testing Act, a concentrated laundry detergent in "action-paks," in several markets since 1985. DDB Needham Worldwide, Chicago, handles Act.#



Highway Regalia

General Motors Corp.'s Buick division will introduce its 1988 Regal with a campaign breaking in late September. A product and image-oriented commercial sings the praises of driving Regal on scenic American highways. The spot focuses on Regal's all-new appearance and exclusive features. McCann-Erickson, Troy, Mich., created the campaign *(see story on Page 52)*.

Dusenberry to lead Kemp ad campaign

By STEVEN W. COLFORD

WASHINGTON—BBDO Chairman-Chief Creative Officer Phil Dusenberry, a major adviser on President Reagan's 1984 ad team, will quarterback the advertising of presidential contender Rep. Jack Kemp (R., N.Y.), a key source says.

Although Mr. Dusenberry refused to confirm or deny the report, the source said the noted adman, who was part of an advisory committee on President Reagan's "Tuesday Team," will be in charge of Rep. Kemp's media efforts.

The Tuesday Team, and the slick advertising it produced, received much of the credit for President Reagan's huge margin of victory. It consisted of such advertising heavyweights as San Francisco-based Hal Riney and Jim Travis, formerly of Della Femina, Travisano & Partners and now head of Hal Riney & Partners' New York office.

Mr. Dusenberry apparently will not be paid for his ser-

(Continued on Page 48)

Last Minute News

Burnett to start hispanic unit

CHICAGO—Leo Burnett Co. in September will start a hispanic marketing division, primarily at the urging of client Procter & Gamble, Cincinnati. President-CEO Rick Fizdale said the agency hasn't yet decided on a name, but Estrella—"star" in Spanish—and Leo Burnett Hispanic have been discussed. The unit will be integrated with Burnett's general agency. Burnett will not "aggressively go after" its clients' minority business now at other agencies, Mr. Fizdale said, but may displace Noble & Asociados, Los Angeles, which handles hispanic marketing for P&G's Pepto-Bismol.

Raisins to perform for Del Monte

SAN FRANCISCO—Del Monte USA is using the California Raisin Advisory Board's rockin' raisins to promote Del Monte Fruit Snacks and Del Monte seedless raisins. The company is offering consumers a plastic version of the raisins, perched on a plastic sandwich, in a custom-made

(Continued on Page 8)

Research may get costlier

Nielsen buys key rival IRI

By GARY LEVIN

Dun & Bradstreet Corp.'s purchase of Information Resources Inc. not only increases its dominance of the research industry but raises the likelihood of higher prices for services of a merged IRI and A.C. Nielsen Co.

Last week's acquisition agreement, a stock-swap transaction valued at $572 million, boosts D&B's total research-business investment to more than $2 billion, including its $1.3 billion purchase of Nielsen itself in 1984.

In addition to eliminating a fast-growing competitor, the deal strengthens Nielsen's weakest link—"single-source" purchase data measurement—by adding BehaviorScan and InfoScan, Chicago-based IRI's most successful services.

"It looks to me like the giant has taken care of the problem," said the president of one major ad agency.

Antitrust issues raised from the pending combination

CBS 'consolidates' account at Backer

By VERNE GAY
and JON LAFAYETTE

NEW YORK—After a prolonged, sometimes agonized search, CBS finally settled on Backer Spielvogel Bates as its new ad agency. But there's no guarantee the choice will put a lid on the turmoil within CBS' promotional ranks.

While the new account has all the earmarks of "prestige" business for newly merged BSB, there are dangers in dealing with what has been and what may continue to be a fractious client organization.

CBS said BSB is getting a consolidated advertising and promotion account—for entertainment, news and sports programming. CBS/Broadcast Group President Gene Jankowski's statement said the selection of a single shop follows consolidation of the network's ad and promotion staff.

However, BSB will report to both Bruce Weiner, VP-advertising and promotion for the CBS Television Network (which includes the news and sports division), and Jerry Goldberg, VP-advertising and promotion of CBS Entertainment (prime-time programming).

Mr. Weiner is based here; Mr. Goldberg is in Los Angeles. BSB said it would service CBS from here and from its Huntington Beach, Calif., office.

CBS previously split its account between Jacobs-Gerber and Ogilvy & Mather in Los Angeles, and DDB Needham Worldwide in New York.

It is the West Coast/East Coast split of responsibilities that has created some of the past turmoil within CBS. Bud Grant, president of CBS Entertainment, has insisted on handling entertainment promotion from the West Coast.

Network President Tom Leahy, along with other top CBS executives, reportedly wanted to consolidate all areas of advertising in one department, presumably based on the East Coast.

Mr. Weiner was just named to succeed Network VP-Advertising Doug Clemensen, a 3½-year CBS veteran who three weeks ago quit in frustration after only eight months on the job, apparently in a dispute over the "total responsibility" question (AA, Aug. 17). Mr. Weiner was VP-print advertising and affiliate promotion.

Sources said Mr. Clemensen expected to run the "consolidated" ad program but that Mr. Grant successfully kept entertainment promotion under his direct supervision.

"There needed to be a delineation of what I was responsible for," Mr. Clemensen said after his resignation. "That was not forthcoming from the company."

He said it was unclear who was responsible for

Highlights

Purina fights to stay top dog 12

Ralston Purina Co. is putting Quaker Oats Co. on notice that it will fight to keep its No. 1 spot in the $3.4 billion dog-food market. Purina is doubling product introductions and reformulations as well as breaking innovative ads, including a bacon-scented "scratch 'n sniff" newspaper insert for Butcher's Blend dry dog food. Purina is responding to Quaker's acquisition of Anderson, Clayton & Co. and its Gaines dog-food line, as well as Quaker's heavy ad support for new products.

BBDO wins Pizza Hut business 47

PepsiCo strengthened its bonds with Omnicom Group last week when Pizza Hut awarded its $25 million national account to BBDO Worldwide. BBDO, principal agency for Pepsi-Cola USA, picks up both the creative assignment and media buying.

C/D big enough for Drexel Burnham 51

The insider trading scandals that rocked Drexel Burnham Lambert changed the industry's advertising environment and threatened Chiat/Day's hold on the account. Drexel stayed with C/D, credited with the now-famous "I thought I was too small for Drexel Burnham Lambert" line. In his speech to the ADVERTISING AGE Creative Workshop, Drexel Senior VP-Director of Marketing Richard Capalbo gave the agency high marks for its creative approach to countering bad publicity.

Vol. 58, No. 37—ADVERTISING AGE (ISSN 0001-8899) is published weekly except semiweekly the fourth week in March and the first week in September at 740 Rush Street, Chicago, Ill. 60611-2590. Second-class postage paid at Chicago and additional mailing offices. Send address changes to ADVERTISING AGE, Circulation Department, 965 E. Jefferson, Detroit, Mich. 48207. Microfilm copies are available from University Microfilms, 300 N. Zeeb Rd., Ann Arbor, Mich. 48103. Microfiche copies are available from Bell & Howell, Micro Photo Division, Old Mansfield Rd., Wooster, O. 44691. $1.50 a copy, $59 a year, $104 two years. Add $104 per year for air delivery to Europe & Middle East. Adv. $34 for surface mail to all other foreign countries. WILLIAM STRONG, VP-circulation; JOHN HUFFMAN, fulfillment director; DAVE KELLEY, circulation manager. Four weeks' notice required for change of address. Address all subscription correspondence to Circulation Department, Advertising Age, 965 E. Jefferson, Detroit, Mich. 48207 (313) 446-0494.

Fla. voters face ad blitz on tax issue

By STEVEN W. COLFORD

Florida Gov. Bob Martinez' call for a referendum on the state's ad tax offers advertisers the chance to duel with the governor on their own turf: the media.

Gov. Martinez has asked the Legislature to approve a referendum on the entire 5% service tax, including the ad tax. He is planning an all-out media assault supporting the tax.

The tax is unique because it hits not only advertising in Florida media but national advertising that reaches into the state. The tax expansion took effect July 1, and has been challenged in several separate lawsuits on grounds it unconstitutionally restricts interstate commerce and freedom of speech.

Still uncertain is whether the Legislature will go along with Gov. Martinez' referendum call. Democratic legislative leaders are reluctant to support a Republican governor on a tax issue that could have political fallout.

To get the referendum on the March 8 ballot, three-fourths of the members of each house of the Legislature would have to endorse the idea at a special session that will be called Sept. 14 to discuss medical costs.

Last week, influential House Speaker John Mills (D., Gainesville) reiterated his opposition to a referendum.

If there is a referendum and voters endorse the tax, the ad industry will have to bank on either legislative or court-ordered changes.

If voters reject the tax, the state's constitution, which already prohibits a personal income tax, will be amended to prohibit a sales tax on services. In that event, Gov. Martinez likely would say he bowed to the will of the people.

With such an enviable scenario looming, industry spokesmen already are talking up prospects for an ad battle that could occupy Florida TV, radio and print until the anticipated referendum.

"We've heard that the governor intends to support his call for a public referendum with an all-out media campaign to retain the tax," said American Advertising Federation Senior VP Wally Snyder. "We haven't formulated any specific plans of our own yet . . . but we'll certainly want to get across to the voters of Florida the negatives of the tax and the pluses of repealing it, and the ways for us to respond certainly would include radio and TV and grass-roots lobbying."

By calling for a referendum, Gov. Martinez tacitly made two concessions:

- That the political and economic heat fomented by the tax on advertising and other professional services has grown intolerable for him and his legislative supporters facing re-election fights next fall.
- That his best chance to save the tax and his bruised political reputation is by winning public support with an ad campaign that would be countered by an ad industry campaign.

Susan Traylor, Gov. Martinez' press secretary, said the governor opted for a referendum to overcome "misinformation" about the tax spread by broadcasters and other anti-tax forces.

To counter that misinformation campaign, she said, Gov. Martinez plans a "media campaign just like any other political campaign," aimed at convincing the public to endorse the tax.

Public polls in Florida repeatedly have shown the tax is opposed by at least 60% of the state's population.

Ms. Traylor wouldn't comment on what kind of budget Gov. Martinez planned for his campaign, but ad industry lobbyist Robert Levy of Robert M. Levy & Associates, Miami, said the governor wants at least $2.5 million for his media assault. No state funds would be involved.

Ms. Traylor said it was unlikely the governor would use an ad agency but instead would rely on

Frisco agencies compete

Seagram searching

SAN MATEO, CALIF.—Seagram Classics Wine Co., a newly formed spinoff of Joseph E. Seagram & Sons, is evaluating DDB Needham Worldwide, Grey Advertising and Sokol & Berman, all San Francisco, for its estimated $3 million-to-$4 million premium wine account.

Larsen Colby Koralek, Los Angeles, which was recently purchased by Seagram's New York agency, Levine, Huntley, Schmidt & Beaver, is working on projects and still may be a contender.

Camp Beverly Hills, a Beverly Hills, Calif.-based fashion marketer, may re-assign its $1 million-to-$2 million corporate image account or take it in-house, sources say. Incumbent Scali, McCabe, Sloves, Los Angeles, is presenting new creative work this week in hopes of keeping the business it won a year ago.

Carolco Pictures, a new Los Angeles-based motion picture production company, has selected Saatchi & Saatchi DFS, Torrance, Calif., as its agency after a review of several local shops, sources said. The agency will develop creative direction and strategy only, with an annual budget of about $500,000.

West Coast News

Southern California Rapid Transit District, Los Angeles' mass transit authority, is expected to hire Kollewe & O'Sullivan to replace Gumpertz/Bentley/Fried as its agency for the rest of the year, sources said. G/B/F resigned the estimated $600,000 account. RTD will conduct a formal review in Octo-

"How many of these albums would have been sold if instead of 12 different tracks, it had consisted of the same song rearranged 12 different ways?"

Larry Light spins ad 'album' concept

By FRED DANZIG

CREATIVE

NEW YORK—Bruce Springsteen's "Born in the USA" and other rock album megahits illustrate a vitally important approach to creative advertising, says Larry Light, president-ceo, Ted Bates International.

In an elaborately mounted presentation last week at the ADVERTISING AGE Creative Workshop here, Mr. Light urged his audience to "think of an advertising campaign as if it were an advertising *album*."

The 30th annual Creative Workshop attracted more than 800 advertising professionals from the U.S. and 43 other countries to the New York Hilton.

Referring to albums by Mr. Springsteen and others, he asked, "How many of these albums would have been sold if instead [of 12 different tracks] it had consisted of the same song re-arranged 12 different ways? Yet many advertising campaigns consist of the same single merely rearranged several different ways. That's not an album. That's boring."

Among Mr. Light's list of "fabulous advertising

Chevy ad plans take local road

By CLEVELAND HORTON

General Motors Corp.'s Chevrolet division will boost regional ad spending by 25% to an estimated $62.5 million in the 1988 model year, or about 20% of Chevy's total annual ad budget.

In a trend many major national advertisers are adopting, Chevrolet is increasing the customized ad messages it carries to its six designated regional marketing areas. Each advertising schedule will be tailored to regional tastes and lifestyles.

At the same time, Warren, Mich.-based Chevrolet is sticking with its 1987 "Heartbeat of America" theme. It will use that theme to back its so-called "core models."

Apart from the GM division's belief that the "Heartbeat" theme has been effective with many age groups, Chevrolet wants its ads to be consistent in a rapidly changing —and confusing—automotive marketplace.

Chevrolet has a 60% unaided awareness by young consumers and 45% overall awareness, thanks to "Heartbeat," said Dannielle Colliver, advertising manager for Chevrolet passenger cars.

The national campaign will concentrate on Chevrolet's core products—its light-truck line and the Caprice, Cavalier, Celebrity and Corsica/Beretta, all models with more than 200,000 unit sales, said Tom Staudt, general marketing manager.

The company's six regional zones will advertise the other cars, including the Suzuki-built Sprint and Isuzu-built Spectrum.

"We can't expect to [promote all the models] on a national basis," Mr. Staudt said.

Chevrolet's agency, Campbell-Ewald Co., screened two of the new "Heartbeat" spots last week at ADVERTISING AGE's Creative Workshop in New York. The new commercials had been shown only to Chevrolet employees and dealers.

In one 60-second spot updating a 1987 execution, Chevrolet adapts the "Heartbeat" song to jazz, gospel and other musical interpretations as scenes of Americana flash across the screen. In another, a narrator delivers information about Chevrolet's automotive and technological achievements.

Campbell-Ewald Creative Director Sean Fitzpatrick said more informational formats will be used.

Chevrolet's Ms. Colliver said ad spending for 1988 will be up but declined to say by how much. It is estimated that Chevrolet's advertising budget hit $320 million this model year.

"There will be fewer commercials

World News Roundup

LONDON—An AIDS information campaign targeting drug abusers will break in September. The U.K. government sponsored the $6 million campaign, with the slogan "Don't inject AIDS." TBWA handles.

CHICAGO—NutraSweet Co. is launching a $5 million pan-European TV and print campaign to introduce the sugar substitute. The campaign, via Ogilvy & Mather here, will run for two to three years.

ZURICH—Swiss Air Transport and Lufthansa German Airlines are the first companies confirming an interest in buying Allegis Corp.'s Hilton International. Sale price could reach $2 billion.

AUCKLAND—Tele-Vid TV3 got approval as New Zealand's first privately owned national TV station. The 2½-year, $6 million legal battle for a license was opposed by two media groups, one backed by Rupert Murdoch. TV3, formed by broadcasters and journalists, will start broadcasting in 1989, with an estimated $50 million in ad revenues in the first year.

SYDNEY—Christopher Skase's Qintex Group plans to merge its Hal Roach Studios with Robert Halmi Inc., New York. Qintex will hold 51%

Catalogs hit newsstands

By GARY LEVIN

The nation's shelf-space wars are moving beyond package goods and crowded supermarkets, as major catalog marketers expand into retail distribution nationally.

Single-copy sales aren't likely to generate huge additional revenues for the catalogs, but could force many smaller magazines off newsstands in the broadening battle for lucrative retail display space.

In a joint venture, Catalog Retail Corp., Ridgefield, Conn., and Curtis Circulation Co., New York, on Sept. 15 will start distributing 6 million copies of more than 200 catalogs to 7,600 newsstands nationwide.

The program is an expansion of a yearlong test at 1,000 Waldenbooks stores, in which CRC set up kiosks to sell 48 separate catalogs.

Unlike that effort, which sold 100,000 copies a month, this time the catalogs will be placed strategically on newsstand racks, alongside appropriate magazines.

For example, a Sharper Image or Sporting Edge catalog could be slotted next to *Esquire*, with Avon Fashions next to *Woman's Day*.

"Catalogs in separate displays

Catalog sales will move from kiosks to magazine racks.

Awareness up for Bartles, BK

By SCOTT HUME

The July adWatch ad awareness survey results provide some good news for Pillsbury Co.'s Burger King Corp. unit and E&J Gallo Winery's Bartles & Jaymes wine cooler.

Both products are caught up in tough, competitive marketing battles in their categories.

Although ad awareness doesn't necessarily translate into sales gains, consumer recall of advertising for both Burger King and Bartles & Jaymes, as measured by adWatch, nearly has doubled in the past few months.

Bartles & Jaymes' advertising once again placed among the top 10 in unaided recall last month, though it slipped from the No. 7 to the No. 9 spot.

The news was better when the 1,000 survey respondents were asked specifically to recall the first wine advertising that came to mind. Bartles & Jaymes' share of first mentions increased to 16.2% from

Why ads aren't making it on videos

By WAYNE WALLEY

LAS VEGAS, NEV.—Negotiations are under way to make "Platoon" the next major theatrical home video to include a commercial.

But odds are it will never happen because numerous stumbling blocks are preventing the home video industry from becoming a viable advertising medium.

New York-based HBO Video, which won rights to distribute this fall Oliver Stone's haunting Vietnam war experience, is continuing last-minute negotiations for sponsorship with an unnamed major marketer.

The idea is for the marketer to produce a special spot as a tribute to war veterans to tag onto the beginning of the cassette, said Eric Kessler, HBO Video's VP-marketing of new release feature films.

But with "Platoon" due in video stores by Oct. 14, Mr. Kessler doubts a deal will be struck in time. "The key issue here is timing. Manufacturers in general are writing ad plans now for next year, and when you come to them four weeks before and need a substantial commitment fast, it can't be done," he said.

Most observers believed Pepsi-Cola Co.'s Diet Pepsi spot on cassettes of Paramount Home Video's "Top Gun" earlier this year would open the floodgates for commercials on videos.

But virtually every major distributor of movie cassettes—CBS/Fox Home Video, Walt Disney Home Video, HBO Video, MCA Home Video, MGM/UA Home Video, Paramount Home Video, RCA/Columbia Pictures Home Video, Vestron Video and Warner Bros. Home Video—reports failed negotiations with potential advertisers.

"It's not for lack of effort or lack of interest," said Craig Relyea, director of advertising, MCA Home Video, Universal City, Calif. "We've been close, but it just hasn't been the right movie for the sponsor.

"But as more sponsors like Pepsi get more comfortable with video as a vehicle, the advertising will follow. It's inevitable."

Some say the real reason advertisers have yet to strike deals with home video companies is the lack of a way to measure the impact of a spot on video.

"Advertisers need a number of impressions or a rating to understand what they are getting," said David McKenzie, a producer for Hollywood-based Associated Television International. "But video isn't the same as buying spot TV. This is just like TV syndication was 20 years ago."

Still, most people in the video industry agree that ads on cassettes will be the wave of the future.

Most video companies have approached or been approached by advertisers from most categories.

One video company said a pharmaceutical company asked to place an ad for a suppository on one movie. "How could we market it? It just wouldn't work," a source said.

Others attending the Video Software Dealers Association meeting here earlier this month said the barrier to ads on videos is a fear of a backlash from consumers seeking commercial-free programs.

"Both the advertisers and the studios need to be and are being sensitive to the consumer. It's a delicate issue. How do you present a 'commercial' to people clearly attracted to feature films on videocassette because of the ability to see a movie full length?" said Vallery Kountze, VP-marketing, Republic Home Video, Los Angeles.

"We are not looking to put commercials on cassettes just to put commercials on cassettes," said Eric Doctorow, VP-sales and marketing, Paramount Home Video, Hollywood. "Our Diet Pepsi/'Top Gun' experience sets up an expectation for future promotions. We have set the gold standard."

Paramount did discuss ads and tie-ins with several companies including Pepsi-Cola for the upcoming video releases of " 'Crocodile' Dundee" and "Star Trek IV," but Mr. Doctorow said the timing and creative could not be worked out.

Although Paramount has no strict guidelines for advertiser involvement, Mr. Doctorow said a proposal must meet three criteria: the commercial has to offer the consumer a direct benefit, be it reduced price or added premium; it has to be respectful of and tie in with the movie; and the advertiser has to create a promotional campaign to help Paramount market the title in addition to a piggyback marketing effort.

Walt Disney Home Video, Burbank, is looking for multilevel involvement with an advertiser beyond the placement of a commercial.

"We think it's a very good idea if it includes a big promotion," said Carole Black, VP-worldwide marketing. "But we would only do it for our Touchstone titles. Our consumer research shows that parents of children would prefer commercials not be on [our Disney titles] at this point."

Even producers and distributors of specialized travel, exercise and how-to videos want to be careful of alienating customers.

"You have to keep credibility," said Laura McKenzie, a travel reporter who hosts a series of one-hour videos called "Travel Tips."#

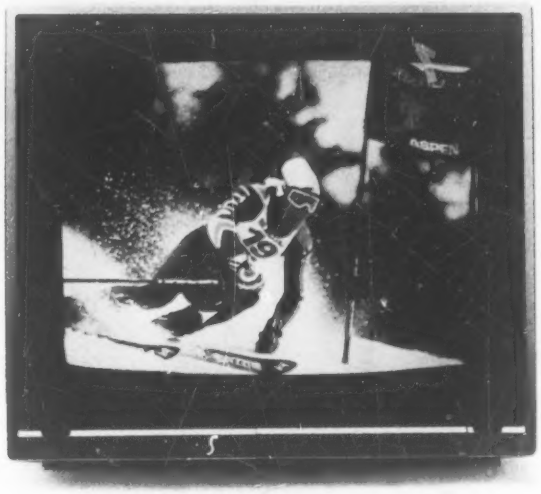
CORRECTIONS & CLARIFICATIONS

- Due to a transmission error, Dow Jones & Co.'s 1987 second-quarter net income was reported incorrectly (AA, Aug. 17, P. 44). The increase was 17% to $49.1 million, from $41.9 million a year earlier.
- The following are corrections for ADVERTISING AGE's 100 Leading Media Companies special issue on June 29:

Landmark Communications: The *Richmond Times-Dispatch* was erroneously listed as part of Landmark Communications. In its place should have been the morning *Virginian-Pilot* and the evening *Ledger-Star*.

Dow Jones & Co.: DowPhones should have been included in media operations and DowAlert, Dow Jones Cable News (videotex) and *South China Morning Post* omitted. Newsprint mills should not have been identified with DJ's publisher, Richard D. Irwin Inc.

Macromedia: Robert Sapanara is the correct spelling of the president of Macromedia's *News Tribune* subsidiary.#



Freeze. Frame.

Introducing the fastest, easiest way to get quality prints and slides from video.

Now you can capture the moment, freeze it, and frame it. All with the touch of a button. With the new FreezeFrame Video Image Recorder from Polaroid.

FreezeFrame produces sharp, instant color prints and color or black and white 35mm slides from virtually any video source. And it delivers a finished picture that is far superior in quality and resolution to direct screen photography or thermal video image recorders.

System includes Video Image Recorder, control console, and print film camera/adapter. 35mm camera adapter optional.

FreezeFrame can be used in broadcast, production and advertising to proof, edit, storyboard, or reference.

It can also be used to pull a print off a just-breaking news story.

The FreezeFrame system includes a Video Image Recorder, control console, and print film camera/adapter. And the system connects easily to video cameras, professional VCR's, laser disc players and computer graphics systems.

New FreezeFrame from Polaroid. It's fast, easy and at $1,899* very affordable.

To find out how FreezeFrame can help you, call toll-free 800-343-5000 8 a.m. to 8 p.m. Eastern Time.

Or fill out and return the coupon. We'll give you the full picture and show you just how easy it can be to capture the moment on FreezeFrame.

For more information, mail this coupon to Polaroid Corporation, Dept. 678, P.O. Box 5011, Clifton, NJ 07015.

Soft touch a new age for medium

By Janice Steinberg

Whether they love it or hate it, everybody in radio is talking about the Wave. The Wave—a no-talk format that blends light jazz, soft rock and New Age music—premiered on former Los Angeles rocker KMET-FM (now KTWV-FM) on Valentine's Day.

The station's ratings rose from a 1.9 share in the January, February, March Arbitron book to a 2.5 in the April, May, June book, which alone could make station managers around the country stock up on Andreas Vollenweider albums. What's even more compelling is that KTWV came in fifth in the 80-station Los Angeles Area of Dominant Influence among the 25-to-54 demographic it was designed to reach by Frank Cody, station program director, and Leech Inc., a Los Angeles-based research company.

Specifically, the Wave was caught by—drum roll, or maybe harp arpeggio—the baby boomers. "Over the last couple of years and for the next, I'd say, 12 to 18 months, the significant majority of radio stations will chase what we at Joint Communications call the 'big generation,'" says John Parikhal, ceo of the Toronto-based media consultancy. "You're going to see a tremendous fragmentation and experimentation in formats to reach them."

Lee Abrams, director of Atlanta-based radio consultancy Burkhart/Abrams/Douglas/Elliot & Associates, created a soft jazz/New Age format introduced by KLRS-FM in Santa Cruz, Calif., in March; and by Chicago's WNUA-FM (formerly WRXR-FM) earlier this month. Mr. Abrams' format is more purely New Age than the Wave, which plays a lot of soft rock. Aptly named WBMW-FM in Washington, and KTOU-FM in Salt Lake City also have New

Syndication boosts stations on a budget

By Hortense Leon

There used to be seven on-air people, alone, at WNDE-AM, Indianapolis. Now the Taft Broadcasting Co.-owned oldies stations has only two employees.

On Feb. 7, 1987 the station switched from live, local broadcasting to 24-hour syndication provided by Transtar Radio Network, which broadcasts live from Los Angeles.

"What this means," says Ed Sanders, WNDE's general manager, "is that now we have at our disposal better disc jockeys, more music to choose from and better sound quality for less money. Today, it is difficult for an AM station to survive on its own. A large operation like Transtar can better afford to pay on-air staff and do costly research."

Transtar, Colorado Springs, Colo., claims about 600 affiliates. Its only direct competitor is Satellite Music Network, Dallas, which claims to have 800 affiliates. Both provide 24-hour programming daily, which could replace all of a station's programming needs. With this kind of arrangement all a broadcaster needs is a satellite dish and a sales staff. The station remains, but much of the operating costs disappear.

"While a station in Chicago may be able to hire a disc jockey for $100,000 a year or more, stations in small towns, which are only billing $300,000 a year, are hard-pressed to hire a disc jockey for even $250 a week," says Jim Wood, VP-programming for Cleveland-based Malrite Broadcasting Corp—owner of 13 radio stations and six TV stations.

Danny Flamberg, senior VP-communications at the Radio Advertising Bureau, New York, says, "For $1,500 a month, a small station can fire all of its disc jockeys and program staff and hire a kid making minimum wage to punch up the local commercials and save on all the operations costs."

Marianne Bellinger, director-public relations for Satellite Music Network, a 6-year-old company with 1986 gross revenues of $15.6 million, puts it this way: "Advertising sales in local markets are tough right now. By becoming an affiliate, station managers can cut out programming costs and devote all their time to local sales and promotion."

SMN, which has seven formats, charges its affiliates $1,150 per month but less than half actually pay the fee. "Because we want our network represented from an advertising standpoint in the top 75 markets, for a good broadcast operation, we waive fees in medium and larger markets," says John S. Tylor, SMN's chairman.

SMN "retains" only two minutes per hour out of a maximum 14½ minutes that can be devoted to commercials. For most of Transtar's five formats, the company retains two minutes out of 12—including Format 41, Adult Contemporary, Country, AM Only and The Oldies Channel. Transtar's fee of $1,000 per month is waived in larger markets.

Local stations probably can afford to give up two minutes of their advertising time, which is less than what more established networks ask. At the same time, the local stations have trouble selling all their inventory.

"The local media have suffered because local businesses have died. The small shoe store can't compete with Fayva or Kinney, so it goes out of business. The large companies don't depend on local ads," Mr. Flamberg says.

But even if local advertising is soft, it far outdistances the network dollars. In 1986, radio's ad revenues totaled $7.02 billion, of which network advertising accounted for only $380 million, while spot radio spending totaled $1.33 billion and local advertising accounted for $5.31 billion, according to the Radio Advertising Bureau in New York.

What is considered a network, rather than a syndicator, which generally sells individual programs, is a tricky question. A standby definition is that a company is a network if it broadcasts programs simultaneously. But even this definition falls apart in the face of technology, which allows a station to tape satellite programming and play it later.

Janice Burenga, VP-creative services for New York-based United Stations, says that in 1981, when the company was founded, it battled with the trade papers over its right to be called a network. The company's rationale was that its affiliates, like the major networks, broadcast programs soon after they are transmitted, for example, over a weekend, if not exactly on Saturday night at 8 p.m.

Disc jockeys from Transtar Radio Network's broadcasting center in Los Angeles feed programming to about 600 affiliates.

Ms. Burenga also defends the company's right to be called a 24-hour network such as Transtar on the basis of the company's hourly news reports. Clearly though, the programs are not continuous in the same way as Transtar. United Stations sells individual programs more than it provides continuous coverage.

Most networks also have syndication arms. Mr. Flamberg says the difference between a network and a syndicator is how they are rated. "Networks are rated by RADAR as a whole, whereas a syndicator is rated in each market by Arbitron."

Bruce B. Cheen, media analyst at Paul Kagan Associates, Carmel, Calif., says, "The term network is an old word. Generally though, the syndicator supplies content and programming, but no schedule."

Mr. Cheen estimates that there are 67 radio syndicators and 25 networks. But it depends on who is doing the counting. Bob Lobdell, president/executive director of the Radio Network Association, New York, says there are 30 networks.

Another participant is Westwood One. Westwood, which dominates 15% of the market and is about to acquire NBC Radio Network—increasing its share to 30% of the market—was born as a syndicator over a decade ago. It became a network in 1985 when it bought the Mutual Broadcasting System.

But, from the advertiser's standpoint, it may not matter if the station is syndicated or is part of a network. At least the difference may not be very great. Mr. Lobdell says that it matters because an advertiser who buys 10 spots on network is more likely to hit the same listener 10 times, thus driving home the message more efficiently. With a syndicated program, there might be only two spots on each station that carries the program. Five people instead of one are more likely to hear the message.

The advertiser does not care whether his message is broadcast on a syndicated program or a network, Mr. Flamberg says. However, he does point out that a syndicated special, for example, one on a health issue, might be a hospitable environment for a commercial for athlete's foot powder.

From the standpoint of the station, Mr. Flamberg believes that syndicated shows are hard to sell. "Who cares about a show on health issues?" he asks. "If, on the other hand, you are selling a Madonna retrospective, which will run simultaneously with a Madonna tour, people might listen. But in general, the market for syndication has gotten terribly oversaturated recently." AA

A new age for radio

(Continued from Page S-1)

Age formats.

"It looks like the whole thing's going to explode," Mr. Abrams says. In spite of the likely short-term growth of New Age, many analysts caution the format's appeal is limited.

"I think it can be successful in sophisticated markets—Los Angeles, Washington, New York, Boston, Atlanta, Seattle, San Francisco," says Jim Duncan, a Kalamazoo, Mich.-based consultant who publishes "American Radio." "But it's not going to sweep the country, it's not going to acquire a 10% share of listening nationally."

One station in every market may make it with a New Age format, Mr. Parikhal says. Stations that aren't the first in their market to go New Age face the question of how to increase their share of the 25-to-54 age group. Probably the most successful answer has been adult contemporary, says Jhan Hiber, VP-research at Cleveland-based Malrite Communications.

"There are a couple reasons for that," he says. "First, although we have our fringe elements here in America, we're largely a mainstream, organized society, and that's very much a mainstream white-bread kind of format.

"Second, there are two or three categories of adult contemporary," Mr. Hiber says. He differentiates between foreground adult contemporary formats, those with prominent personalities, and "the laid-back AC stations—the ones whose main claim to fame is, all we do is play music, we don't talk."

Mr. Duncan includes oldies formats—Top 40 hits from the '60s and '70s—under the AC umbrella, and says the growth in oldies is the reason AC went from a 15.8 share nationally in fall 1985 to 18.2 last year.

He says oldies album cuts also are revitalizing album-oriented rock. "That format has been growing steadily for the past four years."

"We were the first ones to do classic hits/classic rock 'n' roll back in September 1985 for WZLX in Boston," says Gary Guthrie, president of Edinborough Rand, a Scottsdale, Ariz.-based consultancy. "They went from 19th in the 25-to-44 demo to second in five or six months."

The reason oldies formats are so hot goes straight to the aging baby boom demographic, says Mr. Parikhal. "To a generation that's going through midlife, it's very attractive to look back to the songs they grew up with and use them as markers for the next journey forward."

More listeners also will turn to talk radio, he says. "You're going to see talk radio exploding as people try to explore themselves." Traditionally aimed at older listeners, talk will evolve into a format more relevant to people in their 30s and 40s, he says.

Jazz also is experiencing a rebirth as the baby boom ages. Few stations offer an all-jazz format, but soft jazz is a mainstay of the New Age formats.

On July 1, WHN-AM in New York traded in its call letters, crated up its country records, and debuted as all-sports WFAN. The station's primary target audience is 25-to-34-year-old males, says John Chanin, WFAN VP-programming and operations. Secondarily, they'd like the 25-to-54-year-old demographic. Recently purchased by Indianapolis-based Emmis Broadcasting, WFAN fulfills a long-held wish of Jeff Smulyen, Emmis president, and Steve Crane, senior VP, to make an all-sports format work on AM, he says.

A long list of factors made them decide the format could succeed in New York, he says. "The number of professional franchises in New York City—two baseball, two football, two basketball, three hockey teams, the site of U.S. Open Tennis, the host for two major golf tournaments a year . . . And the male demographic in this area, plus the fact it's a three-shift town, which means you've got potential listeners around the clock, in what has always been hailed as the most ardent sports fan town in the country." WFAN is also the flagship station for the Mets baseball team.

It's still too early to estimate the all-sports station's ratings, but Brian Beglane, promotion director, says audience response has been "tremendous—the phone lines are constantly lit up, 24 hours a day." He says although they lost a few advertisers with the format shift, they have signed 35 new advertisers.

Of course, some radio programmers don't worship at the shrine of the baby boom.

They see their task as not to attract baby boom listeners, but to convince advertisers that life exists before 25 and after 54.

Ted Dorf, VP, general manager of Beautiful Music WGAY-FM, Silver Spring, Md., chairs the 35-to-64 Committee, an association of radio stations, networks, reps and syndicators who banded together five years ago to promote the older demographic to advertisers.

Among the facts he uses to make his case: "People over 54 have the most discretionary income in this country. They're the people who are able to take the trips, who are able to buy the fine clothes, have the second homes. They're the people the financial community wants to talk to."

Nevertheless, Mr. Dorf says, advertisers have been slow to

(Continued on Page S-6)

WFMT rolls over Beethoven

By Eileen Norris

Perhaps composer Ludwig van Beethoven *would* roll over if he knew how far his beloved classical music has come. In less than one year, Chicago radio station WFMT-FM has sold its Beethoven Satellite Network to 70 stations around the country, mostly noncommercial.

Radio stations can take the 11-hour BSN live via satellite—which the majority do—from 10 p.m. until 9 a.m. (ET) or tape it and air it later. Either way, the new service, which costs $3,000 to $12,000 a year, depending on market size, provides stations a way to take advantage of WFMT's expansive 40,000-record library.

Commercial stations using BSN are given five minutes per hour to sell local advertising. Noncommercial stations plug in their individual underwriters and run house spots. WFMT, however, does not sell national ads for BSN.

The network is the brainchild of WFMT President Raymond Nordstrand, who saw a need for the satellite service after witnessing several classical music stations go out of business and some switch to other, more profitable, formats. He says stations had the desire to offer the specialized format but couldn't afford the announcer or lacked the necessary musical inventory.

Chicago freelancer Eileen Norris is a frequent contributor to Special Report.

Edgar Weinstock does his imitation of Beethoven for WFMT-FM's network.

To make it more appealing, WFMT says it not only will help a station get classical music on the air, it also will help find a way to pay for it.

The station need only look to banks to help radio stations find underwriters to finance the BSN. For years, Chicago's Talman Federal Savings & Loan has been WFMT's chief commercial sponsor. WFMT figured plenty of other financial institutions would be willing to share a similar kind of setup with radio stations that wanted to subscribe to BSN.

That logic rang true with Chicago-based U.S. League of Savings and its affiliated company, Advertising Division Inc., which currently is working with WFMT to find financial institutions that might be interested in underwriting the BSN. A non-commercial station at Ball State University, WBST-FM in Muncie, Ind., has worked out an agreement with Mutual Federal Savings in Muncie to sponsor the network. WCQS-FM, a public radio station in Asheville, N.C., found a financial backer in Asheville Federal Savings. These are two of six stations now underwritten by banks.

To make the network more appealing to stations, WFMT also offers to customize BSN so that, "once it hits their air, it's their product," says David Levin, BSN director-development.

The network's announcers will tape call letters and promos for BSN members if they want the network to have a local flavor. Mr. Levin says BSN's affiliate stations even get letters addressed to the announcer because listeners think they work for the local station. If a radio station wants BSN to sound like the national product it really is, the affiliate can use spots that identify it as being from Chicago.

So far, this new business venture has proven to be on the mark, although Mr. Levin won't be really satisfied with its progress until demand prompts the station to offer it 24 hours a day.

Still, for BSN, getting an audience of 30 million in one year isn't bad.

New Age a tough ad spot

New Age radio has been ridiculed as "audio Valium."" Rock critics have howled that the music is so insipid, prolonged listening may produce rigor mortis. But radio executives say consumers—particularly in the 25-to-54-year-old group—are tuning in to New Age stations.

Or are they?

Some analysts are concerned that New Age yields listeners whose passive relationship to radio may limit the effectiveness of commercials.

"The Wave, [Los Angeles' KTWV] is a classic example of a station where people barely know what's on. There are no disc jockeys, there's nothing to establish loyalty to the station—so it just kind of sits there," says John Parikhal, ceo of Joint Communications Corp., a Toronto-based media consultant.

"There's a good chance that people can hear your spot five times and not hear what's being said."

"How do I produce or write a commercial that breaks through the person's subconscious, when the station they're listening to is one they have to some extent tuned out?" says Jhan Hiber, VP-research at Cleveland-based Malrite Communications Group. "There's going to be a concern on the part of advertisers; it may do OK in [the ratings], but does it do the advertiser any good in moving product and making an impression?"

KTWV, the wonder child of the 80-station Los Angeles market, has been a lightning rod for criticism and questions.

Howard Bloom, KTWV VP-general manager, says "When commercials come on, they're highlighted. There isn't any question that it's a commercial, so people listen to it more clearly."

Advertisers and agencies are responsible for creating commercials that will work in the [New Age] format, says Lee Abrams, director of Atlanta-based Burkhart/Abrams/Douglas/Elliot & Associates, who helped launch New Age stations WNUA-FM, Chicago, and KLRS-FM, Santa Cruz, Calif.

"They can't be too much like Crazy Eddie's, but they can't be too relaxed either," Mr. Abrams says. "We've done a lot of tapes where we test different musical mixes to see what [types of] ads are retained.

"There's a certain production style where the spots do get retained by listeners and others where they just go right by."

"I'm going to get on my soapbox here," says Jim Duncan, publisher of "American Radio," Kalamazoo, Mich. "Advertising people with the smarts are going to be able to handle [creating effective ads for New Age stations]. If they put their most competent, creative people toward making excellent radio commercials, there's no reason why they can't handle that problem."

—Janice Steinberg

Allen sings the praises of radio

Whether he's engaged in inspired wordplay with his sidekick, Mark Simone, or trading silly songs with guest Mel Brooks, Steve Allen guffaws frequently on his live radio show on New York's WNEW-AM.

Mr. Allen, who started in radio in the 1940s, took over WNEW's 10 a.m.-to-2 p.m. weekday slot in January. The comedian/author/composer/musician says he is having a ball.

"To draw an analogy," Mr. Allen says, "on almost every Monday night Woody Allen performs at a little New York club, a restaurant called Michael's Pub.

"He simply plays Dixieland clarinet with a little Dixieland group. You might say that doing this WNEW show is my Michael's Pub."

Steve Allen's 1940s radio show took an unexpected turn toward comedy the night Doris Day didn't make her scheduled appearance.

The improvisational ability and zaniness of Steve Allen makes him great for radio.

Mr. Allen improvised hilariously for 25 minutes; fast-paced, ad-libbed humor is the cornerstone of his current program.

Mr. Allen's and Mr. Simone's banter has covered such subjects as why undershirts don't hold up the way they did 20 years ago and why bathing produces the "prune wrinkle response" on fingers only part of the time.

Westwood One, Culver City, Calif., now is developing plans to make the show available nationwide.

Despite his on-air zaniness, Mr. Allen also has a well-known serious side that emerges as he talks about the role of radio in American life and the current state of the medium.

"I strong disapprove of [shock radio]. Our society is getting depraved and disorganized enough, and that to me is simply worsening that trend, and not helping or countering it," he says.

He believes that radio's innate strengths are enough to guarantee its viability in a TV-dominated culture.

"Intimacy is a key word. There's something about just hearing a voice, whether or not you know what the fellow whose voice it is looks like, that makes people get closer to radio."

—Janice Steinberg

A new age for radio

(Continued from Page S-2)
buy the beautiful music, talk and middle-of-the-road stations that do well with older listeners.

On the other side of the baby boom contemporary hit radio, radio's hottest format a few years ago, may be heading for trouble as boomers move out of the format's primary 12-to-34-year-old demographic.

"The CHR stations that do a 1987 version of 1963 radio—bells and whistles and wacky promotions—are going to do great," says Mr. Abrams. However, he sees the format appealing mainly to teens and to "a type of 18 to 34-year-old who's not very musically sophisticated . . ."

Other industry observers say CHR is doing fine. "Malrite has some CHR stations that do very well—No. 1 in New York, No. 1 in Cleveland," says Mr. Hiber.

He coined the term "churban" to describe a CHR and black/urban hybrid, such as KPWR in Los Angeles, that attract a multi-ethnic audience and have soared in the ratings.

Z-Rock is a new youth-oriented syndicated format that debuted on WZRC-FM in Chicago last September. Bill Scott, operations manager at Dallas-based Satellite Music Network, says it designed the hard rock/heavy metal format to hit the 12-to-24 demographic, but the five stations carrying it—in Chicago, Cleveland, Dallas, Columbus, Ohio, and Grand Rapids, Mich.—have shown unexpected strength with 25-to-34-year-old listeners as well.

"Hard rock is picking up tons of teens, because it's dance music. It's easy to get into, it's new, it's something teens can call their own," says Mr. Parikhal. "I think hard rock is going to be a format that's got some potential if people can find ways to sell the young audience it attracts." In addition to Z network, KNAC-FM in Long Beach, Calif., has a similar format.

Some areas of radio clearly are in trouble. Country has lost ground. "If you could take the Mason-Dixon line and extend it across the country—a musical Mason-Dixon Line—in the Southern tier of states country has good longevity," Mr. Hiber says. "In markets above that line, I think it's going to be a much harder go."

Over the past several years, AM stations have come up with a number of unsuccessful formats to win back the 70% of the audience that listens to FM—game shows in San Francisco, an all-traffic station in L.A. But talk is the one format that has consistently worked—31% of all AM listening is devoted to news and talk stations, Mr. Duncan says.

In spite of these trouble areas, analysts say the radio industry is in excellent health. Revenues rose to $7.03 billion in 1986, up from $6.56 billion in 1985. According to Mr. Duncan, the value of FM stations has increased 30% to 35% in the last two or three years.

Mr. Abrams sees signs of financial health and also in radio's spirit. "A couple years ago I thought it was sort of sick, everything was getting over-researched and it was turning real boring. Now research is important, but so is being out to lunch a little bit. I see a lot of show biz values coming back, which I think is real healthy," he says.

Assistant editor Kevin Brown coordinated this report on Radio.

Coming

Next week ADVERTISING AGE's Special Report will take a week hiatus. The Sept. 14 report will focus on **Magazines.**

THE ONLY RADIO NETWORKS WHERE ADVERTISERS COME ~~FIRST~~ SECOND.

United Stations Radio Networks work BEST for advertisers because we work FIRST for radio.

United Stations is a team of seasoned radio pros, dedicated to giving affiliates the kind of customized news and sportscasts and the type of music programming they need most. When you give radio stations what they need, they'll use it.

In radio programmer polls, United Stations consistently is the network of choice for the best music programming for America's most popular radio formats. News directors, too, sing the praises of United Stations when it comes to our news and sports coverage.

Nobody is more tuned-in to local radio than United Stations. We spend an enormous amount of time and money creating quality radio programming. And it pays off. It pays off for local radio and it pays off for the network advertiser.

Sure, our advertisers come second.

If We Didn't Work for Radio We Couldn't Work for Advertisers!

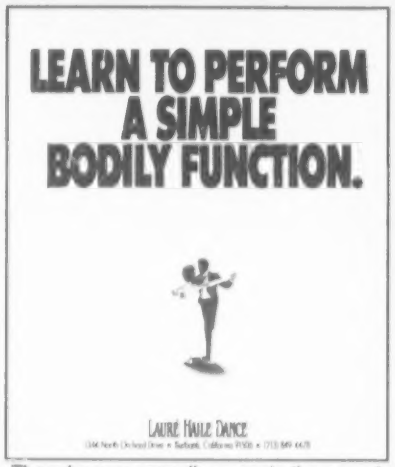
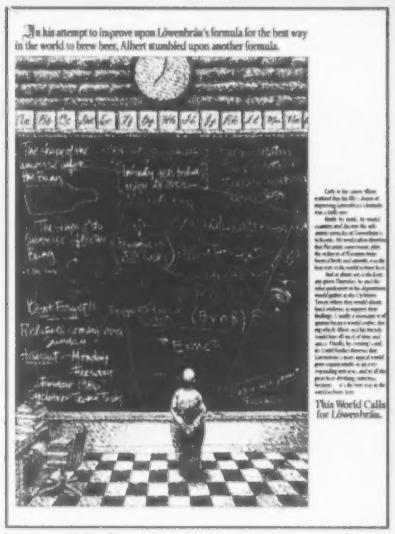
1-800-248-8808
Wheelabrator Technologies Inc.

This ad for the Wheelabrator Environmental Systems unit of Wheelabrator Technologies capitalized on an ongoing news story to advertise what is not exactly your top-of-mind kind of service. The ad was conceived and written by John Sullivan, president-ceo of Wheelabrator Environmental Systems, Hampton, N.H. Art direction was provided by Kevin Stickney, Wheelabrator's director-communications.

This ad from Chiat/Day, New York, for Ricoh Corp. copiers, makes good use of a combination of an attention-grabbing headline and a dominant graphic to make its point, then it uses graphic breaks that make the long copy more visually appealing and readable. Creative director: Bill Hamilton; art director: Leslie Sweet; copywriter: Nat Whitten.



Though some may disagree, in the age of AIDS and other sexually transmitted diseases the words "bodily function" are enough to catch a prospect's eye. In this ad for Laure Haile Dance in Burbank, Calif., Hoffman York & Compton, Milwaukee, uses a play on those words in a dominant headline and a relatively small graphic to draw the reader into the ad. Creative directors: Tom Jordan, Reed Allen; art director: Mark Drewek; copywriter: West Hranchak.



In a world of me-too, look-alike beer advertising, this ad for Miller Brewing Co.'s Lowenbrau, via J. Walter Thompson USA, Chicago, really stands out—especially if one appreciates a tongue-in-cheek approach to consumer product advertising. Creative director: Tom Hall; art director: Tim Murphy; copywriters: Tom DeCerchio, Bart Darress; illustrator: Fred Hillaird.

Best of Press selections are made by: Hank Simons, VP-creative director of the Newspaper Advertising Bureau; James Dunaway, VP-information at the bureau; and Advertising Age. National System Inc., St. Louis, provides tearsheets to the Newspaper Advertising Bureau for much of this work. Agencies, clients and newspapers are invited to submit ads for review. Submissions should be sent to AA's New York bureau.

Ad spending tops $342M

New York—Advertiser investments during May in major-market daily newspapers in 16 major categories surged 9.5% from May 1986 to $342.7 million, the Advertising Age Flash Report indicates.

The overall gain was due in part to an extra Sunday this year, making a total of five, vs. four in May '86.

Leading the gainers was the new-car category, which grew 51.5% to $28.8 million. Other big gainers included general-merchandise stores, up 17% to $55.4 million; publishing and media, up 23% to $18.5 million; banks and trust companies, up 42.2% to $11.4 million; food stores, up 8.9% to $34.1 million; and computer stores and supplies, up 45.1% to $6 million.

Among other categories posting gains were amusements, up 3% to $32.2 million; department stores, up 3.7% to $103.2 million; and radio-TV-phonographs-records dealers, up 9% to $21.2 million.

Categories showing losses from May '86 were airlines, down 7% to $17.3 million; public service utilities and communications, down 29.7% to $5.3 million; alcoholic beverages, down 14.3% to $2.9 million; computers, equipment and services, down 25.8% to $2.4 million; cigarettes, down 51.3% to $1.5 million; stock, bond and investment houses, down 26.5% to $1.7 million; and camera., photo supplies and services retailers, down 4.1% to $827,752. The Flash Report is based on linage measurements by Media Records here in 29 daily and 22 Sunday newspapers in 15 major markets.#

Pizza Hut wants BBDO to use tough approach

By SCOTT HUME

PepsiCo further strengthened its bonds with Omnicom Group last week when Pizza Hut awarded its $25 million national account to BBDO Worldwide, New York.

BBDO, principal agency for Somers, N.Y.-based Pepsi-Cola USA, picks up both the creative assignment (from Chiat/Day, Los Angeles) and media buying (from DeWitt Media, New York).

Wichita, Kan.-based Pizza Hut's regional co-op agencies will continue to augment national work with local-market creative.

The assignment marks a further consolidation of PepsiCo business at Omnicom agencies.

Tracy-Locke, Dallas, handles the $50 million Taco Bell account and, along with DDB Needham Worldwide, Chicago, much of the Frito-Lay snacks business. Those two shops also are part of Omnicom.

Kentucky Fried Chicken Corp., Louisville, Ky., which PepsiCo acquired last year, remains its largest piece of U.S. business outside the Omnicom fold. Young & Rubicam, New York, holds that $75 million account, and the world's largest chicken chain says it has no plans to make a change.

KFC last week launched a $40 million campaign via Y&R for its 1-ounce Chicken Littles sandwiches (AA, May 11, *et seq.*).

BBDO's mandate will be to create tougher, harder-sell advertising than the "Pizza Hut People" and "On the road with Pizza Hut" campaigns that C/D provided.

A Pizza Hut spokesman said BBDO was chosen because of its "superior creative abilities as well as its understanding of how best to leverage our size in the marketplace."

Industry observers translate that to mean that though Pizza Hut is the nation's largest pizza chain—with sales of about $2.5 billion in 1986—its market position has been undercut by delivery chains such as Domino's Pizza and price-cutting specialists like Little Caesar Enterprises.

Pizza Hut franchisees have made known their desire for advertising that clearly defines and sells the "brand" in a toughening market.

For its part, BBDO has made no secret of its interest in gaining a major restaurant account since it lost Burger King Corp. to J. Walter Thompson USA, New York, in 1976. BBDO was one of the five finalists for Pizza Hut's account in 1984 when C/D succeeded Foote, Cone & Belding, Chicago (AA, May 7, 1984).

Although included among the eight first-round contenders in BK's current review of what is now a $200 million account, BBDO was not among the three finalists named earlier this month (AA, Aug. 17).

BBDO's only competitor for Pizza Hut this time around was Saatchi & Saatchi DFS Compton, New York, which was hoping to rebound from its loss of the $50 million Wendy's International account (AA, Nov. 3).

The swiftness of the change—coming less than three weeks after C/D's official "resignation" of the account Aug. 8—appeared to confirm reports that Pizza Hut was holding something other than the "informal talks" with New York agencies it confirmed were under way last month (AA, Aug. 3).#

BK, Bartles recall up

(Continued from Page 3)

14.8% in June. Considering that Bartles & Jaymes' recall share was only 5.1% in March and 8.8% in April, its July score is impressive.

The Bartles & Jaymes brand faces a tough challenger in Jos. E. Seagram & Sons' Seagram's wine coolers, which became the top seller in some markets. That has raised questions about how long Gallo will continue to use the Hal Riney & Partners-created "Frank Bartles" and "Ed Jaymes" characters and campaign for the product.

Gallo this spring launched new creative executions to introduce a Premium Red extension of Bartles & Jaymes. The steady rise in the product's share of first mentions since then suggests that there's still some vitality and memorability left in Frank and Ed.

In second place behind Bartles & Jaymes in the wine category was advertising for Gallo's wines. San Francisco-based Riney also created that advertising. It received 12.5% of first mentions in July's survey, up 3.6 percentage points from June's 8.9% share.

Advertising for Banfi Vintners' Riunite placed third last month with an 8.9% share, followed by Seagram's at 3.2% and Brown-Forman Co.'s California Cooler at 1.4%.

BK's "Best food for fast times" campaign, recently augmented by new commercials supporting the national introduction of Burger Bundles, went from No. 8 in June to the bottom of July's top 10 list. But when respondents were asked specifically which fast-food advertising came to mind first, BK did quite well.

Last month, BK came to mind first for 19.5% of the sample, up 5.4 percentage points from June and nearly double the 5.9% share it received in May. It was BK's highest score since February 1986, when it garnered a 23% share.

J. Walter Thompson USA, New York, creator of the "fast times" positioning, is one of three agencies (with N W Ayer and D'Arcy Masius Benton & Bowles) preparing final presentations for the review of that $200 million account.

McDonald's Corp.'s share of first mentions was 40% in the July survey, twice that of second-place finisher Burger King but still Big Mac's lowest share since February 1986.

Wendy's International was third last month with a 10.2% share, Hardee's Food Systems was fourth with 4.4% and Taco Bell moved into the category's top 5 on the strength of its Steak Fajita campaign with 1.6%.

AdWatch is a joint project of ADVERTISING AGE and SRI Research Center, Lincoln, Neb.

Ad awareness is measured by asking a nationally projectable sample to name the advertising that first comes to mind of all seen, heard or read in the previous 30 days.

Consumers are queried on the first ad they recall overall, yielding the top 10 list, as well as in a variety of product areas. During July, 1,000 adults were polled by telephone.

Those changes in advertising that are deemed statistically significant by adWatch researchers are attributable to more than sample variation.

In other significant changes in the July survey:

- Ford Motor Co. widened its lead over General Motors Corp.'s Chevrolet in the **cars & trucks** category with a 3.4-point increase to 22.5% of first mentions. Chevy came to mind first for 13.7% of the sample, down 2.5 points from its 16.2% share in the June survey.

Toyota Motor Sales USA held the third spot with a 7.9% share.

- Apple Computer has bounced back after getting a scare earlier this year from IBM Corp. in the **computer** category. IBM had vaulted into the No. 1 spot in April after launching its campaign studded with former "M*A*S*H" cast members, and while IBM's recall score remains higher than it traditionally had been before that campaign broke, Apple took only two months to reclaim the top spot.

Last month, Apple's advertising came to mind first for 28.4% of the sample, while IBM was named by 21.3%, down 2.3 points from its 23.6% share in June. Radio Shack ads were named first by 1.6%.#

For more information or data, contact SRI Research Center, 301 S. 68th St., Lincoln, Neb. 68506. Phone: (402) 489-0351.

Chevrolet plans

(Continued from Page 3)

in 1988, so we will spend less on production and more on actual time," she said. TV and print spending will rise, she said.

Promotion will be decreased because the company is not introducing any new-car brands for 1988, only new models of existing brands, she said.

In 1987, Chevrolet ran a big promotion with Procter & Gamble Co. to introduce the full-size pickup truck and the Corsica/Beretta.

Keys for these models were placed in packages of seven P&G products. Today, the Corsica/Beretta accounts for 20% of all Chevrolet sales.

Mr. Staudt said the promo drew 2.5 million people to Chevy showrooms. He attributed one-third of the name recognition for the new models to promotion.

Chevrolet projects total industry sales of 10.3 million cars and 4.7 million trucks in the 1988 model year, General Manager Robert D. Burger said. That will be a 2% drop from 1987's 15.4 million cars and trucks sold, boosted primarily by end-of-the-year clearance sales.

Chevy, responsible for more than 40% of GM's total sales, expects to sell 1.7 million cars and 1.25 million trucks in the 1988 model year.#

Pat Sloan in New York contributed to this story.

For the Record

REVLON GROUP, New York, took its estimated $6 million Charles of the Ritz fragrance account in-house from Rosenfeld, Sirowitz, Humphrey & Strauss. Brands include Carrington, Enjoli, Forever Krystle and Jean Nate. The move was made for consolidation and cost-savings purposes. Revlon completed its acquisition of Ritz from Yves Saint Laurent International this month. RSH&S retains the Bain de Soleil suncare line, which Revlon sold to Procter & Gamble Co.'s Richardson-Vicks division. Spending is about $4 million.

HYUNDAI MOTORS AMERICA, Garden Grove, Calif., named **Backer Spielvogel Bates**, New York, to handle its $12 million central U.S. dealer advertising association account. The newly formed group (AA, July 27) starts a Midwest rollout Oct. 1 in Chicago, Cincinnati, Minneapolis and St. Louis that by next year will make the car a national brand. BSB, which handles Hyundai's national account and its Eastern, Western and Southern dealer groups, will expand its Chicago field office to service the Midwest account.

MAGAZINE ADVERTISING RESULTS rose in July compared with a year earlier, reports Publishers Information Bureau, New York. Ad pages gained 6.4% to 9,312, while revenues climbed 7.9% to $320.6 million. For the year to date, ad pages are up 1% to 83,792, while revenues have increased 3.2% to $2.88 billion.

BLACK ENTERTAINMENT TELEVISION, Washington, next week breaks a $1 million radio campaign to promote the cable channel's fall 1987 schedule and prod more cable operators into offering BET. The campaign, created in-house, is the first in BET's seven-year history.

CAPITAL CITIES/ABC'S Fairchild Publications, New York, acquired *Financial Services Times*, a monthly, from M&S Communications, Newton, Mass. Fairchild will merge the title into *FP Week*, which it planned to launch in October. The new magazine will debut as an every-other-weekly entitled *Financial Services Week*. Fairchild Senior VP Stephen Stoneburn, 44, will be publisher.

VALVOLINE OIL CO., Lexington, Ky., on Sept. 7 begins national TV and print advertising and a rebate promotion for its motor oil. Country singer Willie Nelson performs "On the Road Again" and provides voice-over for one of the TV spots. Bozell, Jacobs, Kenyon & Eckhardt, Atlanta, handles the estimated $20 million account.

PRODUCT MOVERS, New York, one of the largest U.S. printers and distributors of free standing inserts, on Sept. 27 will include an editorial against the Florida ad tax in 3 million FSIs scheduled to run in 14 Florida newspapers. The editorial will urge consumers to write to Gov. Bob Martinez to protest the tax. Product Movers already canceled its TV spots in Florida markets.

SHANDWICK PLC, London, will acquire Casey Communications Management, a Southfield, Mich., public relations company with 1986 revenues of $3.1 million. Earlier this month, Shandwick bought three public relations or publications management companies in Rockville, Md., and Los Angeles.

OGILVY & MATHER, New York, will open a Dearborn, Mich., office in October with about 10 staffers. O&M last month won the $20 million Ford Parts & Service Division account. O&M U.S. Chairman Graham Phillips said servicing Ford is the primary goal, "but down the road we hope to expand this new office into a full-service agency."

GILLETTE CO., Boston, breaks a TV campaign Sept. 14 for its new Soft & Dri Wide Oval Solid antiperspirant deodorant. The 30 and 15-second spots, via BBDO Worldwide, New York, will run on daytime, syndication and cable TV. Separately, Gillette last week reached an agreement to sell its Paris-based S.T. Du Pont specialty pen and lighter company to Dickson Concepts Ltd., a subsidiary of Dickson Too Holding Co., Hong Kong, marketer of luxury goods. Dupont had 1986 sales of about $50 million.

ANHEUSER-BUSCH, St. Louis, added an execution in its "Night belongs to Michelob" campaign with music by the Robert Cray Band, which joins Phil Collins, Genesis, Roger Daltrey and Wang Chung on the list of pop groups now represented in the year-old campaign. DDB Needham Worldwide, Chicago, handles.

ABC, New York, last week began scheduling preseason series debuts. "Growing Pains," usually seen on Tuesdays, will open with a one-hour version at 8 p.m. (ET) Friday, Sept. 18, leading into the return of "Max Headroom" at 9 p.m. "Once a Hero" will open with a 90-minute episode at 8 p.m. Sept. 19. In "premiere week," ABC will preview "Full House" Sept. 22 behind "Who's the Boss?" and "I Married Dora" at 9:30 p.m. behind "Pains" on its regular night. The newcomers go to their regular Friday berths on Sept. 25—vs. CBS' two-hour "Dallas" *(see related story on Page 45.)*.

ACCOUNT ACTIVITY: **Blue Cross & Blue Shield Association**, Chicago, to **Hal Riney & Partners** from HDM Dawson Johns & Black for its $10 million national account. . . . **Robert Bosch Corp.**, Broadview, Ill., to **BBDM**, Chicago, and **J. Walter Thompson USA**, Detroit, from Ogilvy & Mather, Chicago, for its $6 million-to-$8 million account. BBDM gets the Blaupunkt car-stereo business, while JWT picks up the corporate and automotive accessories accounts. Spending will be split about evenly. . . . **Service Corp. International**, Houston, the nation's leading funeral services company, to **Penny & Speier** to handle advertising for six of its funeral division's eight regions. The $2 million account had been split among local agencies. Moss & Co., New York, still handles the other two regions and the $6 million-plus account for Guardian Plan, Service Corp.'s pre-arranged funeral division. . . . **Daisy Manufacturing Co.**, Rogers, Ark., to **Doe-Anderson**, Louisville, Ky., from Ackerman, Hood & McQueen, Oklahoma City, for its $1 million airgun, ammunition and accessories account.

WORTH NOTING: **Robert Stempel**, 53, to president-chief operating officer, General Motors Corp., Detroit, from exec VP. He succeeds **F. James McDonald**, 64, who retires today. . . . **Robert Holmes a'Court**, one of Australia's media barons, has almost doubled his stake to 3.2% in John Fairfax Ltd., Australia's second-largest publishing company. . . . **Dallas-Fort Worth Home & Garden** has ceased publication after nine years. Its parent, City Home Publishing, Houston, will continue publishing *Houston Home & Garden*.

After a year as NBC president, "deal maker" Robert Wright has big plans for the network.

Wright eyes NBC entry in ratings, cable

By VERNE GAY

NEW YORK—One year ago, the newly installed president of NBC, Robert Wright, declared he would bring no new agenda to the network.

Instead, he said, he would take time to "learn the business."

Today, the 44-year-old Mr. Wright has finished his homework and now has big plans for the company that owns the top-rated television network.

If successful, he could radically change the face of NBC and the network TV business.

In an interview conducted on the eve of his network's new season, Mr. Wright discussed his ideas about the current and future course of network television. Although he acknowledged that some of his plans could be held up by resistance from the industry or Washington legislators, there is little doubt that, if successful, NBC could be headed for some major changes.

Some of Mr. Wright's ideas include:

- Forming a new TV ratings service, which would compete with A.C. Nielsen Co. and AGB Television Research. Mr. Wright said that if Nielsen does not correct methodological errors in its new people-meter system, NBC would form a cooperative research company. "We would be prepared to do that [when] we concluded we didn't have a viable system" from Nielsen, he said. NBC subscribes solely to Nielsen's ratings service.
- Creating a cable TV network. Mr. Wright said such a channel, which could use the resources of NBC Entertainment, is "possible" but not likely in the near future. "Lots of people would like to see an NBC channel on cable, but we have to be realistic," he said. "The costs are enormous, and I'm not sure the [cable] industry is ready for that."
- Making new financial arrangements with Hollywood producers in which NBC would partially underwrite new TV shows in exchange for home video and, possibly, syndication rights. The Federal Communications Commission's financial interest and syndication rules forbid such an arrangement, but Mr. Wright said, "There are an awful lot of people in Hollywood

WCRS buys Belier

French aim: U.S. stake

By CLAIRE WILSON and JON LAFAYETTE

PARIS—French ad agencies may be using fast-moving British ad groups as a springboard into the U.S. market.

London-based WCRS Group last week acquired 49% of France's Groupe Belier, forming a partnership that not only gives WCRS its first major presence in continental Europe but allows the French shop to participate in WCRS' international network.

Eurocom, which owns Belier, gets a 20% stake in WCRS' ad businesses, which include Della Femina, Travisano & Partners, New York, and HBM/Creamer, Boston.

London's Lowe International, meanwhile, last week bought a majority interest in Paris agency Gaudin & Lichtenberg, forming a new agency called Lowe Lichtenberg

Last Minute News

Benckiser to clean up with BJK&E

GREENWICH, CONN.—Benckiser Consumer Products USA named Bozell, Jacobs, Kenyon & Eckhardt, New York, as agency for its $16 million-to-$20 million account. Benckiser, a unit of the West German Benckiser Group, plans to make its first big consumer-products push here with brands recently acquired from EcoLab, St. Paul, Minn., including Electrasol dishwasher detergent, Jet Dry dishwasher rinse agent, ScrubFree bath cleaner and Lime Away bathroom/kitchen cleaner.

Fallon clicks with Timex watches

WATERBURY, CONN.—Timex moved its $10 million account to Fallon McElligott, Minneapolis. Grey Advertising, New York, resigned the business earlier this year.

NFL strike wouldn't stop CBS

NEW YORK—CBS plans to broadcast National Football League games even if the players go ahead with their strike Sept. 22. "If games are played by the NFL, we will telecast them," a CBS spokesman said last week. ABC and

Pepsi to use Jackson in 4-part spot

By PATRICIA WINTERS

Pepsi-Cola Co. intends to break new creative ground in its Michael Jackson commercials with a four-part commercial that shows the superstar in daredevil stunts.

Somers, N.Y.-based Pepsi declined to comment on the details but revealed over the weekend that the much-publicized campaign features four individual 60-second spots, all considered part of a single commercial. Mr. Jackson also will appear in a separate second commercial that Pepsi did not discuss.

For his part in the commercials, Mr. Jackson receives more than $10 million.

The four-part series, created by BBDO Worldwide, New York, and directed by Joe Pytka, will show Mr. Jack-

Who are the best and brightest? P. 38

M&M's in U.K., P. 90

Highlights

Jackson in black and white 4
The Rev. Jesse Jackson's long-shot bid for the Democratic presidential nomination may rely more on paid advertising this time around than in 1984. Although the Rev. Jackson is assured of much free media coverage, in part because of his high political profile, the feeling among some observers is that that coverage could turn into a liability.

Corona makes Heineken sweat 12
Heineken, still the nation's No. 1 imported beer, is being humbled by Corona Extra, the once-innocuous little beer from Mexico. Corona has been choking sales of the Dutch import in several major markets.

AHP's buy good medicine 32
American Home Products Corp.'s pending acquisition of VLI Corp. could mean a bonanza for the marketer of drugs, food and household products. Observers believe VLI's successful line of contraceptives will be marketed under AHP's Whitehall Laboratories unit.

Squeezing the o.j. category 36
Coca-Cola Foods is testing Minute Maid Squeeze-Fresh, a frozen juice concentrate in a squeeze bottle, as a convenience alternative to chilled juice for smaller families. It joins a small but growing list of Minute Maid single-serve products in test or rollout stages.

At least the rent's cheap 84
New Jersey agencies are saying "New Jersey and you—perfect together," to a growing number of disenchanted, disenfranchised New York City ad executives. Fallout from New York agency mergers and the gradual improvement of the Garden State's image are sending a steady flow of talent across the Hudson River, to the delight of New Jersey shops.

Worth a thousand words 88
To call Michael Lebron's ads "graphic" is superfluous. What else could you say about a campaign that includes a child's depiction of a slain pregnant woman? But that's the sort of work that has won the artist notoriety and readers' attentions.

God bless you 109
Colleen Todd's book, "Christian Wives," has given her a national reputation as a Christian writer, but she doesn't care much for that reputation. The cheerfully secular agency executive said she emerged unscathed from her brushes with televangelism: "Every interview started with a prayer and ended with a prayer. I'd leave and get in the elevator and say 'f---' 20 times just to get my feet back on the ground."

P&G adds fire to fat 111
Procter & Gamble Co. is showing its confidence in the marketability of olestra, a revolutionary fat substitute awaiting government approval, by tapping a rising executive to head an olestra division. The Cincinnati-based company's decision to create a new division with its own staff for a product not expected to win government clearance for more than a year was called "unusual" by an industry analyst, who said P&G "must feel certain" the FDA will approve it.

INTERNATIONAL

Playboy Bunny finds home in India 92
The Playboy Bunny is moving into India with a new line of sports clothes produced by Fashionsport India and Playboy Enterprises. Next month the two companies will introduce lines of Playboy men's shirts, casual pants and jeans and Playmate women's sportswear and shoes.

OTHER NEWS

Carl Karcher Enterprises' Carl's Jr. fast-food chain will introduce Country Fried Steak systemwide next month, the third new product since its extremely successful "back to basics" strategy began nearly two years ago. Page 24.

Harley-Davidson cigarettes have rolled into Terre Haute, Ind. Lorillard began test-marketing the new brand in the Indiana city. Page 32.

Congress is weighing proposals to end sales-tax exemptions for mail-order catalogs and home-shopping shows. Page 37.

Y&R divides N.Y. unit in 3

By JON LAFAYETTE

NEW YORK—Young & Rubicam has split its office here into three separate groups, each with its own account management, creative, media research and administrative staffs.

Agency officials said the move was made to improve the shop's creative product. Billings have grown from $600 million to more than $1 billion since early last year.

Y&R named as group general managers John Glorieux, 40, who had been director of client services; George Guimaraes, 42, who had been in charge of new business; and Jane Brite, 43, a group director.

John Ferrell, 43, who has been creative director for Y&R's flagship office since 1984, will report to Mr. Guimaraes, whose accounts include Colgate-Palmolive Co. and Ford Motor Co.'s Lincoln-Mercury division.

Louis DiJoseph, 59, will be creative director of Mr. Glorieux's group, which handles the U.S. Army, Kentucky Fried Chicken Corp. and Dr Pepper Co.

Cary Lemkowitz, 39, will be creative director in Ms. Brite's group, which includes Johnson & Johnson, RJR Nabisco and Pillsbury Co.

The group general managers will report to Arthur Klein, 50, who has been promoted to president-ceo of Y&R New York from managing director. John McGarry, 47, who had been president, becomes chairman of Y&R here and continues as chairman of client service worldwide.

"As we grow larger, we must continue to grow swifter and smarter," said Y&R Chairman Alexander Kroll. "Thus we will make ourselves smaller, where smaller is better. But we will not abdicate the advantages of size—media clout, marketing resources, depth of talent—where bigger is better."

Mr. Klein added that the new structure allows the agency to promote deserving people and give them management responsibilities. The new structure will be evaluated by Mr. Klein and the three group heads, who will review the agency's work for signs of improvement.

Since mid-1986, Y&R's New York office has received new assignments from several major companies.#

Chart-topper for Pop Secret

By BETH AUSTIN

General Mills' Betty Crocker Pop Secret, a close second in the hot microwave popcorn market, hopes to dance into first place with the tune "La Bamba," one of the summer's top pop hits.

Minneapolis-based General Mills, gunning for Beatrice Cos.' Orville Redenbacher brand's top spot in the $300 million segment, is launching an ad campaign featuring the song, a 1950s hit revived by the movie of the same name.

A new TV spot for Pop Secret begins airing on the Big 3 networks today. It features popcorn kernels wearing sunglasses and reclining on lawn chairs in the sun. The real corn kernels, which have animated arms and legs, move to the music until they pop.

The commercial, created by Campbell-Mithun, aired for the first time Sept. 11 during MTV: Music Television's Annual Music Video Awards program.

The combination of real kernels and sunglasses and animated limbs was created by Broadcast Arts, New York, a company that also has done ani-

Republicans desert Martinez

Ad tax may die

By STEVEN W. COLFORD

The push to repeal Florida's tax on advertising gained political momentum last week as state GOP leaders began deserting Republican Gov. Bob Martinez and the $1 billion tax hike he pushed through the Legislature last April.

Although industry lobbyists were unwilling to predict outright repeal of the 5% sales tax on services like advertising, they were openly encouraged by the fact that Gov. Martinez' support on the issue is dwindling rapidly.

The tax expansion will be discussed when legislators convene Sept. 21 for a special session.

In rapid-fire succession last week, the head of the state Republican Party and three of his predecessors publicly endorsed repeal of the tax on advertising and other professional services.

Shortly after, the Republican leader of the Florida House and a leading GOP senator issued a similar call for repeal of the tax.

Statewide polls show the tax expansion is opposed by up to 80% of the voters.

The frantic scrambling by Florida Republicans to put many political miles between themselves and the biggest tax increase in state history convinced industry lobbyists that expansion of the tax will be repealed or revised during next week's three-day legislative session. What revisions the 160 legislators will make is now more the topic of discussion than whether they will make any changes at all.

"There's a real window of opportunity here," said Association of National Advertisers Senior VP Dan Jaffe.

And Charles Ranson, the usually cautious Tallahassee lobbyist hired by the ad industry's State Advertis-

This data has been provided by Media Records for exclusive publication in Advertising Age and may not be reprinted or published in any form without explicit permission from Media Records. All newspapers represented are subscribers to Media Records. For those newspapers that subscribe to Media Records National Advertising Reporting Service. Total Advertising data shown has been supplied by the publisher to Media Records and included in this compilation. All publisher supplied figures are converted to MRCS SAU inches by Media Records. These newspapers are indicated with an asterisk (*).

REPORTING METHODOLOGY

Media Records continues to measure in linage but due to the introduction of the SAU 6 column format Media Records has designed and developed a methodology with the approval of our subscribers, the INAME Measurements Committee, The ANPA NAB Working Committee, The AAAA Newspaper Committee, and other industry groups.

The approved methodology is titled The Media Records Conversion System (MRCS) and is based upon the printed page area of each product of the newspaper and is a five step approach as follows:

1. Measure Printed Page
   Width and Depth in Inches
2. Determine Square Inches of Page
   Multiply Width by Depth Inches
3. Determine the Number of SAU Inches of Page
   Divide the Square Inches by 2.0625 (SAU Inches)
4. Measure the Total Lines of the Page
   Multiply Column Depth Agate Lines by the Number of Columns on the Page
5. Determine the Factor for Converting Measured Lines to Reported SAU Inches
   Divide the Total Lines of Page by the Number of MRCS SAU Inches of the Page

SAU* is the registered trademark of the American Newspaper Publishers Association

Special Report

Ted Cart

Style, looks enthrall publishers

By Belinda Hulin-Salkin

History may remember the 1980s as a kind of *belle epoche* for magazine publishing. In spite of intense competition, sluggish ad sales and frequent fallout, new titles hit newsstands at an astonishing rate—362 last year.

In addition, publishers are investing more money than ever into existing titles. Individual magazines have become bigger and brighter. Heavier paper stocks, lush photography and sophisticated graphics are tools to create beautiful, eye-catching editorial environments that entice both readers and advertisers.

Belinda Hulin-Salkin is a frequent contributor to Special Report who writes regularly about media topics.

Unless otherwise noted, all circulation figures in this Special Report represent total paid circulation averages for the six months ended June 30, as reported in Audit Bureau of Circulations' FAS-FAX.

Singularly sensational

Largest increases in single-copy sales

	single-copy sales	% gain from 6/86
Vanity Fair	135,954	69.3
WWF Magazine	161,407	56.1
Elle	434,154	51.4
Prevention	204,091	41.6
Soap Opera Digest	645,980	38.3
YM	126,075	36.7
Satellite Orbit	180,118	29.8
Southern Living	185,379	22.0
Sun	435,002	20.8
Golf Digest	126,949	15.8

Source: Audit Bureau of Circulations' FAS-FAX report for the six months ended June 30. List includes only those magazines with circulations greater than 200,000 and newsstand sales greater than 100,000; it does not include magazine groups or combined buys.

Editors and publishers offer mixed opinions on what those changes mean for editorial quality and how they reflect readers' desires.

John Mack Carter, editor in chief of *Good Housekeeping* and director-magazine development for Hearst Magazines, New York, believes recent industry transactions indirectly have benefited the look of many magazines.

"There's an old adage, 'You never know what a thing is worth until you sell it.' Well, a lot of magazines have been bought and sold in recent years at prices that surprised people," he says. "I think it has begun to dawn on publishers that they have a dear product and it's worth putting money into it.

"Now publishers are investing in their franchise with readers, putting money into the product rather than merchandising. I think that's the single biggest trend of the last year."

(Continued on Page S-2)

Looks, style enthrall

(Continued from Page S-1)

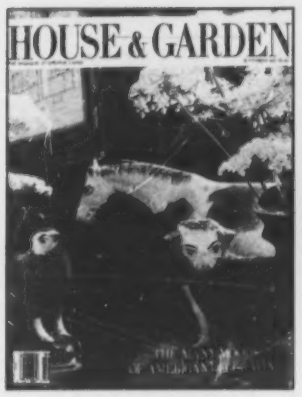
Some observers say Conde Nast Publications' January 1983 revamp of *House & Garden* initiated the age of upgraded, more opulent magazines. However, Peter Diamandis, president of CBS Magazines, New York, dates the trend toward heavier paper stocks, better inks and glossier photography to studies done in the early 1980s.

"Somewhere along the way, people learned that no matter how bad times get, the rich always spend money," he quips. "So a huge spate of magazines came out targeted to the affluent market. An upscale magazine has to look the part . . . That's where the movement toward 'lush' magazines came from."

Mr. Diamandis says the current drive to improve magazine aesthetics and readability is widespread, but he's quick to note that the "*House & Garden* treatment" isn't appropriate for many audiences.

"At *Woman's Day*, we're running shorter stories with more spot art and a simplified typeface, but if we made it look slick, we'd kill it. This is a practical magazine. Women have to be able to identify with it."

Several of the CBS special-interest magazines—*Car & Driver*, *Stereo Review* and *Yachting*—appeal either to an upwardly mobile or downright affluent audience. With them, particularly *Yachting*, CBS is using more color, photo spreads and fashion photography techniques to create the proper editorial ambiance.



Some observers say Conde Nast's revamp of House & Garden began a trend to "beautiful" magazines that has affected even such titles as Time.

Readers' seeming willingness to spend time reading about hobbies and less interest in lengthy news and public affairs coverage doesn't surprise Mr. Diamandis.

"I think society has been wracked by a lot of bad news: crime, AIDS, terrorists. People are tired of all that; they want some beauty in their lives," he says. "We've been issued-out."

But some observers believe that magazine style has triumphed over substance—that editorial content has declined in quantity and quality just as presentation has improved. Tailored to fit the modern reader's harried lifestyle, magazines today appear to favor how-to and service pieces, offering fewer lengthy articles and less in-depth, issue-oriented reporting.

"Across the board in magazines, the word is not getting the same position it once had," Mr. Carter says. "Most of us try to do at least one major piece an issue, but the in-depth piece that goes on and on . . . that's becoming rare."

Mr. Carter says most magazines have fallen into the "*USA Today* syndrome," favoring bite-sized nuggets of information. Using this philosophy, "big" stories are likely to be broken up with four-color graphics, sidebar boxes and separate commentary.

Editors say this trend is reader-driven—journalism's fast food for people who don't have time to sit and read one long story. Less charitable sources blame the reading habits and short attention span of the TV generation, perceived as more interested in impressions than information.

"I think this trend says bad things about the literacy level of the U.S.," Mr. Carter says. "But when it's done well, [the tidbit approach] has done good things for a lot of magazines."

Marshall Loeb, managing editor of Time Inc.'s *Fortune*, New York, says, "In this day where the perceived wisdom is that readers want McNuggets of information, I think there's a great yearning for the in-depth article that puts together all the elements of an event or issue."

Mr. Loeb cites a *Fortune* cover on the Rockefellers and one on software entrepreneur Bill Gates—two of the longest articles ever to appear in the magazine. "By reader survey, both those stories were among our most intensely read," he says.

"We're dealing with a highly intelligent American population that demands knowledge. The most important thing is to present them with solid, in-depth reporting," he says.

"Now, obviously, we try to physically present that information in such a way that it attracts readers to the story. We use provocative headlines, attractive photography, and

(Continued on Page S-6)

ARE YOU TRYING TO REACH MILLIONS OF AMERICAN MEN IN A FOREIGN TONGUE?

You're talking to them in English. But they don't want to be talked to in English. They appreciate advertisers who communicate with them in their primary language. Español.

Today, Hispanics represent an enormous growth market in the United States. They're nearly 20 million strong. Representing some $134 billion in purchasing power. And the vast majority is far more comfortable in Spanish than in English.

That's why so many of them turn to our magazines for news and information, excitement and entertainment. The magazines of SpanAmerica, the De Armas Hispanic Magazine Network.

We're the largest publisher of Hispanic magazines today. Not just in the United States, but throughout the Spanish speaking world. Our readers are used to seeing your ads in their countries of origin. Shouldn't they be seeing them in the U.S. as well?

We publish 13 handsome, full color magazines in this country, including several targeted primarily to men. They're the Hispanic males you want to reach, too. The better educated. The more affluent. The movers and shakers throughout the Hispanic-American community.

Whether you're selling cars or travel, electronics or fashion, financial services or alcoholic beverages, we have an audience you ought to get to know.

Isn't it time you introduced yourself? Damaso Santana (South and West) or Arnaldo Jimenez (North), can show you how cost-efficient it can be to communicate with this dynamic market on a national, regional or local basis. Just give them a call at (305) 871-6400 (Miami) or (212) 687-8760 (New York). Executive Offices: 6355 N.W. 36th Street, Miami, FL 33166.

If you want to reach America's Hispanic males, you'll find that they're talking your language.

SPANAMERICA℠
The DeArmas Hispanic Magazine Network.

Looks, style enthrall

(Continued from Page S-2)

whenever it's appropriate, we put individuals on the cover to whom our readers can relate."

Mr. Loeb and other editors say good pacing and attention-getting stories—not word-count limits—sell magazines today. Patricia Ryan, new managing editor of New York-based Time Inc.'s *Life* and former managing editor of *People*, says people often confuse the content of a magazine with its cover lines. "If you took the cover off of *People* and read it . . . it's not a quick read," she says.

"It has a fast pace, and there are a number of short departments that you can get in and out of in a few minutes. But when I left *People*, the word count had moved up to 30,000 a week."

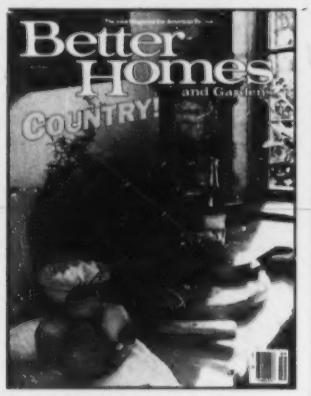
Ms. Ryan adds that *People* has run a number of serious stories on such topics as rape, AIDS, the homeless and teen suicide that received good reader response, even if consumers initially bought the magazine for the celebrity cover.

"If you did a *People* commercial that said, 'I'm going to tell you about rape and the homeless,' you'd look foolish and you wouldn't sell many magazines," Ms. Ryan says. "[Readers] come to you for the lighter reasons . . . that's what makes them put their dollars down at the cash register. But that doesn't mean they don't read the other stories."

At *Life*, Ms. Ryan plans to give readers more words, not fewer. "The old *Life* was keepable because it had text," she says.

A number of traditional service magazines and new do-it-yourself books have instituted editorial changes geared toward making their products "user friendly." These overhauls often involve a greater emphasis on illustrations, but editors say these pictures must do more than just break up the page.

"At *Better Homes & Gardens*, we've changed our layout in hopes of making editorial material more easily read and used by readers," says Doris Eby, VP-editorial director for Meredith Magazine Group, Des Moines, Iowa. "Sometimes that means using fewer big pictures and more small illustrations to communicate clearly and quickly."



For Better Homes & Gardens, art makes information easier to use.

Some editors and publishers pooh-pooh the notion that magazines must bend and sway to accommodate reader trends. "We don't put out a magazine that tries to pander to what the reader wants," says Henry Muller, *Time* managing editor. "We think readers have a compact with the editor—a bond of trust. Readers want an editor's judgment."

Nevertheless, *Time* has added and subtracted special departments to cover timely topics. In the last 10 years, sections on computers, health and fitness, food and ethics have been added. The 1970s energy department has been retired.

According to *Time* Publisher Robert Miller, the magazine's appearance also has changed in recent years to accommodate more four-color layouts, more pictures and many more charts and graphics.

Advertisers generally give the new upgraded magazines good reviews, and in some cases have designed special campaigns for a better fit. Although demographics are still a top consideration, advertisers and media buyers say they've considered more than numbers when buying space.

"There truly is a ruboff," says Walter Staab, president of SFM Media Corp., New York. "If you've got an attractive, evocative ad, an attractive editorial environment certainly helps it along. If the environment isn't right, it detracts from what you're trying to accomplish."

Mr. Staab believes readers and advertisers ultimately pay for a magazine's posh look, but that isn't necessarily a problem. "We're not putting all our eggs in the cost-efficiency basket," he says. "We're much more willing to trade cost efficiency for some of the other benefits of association with a quality magazine. Editorial environment, credibility and the feeling a magazine evokes . . . are all important."

Sheldon Wardwell, advertising manager for Ford Motor Co.'s Lincoln-Mercury division, agrees. "We look for the right demographics," he says. "But editorial is important. Good paper quality, the look and credibility of a magazine could give it an edge over a competitor. We would exclude a magazine for poor editorial content."

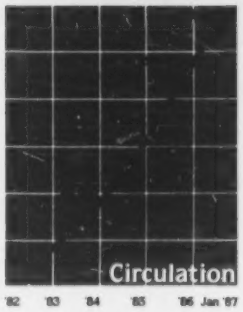
Upcoming titles will continue the trend toward beautiful magazines, says industry scholar Samir Husni. "Most of the new magazines coming out are edited for the eye rather than the brain," says Mr. Husni, head of the service journalism program at the University of Mississippi, Oxford.

Mr. Husni says magazines have entered the "age of skimming. Eighty percent of the information given comes from the story titles, the subheadings, the captions and the pictures."

WOULD YOU PAY $1,350 FOR A MAGAZINE?

Online Today readers already have—and they're looking for ways to spend more.

Before the average *Online Today* readers even saw their first issue, they had already spent approximately $1,350* (and often more) on their computer system and peripherals. That figure includes a subscription to CompuServe, the largest (and still growing) online information service in the country. As a CompuServe subscriber, our spender receives *Online Today*, the monthly magazine with features devoted exclusively to computers and communications.



These high-tech trendsetters are also looking for the newest and the best in electronics, stereos, cameras, cars and computer accessories. And isn't that the kind of people you want your ad to reach?

An ever-growing audience.

An ad that appears in one issue of *Online Today* is seen by more than a quarter of a million computer-owning readers. And because CompuServe adds approximately 8,000 subscribers each month, an ad that runs for a year gets seen by even more new readers.

High-tech, high income.

According to CompuServe's March 1986 Subscriber Study of *Online Today* readers:

- **average household income is $48,000**
- **54% are college graduates or above**
- **76% are males 25-55**
- **81% are professionals, managers, executives or proprietors**
- **6 hours a week are spent reading magazines**
- **15 hours a week are spent using computers**
- **100% are computer owners; 60% use them for both business and personal needs**

Reach the big spenders without spending the big bucks.

A buy in *Online Today* is extremely cost-effective. It's an excellent value based on such a select audience.

For a complete media kit, contact the *Online Today* representative in your area:

U.S. car makers weak on image

SAN FRANCISCO—U.S. automakers suffer from image problems, particularly with young people, according to a national study.

The study, conducted by Landor Associates here, claims U.S. cars have weak and often unfocused images. American cars were seen as bland, less prestigious than their European competitors and less reliable than their Japanese counterparts.

Based on interviews with 1,000 people last July, the study compared the images of 24 leading car brands. It focused on the appeal of the cars' logos and badges.

The study said that marketing similar models under different divisions confused would-be customers, especially those under age 35. For example, many of those surveyed were able to identify the symbols for Ford, Chrysler and Chevrolet. But fewer than half of those interviewed could identify the symbols of Pontiac, Buick or Mercury. Older people were less confused by the strategy. Nearly three-quarters of the sample could link related divisions, such as Cougar/Mercury/Ford.

The domestics also had weak image ratings, according to the Landor study. Collectively, Detroit carmakers scored slightly higher than average in the "practical" category but significantly lower in the "sporty," "fun" and "innovative" categories.

Landor's conclusions: U.S. automakers project weak images to both high-end buyers seeking prestige, luxury, reliability and innovations, and to the low-end buyer in search of economy, practicality and fun. "The American consumer no longer has a clear image of what American cars stand for," said John Diefenbach, president-ceo.#

Cigars' slide continues

By JOHN C. MAXWELL

The cigar industry last year remained caught in the downward momentum that has persisted for more than 20 years.

In units, the large-cigars category fell 5.5%, cigarillos were down 2.9% and little cigars were down 20.3%.

Overall the market was down 9.0%. As has been true in the past, the only area of growth was the premium group, 50¢ or more each.

The industry continues to consolidate. Consolidated Cigar Corp., Secaucus, N.J., purchased the American Cigar brands last summer, and Jno. H. Swisher & Son, Jacksonville, Fla., bought Universal Cigar in December, having already purchased Corral Wodiska in October 1985.

RJR Nabisco, Winston-Salem, N.C., has announced its intention to get out of the cigar business.

It may arrive at a point where there will be only three or four companies left in the cigar business.#

Mr. Maxwell is with Furman Selz Mager Dietz & Birney, New York.

Dunkin' Donuts gains popularity

Brazil does doughnuts

By JULIA MICHAELS

SAO PAULO—Dunkin' Donuts is on a roll in Brazil.

After a slow start, the treats have been repositioned to meet Brazilian tastes, and the local stores expect to make an operating profit for the first time since opening here in 1983.

The turnaround partly is due to changes made since Arbi SA Comercio e Empreendimentos bought out the U.S. company's 50% share of the Brazilian operation in 1985. The locally owned operation now operates under license from Dunkin' Donuts Inc., Randolph, Mass.

The food outlet has not been advertised in the traditional sense, but one key to success has been specially developed shopping mall kiosks as low-cost, high-traffic points of sale. In Brazil, the kiosks have been vital in educating consumers about doughnuts.

Michael Brull, local partner-director, adapted the original stores to make filled, yeast-raised doughnuts similar to the Brazilian *sonho*, instead of the cake-type preferred in the U.S.

Yeast doughnuts take three hours to produce; cake doughnuts take 30 minutes.

Dunkin' Donuts installs an on-site kitchen for cake doughnuts at each U.S. outlet. In Brazil, Mr. Brull set up a central kitchen, from which partly or fully finished doughnuts are transported to the outlets.

Four stores and five kiosks operate here. There are plans to open two more stores by yearend.

"American names are attention-getters," Mr. Brull said. But the varieties of many Dunkin' Donuts menu items were misunderstood here. For example, "macaroon" on the original menu boards often was interpreted as macaroni.

Cinnamon rolls, Boston cremes and French crullers meant little to Brazilians, Mr. Brull said.

The chain eventually translated some of the English-language names and printed a paper placemat explaining items such as brownies, cookies and muffins.

Press Bureau, a local agency, created the placemats and handles Dunkin' Donuts' very small ad account here.

Mr. Brull estimates Sao Paulo could support 20 stores plus 20 kiosks. It will take him about four more years to set them up, he said.

Locals have approached Mr. Brull, wanting to take the Dunkin' Donuts name beyond Sao Paulo. "In less than a year we'll be talking about other cities," he said.#

Merck prepares to advertise new anti-cholesterol drug

RAHWAY, N.J.—Merck & Co. is readying a campaign for its Mevacor cholesterol-reducing drug, following approval of the drug by the Food & Drug Administration.

The campaign kicks off late this month in 30 medical journals (AA, Sept. 7). Gross Townsend Frank Hoffman, New York, handles.

Mevacor is the trade name for the drug lovastatin, which has anticipated first-year sales of $1 billion.#

Fla. governor caves in

Calls ad tax 'a mistake'

By STEVEN W. COLFORD and JO BETH McDANIEL

An embarrassed Florida Legislature is expected today to start repeal of the controversial tax on advertising that its patron, Gov. Bob Martinez, concedes was a major disaster for Florida, for business and for his own political future.

The Legislature's anticipated erasure of the unprecedented 5% tax on national and local advertising got a major boost Sept. 18 when Gov. Martinez acknowledged publicly the tax was a "mistake" and should be buried effective Jan. 1.

Barely an hour after Gov. Martinez hoisted the white flag, leaders of the Florida House and Senate indicated they will consider eliminating the tax on advertising and services that was to raise $750 million in its first year, but only if a substitute revenue-raiser can be agreed on.

Although the Legislature had been expected to consider repealing the tax even before the governor's endorsement, the turnabout by Gov. Martinez was expected to sway fence-sitters.

It is doubtful that the Legislature will be able to agree on changes to the existing law, or implement an entirely new tax law, during this week's three-day special session. Legislative leaders indicated another special session next week is likely.

Pressure on Florida's governor and lawmakers to change or repeal the tax, which took effect July 1, had mounted steadily since April, when it became clear that the Legislature was caving in to the governor's pleas for passage. It intensified as major advertisers announced plans to eliminate Florida from their advertising programs.

Although a Martinez spokesman denied the governor's change of mind was influenced by the advertising industry's financial pressure on Florida, that opinion was disputed by others, including Glenn Robertson, the state's director of policy and finance.

Mr. Robertson said the estimated $200 million in canceled advertising and convention business in Florida "had a big economic impact that really hurt us."

Also, anti-tax ads "definitely swayed public opinion," he said. The "ads did exactly what they were intended to do. Hostility toward the tax increased since February from 54% to 79% . . . during the period of advertising."

The Florida Association of Broadcasters and other local groups mounted local ad campaigns denouncing the tax.

Sen. John Vogt, a Democrat and president of the state Senate, whose support was

Energizer's Jacko says he's gonna surprise ya. Terrify is more like it.

Jacko gives jumpin' jolt to Energizer's campaign

By BOB GARFIELD

AD REVIEW

Oy, this is so complicated.

For the past two weeks an Australian football star/pop celebrity named Jacko, who looks like the mutant sibling of either Brian Bosworth or Max Headroom or both, has been yelling at us about Energizer batteries by Eveready, which used to be a Union Carbide company and now is part of Ralston Purina Co.

Jacko, who is 28 but looks 58, explodes on the screen doing a sort of Australian rap song, while slamming through doors and physically toppling competing brand batteries and generally looking bizarre.

"What's the longest lasting battery you can buy?" he shouts. "I'm gonna surprise ya. New Energizer."

He had done much the same thing in Australia, where he was already famous for recording novelty songs and videos, which opportunity he seized by playing Australian Rules Football, which combines the best of rugby and nuclear fission and can be seen on ESPN any day

Hoyne, Jacoby sell off some Ogilvy shares

By JON LAFAYETTE

NEW YORK—The likelihood of an Ogilvy Group takeover diminished last week as two ex-Ted Bates Worldwide executives revealed they had sold off some of their shares in the group.

John Hoyne, the former head of Bates' international unit, said he sold a portion of the 80,000 shares—less than 1% of the company—that he purchased earlier this year. Mr. Hoyne helped put Ogilvy stock "in play" last month (AA, Aug. 17).

Former Bates Chairman Robert Jacoby also revealed last week that he sold all his 30,000 shares in Ogilvy Group in late August, not long after takeover rumors drove up the stock's price by $9 per share from late June.

Both Mr. Jacoby and Mr. Hoyne were linked together in the attempted takeover move against Ogilvy in August, when the shares were accumulated and Ogilvy was approached. Neither ex-agency executive works for an advertising agency now.

Mr. Jacoby bought his shares in late June or early July for about $33 each and sold them in late August for about $42 each, thereby netting a quick $270,000 profit. He said he sold the shares

Last Minute News

GSD&M wins Coors creative

GOLDEN, COLO.—Adolph Coors Co. has moved creative for its flagship Coors beer to GSD&M, Austin, Texas, from Foote, Cone & Belding, Chicago. FCB retains media-buying for the brand—which billed about $40 million in measured media in 1986—and creative and media for Coors Light, Herman Joseph's, Herman Joseph's Light and Killian's Irish Ale. GSD&M, which has handled Coors' hispanic marketing since 1983, immediately will start filming new Coors TV spots, using Mark Harmon. The commercials will break this fall.

ABC signs with Nielsen

NEW YORK—ABC-TV renewed its contract with A.C. Nielsen Co. Sept. 18 after going almost a week without a ratings service, sources said. ABC was the last of the Big 3 networks to renew its Nielsen contract. ABC said the contract was unique because it includes provi-

Minnelli touts Lauder, P. 4 | Mercury stops pop, P. 68 | Fast-food ads rising, P. 84

Highlights

Liza with two Z's 4

Come November, two intense rivals, Estee Lauder Inc. and Revlon Group, will find themselves in the odd position of sharing the same endorser—Liza Minnelli. She will appear in a 30-second TV spot for a new men's fragrance by Lauder, called Metropolis. Through November and into December, Revlon still will be using Ms. Minnelli in its "Most unforgettable women" campaign. Revlon executives were unaware of Ms. Minnelli's Lauder deal until only hours before Lauder's announcement.

Ford revs new ads 6

Ford's 1988 ad campaign lauds the automaker's recent successes under an umbrella theme that positions Ford as "the one car company that's winning the world over." The theme is designed to celebrate Ford's market gains in the U.S., including its new position as the top-selling brand.

Add water and watch it grow 24

The $1.7 million bottled water category is brimming with competition as soft-drink, beer and spirits marketers pour into the fastest-growing segment of the beverage business. Fueling the highly regionalized water business' growth in part is the entry of marketing-minded companies such as PepsiCo and Anheuser-Busch Cos. The category's appeal for such competitors prompted Perrier Group to protect its No. 1 position by acquiring Arrowhead Drinking Water Co. from Beatrice Cos. for an estimated $500 million.

Gordon giggles at Brits 26

Gordon's gin is targeting a younger crowd with a new campaign that pokes fun at its British heritage. Magazine advertising uses puns to identify Gordon's with England. One ad shows Stonehenge under a moonlit sky and the headline "England. Known for its famous rock groups." Another shows a silhouette of Sherlock Holmes under the headline "England. Known for its stately homes." The campaign is the first Gordon's advertising from Schenley, which bought the rights to produce Gordon's in the U.S. when it acquired Renfield Importers.

Political roundtable 30

What are the media and marketing issues facing political experts as they prepare for the 1988 campaigns? ADVERTISING AGE gathered five top political consultants for a roundtable discussion in Washington.

GE brings better things to life 56

After years of selling to the masses, General Electric Co. wants to bring good things to the lives of the select few who earn more than $100,000 a year and live in homes valued at $400,000 and up. The appliance-market leader is about to introduce an integrated line of built-in appliances for the custom kitchen market; the new Monogram line is GE's first foray into upscale niche marketing. It also represents a departure in terms of advertising: The line will be advertised in magazines only, with a $4 million campaign. That's minuscule compared with GE's TV budget, for which network spending alone totaled $51.4 million in 1986.

INTERNATIONAL

U.S. candy producers expand in Canada 53

Mars Inc. and Hershey Chocolate Co., the two biggest candy producers in the U.S., are boosting their presence in the $750 million Canadian candy market. The expansion is taking place through acquisition and increased ad spending despite two consecutive years of 14% sales declines.

OTHER NEWS

Sony Corp. of America's newest consumer electronics line is made for kids. My First Sony is aimed at children ages 4 to 11, a group that appears to be an untapped niche in the market. A three-month, $3 million introductory ad campaign starts in October and uses the theme "After years of giving people smaller electronics, Sony now makes electronics for smaller people." Page 12.

The Ladbroke Group, buying the Hilton International Co. hotel chain from Allegis Corp., will extend the Hilton name to new markets and to a lower-price chain of inns. The deal also gives Ladbroke a foothold in the U.S. through Hilton International's five Vista hotels. Page 34.

William Esty Co. is bolstering its management in Southfield, Mich., and will open a new office in Canada to handle its Chrysler Corp. business, which could grow to about $140 million. Page 36.

Postal Instant Press is trying to assert its leadership in the $5 billion quick-printing industry with a new campaign appealing to corporate customers. Three humorous 15-second network TV spots, directed by Rob Lieberman, break today. Page 30.

The New York Times Magazine Group this winter will launch a new skiing magazine that promises to throw snow on the traditional way ski magazines are published and marketed. Page 80.

Seagram gets discount rate from Gannett

By PATRICK REILLY

In a major breakthrough for liquor marketers, Gannett Co. and its 89 daily newspapers will offer Jos. E. Seagram & Sons the same special discounted national ad rate they now extend to package-goods companies.

Although some major-market newspapers already have said they will accept national liquor ads at the discounted rate, Gannett's decision marks a new willingness among newspaper groups to include a category generally excluded from the medium's Package Goods Rate Plan (AA, Dec. 15, *et seq.*).

"It's a sign we are making progress," said Bernie Stolbof, VP-media for House of Seagram, the U.S. marketing arm for New York-based Seagram's distilled spirits. "What we've been seeking is parity between the local and national rates. We expect more papers will have offers after Gannett."

Under the plan, national ad rates for food, drugs, toiletries, household products and cosmetics companies are being cut by about 30%. However, the rate still is an average 25% higher than comparable local rates.

The plan is an 18-month test designed to boost the newspaper industry's share of national advertising.

Like the industrywide plan, the Gannett discount is based on frequency and size of the ads.

The newspaper industry is not united on the discount rate issue. When the rate plan was proposed in June by the Newspaper Advertising Sales Association, 258 daily newspapers—or 52% of all U.S. circulation—agreed to offer the discounts.

But several major papers, such as *The Washington Post*, haven't agreed to participate.

"In general, publishers will be conservative and hold back because for some the discount plan is a concession," an industry source said. "But it's a matter of looking into the future and asking, 'How can we get more national advertising?' It's a step forward."

Traditionally, national advertisers have paid up to 60% more for news-

(Continued on Page 87)

Critics blast 'Captain Power'

Rules mulled for kiddie TV

By STEVEN W. COLFORD

WASHINGTON—A new "interactive" children's TV show, linked to Mattel Inc., was attacked last week at a House hearing that opened a new drive to re-regulate TV programming aimed at kids.

The drive seeks to restore federal rules that until 1984 limited the number of commercial minutes per hour of children's TV programming and imposed other restrictions. Legislation to revive the rules was filed last week by six Democrats on the House telecommunications subcommittee.

The new interactive program, "Captain Power & the Soldiers of Fortune," which debuted Sept. 19, came under fire by subcommitee Chairman Edward Markey (D., Mass.) and Action for Children's Television President Peggy Charren because it interacts directly with the toy on which it's based.

Hailed as breakthrough programming (AA, Feb. 16), "Captain Power" viewers can participate in its futuristic live action adventures if they buy Hawthorne, Calif.-based Mattel's battery-powered XG7 "power jet." The toy can be fired at the TV screen for five minutes during the program with the show "firing back."

The power jet retails for $30 to $40 and is one of several toys available for purchase in conjunction with the program.

While Mattel insists that the toy and program can be enjoyed independently of each other, the two are essentially being advertised within the same commercial, themed "The

(Continued on Page 86)

Egg commission reviews agencies

UPLAND, CALIF.—The California Egg Commission, seeking a more hard-sell approach in its advertising, is putting its $4 million account in review.

Ketchum Advertising, San Francisco, the commission's agency of three years, will be included in the competition, said CEC President Robert Pierre.

Healthcare Marketing

Troy Thomas

Balancing act tough in ailing market

By Julie Liesse Erickson

After nearly a decade of experimenting with miracle cures, the healthcare marketing industry is prescribing familiar remedies.

Advertising has not proved a panacea for the financial and competitive challenges resulting from industry reorganization. Neither have other wonder drugs such as health maintenance organizations, urgent care centers, outpatient surgery, home healthcare, hospital diversification, chain insurance ventures or "branded" healthcare—all of which generally have left many healthcare practitioners poorer and disillusioned.

In response, healthcare marketing is moving into a conservative era that emphasizes providing quality care and building bridges with physicians—who again are perceived as hospital gatekeepers.

"The top issue in healthcare advertising is quality, and how to express it," says Arthur Sturm, president of Chicago-based Sturm Communications Group, an ad agency specializing in healthcare clients.

In a just-released study of 1,600 healthcare executives and opinion leaders, 91% agree that by 1995, the industry will have defined and accepted standards for quality treatment. The study, conducted by accounting firm Arthur Andersen & Co. in conjunction with the American College of Healthcare Executives, concludes that to maintain market share, healthcare facilities must establish data-gathering systems to monitor quality—and then report the results in advertising to consumers and employers.

"A lot of consumers and employers are looking for tangibles in the quality area," Mr. Sturm says. "But how do you express quality in your advertising, without quoting mortality rates?"

That tactic has caused cries of outrage from

Balancing act tough

(Continued from Page S-1)
healthcare professionals in New York and other markets. Even seemingly innocuous ad claims—such as a Milwaukee hospital billing itself as "the best and brightest"—still raise eyebrows.

"I think consumers make their assessment of a facility's quality based on three factors: the degree of technical sophistication or specialization; the caliber of the medical staff, and the quality of the experience for both doctor and patient," Mr. Sturm says.

But as consumers become more sophisticated about healthcare, they'll seek out more concrete information when comparing hospitals, HMOs and doctors, says Daniel Beckham, president of Arlington Heights, Ill.-based HealthMarket, a healthcare marketing consultancy.

The development of "Consumer Reports"-style ratings of healthcare facilities will increase; already in some states, including Minnesota and Pennsylvania, private concerns are selling this kind of information to employers.

"To a large degree, healthcare has operated under a veil of secrecy," Mr. Beckham says. "It's an old tradition to not talk about your patients, let alone other doctors."

Addressing the quality question, however, may be advertising's last operation for a healthcare industry bent on keeping up with the latest technologies. "Very few hospitals have the resources to have the ultimate healthcare center and still have dollars to drive demand," Mr. Sturm says.

"The big question for the future of healthcare advertising is how facilities are going to allocate their resources."

"What we're seeing this year is a much more conservative approach to healthcare marketing in general," says Karen York, president of Los Angeles-based York Alpern, an Omnicom Group ad agency specializing in healthcare marketing.

"The newest trend is a move toward everything old," says Mr. Beckham. "There's been a lot of experimentation over the past five years. It's been good for the industry because it learned a lesson; but it's too bad all the money and resources were wasted."

Advertising is a prime scapegoat. "I think in the majority of cases, hospitals haven't seen a return on their advertising investment," Mr. Beckham says. "I see a resulting real downturn in spending—maybe not on a total industry figure, but on a per-hospital basis."

Not everyone is willing to make that blanket statement. Estimates from SRI Gallup Hospital Market Research, Chicago, show ad dollars for hospitals and hospital chains increasing to $726 million in 1987, up 45.2% from last year. That means advertising will consume 61.5% of hospital marketing dollars, which SRI Gallup predicts will increase 7.2% to $1.18 billion, this year.

The U.S. Department of Commerce pegs healthcare as a $455 billion industry, accounting for about 10.9% of the 1986 U.S. gross national product.

SRI Gallup also reports that 91% of the nation's nearly 7,000 hospitals advertised in 1986, up from 64% in 1985. By 1990, the company predicts, hospital advertising will represent a $1 billion business.

Much of the increase is coming from the South, where SRI Gallup expects hospitals to boost ad spending to an average of $122,500 this year, up 75% from 1986. Southern hospitals are playing catch-up with their counterparts in other parts of the country; in the North Central states' more advanced healthcare market, SRI Gallup actually projects a decrease in average ad spending, to $114,800 this year. The average ad budget is pegged at $227,700 in the West and $94,000 in the Northeast.

"The increase in advertising expenditures will continue," says Steven R. Steiber, SRI Gallup senior VP-research and development. "Although there's been a lot of press for the naysayers, hospitals still have to take their message to the marketplace, particularly in a more crowded marketplace."

Besides the costs, individual hospitals are controlling the impact of advertising. "The chains have been under the greatest pressure to get their act together and offer marketing programs which individual hospitals can use," Ms. York says. "But corporate marketing has not been very successful. The chains can package programs with terrific creative, but it's still up to the hospital-level marketing personnel to implement—and there is a dearth of hospital-level marketing managers," she says.

Because of their inability to offer consumers broad-based, standardized healthcare, "The chains are focusing on specializing," Mr. Sturm says.

"Advertising has never received consistent support [from the chains]. I'm not sure they know what to do to leverage their market share."

When individual hospitals do choose to advertise, top executives more frequently are involved in the decision making. "The key to the future of hospital marketing is the involvement at the hospital ceo level," Ms. York says. "That represents a critical change for the industry. Ad agencies too often work with the marketing department just as paper suppliers work with the purchasing department—as mere vendors."

But although more marketing professionals are breaking into healthcare, less than 1% of U.S. healthcare ceo's are estimated to have marketing experience, says Stephen W. Brown, professor and executive director of the First Interstate Center for Services Marketing at Arizona State University, Tempe.

Healthcare marketing executives are rethinking advertising's role. In a 1986 SRI Gallup study of 250 U.S. hospital marketers, 23% said the primary goal of increased ad expenditures is increasing patient volume. In a similar 1984 study, by contrast, 36% of the respondents listed public relations as marketing's principal responsibility. This bottom-line mentality leads industry experts, including Mr. Steiber, to predict an increase in advertising impact research.

"Remember that marketing still accounts for less than 1% of the average hospital's revenues," he says. "That's not much money to spend on advertising, and most of it has gone to creative development; until now, hospitals haven't had the money to measure anything but top-of-mind awareness."

The messages researchers are tracking have changed substantially from even a year ago. "Image marketing is a thing of the past," Ms. York says. "Product or service-line marketing, which replaced that, is even more effective."

The emphasis on products and services has helped healthcare marketing executives sidestep the question of defining their ultimate consumer: the doctor who admits patients into hospitals; the consumer who frequently chooses between hospitals and urgent care centers; or the employer who, by selecting from available insurance and HMO plans, helps direct where employees will be treated. Specific services, such as women's health or children's psychiatric programs, have clearly defined targets.

Specialization has led to the development of new forms of delivery systems, Ms. York says. "Most center around a trend toward contract management: hospitals buying services rather than developing their own. Many are asking whether they can be the supermarkets of healthcare services."

"You'll be seeing more joint ventures between hospitals and physician groups in setting up urgent care centers, cardiology programs, ambulatory care centers and other specialized facilities," says Mr. Brown, author of two books on physician marketing.

While doctors use entrepreneurial ventures like these to regain leverage in the industry, HMOs may become a less powerful component of the healthcare delivery system.

Minneapolis, often considered a bellwether for the U.S. healthcare industry, shows signs that doctors, employers and consumers are becoming

Quality, cost controls meet in middle

By Diane Stafford

A commonly prescribed antibiotic used to prevent infections in cardiovascular surgery patients at Minneapolis' Abbott Northwestern Hospital was costing each patient about $155 a day, or nearly $600 per patient for the prescribed period.

The hospital's annual bill for this drug was $900,000—a price once paid without question.

However, with some tough cost-cutting goals from hospital administrators and a three-year study completed in 1986, a newer antibiotic is now costing patients just $62 a day, which means an annual $600,000 savings for Abbott Northwestern.

Diane Stafford is Advertising Age correspondent in Kansas City, Mo.

Charles Peterson, the director of clinical pharmacy responsible for the study, determined the newer antibiotic could be substituted for the commonly prescribed one with no change in the quality of care.

In the multi-billion-dollar healthcare industry, $600,000 doesn't sound like much. But it's an example of the don't-overlook-anything attitude gripping a field trying to hold down healthcare costs without sacrificing the quality of care.

"Doctors often prescribe medication without knowledge of the cost," says Mr. Peterson. "In this study we monitored one drug therapy to make sure we were using the most cost-effective medication. We weren't."

Healthcare providers and consumers are learning to apply Mr. Peterson's lesson to all medical relationships: "Good communication, that's

Cheaper but similar drugs, good communications define times of managed healthcare

the key," Mr. Peterson says. "In our case, we got the clinical pharmacists working with the physicians to prescribe more cost-effective therapies."

Skyrocketing insurance and healthcare costs, coupled with more stringent payout standards by Medicare and Medicaid, have sent consumers, businesses, insurance companies and care providers scrambling to hold the bottom line.

"We have entered the era of managed healthcare," says Leonard Brauner, manager of healthcare consulting at the Kansas City, Mo. office of Laventhol & Horwath, an accounting firm. "Employers and insurance companies are creating financial incentives to encourage consumers to look at less expensive options. And the impact on the care provider is an emphasis on productivity."

The first round of cost-cutting at hospitals—primarily labor force reductions—was easy because "there was so much fat before," Mr. Brauner says. Now, hospital administrators are learning to apply cost-benefit analysis to each department or service, he says.

Departments showing the most cost-effective profit potential are the ones that frequently get the hospital's marketing emphasis.

At Sherman Hospital in Elgin, Ill., a back-injury screening program is meeting both cost-effective and open-communication goals.

In the last year, marketing costs of about $4,000 covered two direct mailings—a total of 3,000 pieces—newsletters and personal visits to ceos and benefits managers. Maggie Springer & Associates, Appleton, Wis., a healthcare marketing agency, handled development and marketing.

At a cost of $42 a session, the hospital's occupational health specialists are working with certain businesses to examine their employees' backs in 45-minute screenings that include evaluation of posture, general strength, weight, flexibility, overall fitness and previous back injuries.

"Forty-two dollars may sound like some out-of-pocket expense that employers might not want to pay," says Connie O'Neill, business relations manager at Sherman, "but compare that to a back X-ray that's probably $65 at the minimum and $150 for different angles.

Balancing act

(Continued from Page S-2)
disenchanted with HMOs.

Figures from Steve Hillestad, VP-marketing for Minneapolis' Abbott Northwestern Hospital and its holding company, Lifespan Inc., show HMO enrollment in the Minneapolis area has grown steadily in the past five years—HMOs and preferred-provider organizations control 40% to 45% of the market—but has leveled off during the last 18 months.

So far, Mr. Hillestad says, "It's a myth that people are rushing to disenroll from HMOs and going back to fee-for-service arrangements; if anything, they're switching to another prepaid plan. There's been a lot of public press about HMO woes. We believe it may lead to HMO disenrollment, but we won't know until . . . January."

In response to perceived low payment from HMOs, physicians in the Twin Cities have discussed the possibility of unionizing. However, most industry executives don't believe doctors have the interest or need to organize.

"As more of the U.S. population gains experience with care under an HMO, you'll see more disenrollment," Mr. Beckham says.

"HMOs are a fine solution for many people, but not for all," Ms. York says. There's a problem at the decision-maker level; promised cost savings haven't been realized."

"Patients are just beginning to realize they have a choice in healthcare," Mr. Hillestad says. "Once everyone realizes this, service delivery will have to be very high." AA

BROGAN KABOT ADVERTISING HAS SENT A LOT OF PEOPLE TO THE HOSPITAL.

To Detroit's biggest, most prestigious hospital. In just one year we helped create a major increase in clinic visits with our national award-winning broadcast, print, outdoor and direct mail advertising. We've also done successful advertising for their affiliated community hospital, specialty centers, suburban clinics, breast center, chemical dependency center, 3 HMO's and a PPO.

We'd like to perform the same operation for other hospitals in other cities. So if your medical advertising needs intensive care, call Karen Cashen or Marcie Brogan at (313) 353-9160. (We'll even tell you who our clients are and show you our work for them.)

Ad growth edges up

By R. CRAIG ENDICOTT

The 100 leading national advertisers increased their U.S. advertising spending only 3.4% to $27.17 billion in 1986 as they continued the struggle in world markets that hit them even harder in 1985 when ad spending grew only 2.7% over the previous year.

Those markets proved inhospitable to the leading advertisers in the aggregate. They forced down net earnings 7.3% to $53.3 billion as sales grew 8.3% to $1.13 trillion, according ADVERTISING AGE's 32nd annual report on the 100 leading national advertisers.

Domestic conditions were only slightly better as the "leaders" operating profits composite grew 0.7% to $33.2 billion on sales of $442.2 billion. (Figures represent only the 54 Leaders that break out U.S. operations.)

The tightening of the ad dollar began at the top of the 100 list. Procter & Gamble Co. retained its No. 1 position even though its ad spending in the U.S. was down 10.3% from 1985, to $1.44 billion. P&G held off No. 2 Philip Morris Cos. at $1.36 billion—an ad budget fattened by the purchase of General Foods Corp. In the 11 advertising media "measured" by various reporting services, however, P&G lost its leading position for the first time in years; Philip Morris Cos., recorded $910 million vs. P&G's $834 million. It was P&G's heavy spending in such "unmeasured" areas as direct marketing, special promotions, couponing, co-op spending and point-of-purchase material, etc., that kept it ahead of the fast closing food, tobacco and beer giant.

In 1986 Betty Crocker got a facelift, the Quaker man, a mod-look, Wrigley reverted to a five-pack at the same per-stick price, and the Army and Air Force clung to old ad themes with new agencies. More style than substance?

P&G dropped 7% to $456.3 million in year-to-year spending on network TV, although it outdistanced Philip Morris, No. 2 in that medium. Network TV accounted for 43% of the 11 media in 1986 for the 100, down 0.4 percentage points from 1985. Philip Morris led all others in magazines, however, spending $230.1 million in the medium. Magazines accounted for 15.9% of the 100's total measured media, down from 16.1% in 1985. RJR Nabisco was a distant second at $135.7 million. PepsiCo surged past P&G to lead spot TV spending with $257 million, as P&G totals fell 17.7% to $233.9 million. Spot TV climbed to 22% of all media used by the Leaders, up from 21.7% in 1985.

Aside from spot TV, the only other media that grabbed a higher percentage of the 100's media spending in 1986 over 1985 were network radio, up from 1.8% to 2.4%, and business publications, up from 1.2% to 1.3%. Sears, Roebuck & Co., ranked No. 3 in total advertising, claimed the top spot in network radio, blowing away the competition with a $47.7 million expenditure, a 129.1% year-to-year increase for the retailer and more than double network radio spending for runner-up Warner-Lambert Co., ranked No. 12 overall.

P&G was one of 38 companies in the top 100 to have reduced ad spending. Among the top 10, the only other advertiser to pare its budget was No. 4, RJR Nabisco, at $935 million, down 6.2% from 1985 largely because of the divestiture of Kentucky Fried Chicken, Heublein Inc., Canada Dry and Sunkist soft drinks.

Rapidly rising national advertising spending among major retailers and the rapidly diversifying regional Bell companies kept the 100 Leaders' chart in flux.

Newcomers this year include No. 75 Bell Atlantic Corp., No. 78 Nynex Corp., No. 97 Pacific Telesis Group and No. 100 BellSouth Corp. Retailers include No. 88 Zale Corp., No. 98 Federated Department Stores, No. 99 May Department Stores, and food retailer No. 82 Kroger Co. E&J Gallo Winery, No. 71, came in on the coattails of heavy wine-cooler spending, and No. 94 Hewlett-Packard Co. spent heavily on a corporate "What if . . ." campaign touting its computer applications technology.

Dropping off the list through the acquisition route were Chesebrough-Ponds, bought by No. 19 Unilever N.V., and Eastern Airlines, purchased by Texas Air Corp. By virtue of the EAL buyout, Texas Air climbed to No. 60 (from No. 192 in the second 100 Leaders list). Only parent companies qualify for listing.

AD AGE will profile the second 100 Leaders in a special report Nov. 23. Included in that report will be Leaders from 1985 that dropped below the $82.8 million cutoff this year—Apple Computer, Canon Inc., Capital Cities/ABC, Cotter & Co., Gulf & Western, George A. Hormel & Co., Matsushita Electric Industrial Co., Mattel Inc., Union Carbide Corp. and Van Munching & Co.

There was a correlation between reduced earnings and reduced advertising, especially among the foreign-based Leaders, whose repatriated dollars declined in value as the year progressed. Beecham Group PLC, No. 55, Nestle S.A., No. 30, and Seagram Co. Ltd., No. 91—each experiencing a slippage in U.S. returns in 1986—all spent less on U.S. advertising, according to AD AGE estimates.

Earnings were conspicuously down

(Continued on Page 2)

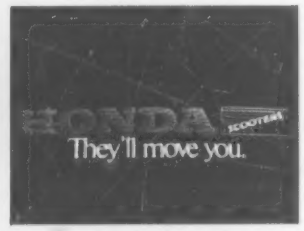
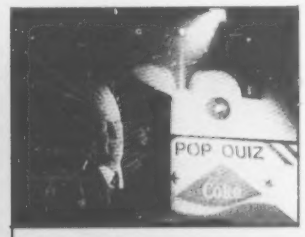
'America' and 'success' oozed from this tableau of a dapper, satisfied Chairman Lee Iacocca posing with Chrysler Corp.'s new Jeep line gained early this year in the buyout of American Motors Corp. Chrysler also reached an agreement to increase its stake in Maserati SpA to 51% over the next eight years, purchased exotic car marketer, Lamborghini, and announced it would re-enter Europe.

"An American legend has come home again. Jeep, and the people of AMC, are now part of Chrysler.
That's good for us. Good for you. And good for America."
We just want to be the first.

If General Motors can match the success of its Chevrolet division's 'Heartbeat of America' campaign, the economic state of the U.S. is sure to improve—if the adage that links GM and USA bears any truth. 'Heartbeat,' a campaign directed at women that mixed rock with quick vignettes, raised Chevy's percent of GM cars sold from 38.9% to 42.4% from June 1986 to June 1987. Agency is Campbell-Ewald, Detroit.

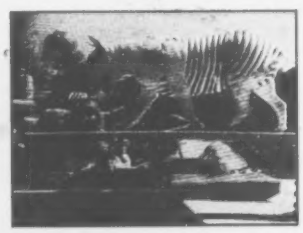


Grainy footage filmed in 8mm gave spots for Honda's Elite 50 model and top-of-the-line Helix motorscooters a documentary feel in a $10 million campaign launched in May 1987. The teen-oriented scooters pulsated Honda's bottom line and gave Honda an 83% share of the U.S. motorscooter market.



Promotional spending and direct response advertising are becoming larger pieces of the nation's total ad pie. Here the two are merged in S.C. Johnson & Son's sponsorship of a national tour by rock band, Night Ranger. Products pushed are Agree, Johnson's teen-age and young-adult positioned haircare line, and Edge shaving gel.

Cccomputer-head Max Headroom lent its talents to New Coke ads and pushed ad recognition to No. 1 among all commercials in 1986 in audience recall, according to Video Storyboard, which estimates Coca-Cola spent about $48.3 million in 1986 for the spots. That comes out to a cost-efficiency of about $12.07 cpm. Max is the creation of Peter Wagg, a former U.K. adman.



Anheuser-Busch's presenter, Spuds MacKenzie, gets the 'ooh's and 'aah's from the young girls in his Bud Light cameo appearance. Spuds, a three-year-old English bull terrier who is dubbed the Original Party Animal, has become a cult pooch among the college crowd—all of which makes A-B wondrously happy as its barrelage keeps flowing while shipments of most other brewers' remains flat.

American Express Co.'s 'Do you know me' campaign may have become tired, but it would be passe for sure with AmEx's current retinue of endorsers for its 'Membership has its privileges' replacement campaign. Among the glitterati is 'Tip' O'Neill, former Speaker of the House, who is finding a lucrative trade in peddling everything from charge plates to Hush Puppies.

Match the faces to the Hush Puppies.
No one in America matches more faces to more shoes with more comfort, style and affordability than Hush Puppies shoes. America's best loved shoes.
To find out where to buy these and over 130 other Hush Puppies shoes, call 1-800-288-0800.

Ad growth edges up

(Continued from Page 1)

among Japanese automakers, although their ad budgets increased across the board. Greater spending probably occurred because the auto market, marked in 1986 by heavily-advertised finance discounts and souped up offerings, requires more persistent ad weight than consumer markets of the other foreign Leaders. The slump in the dollar and a parallel rise in the yen—up 40% against the dollar in 1986—put the squeeze on margins of export-oriented Japanese carmakers.

The companies are trying to shore up their weaknesses in several areas—from the well-publicized construction of U.S. auto plants that will shift production and sales to dollars and permit circumvention of voluntary import restraints, to the introduction of luxury/performance cars that should help restore margins.

In addition, one-time writeoffs from divestitures and corporate restructuring often were the culprits that caused earnings to drop precipitously in the year-to-year period. Genesis of such writeoffs was rooted in several areas. Companies restructured to prevent corporate raiders from gaining voting control of their stock. They bought up their own stock, paid greenmail, or sold off units to pay for such payoffs—all of which showed as negatives on the balance sheet.

Companies ran for cover in 1986 and 1987 when Ronald O. Perelman, chairman of No. 57 Revlon Group, came to town. Two 100 Leaders initiated anti-takeover measures to avoid his clutches. CPC International, No. 68, repurchased 20% of its outstanding common stock following a run-in with Mr. Perelman. Gillette Co., No. 62, thought it had shaken off Mr. Perelman when it bought his 13.9% accumulation of stock. But last month he approached the Gillette board intending to make another offer, and the company promptly put on hold all new product introductions perhaps through 1988 to generate more cash flow and boost earnings.

Restructuring or its many synonymous expressions usually brought reduced advertising and higher earnings, the latter padded with receipts from divestitures. Campbell Soup Co., No. 42, sold off its restaurants and dog food operation to go "back to the basics" of selling soup, fresh and prepared foods and specialty bakery goods. Its advertising dropped an estimated 5.3% while earnings rose 12.8%. CBS Inc. sought to become "more efficient," a road that ultimately became littered with budget cutbacks, staff reductions and a renewed focus on the broadcast and records segments. Its advertising spending grew by a hair, 0.7%, while net income rose meteorically because of selloffs. Colgate-Palmolive Co., No. 36, sold off "non-core businesses" and cut advertising an estimated 4.9% to help earnings grow 62.2%.

The most obvious impact of downsizing and/or restructuring is that in the resulting corporate mix there were fewer products to advertise. RJR Nabisco, for example, spun off units that account for about $120 million in measured media spending. Restructuring even reached into the company's agency lineup and produced sizable agency shifts that often put ad campaigns on hold until new creative could be produced by the new shop.

Economic conditions that led to restructuring on a regional or local basis also will affect advertising in the future—in reduced commissions and a shift of ad responsibility from the corporate suites of the mega-ad centers to local markets.

General Motors Corp., No. 5, clipped commissions to 12.5% in the summer of 1986. GM—whose earnings dropped 26.4% while sales grew only 6.7%—reportedly is headed toward 9%, although that will be compensated by paying fees for collateral work formerly done free.

Nestle S.A., hurt by the declining dollar and collapse of coffee prices, went out looking for economies. Its subsidiary, Carnation Co., found them by slashing two to three percentage points from commissions paid agencies and by cutting its own payroll 10%. Nestle is considering a worldwide agency fee system now that product movement and promotion are gaining on media-generated brand-building advertising. Philip Morris's General Foods this year began looking into ways of cutting agency commissions.

General Foods is experimenting with a new marketing approach that would give regional managers control over a portion of the marketing, promotion and ad budgets traditionally handled by a home office brand manager. It is testing the concept by assigning local campaigns to local agencies rather than agencies of record.

In fact, many of AA's 100 Leaders are gearing their marketing strategies toward maximizing regional and local markets—as a means of responding more quickly to changing consumer needs and tastes. Campbell Soup reorganized its sales force, giving local sales managers more say in developing products, advertising and marketing strategies. J.C. Penney Co., No. 15, sees its future in regionalization of its retail operation. It is moving corporate headquarters to Dallas from New York, and making its merchandise and marketing mix more compatible with regional consumer buying patterns by giving buying responsibilities to local operations.

Seagram Co. Ltd. has replaced the four national spirits companies of its House of Seagram—the U.S. marketing arm for distilled spirits and wine coolers—with a single sales force, one marketing unit and centralized administration. Restructuring is meant to fine-tune Seagram's marketing on the local level where grocers, liquor store chains and large independent stores have grown highly influential in retailing of distilled spirits and wines.

Ironically, advertising agencies probably contributed to the slow growth in advertising out of their push to grow even larger. Consolidation of agencies into corporate holding companies, a la Saatchi & Saatchi PLC and Omnicom Group, led to wholesale account shifts because of agency conflicts. These shifts left accounts in dangling and campaigns on hold. They affected such big spenders as P&G, No. 16 Pillsbury Co., No. 28 Quaker Oats, Nestle, No. 27 Mars Inc., and Colgate-Palmolive.

While 1986 was short on sales and earnings, it wasn't short on products. There were 2,530 basic products introduced in the year by all marketers, up 14.7% from 1985, according to "Gorman's New Product News." One area of heavy growth was analgesics, stimulated by a rush of new ibuprofen-based products as the exclusive marketing rights granted No. 22 American Home Products Corp. and No. 26 Bristol-Myers Co. expired in September 1986.

Looking ahead, there is RJR Nabisco's new smokeless cigarette. And Gillette has ceramic blades on tap, but their introduction may depend on when Gillette can rid itself of Mr. Perelman.

Hertz	1,600	497	N/A

Allegis Corp., formerly UAL Inc., began 1987 with a new name and a new mission: to cross-sell its travel services through a synergistic plan that provides passengers with easy access to its Hertz Corp. car-rental unit, Hilton International and Westin Hotel chains and the flagship United Airlines, the largest single carrier in the free world.

The grand strategy was orchestrated by Chairman-CEO Richard Ferris, accompanied by a $7 million ad blitz "in celebration of travel." Initial signs proved promising: Airline passengers in Denver, Washington and other cities could check their luggage and pick up tickets while returning cars at the Hertz counter. The brand loyalty paid off in the form of points awarded participants in the company's Mileage Plus frequent-traveler program. And the company cautiously reported positive consumer acceptance of the plan.

But the vagaries of corporate life doomed the Allegis travel supermarket concept before it really had a chance to take off. Shareholders unwilling to pay the price and impatient for short-term gains in an intensely competitive industry grounded Mr. Ferris' plan as well as his career at Allegis. The airline's pilots now are seeking control of the airline, a development that spurred Mr. Ferris' ouster.

In June, Allegis' board of directors voted to sell off all but United Airlines itself, which will become the parent company's new name by yearend. Additionally, the company will sell as much as a 49% stake in Covia Corp., the rechristened parent of its lucrative Apollo computer reservations system.

Prompting the directors' actions were losses at United Airlines and anticipated costs of fully integrating the three units.

In 1986, what was then known as UAL Inc. posted earnings of $11.6 million, compared with a prior year loss of $48.7 million, on operating revenues of nearly $9.2 billion, a 44% gain.

For the first six months of 1987, Allegis Corp. earned $42.8 million, compared with an $84.6 million loss a year earlier, on operating revenues of $5.25 billion, a 22% gain.

Companywide, Allegis spent $303.7 million on worldwide advertising during 1986, a 52% jump from 1985 and more than double the $136.7 million spent in 1984. Much of the increase is attributable to the Hertz acquisition and the Allegis name change, budgeted for 1986, as well as increased promotional spending and marketing activities for United's new Pacific routes.

United Airlines again proved to be the largest drag on corporate profits, and remained by far the largest revenue contributor despite acquisitions in Allegis' other travel segments.

United posted a net loss of $80.6 million in 1986, slightly below its $88.2 million loss of 1985, on operating revenues of $7.1 billion, up 34%. The company termed these results "disappointing," saying they reflected higher operating expenses and the airline's $715.5 million purchase of Pan American World Airways' trans-Pacific routes, which United began serving in February 1986.

Aging equipment and service problems plagued United's early months controlling that service, as did increased marketing competition from chief rival Northwest Airlines, Eagan, Minn.

United accounted for 77% of corporate revenues in 1986, compared with 83% in 1985. The company acquired Hertz Corp. for $587.5 million in August 1985 and Hilton International for $980 million in December 1986 capping a period of little more than a year in which it spent nearly $2.3 billion on acquisitions.

Despite the losses, United remained the dominant single-brand airline. For the first six months of 1987, United commanded a 16.9% share of the domestic airline market, second only to the amalgamated Texas Air Corp., Houston, whose Continental and Eastern Airlines hold a combined 19% market share through earlier consolidations of People Express and New York Air.

In 1986, United had a 16% share of the domestic airline market, substantially improved from 1985, when the airline was plagued for several months by a bitter pilots' strike. The strike, though eventually settled, set the stage for a looming takeover battle as the Air Line Pilots Assn. seeks to make good on its bid to acquire the airline. In August, the pilots lured Piedmont Aviation Chairman-CEO William Howard to become head of United if the bid succeeds. Allegis officials have vowed to fight the overtures.

United's marketing efforts, through longtime agency Leo Burnett USA, Chicago, last year focused on domestic route expansion and on Pacific routes in a separate introductory campaign that began in February 1986. The airline added Washington's Dulles International Airport as a major hub, joining Chicago/O'Hare, Denver and San Francisco as major "feeder" gateways. Dulles provides a new north-south connection along the eastern seaboard.

As part of the Allegis strategy, the company's United Vacations unit stepped up its plan to market weekend and other vacation packages with other travel units. Joint United/Hertz deals in Florida and the West were offered on short notice to solve logistical problems when, for example, the company needed 500 cars moved from Denver to Phoenix. More permanent ways to capitalize on the connection came from Hertz and Westin through travel packages in Asia and elsewhere.

Hertz itself earned $49.2 million in 1986 on operating revenues of nearly $1.6 billion. Prior-year figures were not available, because UAL acquired the company in August 1985 from RCA Corp.

The car-rental and leasing company broadened its service-oriented campaign last year via Scali, McCabe, Sloves, New York, with a new theme: "You don't just rent a car, you rent a company." Supporting that claim were "exclusive" features such as computerized driving directions to unfamiliar areas.

Hertz remains the largest car-rental company, with nearly one-third of airport rentals. Hertz raised its corporate pricing structure in 1986 after several years of profit-draining price wars with Avis, National and Budget. Industrywide profit levels are expected to increase in 1987 as companies earn more from rentals, collision damage coverage and the general increase in domestic vacation travel.

Westin Hotels earned $75.2 million in net earnings, a 199% gain, on revenues of $491.6 million, down 2%. The earnings gain came mainly from the sale of certain hotels, including the Westin Chicago and the Westin St. Francis in San Francisco, to capitalize on a favorable tax structure. The company continues to manage those and other properties.

The leading national advertisers spent $27.17 billion in 1986 in advertising in the U.S. for a 3.4% increase over 1985 levels. Of the total, $14.78 billion was in 11 measured media, with network TV claiming 43% of that. Media spending was 47.5% of all expenditures in those 11 media, down from 48%.

Although sales for American Brands Inc. reached record levels in 1986, many of the American Tobacco Co. products to which much of the company's success is tied continued to lose market share. This decline, continuing into 1987, is likely to have little impact on sales because of new revenues coming in from recent acquisitions—particularly the spirits division of National Distillers & Chemical Corp.

Cash-rich American Brands was thought to be a potential takeover target in mid-1986 as its stock began trading at a brisk pace. Nothing materialized. However, later in the year American Brands made a $2.8 billion bid for Chesebrough-Pond's Inc., which it later withdrew when topped by a $3.1 billion offer from eventual winner, Unilever N.V.

The aggregate market share of the company's domestic brands was only 7.2% in 1986 against 7.5% in 1985. In the first half of 1987, that share decreased even further to 6.7%, according to John Maxwell Jr., analyst at Furman Selz Dietz Mager & Birney, New York,. Sales for domestic tobacco declined by $15.1 million.

While American Tobacco Co. products were losing market share, the company's measured ad expenditures have dropped. In 1986, measured media dollars in the seven media monitored by BAR/LNA was $30.6 million, or 48% of total measured media advertising. Total measured media include four other media—spot radio, newspapers, business press and farm, none of which supply ADVERTISING AGE with brand data. In the case of cigarette marketers, the heaviest medium is traditionally newspapers. In 1985, the BAR/LNA advertising total was $31.7 million, or 58% of total measured media. Declining ad expenditures also have continued into the first half of 1987.

Among its cigarette brands is the new Malibu brand, a lower-priced cigarette first tested in December 1986 and now being introduced nationally, with advertising support heavy at the in-store level. Other major brands—all of which are handled by Laurence, Charles, Free & Lawson, New York—include Carlton, Lucky Strike, Tareyton, Silva Thins and Pall Mall non-filter. D'Arcy Masius Benton & Bowles, New York, handles Pall Mall Red Filter.

Carlton received $22.2 million in measured support for its nine-item line, down 7.5%. Carlton has a 1.9% share of the market, which has stabilized after dropping from 2.1% in 1982, according to Mr. Maxwell. Pall Mall's received only $3.5 million for its Filter King and Light 100s. It bears an 0.6% share of market, which has declined from 1% in 1982. No measured support was monitored in the seven BAR/LNA media for Tareyton, the company's No. 2 brand. It has a market share of 0.9%, a decline from a 1.3% share in 1982. Lucky Strike's gained slightly in market share from 0.4% in 1985 to 0.5% in 1986.

In 1986, American Tobacco began a restructuring operation. It involved a 15-

Fictitious New World Wheels PLC is ranked 50th among the 100 Leading National Advertisers picked by AD AGE in this issue and based on total U.S. ad spending in 1986, which is reported in this box under Worldwide or U.S. bold headings.

New World Wheels PLC is based in London, and the exchange rate is indicated in the profile.

NWW reports on a calendar basis like most of the top 100. However, should a company report on a fiscal basis, the years heading column would read 1987 and 1986, if the fiscal data occurs before this issue was published.

The advertising figure is a composite of NWW's media spending, both measured and unmeasured, contained in the tabular breakout at the end of the text in each profile. See "Where AD AGE got its data" on Page 14 for an explanation of the tabular breakout.

Division sales for comparable years are for the business segments as defined by NWW. However, should NWW have too many divisions to fit into the box, the editors combined those segments into "other." In this case, NWW segments for its skateboards and roller skates divisions—both providing minor contributions to its strong transportation products divisions—were merged into "other."

month phased closing of the company's 100-year-old production facility in Durham, N.C., and moving to another plant in Reidsville, N.C., about 45 miles away. The company's stemmery in Richmond was closed in the first quarter of 1987. The moves resulted in a $73.4 million restructuring charge in the third quarter of 1986.

In the first half of 1987, American Brands had net income of $238.2 million, up 10% from 1986. Operating income for the first six month was $520 million, up 9%. Net sales were $4.8 billion, up 19%. Tobacco accounted for $2.86 billion or about 60% of the company's net sales.

James B. Beam Distilling Co. finished 1986 with a record fourth quarter, but its operating income declined 13% to $35 million on sales of $254.5 million, up 1.9%. The company claims that it holds 19% of the U.S. bourbon market, compared to 17% for 1985. It spent $2.6 million in 1986 in the BAR/LNA seven media for six products, including Jim Beam Bourbon Whiskey, Jim Beam Schnapps Spritzer and Kamora Imported Coffee Liqueur.

The food segment, which consists of Sunshine Biscuits Inc. and Taylor Food Products Inc., a unit of the James B. Beam subsidiary, posted sales of $532.7 million, up 5%, and operating income of $28.1 million, up 2.6%.

Sunshine, which has 13% share of the cracker market and 7% share of the cookie market, according to D[illegible]mple, analyst at Salomon Broth[illegible] York, spent $1.7 million in mea[illegible]vertising in 1986. Sunshine includes [illegible]o's, Hydrox and Cheez-It among its offerings.

New introductions in 1986 included Cheez-It Low Salt snack crackers and Hydrox Doubles, which contain a second flavor in the center in addition to the regular cream filling. Agency for Sunshine Biscuits is Sherwood & Schneider, New York.

In the competitive cookie market, Sunshine is a distant second to RJR Nabisco, which holds a share of about 40%. Sunshine claims about 8%.

The Andrew Jergens Co., which comprises the personal care products segment of American Brands, had operating income of $10.8 million, up 16%, and sales of $154.1 million, up 4.8%. Jergens spent $7.7 million in measured media in 1986, the same as in 1985, according to BAR/LNA.

The company made several acquisitions in 1986. In July, Forbuoys Ltd., a subsidiary of American Brand's Gallaher Ltd., acquired NSS Newsagents PLC, the U.K.'s largest independent chain of retail newspaper, tobacco, confectionery and stationery outlets, at a cost of about $126 million.

American Brands acquired Bonny Products Inc., a U.S. manufacturer and distributor of kitchen utensils, to supplement the housewares line of the Prestige Group. Pinkerton's Inc., a subsidiary, bought the assets of BASIX Controls Systems Corp., a business specializing in electronic security systems. The total cost of the Bonny Products and Controls Systems acquisitions, along with several smaller businesses, was about $28 million.

At the same time that the company picked up several non-tobacco businesses, it sold American Cigar Co. for $14 million in July 1986.

Acquisitions have continued in 1987. In April, American Brands' James B. Beam Distilling Co. purchased the spirits division of National Distillers & Chemical Corp. for $545 million cash. The division includes several well-recognized brands, such as Old Grand Dad bourbon, DeKuyper Liqueurs, Windsor Supreme Canadian Whisky and Gilbey's Gin.

At presstime, American Brands was completing a purchase of Acco World Products Inc., an office equipment company, to fit with its Swingline Inc. and Wilson Jones Co., which specializes in office products. The price is $602 million.

In late August American Brands announced it was putting up for sale Taylor Food Products, makers of Mr and Mrs "T" Bloody Mary and other cocktail mixes. Taylor Foods, which only brought in $22 million in sales for 1986, suffered lower profits in 1986. The company attributes the decline in sales to a reduced demand for distilled beverages and to introductory costs for Ramlosa Sparkling Mineral Water, which was introduced into the East and West Coast markets.

Agricultural	873	859	1.7
Chemicals	948	972	(2.4)
Shulton	555	539	2.9

American Cyanamid's Shulton USA Division, its largest advertised segment, which markets personal care, liquid cleaning and insect control products, was joined by two of the other three American Cyanamid segments in recording sales and operating income growth for 1986, turning around a dismal 1985.

Shulton, the only segment to have survived 1985 with growth in both sales and operating income, remains the smallest segment in a company that is placing more emphasis on its medical group through acquisition and product development. Medical is the second most advertised segment, with most of the spending in the segment pulled by Lederle Laboratories for Caltrate 600 calcium tablets, Centrum vitamins and FiberCon laxative.

Shulton reshuffled its product lineup in 1987 by selling its Jacqueline Cochran Inc. division to Sanofi, a Paris-based multinational pharmaceutical, cosmetics and fragrance company. The division marketed L'Air du Temps, La Prairie line cosmetics, Grey Flannel men's fragrance, Niki de Saint Phalle perfume and Pierre Cardin fragrances and colognes. Only the Pierre Cardin line was retained. It was transferred to the Shulton division.

According to K.M. Freeman, VP-marketing for Shulton, the reportedly slow-growth division "didn't fit in with group priorities and long-range goals."

Heavy ad support continued to back the Old Spice line of men's aftershave, cologne, deodorant and antiperspirant. Seven lines account for more than $13.4 million in measured spending in 1986, virtually the same as in 1985.

Old Spice, priced in the lower-middle market, remains the largest men's fragrance brand in the world, with wholesale volume topping $180 million. One major advertising campaign last spring linked Old Spice with the National Football League in a Rookie of the Year voting promotion.

This October, Old Spice will introduce "Night Spice cologne," which, at $10 for two ounces, is just about double the price of Old Spice four-ounce fragrance and is designed to appeal to a younger, more upscale customer. Scali, McCabe, Sloves is developing the $4 million ad campaign.

In a big shakeup early in January 1987, Ted Bates resigned the Cyanamid account to avoid conflicts with Procter & Gamble. Bates is now Backer Spielvogel Bates in the advertising empire of Saatchi & Saatchi PLC, whose S&S DFS Compton unit is a longtime P&G agency. Cyanamid also dropped DFS (Dancer Fitzgerald Sample) from its agency lineup.

Carryover agency Carrafiello Diehl & Associates, which handles Combat insecticide, picked up Lady's Choice antiperspirant handled by DFS, and Pine-Sol handled by Bates. New agency, Scali, McCabe, Sloves gained Old Spice deodorant and antiperspirant from DFS, plus Old Spice aftershave and cologne and Breck from Bates.

In the household products area, Pine-Sol's cleaning formula was improved, a new plastic bottle introduced and the line expanded with a pump spray cleaner. Measured advertising spending for Pine-Sol was up 2% to $9.2 million in 1986, mostly in network TV ($6.8 million), while spot TV was down substantially.

Nonetheless, increased competition, particularly from companies who want to get into the popular "pine scent" business, has kept market share for pine-scented cleaners about even, with Pine-Sol the leader with an approximately 17%-19% share in manufacturer dollar sales. The nearest competitor is thought to be Clorox's Formula 409 with a 10%-12% share. However, in the larger surface cleaning industry, Pine-Sol ranks fourth behind Procter & Gamble's Mr. Clean and its Spic 'n Span, and Sterling Drug's Lysol.

Shulton's Combat insect control systems' market share is an estimated 6% of the household insecticide market, far down the line from S.C. Johnson's Raid, which has an estimated 45%-50% share, and American Home Products Corp.'s Black Flag, with 20%. More recent Combat introductions include a bait product for rodents and aerosol spray for flying and crawling insects. Combat is supported with $3 million in measured spending, up from $2.9 million in 1985.

Earlier this year, the Lederle Laboratories division brought out FiberCon tablet laxative to go up against P&G's Metamucil brand, which has a reported 65% market share. Lederle backed its marketing program, kicked off in March, with some $15 million. P&G spent $5.3 million in measured media in 1986 on Metamucil.

In June 1986 Lederle was asked by the New York attorney general's office to stop promotions that claimed its Stresstabs vitamins can reduce the effects of psychological and physical stress. It also reimbursed the state with $25,000 to cover the cost of investigation, while admitting no wrongdoing.

Lederle's Caltrate 600 line received $6.6 million in measured spending, up 22%, and spending on Centrum vitamins dropped slightly to $6.1 million.

Research facilities are being expanded in an $85 million building program at Lederle Laboratories in Pearl River, N.Y. Under construction are facilities for cardiovascular and central nervous system research. The company also is completing an $8 million facility for the Medical Device Research Division in Danbury, Conn.

Greater emphasis is being placed on the Medical Group through the creation of a Medical Device Division, which comprises Davis & Geck surgical products, medical instruments and equipment, and two 1986 acquisitions, Acufex Microsurgical Inc., a supplier of arthroscopic surgical devices, and Storz Instrument Co., a leader in ophthalmic instruments.

The company says such acquisitions are part of the Medical Group's strategy to broaden its position in specialized medical devices "to capitalize on emerging markets for less invasive and more cost-effective surgery."

Last August, Harry M. Meyer Jr., former director of the U.S. Food & Drug Administration's Center for Drugs and Biologics, was named president of the Medical Research Division.

Difficulties in the farm economy put a crunch on fertilizer sales, which affected growth of only 2% in sales for the agriculture segment. In October, Cyanamid withdrew from the U.S. upgraded phosphates fertilizer market when it leased its phosphate rock processing plants to International Minerals & Chemical Corp. and sold the rights to its rock reserves. Sales in the chemicals segment dropped in 1986, primarily because of the divestiture of its U.S. titanium dioxide business in mid-1985. In 1986, the company purchased approximately 75% of the common stock of Applied Solar Energy Corp., a producer of solar cells, from Chesebrough-Pond's for $37.7 million, in a move to complement Cyanamid's electronic chemicals business.

American Dairy	64.4	N/A	N/A
Nat'l Dairy Promo.	60.9	N/A	N/A
C.O.W.	N/A	N/A	N/A

U.S. dairy marketing promotion is in a state of mega flux. While the advertising and promotional money comes from one source—the dairy farmer—the three caretakers of those funds operate under different mandates. While they often operate in concert promoting dairy products, they can speak with a different voice. This has caused change in the way ADVERTISING AGE reports on the year's national dairy advertising in this special issue. What was previously listed as American Dairy Assn. will now be referred to as American Dairy Farmers.

This profile, while merging the ad dollar totals for the players in the U.S. dairy advertising, shows each player as a distinct program. Each has its differences. In the background is a kind of white noise, not quite static, accompanying their stated purposes and competitiveness.

One of the lead players in American dairy promotion is the American Dairy Assn., which in previous years, lent its name to the title of this profile. ADA is the marketing/advertising unit of the United Dairy Industries Assn. The UDIA is an organization of dairy farmers, processors and equipment makers formed to promote the sale of dairy products. The existence of the ADA, established in 1940, is justified in the credo of its parent, the UDIA, which is to sustain support of a single national dairy promotional organization which will merge the talents and resources of existing dairy promotional groups under one board of directors and chief executive officer.

The National Dairy Promotion and Research Board (NDPRB), created by the U.S. Congress in its Dairy & Tobacco Adjustment Act of 1983, began especially in this past year to move out energetically with its own dairy programs. Emphasis is on manufactured dairy products. However, in the coming year NDPRB will back away from advertising milk, leaving that to UDIA, and stressing cheese and butter.

The third group is the West Coast dairymen represented by COW, the acronym for a cooperative promotion program conducted by the dairy commissions of California, Oregon and Washington. COW is attempting to build a regional marketing promotion which its supporters feel they understand better than the national groups and which they feel the national groups have neglected. In practical fact, COW continues to work with the ADA and NDPRB in making media buys and coordinating efforts.

The biggest present unifying factor in dairy marketing promotion is dollars, generated by a contribution of 15 cents per hundredweight of milk produced. This contribution, mandated by the Dairy and Tobacco Adjustment Act of 1983, is broken down into three 5 cent allotments-5 cents can go to the NDPRB for its marketing promotion programs; the other two nickels can go to regional and national organizations, like UDIA and its members, for both national and regional or local promotion. The UDIA states that it represents 95% of U.S. dairy farmers who are producing 86% of milk marketed in the U.S.

How big is the national milk advertising pot? Based on recent dairy herd counts totalling 9.5 million, potential dollars can be calculated by multiplying that figure by the average annual milk production per cow in pounds, or 12,495 lbs. of milk, dividing by 100 (for hundredweight) and multiplying by 15 cents. The result: a potential dairy promotion budget of about $177.4 million. According to the most recent counts and estimates including amounts not directly reported in media monitoring, the 1986 total spent for dairy product marketing promotion was approximately $144.3 million.

Changes made during the past year by these major dairy promotional organizations in their accounting for expenditures have caused discrepancies between the total expenditures they claim for advertising in 1986 and the counts made during the year by media-monitoring organizations such as LNA/BAR.

Using these counts for 11 media, ADVERTISING AGE shows total spending for 1986 as $125.8 million.The UDIA estimates it spends $60.9 million and NDPRB $64.4 million. An annual $19-$20 million budget finances COW promotions. COW's estimated 1986 media spending included $15 million by California, $1-$1.25 million by Oregon and $3.5-$4 million by Washington.

The NDPRB expenditures are essentially for national buys, both network TV and print. In allocating monies from the mandated 15-cents contribution, the board in effect has retained for itself the spending for manufactured products plus marketing of fluid milk to younger consumers.

Major ad programs of the NDPRB in 1986 included $8 million for young adult milk promotion; $6 million for children's milk; $22 million for cheese; $7 million for butter; $16 million for dairy calcium; $5 million for ice cream; $200,000 for non-fat dry milk and $1.5 million for an information program directed at the health professions.

The ADA also made its biggest expenditures in 1986 for network TV, but that was only a little more than a third of its $60.9 million ad budget, or $22 million. Other spending was $16.4 million for spot TV and $8 million for spot radio. In-store displays at the dairy case were a major factor at $7 million. The major part of ADA national advertising reportedly is with adult fluid milk, the REAL seal identity program and some manufactured products.

On the West Coast, COW is only receiving national funds from NDPRB to support adult fluid milk advertising. If COW wants to advertise manufactured

"What do I have to do to get 'local' rates in The Houston Chronicle?"

Just increase your frequency with a Chron-Flight* schedule.

"How does Chron-Flight work?"

Most advertisers space their ads throughout a quarter or entire year. But with Chron-Flight, you can concentrate your ads into flights, going to short-burst, high-impact schedules similar to your broadcast buys.

"And Chron-Flight gets me a 'local' rate?"

You bet. Because you're not only getting a substantial Chron-Flight discount, you're also getting your usual frequency discount. The end result? A cost-per-page that is so rock-bottom, you'll think you're off the rate card.

Now your client will be getting the "local" rates that have been in the news lately.

"But won't more ads—even discounted—cost more?"

Actually, you'll spend less. The Chronicle delivers your target market at a very affordable rate. You'll get the maximum frequency discount by placing 100% of your ads in The Chronicle. So don't split your advertising between different newspapers.

"Wait. Isn't Houston a two-newspaper town?"

Yes, Houston has long been known as a two-paper town—and those top two are the Sunday Chronicle and the daily Chronicle.

Surprised? You shouldn't be. The Chronicle's circulation lead over the Post is overwhelming—more than *95,000 daily and *175,000 Sundays.

So The Chronicle, all by itself, delivers the market to advertisers.

It takes only one daily insertion in The Chronicle to reach as many adults as two in the daily Post.

And check what happens on Sunday: One ad in The Chronicle reaches as many Houston adults as five ads in The Post. Here is the big picture.

Total Adults

	1 ad	2 ads	3 ads	4 ads	5 ads
Daily					
Chronicle	40%	48%	53%	56%	58%
Post	32	40	44	47	49
Sunday					
Chronicle	53	62	66	69	71
Post	38	45	49	51	53

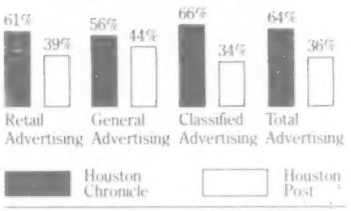
Source: Simmons 1987 National Study of Local Newspaper Ratings, Houston P.M.S.A.

"But which newspaper do advertisers choose?"

The smartest ones are in The Chronicle. They've made us the clear, number one choice in Houston. We lead in every single category of advertising, as you can see here.

So when you bring your national advertising campaign into Houston, use the "local" rate structure of Chron-Flight to make the most of your budget.

Chronicle vs. Post Market Shares



Source: Houston Chronicle internal inch reports, first six months, 1987. Includes full and part run ROP inches. Preprint inches are excluded.

"How can I get a Chron-Flight schedule?"

Just call your Houston Chronicle rep. Get full details on how increased frequency gets you the "local" rate. Today in Houston, Chron-Flight makes your dollar more powerful than ever before.

"Call the Chron-Flight Hot Line at 713-220-7761."

Note: Dollars are in thousands.

daily products like cheese and butter, it must raise its own funds. Says Sheldon Pratt, ceo of the Oregon Dairy Products Commission: "We won't develop our own cheese, or own butter programs. There's no point in duplicating the national programs." He then adds, "After all, there's more than enough money to go around in this industry for the dairy promotion we need."

In a significant agency change, the NDPRB in July 1987 switched the $22 million national cheese account from D'Arcy Masius Benton & Bowles, Chicago, to DDB Needham, Chicago. The Board had become dissatisfied with what it considered the too-highfalutin, gourmet flavor of D'Arcy's "Cheese, glorious cheese" (played to the tune of "Oliver's" "Food, Glorious Food"). DDB Needham's alternative was a more homey "Don't forget the cheese" proposal.

McCann-Erickson, San Francisco, which handles advertising for calcium, is doing the creative for adult fluid milk in western states and will start on "tweens" fluid milk in 1988. It lost children's fluid milk in August 1987 to Scali, McCabe Sloves, New York, which will pick up the account in the fall of 1988. For the ADA, DMB&B, Chicago, continues with adult fluid milk and REAL seal promotion.

New to the top chairman post at UDIA in 1986 was J. Douglas Webb, a Vermont Dairy farmer who replaces James P. Camerlo. Mr. Camerlo left to take the same position at the National Milk Producers Federation.

After 15 years of gently challenging consumers with the classic "Do you know me?" TV campaign, American Express Co. is taking the "guesswork" out of its advertising by boldly touting famous cardholders. The company also seems poised to revolutionize the credit card industry with its new Optima card, which bears a finance charge that lowballs competing cards.

The company has adopted a two-pronged strategy to promote its cards. The effort began in March with a TV campaign using the theme "Membership has its privileges" that highlights the style and level of services provided to cardholders.

In June AmEx began a print campaign called "Portraits" (photographed by Annie Leibovitz) depicting famous cardholders and their length of membership. The group included former Speaker of the House Thomas "Tip" O'Neill, singer Amy Grant, athletes Willie Shoemaker and Wilt Chamberlain, opera singer Luciano Pavarotti, songwriter Quincy Jones and America's Cup skipper Dennis Conner. It takes a soft sell marketing approach.

The old campaign was "getting a little tired," says Edwin M. Cooperman, president of Consumer Card Group, USA, part of the company's Travel Related Services Co. The new Ogilvy & Mather campaign sharpens distinctions between American Express cards and others by stressing service through the membership concept.

The new approach drew a tart response from Visa USA, which ran ads with headlines such as "Membership has its disadvantages," accompanied by a map of Madrid identifying the larger number of establishments taking Visa over American Express. Mr. Cooperman says, "Most consumers feel fairly negative about that," adding the effort is actually promoting the new Optima card.

American Express' new themes follow a year of solid increases in AmEx advertising. The company increased total measured spending 12% to $134.5 million in 1986. Most of the increase was in network TV, up 41.8% to $57.3 million. By contrast, magazine spending slipped 10.2% to $30.1 million.

Big increases as measured by BAR/LNA went to credit card services, up 20.8% to $68.5 million. Travelers check spending was up 39.4% to $15.2 million. General promotion for Shearson Lehman Brothers rose 148% to $12.4 million.

Travel Related Services boosted its total revenues to $6 billion, up 21%, while net income was $599 million, up 16%. The worldwide number of cards in force rose 7% to 23.8 million, while charge volume rose 15%. The number of platinum cards stood at 150,000.

So far in 1987 TRS has launched two

Where Ad Age got its data

ADVERTISING AGE's 32nd annual ranking of 100 leading national advertisers includes 100 profiles and 17 charts. Profiles list marketing executives, current agencies and account personnel, as well as advertising expenditures, sales and earnings figures, market shares and other data.

The 200 largest advertisers in the U.S. are selected on the basis of measured ad spending only. (AD AGE will publish a directory of the second 100 leading national advertisers Nov. 23, 1987.) These 200 companies are then ranked by combined measured and unmeasured ad spending.

Ad expenditures are for U.S. only and reflect calendar 1986 and 1985.

Measured media

BAR/LNA reports supplies the bulk of measured media information. **Magazine** and **newspaper supplements** are supplied to Leading National Advertisers by Publishers Information Bureau. **Outdoor** is supplied to LNA by Outdoor Advertising Assn. of America and Institute of Outdoor Advertisers. **Network TV, spot TV, network radio** and **cable TV networks** are supplied by Broadcast Advertisers Reports. BAR/LNA's seven-media service also supplies brand and category spending by media.

Seven-media totals quoted in corporate profiles throughout this issue include only media listed in the preceding paragraph.

Other media expenditures listed include **newspaper** as supplied by Media Records, **business publications** as supplied by Rome Reports, **farm publications** as supplied by Agricultural Marketing Information Services (AGRICOM) and **spot radio** as supplied by Radio Expenditures Reports. Many thanks to the Radio Advertising Bureau in New York for its help in analyzing spot radio data.

PIB monitors 138 consumer magazines and *New York Magazine*, *Parade*, and *USA Weekend*. BAR monitors ABC, NBC and CBS TV networks; 319 TV stations in 75 top markets with continuous monitoring in New York, Los Angeles, Chicago, Philadelphia, Dallas and Atlanta; CBN, CNN, ESPN, MTV: Music Television, USA and WTBS cable TV networks continuously, and 17 radio networks including seven ABC networks, two CBS networks, three NBC networks, two United Stations networks and the Mutual, Satellite Music and Transtar radio networks.

O.A.A.A. and I.O.A. measure gross sales from more than 200 national poster and paint advertising plants in markets of over 100,000 population. Rome Reports monitors 567 business and trade publications. Media Records tracks 210 daily and Sunday newspapers.

Some measured media expenditures are restated to reflect corporate structure as of Dec. 31, 1986. Companies acquired prior to that date are included in the new parent's ad spending for full calendar 1986 and 1985 totals.

Likewise, units spun off before the end of calendar 1986 are subtracted unless otherwise noted.

Measured-media services vary in the way they track ad spending. Spot radio totals may not include all subsidiaries because RER does not always report full parent company spending. Also, Rome Reports tracks ad spending by division, rather than parent total.

Every effort has been made to give full parent company ad expenditures wherever possible.

These services also vary category breakouts. Category totals appearing in this issue reflect only BAR/LNA total spending, unless otherwise noted.

U.S. Government ad spending figures are supplied by agencies of the Federal government rather than measured-media sources.

Unmeasured spending

Unmeasured advertising figures are estimates and include direct mail, promotion, co-op and couponing to name a few. AD AGE beat reporters and corporate sources assist in providing unmeasured spending.

Sales and earnings

Sales and earnings figures are taken from public documents. Where private companies will not divulge this information, an estimate or an "N/A" is used.

Vol. 58, No. 41—ADVERTISING AGE (ISSN 0001-8899) is published weekly except semiweekly the fourth week in March and the first week in September at 740 Rush Street, Chicago, Ill. 60611-2590. Second-class postage paid at Chicago and additional mailing offices. Send address changes to ADVERTISING AGE, Circulation Department, 965 E. Jefferson, Detroit, Mich. 48207. Microfilm copies are available from University Microfilms, 300 N. Zeeb Rd., Ann Arbor, Mich. 48103. Microfiche copies are available from Bell & Howell, Micro Photo Division, Old Mansfield Rd., Wooster, O. 44691. $1.50 a copy, $59 a year, $104 two years. Add $104 per year for air delivery to Europe & Middle East. Add $34 for surface mail to all other foreign countries. WILLIAM STRONG, VP-circulation; JOHN HUFFMAN, fulfillment director; DAVE KELLEY, circulation manager. Four weeks' notice required for change of address. Address all subscription correspondence to Circulation Department, Advertising Age, 965 E. Jefferson, Detroit, Mich. 48207 (313) 446-0494.

major products: a new card and gift checks. This March, AmEx cardholders began getting applications for the new Optima card, which allows them to charge on a revolving credit base with a 13.5% interest rate. The move came after "customers told us they like to buy on time," Mr. Cooperman says. Optima has a $15 annual fee and is available to U.S. cardholders with clean accounts and at least a year of membership. Platinum cardholders get it for free. Some industry observers predict that the mere presence of Optima may cause competitors to lower their card interest rates in an effort to retain and/or increase customers.

This July, American Express announced a line of gift checks aimed at the $45 billion monetary gift market. In denominations of $25, $50 and $100, the product works like a transferable travelers check. A $4 million ad campaign will run in November and December.

Travelers check sales rose 6.4% last year, to $17.1 billion. For the first half of 1987 sales were up 18% from the same period in 1986, says Thomas Cash, senior VP-marketing and sales for the Travelers Cheque Group USA. An Ogilvy & Mather TV campaign broke in March and will run through September. It depicts the difficulties faced by travelers caught without American Express checks. A radio campaign of 10 spots stresses actual stories of people recounting problem when they did not use the checks on vacation.

The company extended through the end of 1987 its Buyer's Assurance program, which extends the warranties of many products purchased with the card. The Global Assist program, offering emergency medical and legal help to travelers, was extended from platinum cardholders to all members.

In other TRS operations, the Direct Marketing Group USA was formed in 1986 to consolidate direct mail efforts. American Express Publishing Corp. purchased *New York Woman* in January from Esquire Magazine Group Inc., and launched editions of *Travel & Leisure* in Australia and New Zealand in conjunction with Australian Consolidated Press.

Shearson Lehman Brothers had revenues of $4.6 billion, up 42%, with net income of $316 million, up 57%. The marketing continued its "Minds Over Money" theme in two parts—on TV, a "pure corporate image" campaign using the theme of "Seeing the Possibility of Things," while a black-and-white print series called "Where We Stand" gave the Shearson viewpoint on various financial issues.

In February, Shearson switched its weekly newspaper ads from the *Wall Street Journal* to *USA Today*. The move retains an upscale audience but reaches readers with more interest in inquiring about Shearson's financial services, says Ms. Stewart.

Ms. Stewart says Shearson did a higher proportion of its spending in the first half of 1987 to address key economic issues such as new tax laws and stock market activity. Shearson also is spending more overseas—about $1.5 million this year and twice that in 1988. Its print ads run in England and Japan and other parts of Europe and Asia.

Revenues for IDS Financial Services climbed 9% to $2.3 billion, while net income rose 27% to $96 million. Michael J. Rothmeier, vp-client acquisition, says recent marketing has focused on the pre-retirement audience segment—people in the 45 to 64 age range, especially 55 to 64. The marketing stresses financial planning as a key part of pre-retirement. IDS also tested more general TV/print campaigns in Los Angeles and Minneapolis/St. Paul with broader non-retirement themes.

AmEx sold its interest in Warner Amex Cable Communications back to Warner Communications in 1986 as an ongoing part of its selective divestiture strategy.

PRESSURE YOUR COMPETITION LIKE THEY'VE NEVER BEEN PRESSURED BEFORE!

INTRODUCING PRESSURE MARKETING FOR 1988

Welcome a fresh new strategy that puts pressure squarely on the competition in a way that they will find hard to monitor and even more difficult to neutralize.

It's called **Direct Pressure Marketing**™, and its roots come from **JFY Audit America**®, the nation's largest builder of customized brand user audiences.

For the past six years, we have been working quietly with some of the country's largest packaged goods companies under confidential arrangements that have dramatically changed the way they confront competition today.

In one case, **Direct Pressure Marketing**™ began in 1980 and has expanded each year without interruption. In fact, it now represents an important share of this advertiser's annual corporate marketing budget of several hundred million dollars.

And, they have been our oldest and largest customer.

To arrange a private, confidential and quietly informal disclosure meeting with our top management, call or write today. We'll show you just how vulnerable your competition can be, and how you might best apply **Direct Pressure Marketing**™ to your benefit.

Call or write today:

Advil continues to be the fastest-growing over-the-counter product at American Home Products Corp. Housed in AHP's packaged medicines division, the 1984-introduced ibuprofen-based analgesic helped push sales in the division up 26.8% in 1986, far outstripping the modest growth recorded in other areas of the company.

Sales of the pain reliever doubled in 1986 as Advil, produced by AHP's Whitehall Laboratories, amassed a 9%-plus share of the $1.7 billion OTC analgesics category, according to Oleh Denysyk, pharmaceutical specialist with Fairfield, N.J.-based Kline & Co., a marketing consultant company. Advil captured 6% of the overall market in 1985.

But success has its price, and the exclusivity which Advil enjoyed ended last September when the analgesic became open to competition. American Home Products and Bristol-Myer's (Nuprin) were granted two years of exclusive marketing of their ibuprofen products, a marketing grace period allowed by legislation governing new forms of drugs.

Wielding a media budget approaching $47 million, Advil sought to gain a lasting

impression in consumers' minds before competitors could make headway. A caplet version was introduced to complement the familia, orown tablet form.

Whitehall attempted to defend even the exclusivity of its colored tablets from generic competitors. It sued the Allegan, Mich.-based L. Perrigo unit of Grow Group Inc., makers of a brown-colored, generic ibuprofen tablet. AHP ultimately lost the suit. AHP has further segmented the ibuprofen market with its menstrual cramp reliever product, Trendar, which, via a $6 million print and TV campaign from Kornhauser & Calene, is billed as "Today's choice for menstrual pain," in the $50 million segment.

The ibuprofen market segment is worth about $325 million, of which Advil holds an estimated 60%, says analyst, Mr. Denysyk. Advil spending also outstrips its major competitors: Bristol-Myers Co.'s Nuprin, which spent $36.3 million in measured media in 1986, and Johnson & Johnson's Medipren, which spent $12.4 million.

Anacin, another Whitehall product, remained the leading aspirin-based brand. It gained two line extensions in 1986—caplets and coated tablets—while holding a 6.5% share of the analgesics market, according to Mr. Denysyk. Measured media spending for Anacin products grew 8.4% to $45.1 million in 1986, with the largest single expenditure for an Anacin-line product going for acetaminophen-based Anacin-3, which had close to $20 million in measured media support, up 18.3%.

Among other Whitehall products, backing in measured media for Preparation H fell 23.7% to $8.7 million and support for asthma reliever Primatene dropped 33% to $5.6 million. Both products continue to lead their respective segments. Denorex medicated shampoo received $6.3 million, the same as in 1985; and measured spending on Dristan, mostly in network TV, dropped 26% to $14 million.

AHP's Ayerst Laboratories spent $6.3 million in measured media for Riopan antacid, down 22.2%, and introduced Fiber Guard, an all-natural, high-fiber supplement in November. No measured spending showed up in 1986 for the product, which competes in an actively growing reducing aids market dominated by big spending in measured media from Ciba-Geigy Ltd.'s Acutrim ($8.3 million), Schering-Plough Corp.'s Fibre Trim ($16.5 million) and Thompson Medical Co.'s Dexatrim.

AHP sold E.J. Brach Corp. of Chicago, leaving it with two divisions—American Home Foods and Boyle-Midway—in the heavily advertised food and household products division.

Operating profit for the year was up at both American Home Foods and Boyle-Midway. American Home Foods continued to lead the $450 million convenience pasta category with its Chef Boy-Ar-Dee line. Two new products were introduced, including Tic Tac Toe's, a canned convenience food with youth appeal, and a more mature pasta offering, a Panzerotti mix, which currently is being introduced in selected regions of the country. The Chef Boy-Ar-Dee line was backed with more than $13 million in measured spending last year.

AHP's Boyle-Midway launched an all-natural formulation of its leading cooking spray, Pam, which received nearly $10 million in measured media support. The Pam account shifted from BBDO, Chicago, to Young & Rubicam, New York, in 1986. Y&R also got Wizard air freshener, an estimated $3 million account, from Hicks & Greist, New York.

Boyle-Midway spent $5.1 million in measured media on Black Flag insecticides, up 8.5%. It reduced spending by 21% on Easy-Off oven cleaner to $3.2 million and boosted spending 21.2% on Woolite to $14.3 million, the main difference being an increase of $2 million for Woolite Liquid Cold Water Wash.

AHP spent $5.1 million in measured media on Brach candy compared with $6.4 million in 1985. Chicago-based Brach was sold for $730 million in cash in December to Jacobs-Suchard Ltd., a Swiss manufacturer of candy and coffee products.

AHP suffered a setback in the prescription drug market when sales for its heretofore biggest earner, the hypertensive beta-blocker, Inderal, continued to fall because of competition from generics. Ayerst's $275 million in Inderal sales last year represented a 53% drop in gross sales over the prior year. Inderal's recent approval for tremor and pediatric hypertension is expected to enhance sales.

Last fall, the Food & Drug Administration turned down AHP's new drug application for the anti-diabetic Alredase, citing the need for additional tests. The decision could result in a delay of several years for the product. Value Line Investment Survey analyst T. P. Au predicts that AHP will not be introducing any major new drugs in 1987. Last year, AHP's two prescription drug units sold $2.7 billion worth of medications.

Sherwood Medical introduced a revolutionary product into the market in 1986, the Argyle Hepatic Venus Shunt, which permits blood to reach vital organs during lengthy liver transplant surgery.

The new year at American Home Products began with a new chairman-ceo: John R. Stafford succeeded the retiring John W. Culligan, who remains as chairman of the corporation's executive committee and as a director.

AHP offered a reported $2 billion for A.H. Robins Co., Richmond, Va., this past February, but withdrew its bid after reconsidering the litigation risks. Robins is facing bankruptcy proceedings stemming from suits filed by users of its ill-fated Dalkon Shield contraceptive device.

AHP's Sherwood Medical gained Hospital Products Division from Chesebrough-Pond's Inc. in October for a reported $260 million cash. The AHP-acquired division had accounted for 3% of C-P's $2.7 billion in 1985 revenues. C-P's itself was purchased by Unilever.

On Aug. 27, 1987, AHP announced the consolidation of its Wyeth Laboratories & Ayerst Laboratories divisions. The new name is Wyeth-Ayerst Laboratories Division of AHP. The chairman is Bernard Canavan, MD, and Judson St. John is president.

Forty-five miles of road separate Baltimore from Washington. Forty-five miles, three counties and one state line. And that's just a drop in the bucket compared to the distance in terms of reading habits.

So if you're still buying The Washington Post in order to get a foothold in Baltimore, you are way off the mark. Not even close. Which is rather unfortunate considering the mark in question spends a cool $14 billion a year.

That's right. Baltimoreans spend $14 billion a year on products whose advertising they actually get to see. In other words, on products that appear in The Baltimore Sun. The only newspaper than can and does deliver Baltimore. In fact, does it so well, it's now recognized as the third fastest growing newspaper among people with household incomes of $50,000 plus.

So, if you want to reach the Baltimore market, there's only one route you can take. The Baltimore Sun.

American Motors Corp.

RANK 72

Southfield, Mich.

($ in millions)

Worldwide	1986	1985	% chg
Sales	3,500	4,040	(13.4)
Net income	(91)	(125)	27.2
Advertising	116	126	(7.5)

Buoyed by a healthy demand for four-wheel-drive vehicles and improved cost efficiencies, American Motors Corp. began its long-awaited financial turnaround in late 1986 and early 1987, which ended up serving as a prelude to the buyout of AMC in mid-1987 by Chrysler Corp.

The company posted a fourth quarter 1986 profit of $20 million, its first sign of black ink in two years. That was followed by two back-to-back profitable quarters in 1987 when AMC earned $53.6 million. Market share for AMC/Jeep in the light-duty truck category also improved from 4% in 1985 to 4.4% in 1986.

The turnaround for Detroit's perennial also-ran automaker came from the continued popularity of the company's Jeep vehicles and the effects of cost-cutting measures begun in 1985. The company also introduced a variety of new products to compete in segments where it was long absent.

In the 1987 model year, AMC introduced its Alliance GTA, a performance version of its beleaguered Alliance subcompact. AMC also brought its Encore models under the Alliance nameplate and dropped its Renault Sportwagon.

Three Jeep models also received a new optional 2.5 liter, V-6 engine from AMC, giving the Comanche, Cherokee and Wagoneer models extra towing capacity and performance capabilities. Also in the Jeep lineup, AMC added a shortbed pickup truck to its Comanche series. The new model boasted a base price of $6,495 to better compete for cost-conscious young buyers who have been turning to pickups as an alternative to passenger cars.

In March 1987, AMC introduced the 1988 Renault Medallion sedan and wagon models from France to help the automaker compete in the compact market. It also added an ultra-plush version of its Jeep Cherokee—called Cherokee Limited—in order to take on England's Austin Rover $30,000-plus Range Rover sport utility vehicle that bowed in March 1987.

AMC used actor George C. Scott as its company spokesman for Renault products such as the Alliance and Medallion. The actor's 14-month, $1 million contract, which was signed in April 1986, wasn't renewed when it expired in 1987 because of the pending acquisition by Chrysler.

Measured spending on Renault nameplates dropped 40.4% to $22.7 million, according to Leading National Advertisers. Measured advertising for the Encore dropped from $7.3 million in 1985 to $721,000 in 1986, since the model was brought under the Alliance banner. However, the difference was not made up on the Alliance side. Total advertising for Alliance and Encore dropped 105% to $18 million in 1986.

Jeep advertising continued to carry the theme line "Only in a Jeep," and concentrated on the sport utility vehicle's versatility and its new six-cylinder engine for the XJ series.

Measured spending for Jeep nameplate vehicles grew 38.2% to $41.6 million, with the Comanche and Cherokee receiving almost equal spending of about $14 million each, both up about $2 million from the prior year.

AMC announced that Jeep will become the official truck and sport utility sponsor of the 1988 Olympics in Seoul, South Korea. Several merchandising and media promotions are planned in connection with Jeep's Olympic tie-in.

In June 1987, AMC's advertising agency, Saatchi & Saatchi Compton, Southfield, Mich., announced it would become part of New York-based William Esty Co. to avoid conflicting with the Toyota Motor Sales USA account handled by DFS Dorland. DFS Dorland and Saatchi & Saatchi Compton (minus the Detroit office) merged to form Saatchi & Saatchi DFS Compton Inc.

Even before Chrysler began its acquisition, AMC signed an agreement with Chrysler to build large, rear-wheel-drive cars for the larger automaker at AMC's underutilized Kenosha, Wis., plant. Production for those vehicles began in February 1987, after extensive employee training and renovations to the plant.

The Kenosha contract, which ultimately led to the Chrysler buyout, marked the first time a domestic automaker had produced cars for another in its own plant. Discussions between Chrysler Chairman Lee Iacocca and Renault Chairman Georges Besse in March 1986 concerning the production of Chrysler cars at Kenosha later evolved into Chrysler's interest in buying Renault's stake in AMC. Chrysler wanted AMC's Jeep lineup in order to better compete in the burgeoning sport utility market, a segment in which Chrysler lacked a formidable competitor. It also coveted AMC's $400 million ultra-modern, Bramalea Assembly Plant in Brampton, Ontario, as well as AMC's network of 1,400 dealers.

Renault, France's state-owned automaker, facing heavy losses in its own market and forced to lay off hundreds of French workers, was receiving pressure from its unions to cut off investment in AMC and to concentrate on its home turf.

Discussions abruptly ended when the Renault chief was assassinated outside his Paris home in November 1986. His successor, Raymond Levy, completed negotiations with Mr. Iacocca for the purchase of Renault's 46.1% stake in AMC for $235 million that could burgeon to $350 million in contingency payments based on future AMC profits. Stockholder approval came Aug. 5, 1987.

AMC has now been reborn as Chrysler's Jeep/Eagle division. The Jeep brand will continue to contain sport utility vehicles; the Eagle nameplate will encompass passenger cars. Chrysler plans to carry out AMC's plan to introduce the Premier intermediate car on Nov. 8. The car will be built at the Bramalea assembly plant.

A number of former AMC executives and marketing managers were brought over to Chrysler to help run the newly acquired company. AMC President Joseph Cappy was appointed group VP of Jeep/Eagle marketing. Francois Castaing, a former Renault executive and most recently AMC VP-product and quality, was named VP-Jeep and Truck Engineering. John Tierney, formerly AMC VP-cfo, was appointed chairman of Chrysler Financial Corp. Martin Levine, former AMC marketing manager, was named Jeep marketing manager. David Kerr, AMC director of advertising and marketing planning, was appointed Jeep advertising manager.

Sirena out to dunk competitors

Sirena, the swim/leisurewear unit of Sara Lee Corp., is after market share through segmentation. It has inked a deal with Anne Klein for designerwear for 1988, will roll out its W-A Swimclub line to high-end retailers in October 1987, and introduce a cotton lycra line—all to gain a beachhead from Rosemarie Reid, Cole of California, Jantzen, Catalina and Gottex in the tightly packed market.

Net income	139	1,557	(91.1)
U.S. advertising	440	521	(15.6)

Since the January 1984 breakup of American Telephone & Telegraph Co., it has become clear that the communications giant is on the right road but in the wrong lane. The year 1986 marked AT&T's attempt to change course through internal restructuring and by stimulating demand for products and services relating to its core business of moving and managing information.

AT&T put its advertising costs at $776 million worldwide in 1986, up 11.5% over 1985. However, the 1986 figure represents only a slight increase from AT&T's reported spending of $772 million in 1984. AT&T's figures include all spending for media, research, agency work and salaries. AD AGE's estimate of $439.9 million in measured media and unmeasured forms of advertising in the U.S. in 1986 is down 15.6% from 1985.

AT&T's spending patterns shifted in 1986 away from corporate identity themes designed to establish the AT&T brand name in the wake of the divestiture of the seven regional Bell companies. AT&T now is stressing three core functions: long distance services, communications equipment for the home and office and network telecommunications equipment. Measured spending for AT&T Communications jumped to $16.4 million in 1986 from about $500,000 in 1985, for example, according to BAR/LNA, which monitors seven media.

As another example of its changing approach, AT&T reactivated its "Reach out and touch" campaign in May 1986. The campaign to stimulate use of long distance service had been shelved for two years.

"In 1985 and 1986 there is no question that we were single-mindedly asking people to choose AT&T when obliged to make a choice of a long distance carrier," says Kim McIver Armstrong, director of long distance and international advertising, Basking Ridge, N.J. "Except for isolated areas, the carrier access issue is over and we are returning to our strategic messages in the marketplace to cause people to continue to use AT&T. In addition we are relaunching stimulative advertising," she says.

AT&T continued downsizing internal operations in 1986, taking $3.2 billion in writedowns in restructuring costs associated with the combination of its Information Systems and AT&T Communications divisions, permitted in a September 1985 ruling by the Federal Communications Commission. AT&T eliminated 32,000 jobs in 1986, and has reduced its workforce by about 80,000 jobs since the start of 1984. The cost reductions are having a positive effect on the bottom line.

For the first six months of 1987, AT&T's profits increased 36% to $1.04 billion. Because of weaker product sales and rental revenue, however, total revenue for the period fell to $16.52 billion, down 3.6% from the same period in 1985.

The single largest cutback in measured media spending during 1986 occurred in brand awareness promotion of AT&T long lines as the race came to a close to sign up business and residential users to "equal access" connections. AT&T long lines advertising fell to $94.4 million in 1986, down more than 20% from 1985. Network TV claimed 68% of the total, although most of the drop-off was in network TV and magazines.

Measured spending for AT&T long lines campaigns oriented to business customers also fell 22% in 1986 to $36.8 million. Some 50% of the spending was in network TV, 21% spot TV and 21% magazine. Spending for corporate general promotion fell to $28.4 million in 1986, down 31% from 1985.

The divestiture agreement requires local telephone companies to provide long-distance carriers with the same access to the network as AT&T. During the three-year phase-in, which ended in September 1986, the nation's 66.5 million business and residential line users were asked to choose a primary long distance carrier.

More than 30% of the nation's telephone customers have yet to be converted to equal access because they are served by older switching equipment, or because their local telephone company is independently owned.

AT&T's advantage in gaining equal access connections by default was struck down in mid-1985 by an FCC ruling that customers who fail to select a carrier would have one assigned at random. Previously, those customers failing to indicate a choice were automatically assigned to AT&T.

As a result of rising competition, AT&T's share of the $22.9 billion long distance market fell to 76% in 1986 on revenues of $17.5 billion. Moving up were Washington, D.C-based MCI Communications, with an 8.7% share on revenues of $2 billion, and Shawnee Mission, Kan.-based US Sprint Communications, with a 4.9% share on revenues of $1.1 billion, according to the U.S. Telecommunications Market Report, issued by New York-based Northern Business Information. Other long distance carriers shared 10% of the market, with $2.3 billion in combined revenues, says Glenn Powers, senior analyst at NBI. All market share figures exclude access charges paid to local telephone companies.

US Sprint's growth in 1986 was particularly impressive. The company now serves about 5 million customers, double its base in 1985. Aggressive rate cuts by both MCI and US Sprint, made possible by 40% lower access fees prior to equal access, have helped fuel their growth. However, as equal access is phased in, the rates long distances carriers pay for network access will move closer to those paid by AT&T.

In the meantime, US Sprint has taken the lead role in promoting low prices and high technology. As of last year, when it was formed as a separate entity, US Sprint has reduced its own rates three times, for a total of 20%, putting AT&T and MCI on the defensive. MCI reduced rates by about 14% in 1987. In addition, Sprint's $3 billion investment in a 23,000-mile fiber optic network is luring new mega-business customers.

Such aggressive marketing can hurt AT&T because some 275 companies account for about 25% of AT&T's revenues for long distance service, analysts say. But AT&T is fighting back.

Since divestiture, AT&T's long-distance rates have fallen 33.5%. And both AT&T and MCI are hurrying to build fiber-optic networks.

One area where AT&T still dominates is the $5 billion market for data transmission services. Data transmission now accounts for 17% of the total market for long distance service, and is growing at a 30% to 35% annual clip. Voice transmission accounts for 83% of long distance service, but is growing at a rate of about 7%. AT&T's measured spending for information systems fell 38% in 1986 to $22.3 million, with 45% of the spending going to network TV, 36% to magazine and 15% to network radio.

AT&T also dominates the market for overseas service. Measured spending to promote overseas long lines was up 47% in 1986 to $36.7 million, divided almost equally between spot TV and magazine. AT&T has set a corporate goal of laying the groundwork to develop international markets for data networking and high technology products and services. This is seen in AT&T's growing alliances with Ing. C. Olivetti & Co. of Italy and N.V. Philips of the Netherlands.

Olivetti markets personal computer and digital private branch exchange systems as part of its joint venture with AT&T and Philips markets advanced digital switching systems.

Long distance service accounted for 56% of AT&T's revenues in 1986, up from 50% in 1985. AT&T also gained 30% of its 1986 revenues from the sales of equipment, down from 33% in 1985, and 14% from equipment rental, down from 17% in 1985.

AT&T's retrenchment was evident in reduced spending for AT&T personal computers, which fell 91% to $1.4 million in 1986 measured media. AT&T's share of business revenues for personal computers through retail computer stores fell to 2% during the first six months of 1987, says JoeAnn Stahel, manager of market analysis at Dallas-based StoreBoard. AT&T's estimated share for 1986 stood at 3% on estimated revenues of $125 million, down from a high of 3.3% in 1985 on revenues of $150 million, she says. AT&T posted a pre-tax operating loss of $1.2 billion in the information products division.

In an effort to rebuild flagging credibility in computers, AT&T introduced four IBM-compatible machines early in 1987, and bolstered spending on its PC 6300 and 6300 Plus personal computers. The PC 6300 received $3.5 million in measured magazine spending, up 117% over 1985.

But analysts anticipate more problems for AT&T in computers. "I think AT&T will have a difficult time trying to break into the heavy IBM user base. It's a problem for all IBM competitors, says Fritz Ringling, a principle with the New York-based consulting firm Booz, Allen & Hamilton.

Passenger	4,961	4,986	(0.5)
Other	1,056	1,145	(7.7)

As AMR Corp. recovers from a financially disappointing year, the parent of American Airlines is focusing on route-system expansion, innovative advertising and a leadership position in airline re-regulation.

Tough airline price competition in 1986 helped produce a decline of 19.4% in net earnings and a drop of 1.8% in revenues at AMR. The company suffered a 10% decline in revenue yield per passenger mile to 10.17 cents in 1986 from 11.30 cents in 1985. Revenue passenger miles actually increased 10.5% to 48.8 billion while load factor inched up to 65% from 64.6%, increases accompanied by a 9.9% jump in available passenger seat miles.

Discount pricing—led by Houston-based Texas Air Corp.'s Continental Airlines—continues to make 1987 a volatile year for airlines. Public concern over airline safety and service issues also has prompted Congress to consider new airline regulations. This fall the Transportation Department is expected to announce rules on these airline issues.

Airline consolidation has changed the industry lineup. American Airlines dropped to third place after Texas Air Corp.'s 1986 acquisitions of Eastern Airlines, Frontier and People Express. The latter two airlines became part of Continental Airlines. Now Texas Air's holdings account for about 19.4% market share. United Airlines follows with a 17% share; American comes in third with a 15% share.

American continues its strategy of route expansion, having opened two hubs last year—Nashville, Tenn. in April and San Juan, Puerto Rico in November. A third hub at Raleigh/Durham, N.C. opened June 1987.

While the San Juan hub increases American's presence in the Caribbean, the Nashville hub serves passengers between the upper Midwest and Gulf states, as well as the Northeast and central-southern states. The Raleigh/Durham hub targets passengers traveling north-south along the East Coast.

Perhaps the most noteworthy development this year was AMR's acquisition of Air Cal, a Newport Beach, Calif.-based regional airline. The $225 million purchase, completed in July 1987, represented a departure from American's strategy of growing internally rather than through acquisition.

With internal growth concentrated in the eastern half of the U.S., management decided that West Coast growth would be best achieved by acquiring an established airline. This immediate expansion along the Pacific Coast not only fills a void for American but also sets the stage for the airline's expansion to Asia.

In June, American inaugurated nonstop service from Dallas-Fort Worth to Tokyo, representing American's first step into the Asian market. European expansion continues with new nonstop service from Chicago to Geneva and Zurich, launched in April, along with nonstop service to Paris and Frankfurt from New York.

Route expansion has been accompanied by an increased ad budget with total 1986 expenditures at $113 million, up 7.1%, according to AD AGE.

When Thomas Plaskett, American's senior VP-marketing left last November to become president of Continental Airlines (he since has left Continental), marketing responsibilities were divided. Michael Gunn became senior VP-marketing from senior VP-passenger marketing. William Shannon was named senior VP-field services from senior VP-field sales and services. Both execs report directly to Robert Crandall, chairman and president.

In March R.A. McKinnon joined American as VP-advertising and market-

ing programs from exec VP-marketing and planning at Pan American World Airways, New York. Ann Smits was promoted to managing director of advertising from assistant VP-advertising.

In response to public concern over flight safety and service, American became the first airline to build a print and broadcast campaign around these hot issues. The effort, via Bozell, Jacobs, Kenyon & Eckhardt, Dallas, is an extension of the carrier's "Something special in the air" lifestyle approach. It will continue through the first quarter of 1988.

Meanwhile Mr. Crandall will lobby Congress for a public database on airline performance; public information on seat spacing; data on missed connections and baggage handling problems and disclosure of overbookings. Should this information become available to the industry, it likely will appear in comparative advertising.

American Airlines and Trintex, White Plains, N.Y., have agreed to provide travel information and bookings as part of Trintex's Prodigy videotex service that becomes available next year to pc users. Trintex is a joint venture of IBM Corp. and Sears, Roebuck & Co.

Making American's Eaasy Sabre electronic reservations system available to pc users will mean that they can obtain flight schedules for more than 650 airlines and book reservations on 300 of them.

Diversified op.	247	190	30.0

Anheuser-Busch Cos., the world's largest brewer of beer, has been making news in almost every category except beer: It expanded its Master Cellars line of keg wines; opened its first retail store to sell its Honey Roast line of nuts and snacks; began testing the waters in the restaurant business; discontinued its upscale Baybry's champagne cooler while expanding distribution of its two bottled waters; repositioned its Dewey Stevens wine cooler, and introduced a soda called Zeltzer Seltzer.

On the down side, A-B fought negative publicity when several top executives were accused of taking money and favors from suppliers and when a small soda company accused it of trademark infringement.

A-B could be simultaneously involved in so many arenas because its core beer business seems to flourish no matter what. The company shipped 72.3 million barrels (bbls.) of beer in 1986, up 6.3% from 1985. The U.S. beer market as a whole grew only 1.8% during that period.

Beer and related beverages contributed 76.8% of A-B's total net 1986 sales of $7.68 billion, compared with 77.3% in 1985.

A-B in 1986 accounted for 39.7% of the total domestic beer market (includes barrels shipped and tax paid withdrawals), up from a 38.1% share in 1985. Its share now is nearly double that of its next closest competitor, Philip Morris' Miller Brewing Co., which represented a 21.3% share of the total market in 1986.

Four of the nation's 10 best selling beers were A-B brands in 1986: No. 1 Budweiser; No. 7 Bud Light; No. 8 Busch and No. 9 Michelob.

Of course, Budweiser more than leads the domestic beer rankings; it dominates them. With sales of 48.8 million bbls. in 1986, Budweiser alone accounted for 26.8% barrels shipped, meaning that better than one of every four beers consumed in this country is a Budweiser.

Appropriately, Budweiser has the largest advertising budget of any A-B brand —or any other brewer, for that matter— $108 million in measured media in 1986, up 17.2% over 1985 spending. But while Bud accounts for 67.5% of A-B's gallonage, its ad budget was only 37% of the $293.5 million the company spent for all its beer brands. And Bud's spending increase in 1986 was the smallest of all major A-B brands.

Economies of scale and Budweiser's unflagging popularity mean A-B needs to spend only $2.22 on advertising per barrel sold, compared with the $12.79 it spends on advertising for every barrel it sells of Michelob Light.

Bud is doing so well in the U.S. that almost all that A-B has to do is expand its availability internationally. In late 1986, Bud arrived in Ireland through a licensed brewing agreement with Guinness Ireland Ltd. In 1987, the brand entered Denmark through agreement with United Breweries Ltd. and South Korea via an agreement with Oriental Brewery Ltd. The brand is now brewed in seven foreign countries and exported to an additional 30.

A-B and Budweiser were corporate sponsors of Dennis Conner's America's Cup yacht Stars & Stripes. Mr. Conner and his yacht were featured in a 30-second TV commercial for the brand that aired prior to and during the January America's Cup competition.

Additionally, when the Stars & Stripes was pulled from the water immediately after winning the America's Cup, its keel bore a Budweiser logo affixed by a team of frogmen (after the race so as not to violate Cup rules against carrying advertising).

Another significant change in Budweiser advertising has been the addition in 1987 of new "young adult" TV commercials themed "I'm a genuine Bud Man" (in place of the "This Bud's for you" theme used generally). These air primarily during late-night programming.

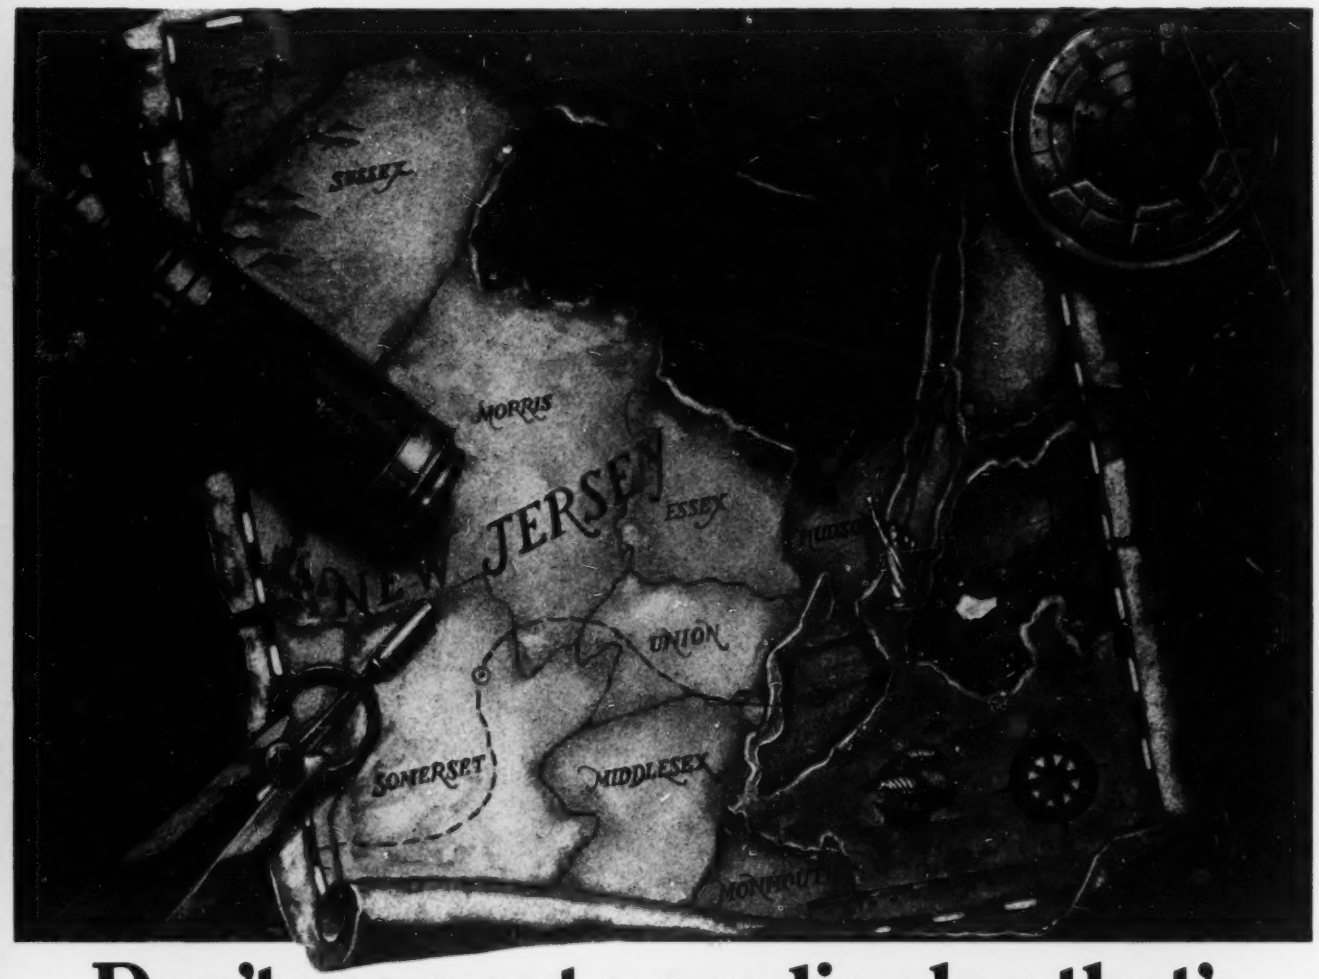
Bud Light has been another success for A-B. Despite the total market's slow growth, sales of Bud Light increased nearly 23% in 1986 to 6.5 million bbls., pushing it up a notch to No. 7 among the top 10 domestics.

Measured ad spending, according to BAR/LNA data, was increased 21.3% in 1986 to $61.6 million, after a decrease of nearly 10% in 1985. The 1986 increase reflects the growth and importance of the brand and the light-beer category overall.

Bud Light sales among young consumers have been increasing, thanks in part to an unlikely brand "spokesman." Spuds MacKenzie, a 3-year-old English bull terrier whose real gender is female and whose real name is Honey Tree Evil Eye, began appearing in Bud Light TV spots in California. Soon he was seen on network TV and on posters in college dormitories nationwide.

Dubbed "The Original Party Animal," Spuds has become a cottage industry for A-B. The company has licensed the dog's name and likeness to more than a dozen companies for everything from casual apparel to keychains. Macy's in New York even has opened a "Spuds MacKenzie Shop" to sell pooch paraphernalia.

The Michelob brands have been a problem for A-B, largely due to a general falloff in consumption experienced by all superpremium domestic beers (as drinkers switch to imports). Michelob's shipments dropped to 5.4 million bbls. in 1986 from



Don't map out a media plan that's missing the richest territory.

A lot of media planners who search diligently for the best way to strike gold in the New York ADI still miss the richest territory. They overlook the only newspaper that lets advertisers tap into $20.7 billion in purchasing power wielded by Bergen/Passaic residents. The Record, New Jersey's largest evening newspaper.

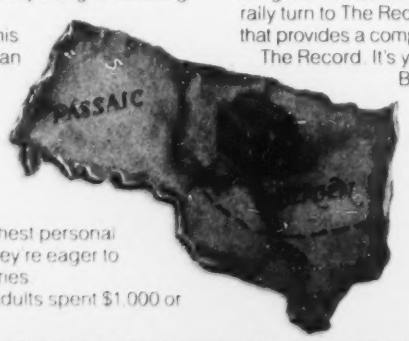
The Record reaches more adults in this upscale northern New Jersey market than any other newspaper, and leads you to the readers with the greatest spending power. In fact, the Bergen/Passaic market is the 33rd largest in the country and is 29 in total retail sales. This positions us with metropolitan areas like San Jose and New Orleans.

Record readers have the second highest personal employment income in America, and they're eager to spend on travel, cars, leisure, and luxuries.

For example, more Bergen/Passaic adults spent $1,000 or more for their last vacation than adults in any other segment of the New York ADI.

And 65 percent of The Record's affluent audience cannot be reached regularly in any other newspaper. It's not surprising. Bergen/Passaic readers, who buy the best things in life, naturally turn to The Record for their news and information. And that provides a compelling environment for advertising that sells.

The Record. It's your guide to reaping the full treasures of the Bergen/Passaic market. Without it, even the most intrepid media planner could end up lost.



The Record
We cover your world. All of it.

5.8 million in 1985; Michelob Light held steady at about 2.5 million bbls.; Michelob Dark continues to account for about 350,000 bbls.

In an effort to improve those brands' performance, A-B dramatically increased ad spending. Michelob's budget was up 29.7% to $49.1 million; Michelob Light spending jumped 27.1% to $32 million. Spending on Michelob Dark dropped to $3 million from $3.8 million, but that brand has been given a new campaign, themed "Don't be afraid of the Dark," and a new spokesman, actor/comic Martin Mull.

A-B consolidated all three Michelob brand assignments at DDB Needham, Chicago, in 1986, but continued to consider other possibilities. Early in 1987, the company quietly weighed alternative creative on Michelob Light from Bud agency D'Arcy Masius Benton & Bowles, St. Louis; corporate advertising agency Hal Riney & Partners, Chicago; Campbell-Ewald, Detroit; and DDB Needham, which ultimately retained the account.

Still, A-B has expressed doubts about the viability of the Michelob brand lineup and openly has suggested that if the brand does not turn around soon, a new super-premium could be introduced.

That could help explain why A-B in July 1987 began a two-market test of a beer called Anheuser. This "ultrapremium" brand—priced comparably with imports—is testing initially without advertising support, although Hal Riney & Partners, Chicago, officially has the assignment.

The Busch brand has been a surprising success for A-B. Competing in the popular-price segment (meaning it is generally priced below Bud), Busch has caught fire in the past few years. In 1986, sales rose nearly 21% to 6.4 million bbls., making it the No. 8 brand.

Reflecting the brand's growth, measured ad expenditures for Busch were increased 158% to $22.5 million in 1985 and another 21.4% in 1986 to $27.3 million. In addition to the continuing "Head for the mountains" campaign, Busch advertising in 1987 has been augmented by young-adult, late-night creative executions themed "Lookin' for a Busch."

A-B execs seem to hate to return from overseas trips empty-handed. Shortly after announcing an agreement with Denmark's United Breweries to brew Budweiser there, A-B announced it had gained exclusive U.S. import and distribution rights to United's Carlsberg, Carlsberg Light and Elephant Malt Liquor brands (rights previously held by All-Brand Importers). Ad expenditures for those brands (now available in 30 states) totaled $2.4 million in 1986.

A-B also has become heavily involved in non-beer beverages, including wine coolers, bottled water and soda. These products all are overseen by The Anheuser-Busch Beverage Group Inc., established in 1986 as a separate operating unit of A-B Cos. to develop and market non-beer brands.

Its first attempt in the wine cooler market, Baybry's Champagne Cooler, ran into resistance to its higher-than-average price and was discontinued (after ad expenditures of $2.4 million in 1986).

A-B has had better luck with Dewey Stevens Premium Light, positioned as the only low-calorie wine cooler. In October 1986, the Dewey's assignment was moved from Bloom Agency, Dallas, to DMB&B, St. Louis, which changed the brand's theme to "Half the calories. All the fun" from the original "Dewey, you do me right."

The company's most surprisingly aggressive growth has been in the bottled water market. Its involvement began with the November 1985 purchase of Saratoga Springs Co., Saratoga Springs, N.Y. It followed that in February 1986 with the purchase of Sante Mineral Waters Inc., Santa Rosa, Calif. In July 1986 it entered a partnership with Cabin Bar Ranch, Olancha, Calif., giving it additional mineral water resources, and in September 1986 A-B signed an agreement to import Ballygowan Irish Spring Water from Ballygowan Spring Water Co. Ltd., Newcastle West, Ireland. Each of these brands is available in limited territories with modest advertising support.

In January 1987, A-B surprised the beverage world with its announcement that it would begin testing a line of all-natural flavored sodas under the name Zeltzer Seltzer. Zeltzer is the company's first foray into the soft drink market since the 1970s when it tried two ill-fated entries named Chelsea and Root 66.

No one was more surprised by Zeltzer Seltzer's arrival than American Natural Beverage Co., New York, which filed suit against A-B. Among the charges was the claim that packaging for A-B's Zeltzer Seltzer infringed on the trademarked package design of American Natural's Soho brand. In an out-of-court settlement reached in May, A-B agreed to alter Zeltzer Seltzer packaging and advertising by Dec. 1, 1987.

A-B has been involved in food products since acquiring Campbell Taggart, one of the nation's largest baking companies, several years ago. Now A-B has expanded its food interests into snack foods and food service.

A-B's Eagle line of snack foods has moved beyond its beginnings as airline products to a major grocery line. In 1986, the company began its first national advertising for the line, spending $3 million on network TV exposure for Eagle Honey Roast Nuts and $300,000 for Eagle Potato Chips. Eagle Peanut Butter continues in limited test.

In St. Louis' Union Station, the company in November 1986 opened Honey Roast Heaven, a specialty retail shop offering its Honey Roast nuts as well as candies, frozen custard, baked goods and a variety of wrapped food gift packs.

The first A-B restaurant, called Amighetti Bakery and Cafe Downtown, opened in St. Louis in April 1987. Bearing a name and concept bought from a family operating another restaurant in the city, Amighetti Bakery is expected to be the first in a chain of units that A-B will develop.

Batus Inc., the U.S. arm of B.A.T Industries, marked 1986 by completing a spinoff of six retailing companies and developing new cigarette brands, specifically appealing to value-oriented customers. The moves boosted sales and earnings to all time highs despite a 44% drop in measured advertising. Yet in its more heavily-advertised tobacco segment, the company lost market share.

At year end, funds from divestitures left Batus with a sizable sum in short-term investments, creating a potential for future acquisitions. As of Dec. 31, 1986, Batus reported $435.1 million in short-term investments, compared with $64.8 million in 1985.

The sale of six retailers, including New York-based Gimbels Department Stores, was completed by mid-1986 for $644 million—an amount greater than expected. In 1985, the company had set aside $150 million for expected book losses associated with the retail restructuring. Because actual results were better than anticipated, a $30 million credit was added to income in 1986.

The largest share of Batus's advertising budget is allocated to its tobacco group, Brown & Williamson Tobacco Corp. Measured spending for B&W was down 65% to $18.4 million, according to seven media tracked by BAR/LNA. Ad spending by Batus in media traditionally associated with cigarette advertising—newspapers, magazines, newspaper supplements and outdoor—dropped 45.6% in the aggregate to $46.8 million in 1986. Thomas E. Sandefur Jr., B&W's president-ceo, told trade specialists in May the company is focusing more on in-store promotions and carefully reviewing its advertising spending.

"The manufacturer must take a closer look at all aspects of doing business to determine if it is spending its marketing dollars as wisely as they can be spent," he says. "As a result, there are increased efforts to talk more directly to the consumer at the point-of-sale and through direct mail."

Key to Brown & Williamson's strategy has been a focus on the relatively new "price/value segment." The price/value category—which includes generic cigarettes—accounts for about 9% of the cigarette market. B&W products account for 26.6% of all price/value cigarettes sold in the U.S., up from 24.7% in 1985, according to "The Maxwell Report," prepared by John C. Maxwell Jr., analyst with Furman, Selz, Mager, Dietz & Birney.

B&W's share of the total domestic market dropped to 11.5% from 11.9% in 1985, according to Mr. Maxwell, as the continuing progress of its Richland brand and generic cigarettes was offset by a decline in full-price brands. The parent company—B.A.T. Industries PLC, London—noted that its entire tobacco group reported an 18% increase in profits (in dollars). The company attributed that gain to higher prices, lower marketing and manufacturing costs and higher overseas sales.

In May 1987, B&W said it would start nationwide sales of a new "brand generic" cigarette, called Falcon Lights. The cigarette, first tested in Kentucky in July 1986, is designed for those who want a lower-priced cigarette but prefer brand names. The suggested price of the 20-to-a-pack brand is the same as that of plain packaged generics and is about 25% less than traditional branded cigarettes.

Falcon Lights was the third branded generic to go national, following RJR Nabisco's Doral and Philip Morris USA's Cambridge. It is B&W's first new product since the introduction of its Richland brand in 1985.

Other B&W products in test are: Capri, an ultra-slim cigarette—17 millimeters in circumference vs. the traditional 21 millimeters; Eli Cutter, a non-menthol male-oriented, full-flavored brand; and Kim 25s, the first value brand targeted primarily at women smokers.

Capri—which is designed to appeal to female smokers—is in test in several markets including Chicago, Detroit, New York, Philadelphia, Washington D.C., Richmond and Baltimore. The brand was introduced in January 1987 in Louisiana.

Kool—which accounts for nearly 60% of B&W's revenues—continued to face declining market share and stiff competition from Loews Corp.'s Lorillard's Newport brand. While ranking No. 4 among U.S. brands, Kool saw its market share drop to 6.6% last year, compared with 6.8% in 1985, according to Mr. Maxwell. Measured advertising for Kool dropped 30% to $20.1 million.

Newport's market share, however, increased to 3.8% from 3.4% in 1985 as Loews plowed $33.7 million into the Newport line, a gain of 5.6%.

In February 1987, B&W switched ad agencies for Kool and Kim 25s to William Esty Co., New York, from Ogilvy & Mather, Chicago. O&M had held the account only since April 1986.

B&W spent more than $14.4 million on measured advertising for Richland in 1986, up 15.2%. The amount is second only to B&W's flagship brand, Kool. Richland had 0.6% of the total market last year, up from 0.5% in 1985, according to Mr. Maxwell.

Measured advertising for Barclay dwindled 47.7% to $2.3 million in 1986 as the cigarette took 0.4% of the market vs. 0.6% in 1985.

The major continuing Batus retailing businesses are: Saks Fifth Avenue, Marshall Field's, Ivey's, Breuners and Thimbles. Saks had record 1986 sales that grew nearly 15% to top the $1 billion mark for the first time in Saks' history—continuing a rebound from a period when Saks failed to keep up with major competitors. Operating income rose over 20% to more than $100 million.

Batus spent about $2.1 million on measured advertising for Saks in 1986, up 33% from 1985.

At Marshall Field's stores, sales were up nearly 15%, approaching $1 billion, while operating profit increased by more than 20%. The company attributed the gains to the strength of improved margins, lowered expenses and further strengthening of its market share in the Chicago market. In 1986, Marshall Field's grew to 25 stores with the opening of five outlets in Wisconsin and a new store in San Antonio, Texas. It continued a remodeling and renovation program which will touch all stores over the next six years. Capital additions in 1986 totaled $67 million.

Measured advertising for Marshall Field's increased 55% to $3.7 million.

Batus sold about 40% of its retailing

Haarmann	40	31	29.0
Deerfield Urethane	19	15	26.7

For the first time in a decade, a sales increase was reported for the Alka-Seltzer brand, the leading advertised product at Miles Laboratories, the major U.S. unit of Bayer USA Inc., Pittsburgh. Bayer USA is the newly formed U.S. holding company for West German-based Bayer AG.

Contributing to Alka-Seltzer's results was a flavored line extension introduced in the fourth quarter of 1985. The line got a new entry in March 1987—Extra Strength Alka-Seltzer. The brand's performance in 1986 was influenced by measured media spending of $20.8 million for regular and flavored Alka-Seltzer, up 5.6% from the prior year, and new packaging. Since July 1986, the product has been carried exclusively in foil packages marketed for convenience, freshness and portability.

Miles, based in Elkhart, Ind., also spent $17.7 million in measured advertising on its Alka-Seltzer Plus cold medicine, which is to be joined in the coming cold season by Night-Time Alka-Seltzer Plus cold medicine.

Miles Laboratories does the bulk of the advertising for Bayer USA, which also includes Agfa-Gevaert, Compugraphic Corp., Mobay Corp., Haarmann & Reimer Corp., Deerfield Urethane, NRC Inc. and Wyrough & Loser.

Miles net income in 1986 was $29 million, up 31%, on sales of $1.23 billion, up 4%. Sales at Bayer USA, formed July 1986, increased 4.4% to $4.2 billion during its first year. However, profits declined 3% to $107 million. Bayer's results accompanied a significant decline in the value of the dollar against the parent company's currency, the Deutsche mark. The company calculated the average value of the dollar at DM2.17 = $1 in 1986. The same conversion was applied to 1985 figures by ADVERTISING AGE.

Miles also reported that vitamin sales firmed after several years, led by Within multivitamins for women, introduced mid-1985 as a reformulation of One-A-Day With Iron by adding more calcium and iron to the product. The sales improvement came despite an 11.6% decline in measured media spending to $3.8 million.

Flintstones held its lead in the chewable vitamins market with an $8.8 million push, up from $3.5 million in 1985, as did sugar-free Bugs Bunny chewable vitamins with just under $1 million support, down from $3.5 million in 1985.

Also in its consumer healthcare division, Miles introduced Triple Antibiotic Bactine Ointment with polymyxin B, bacitracin and neomycin, in the fourth quarter of 1986.

S.O.S. Glass Works, a vinegar-based glass cleaner that went on the market in April 1986, contributed to a 19% increase in sales for the consumer household products division. The Bayer USA unit spent $5.9 million promoting the new product, positioned against Drackett Co.'s Windex, which holds a 58% share of the glass cleaner market and Texize's Glass Plus, which claims 22% of market.

Miles spent $4.1 million, down 4.7%, to hold onto a market for its S.O.S. Steel Wool Soap Pads. Use of microwave ovens and changing eating patterns have depressed soap pad use.

S.O.S. Oven Cleaning Pads, the only such pads on the market and the only non-aerosol with significant market share, were reformulated early in the year to attack baked-on soils. The product received only $311,000 in measured media support, down from $1.7 million in 1985.

Cutter Insect Repellent entered the year with a large inventory carryover, but two developments may improve prospects. The U.S. Environmental Protection Agency approved a new biting-fly repellent compound, and the company designed a slim-line can to appeal aesthetically to customers. Cutter received $591,000 in ad support, down 34.8%.

In 1986, Miles' pharmaceutical division introduced Adalat (nifedipine), used for angina pectoris. The new product became Miles' first cardiovascular drug. A drug for the treatment of hypertension and an antimicrobial drug are under Federal Drug Administration review for release.

Miles consolidated its Cutter biological division, a world leader in plasma products, into its pharmaceutical division during the year to strengthen its presence in the hospital market. It also bought the assets of Columbus Dental Manufacturing Co. of St. Louis to bolster U.S. dental sales for Bayer, merging the acquisition into the Cutter dental division of its pharmaceutical unit.

In 1986, Miles completed the transfer of all manufacturing and packaging lines for consumer healthcare from West Haven, Conn., to Elkhart.

By the end of this year, the company expects to complete its $35 million research center in West Haven. The research center's first phase will house Molecular Diagnostics Inc. and Molecular Therapeutics Inc., as well as the Miles Institute of Autoimmune Diseases.

Miles attributed a 20% increase in sales in its diagnostic division to blood and urine test strips and the Glucometer II, which allows diabetics to test their blood sugar any time and place. The Glucometer II with Memory, introduced in 1986, helps patients manage diabetes by remembering 26 glucose results. Glucometer M, introduced early this year, works with the Glucofacts data management system to display trends graphically.

Miles' biotechnology products division maintained a leadership position in the world markets for citric acid, industrial enzymes and dairy ingredients. It reported good growth in 1986 for citric acid used in soft drink markets. In its enzyme technology, Miles will introduce this year a high-alkaline protease for the powdered detergent market. The product is billed as having greater stability and improved stain-removal capability.

If Beatrice had continued its corporate "family" ad campaign this year, the appropriate tag line might have been "We WERE Beatrice."

While other food giants have been busily acquiring smaller, regional companies to boost market share and increase brand recognition, BCI Holdings Corp., the parent of Beatrice Co., has been selling off subsidiary after subsidiary—its latest offering being Beatrice itself which it put out for bids earlier this month.

By divesting itself of a mixed bag of specialty and non-food subsidiaries, the company has trimmed down into a food marketing company called Beatrice Co., consisting primarily of Beatrice/Hunt-Wesson, Swift-Eckrich, Beatrice Cheese and Tropicana Products.

The divestitures give the core foods group a chance to refocus its marketing efforts, free of the distractions caused by last year's "We are Beatrice" umbrella campaign—that is assuming Beatrice remains a unit after its presumed sale. Although the family of brands emphasis was embraced by the central office in Chicago, lower-level management was uncomfortable with the idea of abandoning longtime primary affiliations with the better-known subsidiaries.

The sales of non-food businesses were part of the strategy Chairman Donald P. Kelly put into place when BCI Holdings took Beatrice private in April 1986 in a $6.2 billion leveraged buyout financed by Kohlberg, Kravis, Roberts & Co., New York. Mr. Kelly and KKR had teamed up to create BCI Holdings. Since the merger, BCI has been selling operations to pay off its debt load and has been getting top dollar.

For example, Beatrice's Los Angeles-based bottling operations sold for $982 million to Coca-Cola Co., Atlanta, in September. Beatrice's Americold refrigerated warehouse business was sold to Kelso Americold Inc. in November for $480 million.

The leveraged buyout was put together by Kelso & Co., a New York-based private investment banking firm that created the new company.

Beatrice also sold this July its bottled water business, based in Monterey Park, Calif., to Perrier Group of America for an estimated $400 million.

Beatrice's bottled water division, the leading processor and distributor of bottled water in the nation, markets Arrowhead brand water in California and Arizona, Ozarka water in Texas and Great Bear water in the Northeast. Beatrice got the three water companies in 1982 with the acquisition of Coca-Cola Bottling Co.

Beatrice sold its dairy products subsidiary—the base on which the conglomerate was built—to Borden Inc. for $315 million last October. The acquisition nearly doubled Borden's dairy product sales, extending the company's market into the Midwest, West and Hawaii. It also gave Borden a number of recognizable brand names, including Meadow Gold milk, Viva low-fat dairy products, Louis Sherry ice cream, Mountain High yogurt and Hotel Bar and Keller's butter.

Those sales, combined with previous divestitures of Avis car rental and leasing, plus personal products, knitwear and specialty printing of the consumer products unit, totaled an estimated $3.8 billion.

In 1987, BCI made more strides toward paying off its debt. In May, the company spun off E-II, a public holding company that took with it almost all of Beatrice's non-food lines, including Samsonite luggage; Stiffel lamps, Culligan water products and Louverdrape window coverings. The consumer products subsidiary had net sales of $1.1 billion for the fiscal year ending February 1987.

E-II also took over the food specialties subsidiary, which accounted for almost $250 million in net sales in fiscal 1987. The food specialties include Lowrey's meat snacks; Aunt Nellie's Farm Kitchens, which make canned and glass-packed vegetables; Martha White baking mixes and ANF pet food products.

BCI figured the 15 operating companies included in E-II accounted for 20% of BCI's assets, so E-II took on a like amount of the private company's debt, $800 million. BCI received the money when the stock offering and a $1.5 billion debt offering were made.

Mr. Kelly took over E-II, relinquishing his post as BCI chief executive to Frederick B. Rentschler, the head of its U.S. Foods unit. Mr. Kelly's reputation as an inveterate dealmaker was enhanced by the creation of two acquisition subsidiaries, one to target companies with sales of up to $500 million, the second to buy companies with sales up to $5 billion. Some observers were surprised that Mr. Kelly made no acquisitions in the first quarter of E-II's existence, given the company's reported $5 billion line of credit.

BCI's coffers were filled again in August when a relatively unknown investment firm bought Beatrice's International unit for $985 million. The buyout by TLC Group, New York, financed by Drexel Burnham Lambert Inc., made TLC the largest black-owned business in the nation. The chairman of TLC, Reginald F. Lewis, previously had bought and sold McCall Pattern Co.

Mr. Lewis said he planned to sell off portions of the unit to retire the debt load. He achieved that goal quickly by negotiating the sale of Beatrice Canada to Onex Corp., Toronto, for a reported $225 million and the sale of Beatrice Australia to Cadbury Schweppes Australia Ltd. for an estimated $90 million. TLC reportedly has the Latin American business on the block as well. Mr. Lewis says he plans to concentrate on the company's European operations, and even those might be for sale.

The core U.S. Foods operation now up for sale should attract considerable attention because of the number of its large number of leading brands: Hunt tomato products, Wesson cooking and salad oils, La Choy oriental foods, Peter Pan peanut butter, Swiss Miss cocoa mixes and puddings, Fisher nuts, Orville Redenbacher's popcorn, County Line cheeses and Butterball turkey products. The sale adds credence to Mr. Kelly's onetime comment that "Everything is for sale."

Those brands were enhanced by increased spending last year, a benefit of diverting ad dollars from the corporate campaign.

For example, Hunt tomato sauce and tomato products were backed by nearly $2.6 million in measured spending, up 86%. Orville Redenbacher's popcorns and oils got $15.2 million, up 28.8%, and Tropicana pulled in $13.5 million, up 53.4%, according to BAR/LNA.

The effects of new leadership became apparent during 1986, as the Beecham Group PLC focused its U.S. efforts on its strong health and personal care businesses, while selling off some of its lagging cosmetics and consumer products operations and cutting back on total U.S. ad spending by 37.7%.

After nearly a year under the interim leadership of Lord Keith of Castleacre, Beecham got a new chairman, Robert P. Bauman, in September 1986. Under his leadership, Beecham has disposed of 13 businesses worldwide for a total sale price of $331.52 million (£1 = $1.40) and leveraged its existing brands through line extensions and new product introductions. Proceeds from sales during the company's fiscal 1987 (ending March 31, 1987) helped boost earnings per share by 17%.

Total advertising expenditures were estimated by AD AGE as $115.8 million in 1986—down from $186.5 million the previous year, a drop of 37.9%.

Key to the success of Beecham's U.S. consumer products operations was the January 1986 acquisition of Norcliff Thayer, with its Tums, Oxy and Aval brands and estimated sales of about $165 million. Value of the acquisition was enhanced through the profits of the sale of Reheis Chemical Co., a manufacturer of proprietary drugs. Reheis, acquired from Revlon along with Norcliff Thayer, was sold in April 1986 to a management group for $23.5 million.

Later in the year, Beecham Products Division sold its Ace Comb division to Goodie Products, a manufacturer of hair brushes and accessories, for $3 million.

After having the Germaine Monteil Cosmetiques on the market for some time, Beecham found a buyer in March 1987 for Monteil, which has been a poor performer for Beecham since its 1985 acquisition for $105 million from B.A.T. Industries PLC. Beecham disposed of the U.S. business of Germaine Monteil, world rights to Diane von Furstenberg and U.S. distribution of Lancaster cosmetics to Revlon for a figure estimated by industry sources at $2.5 million to $10 million.

Beecham Home Improvement Products then sold its Roberts Consolidated Industries subsidiary to an investor group for $45 million. The company has announced its intentions to find a buyer for its remaining U.S. home improvement business, Dayton, Ohio-based DAP Inc.

Beecham succeeded with line extensions in its consumer products businesses, while it had mixed results with new introductions. Its Adidas men's fragrance line made a very successful debut, while the failure of the introduction of Delicare cold water detergent for delicate fabrics has led the company to sue its market researcher.

Beecham rolled out a Sucrets Spray in the U.S. with $4.9 million in measured spending in seven media measured by BAR/LNA.

Oxy 10 acne remedy, a new product in Norcliff Thayer's Oxy skincare line, received $4.1 million in measured spending. Oxy 10 is the market leader in the medicated facial care category with a 23.7% share, compared with No. 2 Procter & Gamble's Clearasil (22.8%) and No. 3 Sterling Drug's Stri-Dex (11.8%).

Adidas men's fragrance and toiletries were introduced to the U.S. by Beecham Cosmetics in 1986 with $2.1 million in measured spending. Adidas had been licensed by Beecham's West German subsidiary, Margaret Astor Cosmetics, for European distribution.

Delicare was launched by Pittsburgh-based Beecham Products in early 1986, supported with $8.2 million in measured spending. Though Delicare captured 17.4% of the $103.5 million market segment and helped spur an 18.7% unit growth in the segment, results fell far short of expectations. Market leader Woolite (American Home Products' Boyle-Midway) lost share, falling from 91% to 74.5%.

As a result of less than expected sales, Beecham has launched a $24 million suit against Saatchi & Saatchi's Yankelovich, Skelly & White/Clancy, Shulman. In the suit, Beecham says the company was led to believe it could top Woolite for No. 1 position in the market. The suit alleges that without the study and its projections, "Beecham would not have introduced Delicare and would not have supported that introduction with the highest of the proposed media spending levels."

Major ad spending in support of Delicare was cut back in early 1987. As a result of the heavy product introduction spending, 1986 media expenditures in support of other Beecham Products brands were curtailed. Spending on Aqua-Fresh toothpaste dropped 68.6% to $8.08 million and its market share continued downward to 10.5% by year end from 11.5% at the beginning of 1986. P&G dominates the market with 39% share followed by Colgate-Palmolive (23%). Beecham is No. 3 in the market.

Measured spending on Aqua Velva aftershave dropped 74.6% to $1.06 million; Geritol spending dipped 80% to $1.66 million. Massengil decreased 78% to $2.6 million, and N'ice lozenges spending fell 55% to $1.3 million.

Spending on Norcliff Thayer's consumer brands was unaffected by the Delicare situation. Tums antacid was supported with $9.6 million, up 1%. Oxy medicated pads maintained spending at $1.2 million. Aval multi-vitamins for women experienced a 336% increase in spending to $4.6 million.

Chicago-based Beecham Cosmetics conducted an agency review in 1986 for its Yardley, Jovan and Vitabath products. The estimated $10 million creative account, formerly handled by Wagner & Associates, was awarded to HBM/Creamer, Boston.

WE WOULD NEVER USE LANGUAGE LIKE THIS IN OUR OWN PUBLICATIONS.

You're reading this ad in English. And, frankly, the English language has no place in our magazines.

SpanAmerica is the DeArmas Hispanic Magazine Network, the largest group of Spanish language publications in the United States.

Today, there are nearly 20 million Hispanic-Americans. Representing some $134 billion in purchasing power. And the vast majority is far more comfortable in Spanish than English. Especially when it comes to the printed word. SpanAmerica provides the magazines they need. Read. And respond to.

There are thirteen vibrant, full color publications altogether. Some of which are targeted to women. Others are geared primarily to men. Several are designed to appeal to anyone and everyone.

Most important, our total readership includes an estimated 2.5 million U.S. Hispanics every month. And you can use our network to buy as selectively as you wish. Nationally, regionally or locally. Men or women. We can give you precisely the audience you want to talk to.

Keep in mind, too, that our sphere of influence extends well beyond the borders of the United States. We're the largest publisher of Hispanic magazines in the world today, with publications in every Spanish speaking country. So a great many of our readers are used to seeing your ads in their countries of origin. Shouldn't they see them in the U.S. as well?

Isn't it time you started making friends with this dynamic market? Hispanics represent the fastest-growing market segment in this country. And we can help you reach the very cream. The better educated. The more affluent. The movers and shakers throughout the Hispanic community.

A good way to begin would be to call Damaso Santana. (South and West) at (305) 871-6400 or Arnaldo Jimenez (North) at (212) 687-8760. Executive Offices: 6355 N.W. 36th Street, Miami, FL 33166.

What they have to say makes a lot of sense. In any language.

SPANAMERICA℠
The DeArmas Hispanic Magazine Network

Adidas products were the only Beecham Cosmetics to have media spending of more than $1 million. Other major spending was in support of the four Jovan musk fragrances and oils for men and women, with aggregate spending of $1.75 million. Other Jovan fragrances received total spending of $912,500, up from $460,000.

Growth in the advertising of Yellow Pages helped propel Bell Atlantic Corp.'s measured ad spending upward by 82.7%, influencing an 11% growth in the company's Yellow Pages revenues to $660 million in 1986. Overall advertising grew 63%.

The gains, primarily going to spot TV, doubled that medium's usage from $13.7 million in 1985 to $26.7 million in 1986. Ad spending on Yellow Pages offered by Bell of Pennsylvania rose from $651,300 to $3.5 million in 1986; by Chesapeake and Potomac Bell from $52,400 to $3.1 million; by New Jersey Bell from $557,000 to $3.1 million.

Advertising continued the "Dragnet" theme using actor David Leisure, popularized recently by his appearance as "the Liar" on Isuzu auto ads. Mr. Leisure has been company presenter since 1984.

Bell Atlantic along with other regional Bell companies continue to be denied growth into such areas as long-distance service, providing electronic information services (they can transmit data, however) and manufacturing of telephone equipment. Judge Harold H. Greene of the U.S. District Curt for the District of Columbia, continued the moratorium on those services in a decision handed down earlier this month. He did drop the requirement that the companies file special applications with the court for permission to enter non-telecommunications businesses. The bulk of Bell Atlantic's revenues come from its Network Services operations, including telephone companies and Yellow Pages.

In 1986 Network Services introduced two new services for residential customers—the Guardian Plan, a maintenance contract providing enhanced diagnostic and repair services including "loaner" phones, and Residence Service Variety Package, which gives residential users access to features previously available only to business customers, such as distinctive ringing for priority calls, call transfer and intercom.

Also in 1986, Bell Atlantic won its first major customer for its Public Data Network Service, which moves data in short bursts between computers, enabling otherwise incompatible terminals to communicate. Its rollout should be completed by the end of 1987.

The rest of Bell Atlantic's revenues come from its non-regulated companies—Bell Atlantic Enterprises and Bell Atlantic

The 1987 Ad Dollar Summary lists 35,000 Brands and how much they spent in 7 Media.

You can't buy this complete listing anywhere else.

These are the official industry figures.
If you want to know who's spending what on advertising, BAR/LNA's Ad Dollar Summary is the reference tool you need.

Because only in this one volume will you find a complete summary of ad dollars from the PIB Magazine and Newspaper Supplement Service, from BAR's Broadcast Services and from the LNA Outdoor Advertising Service.

These are the very same figures LNA prepares for major media organizations like MPA, TVB, RAB, and IOA. They're used by leading advertisers and their agencies. The trade journals also turn to LNA for media data.

Includes cable TV.
The Ad Dollar Summary tells you how much each of 35,000 brands is spending in consumer magazines, newspaper supplements, network and spot television, network radio, outdoor advertising, and since 1985, cable TV.

Brands are listed in alphabetical order along with their parent company identifications and the media used.

And that's not all. We have listings that show the top 100 companies ranked by expenditures in each of the media.

Top 1000 Companies by total ad dollars.
The Ad Dollar Summary includes other vital reference data.

For instance, there's a convenient listing of Top 1000 Companies ranked in order of total media expenditures and broken out in each of the seven media.

There's also a section in the year-end edition showing the top 10 brands in 275 product categories, with a category total.

Year-End 1986 Edition on sale now.
If you didn't subscribe to the last year's Ad Dollar Summary, now is your chance to order the entire year round-up in one conveniently bound edition for just $200.

Multi-Media Services from BAR/LNA.
The Ad Dollar Summary is just one of the Multi-Media reports we offer, and the only one available without subscribing to the full service. Our full-service subscribers receive two additional reports which complement the Ad Dollar Summary with more detailed analyses.

- Company/Brand – an alphabetical listing of companies and how much is spent on each brand in seven media.
- Class/Brand – compares competitive brands within 275 product categories. This enables you to see not only how much each brand spent in specific media, but also who the major spenders are in each category.

For more information about our other media analysis services, including on-line programs and customized reports, just check the box in the adjacent column.

Investment Development Corporation (BAID).

Enterprises stresses service and finance of information and communications equipment. Bell Atlantic Capital Corp., formed last October, manages Bell Atlantic TriCon Leasing and Bell Atlantic Properties, which invests in real estate and development projects. Its portfolio exceeded $300 million in 1986.

In the leasing field, Enterprises expanded with the October purchase of Greyhound Capital Corp., a lessor of computer equipment. It was renamed Bell Atlantic Systems Leasing International and linked to TriCon Leasing.

Enterprises also expanded its presence in the computer service market. Already a force with Sorbus in the computer maintenance field, Bell Atlantic purchased Electronic Service Specialists, a company specializing in servicing minicomputers made by Digital Equipment Corp. Bell Atlantic also acquired Technology Concepts Inc., producer of software for telecommunications and computer networking.

Bell Atlantic Mobile Systems, Enterprises' cellular mobile communications company, expanded in 1986 to cover 106 cell sites in mid-Atlantic states. According to BAR/LNA, advertising for the operation slipped from $795,500 to $61,800.

BellSouth Corp., Atlanta, the largest of the seven regional Bell holding companies, is moving quickly to build profits in unregulated businesses. In addition to developing new telecommunications services, the company is following a strategy of acquiring and managing complementary businesses.

BellSouth, which recorded $42.5 million in measured advertising in 1986, up 17% over 1985, spent heavily on its two regulated telephone subsidiaries, Atlanta-based Southern Bell, with $8.1 million in measured media, down 7%, and Birmingham, Ala.-based South Central Bell, with $7.3 million in measured media, up 23%. Measured media spending for both subsidiaries was 81% spot TV, 16% magazine, and 3% other media.

BellSouth is in a strong position for growth and profitability as a result of rising population and healthy economic trends in its nine-state region. Local service revenues grew 7.4% in 1986, which is attributed to an increase of 514,000 access lines in service over 1985. Interstate access revenues in 1986 grew 5.9% and intrastate access revenues grew 2.1%. BellSouth also recorded a 15% improvement in revenues from Atlanta-based BellSouth Enterprises as a result of revenues from acquisitions in 1986, and from improved sales of customer premises equipment.

Total revenues for the first six months of 1987 were $5.98 billion, up 4.2% over the same period in 1986. Net income for the six month period was $834.7 million, up 1%. As part of BellSouth's efforts to improve profits, the company announced an early retirement program in mid-1987. By Nov. 1, 1987, 2,400 managers will have voluntarily left the company.

BellSouth's movement into non-regulated businesses complements its strengths in telecommunications, analysts say. BellSouth's general strategy has been to buy companies with expertise in computer hardware and software systems that would enable it to provide consulting and systems development services.

Examples include the $97 million purchase in March 1987 of Dataserve, headquartered in Windsor, England, and Eden Prairie, Minn. Dataserve provides computer parts, service and maintenance, in addition to computer leasing in Europe and the U.S. BellSouth also announced plans in July 1987 to purchase Universal Communications Systems, Roanoke, Va., for $79 million. UCS is one of the nation's largest independent interconnection companies with a presence in 44 states. The transaction, which is expected to be completed this fall, would provide nationwide equipment and consulting for customer premise equipment.

BellSouth also is expanding its presence in cellular communications and paging systems. On Dec. 31, 1986, the company entered a joint venture with Mobile Communications Corp. of America to provide service in the Jackson, Miss., area. BellSouth International purchased a 40% stake in August 1986 in London-based Air Call, which provides cellular and paging service, media response and telephone answering services in five European countries. No purchase price was released on the acquisition.

As a result of BellSouth's growing capabilities, the company has landed several large international consulting contracts. In January 1987, BellSouth agreed to an 18-year pact to provide voice and data communications equipment and services to Shanghai Center, the largest multi-use real estate project in China.

In March 1987, BellSouth agreed to oversee purchase and installation of digital network equipment for Guatel, Guatemala's national telephone company. In April 1987, BellSouth agreed to a one-year contract to provide telecommunications training and technical support to Telecommunications Consultants Ltd., a part of India's national department of telecommunication.

In November 1986, South Central Bell and Kansas City, Mo.-based US Sprint announced a joint trial of SCB's public switched digital service, and SprintLink switched service. It was the first trial of its kind between a Bell operating company and an interexchange carrier. The application was to provide high speed data transmission service to an industrial user, says Mont Williams, a Sprint VP. "It's one of many developments we have going with the Bell companies. We'd like to make it a ubiquitous national service," he says.

"I expect to see more partnerships between the Bell companies and long distance carriers," says William Rich, senior analyst at New York-based Northern Business Information. "The regional Bell companies are looking to become general service providers to large business customers. This would help them eliminate bypassing of the (Bell company's) network."

BellSouth also is expanding the activities of its Birmingham, Ala.-based BellSouth Advertising and Publishing unit. The unit, which publishes over 500 directories in 517 markets, announced plans to publish Gulf Coast, Northeast Texas and Pacific Northwest editions of its Regional Industrial Pages business directories.

Measured spot TV spending for Yellow Pages advertising by Southern Bell jumped 73% to $3.5 million in 1986. Measured spot TV for South Central Bell fell 9% to $1.5 million in 1986. BellSouth's publishing unit also purchased Dayton, Ohio-based L.M. Berry in April, 1986, for an undisclosed sum. L.M. Berry is the nation's second largest independent advertising sales company.

Bristol-Myers Co. showed strong sales and earnings increases in 1986 despite a massive withdrawal of all its capsule products in the wake of two deaths attributed to cyanide capsules taken from tampered Excedrin bottles.

B-M's Clairol unit also ended a 30-year relationship with Foote, Cone & Belding, Chicago—the agency that created the fabled "Does she . . . or doesn't she?" line. Clairol shifted Loving Care to DDB Needham, Miss Clairol to Grey Advertising and Condition shampoos and styling products to Laurence, Charles, Free & Lawson. The assignments represented about $10 million in billings.

New products include Westwood Pharmaceutical's Keri Silky Smooth and the prescription Lac-Hydrin, the first prescription therapeutic lotion approved by the Food & Drug Administration. Westwood also introduced PreSun SPF 29, which offers the highest possible protection from the sun.

Of B-M's $4.8 billion in sales, up 9% from 1985, the greatest dollar volume increase—11.8%—came from its $1.9 billion pharmaceutical and medical products division. The division claims to be the industry leader in anti-cancer drug therapy, and in 1986 introduced VePesid, the fastest-growing anti-cancer drug in the world. The division also introduced Bu-Spar for the treatment of anxiety.

Sales in nonprescription health products grew 11.8% to $1.37 billion, despite the withdrawal of its OTC capsules— including Excedrin, Datril, Comtrex and Bufferin—after two people died of cyanide-laced Excedrin capsules. The products have since been reintroduced in caplets.

In the OTC products category, B-M's Comtrex, competing in the $800 million cold medicine category, saw a slight 2% decline in ad spending to $9.5 million while it continued to hold its estimated 7% market share. Procter & Gamble's Nyquil remains the leader in the category with an estimated 10% share, down from 12%.

In March, B-M introduced Comtrex A/S, a multi-symptom allergy and sinus reliever that is attempting to cross over into the $125 million allergy segment led by Schering-Plough's Chlor-Trimeton and Warner-Lambert's Benadryl. The product was backed by an estimated $8 million ad budget.

The biggest spending increase backed its ibuprofen product, Nuprin. Nuprin spending increased 27% to $36.2 million, the highest advertised brand in the B-M product portfolio. The heavy spending was believed to have been influenced by new entries expected in the ibuprofen-based analgesic category. In September 1986, an exclusive marketing right granted by the FDA for B-M's Nuprin and American Home Products' Advil ended. And several companies charged forth with their own ibuprofen-based analgesics, a segment that gained 15% of the overall $1.7 billion OTC analgesic market in 1986. Nuprin had a 2.5% share; Advil had a 6% share.

That market has grown to $2.2 billion in 1987, a growth influenced by the new ibuprofen entries. Now competing with Nuprin and Advil are Thompson Medical Co.'s Ibuprin and Johnson & Johnson's Medipren, as well as generic-label products from Bolar, Par Pharmaceutical and Zenith Laboratories. Meanwhile, AHP's Whitehall Labs introduced Trendar and Upjohn Co. introduced Haltran, both marketed for relieving menstrual cramps.

With heavy spending behind Nuprin, B-M's ad spending for its Bufferin aspirin-based analgesic decline nearly 27% percent to about $8.4 million. Spending for Excedrin remained unchanged at $16.5 million.

Bufferin, with a 5% share, trails Excedrin, with 5.5% share; Sterling Drug Co.'s Bayer, with 6%; and American Home Products' Anacin, with 6.5%. Aspirin brands were losing share in the analgesics market due to new painkillers, but the market is back on the upswing now that the FDA has allowed drug companies to advertise the link between aspirin and prevention of heart attack.

Sales of toiletries, beauty products and household products were essentially unchanged from 1986. Toiletries and beauty products accounted for an estimated $1 billion in sales, while household products contributed $439 million.

In household products, B-M was clobbered in the air freshener market after Airwick Industries introduced Magic Mushroom. Magic Mushroom has increased Airwick's share of the $300 million category to 30%, from 12% in 1985. Market share for both B-M's Renuzit (marketed by its Drackett Co. subsidiary) and S.C. Johnson's Glade dropped from 25% to 20%, while the category grew by $50 million in retail sales.

Drackett's Windex also took a beating in 1986 from Miles Labs' Glassworks. While Miles was coming on strong with the April introduction of Glassworks, backed by a $7 million budget, Drackett was dropping ad spending for leader Windex by 21.8% to $3.3 million. The Windex market share took a similar dive, to 44.6% from 51.4% a year ago. Texize's GlassPlus has a 25% share, up from 24%, while Glassworks has 15%.

In personal care products, B-M's Keri Lotion continued to hold an estimated 3% share in the body lotion market, against Unilever's Vaseline Intensive Care's 24% share.

Clairol remains the leader in the haircoloring market, though Cosmair's L'Oreal line has been making steady inroads. Clairol has an estimated 63.7% share against L'Oreal's 26.6% share, according to Salomon Brothers.

With half of the U.S. population to be over 40 by the end of the decade, Clairol has shifted its emphasis to a ore mature audience with endorsers such as "Dynasty's" Linda Evans and "Family Ties' " Meredith Baxter Birney. In 1986, L'Oreal began to fight back with spokeswoman Cybill Shepherd.

Ad spending in 1986 was essentially unchanged at about $30 million for all lines, including Ultress and Loving Care. In 1986, B-M also introduced its Color Visions computer system that allows women to try on new haircolors via computer graphics.

B-M signed an estimated $10 million plus multi-year agreement with Westinghouse Broadcasting & Cable's Group W Productions and its five-station group. It calls for B-M to co-venture with Group W for several years in a new syndicated TV series and to sponsor a package of quarterly health specials.

WHY BE A LITTLE FISH IN A BIG POND?
FOOD STORE SALES ARE BEEFING UP IN TUSCALOOSA.
Tuscaloosa, Alabama outspends Birmingham, the 45th-ranked HH ADI in the United States, for Supermarket, Grocery and Other Food sales-per-person. By as soon as 1990, Effective Buying Income is expected to leap 55%, outperforming Alabama, the East South Central Region, and the entire United States. Total Retail Sales are projected to rise 52%, again beating state, region and national projections and proving that Tuscaloosa is a fat and juicy market that's beefing up even more.
WCFT DOMINATES THE MARKET.
We're the #1-rated station sign-on to sign-off. We've got the facts, figures, programming, including the #1 news, to help make your food store sales #1 in Tuscaloosa.

Home furnishings	194	174	11.5
Personal products	146	143	2.1

As the industry suffered from a decline in demand for distilled spirits, Brown-Forman Corp., the country's second largest distiller, registered a better-than-average performance in 1986. The company geared up for 1987 by tightening its work force and extending its product lineup.

Even though the distiller has experienced some volume declines, most of the Brown-Forman labels are performing better than the overall industry, according to M.L. Conway, an analyst with Value Line Investment Survey.

Brown-Forman formed a new U.S. marketing division in December 1986, Brown-Forman Beverage Co., by combining four wine and spirits companies—Jack Daniel's Distillery, B-F Spirits Ltd., California Cooler Co. and Jos. Garneau Co. The move, which was said to be dictated by a cash drain stemming from Brown-Forman's purchase of California Cooler, sparked a family feud.

The restructuring plan, reported to be the brainchild of company chairman-ceo, W.L. Lyons (Lee) Brown, was opposed by his brother, Martin Brown, who resigned as vice-chairman of the company and chairman of the Jack Daniel's division. William M. Street, vice-chairman of Brown-Forman, was named president and chief marketing officer of the new unit. The goal of the consolidation was to improve profits by trimming the work force.

The company took further steps to simplify the corporate structure on July 31, 1987, when it eliminated the holding company, Brown-Forman Inc., by merging it with Brown-Forman Corp., which previously was the title of the operating company. The move also had tax advantages.

In June 1987 the company sold the Lenox Candles division to Candle Corp. of America, Greenwich, Conn., for an undisclosed amount of cash, and it liquidated the Keepsake diamond jewelry line last year. Home furnishings and personal products divisions at B-F together account for one-fourth of sales and 16% of profits. Wine and spirits command the major share of corporate sales and profits.

The hottest item in that wine and spirits business is California Cooler, bought in fiscal 1986. The agreement involved an upfront payment of $98 million in cash and further payments over the next two years based on case volume—an amount that could cost an additional $44 million.

Although the Brown-Forman cooler product relinquished its crown last year to Gallo's Bartles & Jaymes brand, sales of the California Cooler line increased by 10%, as 13 million cases made their way into the market in 1986. That gave California Cooler a 17.5% share of market compared with Bartles & Jaymes' 22.9% share, according to M. Shanken Communications' wine and spirits industry newsletter, *Impact*.

During the last year, wine cooler sales grew to account for over one-fourth of all wine products consumed in the U.S. Analysts predict the category will reach $1.3 billion in sales this year. Because of the product's popularity and newness, market shares fluctuate wildly. Bartles & Jaymes, with a 17.5% share in 1985 compared with California Cooler's 26.8%, roared past California Cooler in 1986, the first full year for B&J. Seagram's lineup of coolers grew from a 9.3% share in 1985 to 13.6% in 1986.

Last year, California Cooler was supported by a $25 million advertising budget, while competitors Gallo and Seagram spent about $30 million apiece. The 1987 advertising budget for California Cooler reportedly approaches $40 million. The line has been augmented by the addition of two new flavors, tropical and orange, and by larger size offerings—2-liter bottles, 187-milliliter bottles and quarter and half-barrels.

Brown-Forman also has been active in market tests and product roll-outs. Martell Cordon Rubie Cognac entered the market last September and will be rolled out nationally this fall. Bolla Pinot Grigio wine debuted last October, while Bolla Gavi di Gavi came out this September. The Cella line introduced two wine beverage products this year: natural peach and natural raspberry flavors.

Brown-Forman currently is test marketing another cooler product in Texas and Florida, one which capitalizes on the name of its most profitable brand, Jack Daniel's whiskey. Jack Daniel's Tennessee Cooler, a blend of fruit juice and Jack Daniel's Black Label Whiskey, should strengthen both B-F's presence in the burgeoning cooler market and bolster the whiskey brand.

Case depletions of Jack Daniel's Black Label declined by 3.8% in 1986 to 4 million, despite more than $6.3 million in measured media support, up 3%. Among bourbons, Jack Daniel's is No. 2 behind Jim Beam in case depletions and is ranked eighth among all liquor brands, according to *Impact*.

Another strong seller in the stronger spirits category, Canadian Mist Whiskey, remained the country's top Canadian whiskey despite a 5.5% drop in case depletions. The brand received nearly $4 million in measured media support, down 20%.

Rejuvenated by its first new creative advertising effort in three years, Early Times Old Style Kentucky Whiskey broke a $2 million ad campaign in November, which was reinforced by a $1.2 million point-of-purchase effort, all from Ally Gargano/MCA Advertising, New York.

The biggest increase in cases sold was for Korbel Champagne, the fastest-growing California champagne. The 11% increase in volume was matched by a 12.4% increase in sales, which demonstrated a stronger performance than that enjoyed by the category as a whole. Korbel received $2.9 million in measured spending, up 45%.

Conversely, the largest decline in number of cases was the 35% drop by Cella wines. Sales of Cella and Bolla Italian import brands were affected by a weakened

dollar. Undaunted, this past March Brown-Forman acquired the worldwide trademark for Fontana Candida premium Italian wines, the world's leading supplier of Frascati wines. The company also bolstered its stake in the domestic wine market last September when it obtained U.S. distribution rights to the Parducci line of California wines, whose major product is a white zinfandel.

Fuller seeks other sales doors

Fuller Brush, a Sara Lee subsidiary, is trying to make itself better known on new fronts through the distribution of 15 million mail order catalogs, advertising in newspapers and magazines, and testing retail stores in Dallas. All of this, President Dave Bryan assures, doesn't spell the demise of the Fuller Brush "man." Fuller has 13,000 of them, in both genders, who deal more with referrals today than door-to-door calling.

Campbell Soup Co.

Other U.S.	76	81	(5.8)

Campbell Soup Co. is getting out of a number of businesses that are corollary to its key food-processing activities. Food products, which represent the foundation of the company, also serve as its growth sectors.

In June 1987 Campbell sold its Triangle Manufacturing Co., a manufacturer of fitness equipment, to St. Lawrence Manufacturing of Canada Inc. for an undisclosed price. One month later, Campbell unloaded its Recipe dog food operation to H.J. Heinz Co.'s StarKist subsidiary.

The three remaining H.T. McDoogal's restaurants in the Philadelphia area were sold recently, and Campbell is planning to sell its 16 Annabelle's restaurants in the Southeast and 66 Pietro's Pizza Restaurants in the Pacific Northwest.

Through the first nine months of its current fiscal year (ending early August), Campbell reported sales up 6.4% to $3.49 billion. Of the total, Campbell U.S. (soups, prepared canned foods, dinners) contributed $2.11 billion, up 2.1% from 1986. Larger sales gains came from Mrs. Paul's Kitchens, up 11.7% to $121.4 million, Pepperidge Farm, up 10.9% to $381.3 million, and Vlasic Foods, up 7.8% to $198.9 million.

To beef up its soup category, a slow-growth sector that still accounts for about 40% of Campbell's total sales, the company is pushing higher-margin, value-added microwaveable soups.

In test market are two microwave soup products in ready-to-serve aseptic plastic containers: shelf-stable Cookbook Classics and frozen Soup du Jour. National rollout of Cookbook Classics is slated for fiscal 1988.

"Microwave soup will be very big," says analyst Leonard A. Teitelbaum, VP capital markets at Merrill Lynch. "Campbell has been a leader in research and development and is taking advantage of better packaging. Once microwave soup comes out in a big way, it will be very good for the company."

To further its push into value-added microwaveable food products and microwave cooking information, the company has established the Campbell Microwave Institute. The unit's goals include establishing and promoting the month of October as International Microwave Month, developing new microwaveable products and standardizing microwave heating directions for Campbell products.

Mr. Teitelbaum sees additional merit in Campbell's recent divestiture decisions. "No one knows how to sell soup like Campbell, and Pepperidge Farm is one of the finest specialty bakeries. I think the company has taken a look and decided to go back to what its does best."

To reflect the growing importance of consumer products, Campbell reorganized its sales force, giving local sales managers more of a say in developing products, advertising and marketing strategies. Campbell believes this will give it the best value for its advertising dollar.

In fiscal 1986, sales and marketing expenses totaled $544 million, or 12.4% of total sales, up dramatically from 8.3% of total sales at the beginning of the decade. This spending has helped Campbell hold onto 66.6% of the $2.2 billion retail soup market. Its condensed soups hold a 49.3% market share; ready-to-serve soups account for 15.8% of the total market, dry soups 1.5%.

Measured ad spending totaled $123.7 million during calendar 1986, down 4.9% from 1985 levels. Media dollars were diverted from existing products to support a variety of new introductions and line extensions.

For example, spending on red-and-white labeled canned soups declined 36.5% to $19.5 million, according to BAR/LNA expenditure reports. At the same time spending increased for introductions of Creamy Natural Canned Soup at $5.3 million and for Home Cookin' Soup at $6.7 million.

Among Campbell's introductions and line extensions over the last 20 months are:

- Line extensions of its condensed soups to include both gourmet and homestyle formulations in the traditional red-and-white labels and under the Golden Classic and Creamy Natural names;
- Introduction of a dry soup line which was able to expand demand in the $430 million category while capturing approximately 25% of dry soup sales. Lipton holds an estimated 50% of the market. Media spending on dry soup held even with previous year levels at $4.85 million. Campbell is introducing a line of dry, oriental-style Ramen Noodle soups and products this year;
- Line extension of the Prego spaghetti sauce line to include Prego al Fresco sauce, Prego soups and Prego frozen entrees. Prego sauce, a solid No. 2 in the sauce market with approximately 30% to Unilever's Ragu's 50%, was supported with $7.6 million in measured spending, down 35% from 1985 levels. Introductory spending on Prego frozen entrees was measured at $1.8 million;
- In the freezer case, Campbell launched nationally a four-variety line of Great Starts breakfast sandwiches, promoted with $3.8 million in spending.
- Its Le Menu frozen dinner line was extended to include entree-size packages, Le Menu Lightstyle, six dinners with less than 350 calories, and L'Orient Chinese dinners. Spending on Le Menu Lightstyle was measured at $1.04 million. L'Orient received $2.3 million support. During 1986, the company repackaged its frozen foods lines in microwaveable containers;
- The Fresh Chef line of refrigerated soups, sauces and salads, scheduled for national distribution in 1986, was pulled back in April 1987 due to distribution problems, after introductory spending of slightly more than $4 million.
- Now under the Mrs. Giles Country Kitchens subsidiary, new distribution methods for Fresh Chef are being tested in three markets;
- Other fresh products were introduced in selected markets including, Campbell's Fresh produce and Campbell's Fresh Express snacks and lunches.

Spending on Pepperidge Farm brands increased overall by 24% to $17.9 million, led by a 123% increase in spending on Pepperidge Farm Cookies at $8.9 million.

For CBS Inc., 1986 was a year to recuperate, with overall advertising expenditures almost unchanged from 1985. After fending off several takeover attempts, CBS found itself deeply in debt and facing a declining market share. To get the company back on course, founder William Paley came back as chairman of the board and Loews Corp.'s Laurence Tisch took over as president-ceo.

Under the new leadership, CBS launched a back-to-basics strategy. This involved a complete overhaul of management. Mr. Tisch hired Coopers & Lybrand as a management consultant to study the company and come up with ways to run CBS more efficiently. The result: Budget cutbacks, staff reductions and a renewed focus on the broadcast and records segments.

Among the 20 divestitures made in 1986 was the sale of the educational and professional book publishing division to Harcourt Brace Jovanovich for $500 million. There was also talk that the records division—one of its strongest performers—might be sold. But this was not to be.

Nevertheless, management's goal of strengthening broadcast operations also resulted in the sale of CBS Magazines division, announced in July 1987, following months of speculation that CBS was looking for a buyer. The division is being bought for $650 million by a group of its senior executives. Several of the special interest consumer magazines had been under the CBS masthead only since 1985 following what became a controversial transaction with Ziff-Davis.

Amidst the corporate restructuring, CBS spent $111.2 million on measured advertising, just slightly above the previous year's level. Overall, the allocation among the various media changed very little.

Although the total spending estimate shows little change from the prior year, CBS' advertising picture is by no means static. Television, records and video account for the largest share of the ad budget. According to BAR/LNA figures, measured spending for the television network dipped 9.4% to $28.8 million in 1986. By contrast, spending increased for the records division 6.4% to $31.4 million. Of this amount, the Columbia Record and Tape Club accounted for $26.9 million in 1986, up 3.1%. The records division accounted for about 37% of the the company's operating profit in 1986.

Advertising costs for video products increased 45.2% to $16.7 million. In particular, BAR/LNA data show that measured advertising for CBS/FOX videocassettes rose 79% to $5 million. Measured media for the video club rose 46% to $9.5 million. In addition, CBS spent close to $3.4 million to advertise its radio network and stations, up 30.8%. The magazines and related products received about $5.3 million of the ad dollars in 1986.

Noticeably absent from 1986's advertising outlays is the substantial sum paid to promote movies produced by Tri-Star Pic-

tures, since CBS sold its interest in the movie company in 1985. Also gone is the budget for Ideal toys and games, another subsidiary sold in 1985.

In addition to holding down ad expenditures, CBS continues to cut back in other areas while struggling to keep from falling further behind in the ratings race. The company recorded a 15.8 overall rating and 25 share, second to NBC (17.8/28), and cut its rates to attract advertisers during the 1986-87 season.

The biggest operations cutbacks were made in 1986 but continued into 1987. Earlier this year, Mr. Tisch announced a reduction in the news division; in April, more staff cutbacks were announced for the entertainment division. The Writers Guild of America settled a six-week strike against CBS earlier this year with approval of a three-year contract including provisions for the company to hire more temporary workers and use managers and on-air reporters to write stories.

However, CBS has found it difficult to trim the budget and improve ratings at the same time. The "CBS Evening News" still trails NBC, at times slipping to third place. CBS is trying to stage a comeback and should be in a better position to do so when it regains financial vigor. In a surprise announcement, Mr. Tisch revealed a plan to offer a second, optional half-hour of the "Evening News" to affiliates. But initial reactions were not enthusiastic. CBS is still pushing its "Morning Program" to gain support among affiliates.

Out of necessity, CBS has been innovative in trying to stem the ratings slide and advertising slump. It became the first network to offer 15-second spots and the first to promote upcoming sitcoms by airing previews, as it does for other programs.

On the programming side, it is taking a bold gamble with "Tour of Duty," a new series set in the Vietnam War. The show, intended to counter NBC's "The Cosby Show," is costly and controversial—the pilot alone cost $2 million. But the new program executive, Earle LeMasters 3d, believes the idea will work. What is clear is that CBS needs to do something drastic to turn its prime-time ratings around.

CBS reported some good news on its first quarter performance in 1987. Net income rose to $48.7 million, nearly triple the $16.3 million of the same period in 1986. CBS credited the gain to lower interest costs and higher earnings in the records division. However, losses at the television network were estimated to be nearly $10 million for the quarter. At a meeting of its shareholders in May 1987, Mr. Tisch found it difficult to characterize the broadcast group's outlook as anything more than "uncertain."

Chrysler Corp. increased its share of the U.S. retail car market for the sixth straight year in 1986, but the high cost of subsidizing sales incentives contributed to a drop in net income.

Chrysler's major 1987 venture was the acquisition of Southfield, Mich.-based American Motors Corp., completed on Aug. 5. Chrysler will gain market share, particularly in the light-duty truck market where AMC/Jeep holds a 4.4% share, compared with 4% in 1985. Chrysler held a 12.6% share in that market compared with 13.4% in 1985, the drop attributed largely to lost production from a three-month shutdown for new model conversion.

Chrysler is now in the process of removing the American Motors name from the marketplace. AMC became Chrysler's third distribution network, marketing trucks and cars as the Jeep/Eagle division.

Chrysler Motors, the vehicle-producing subsidiary of Chrysler Corp., held an 11.7% share of the combined car and truck market in the U.S. in 1986. It held an 11.8% share in 1985, according to *Automotive News' 1987 Market Data Book*.

Chrysler Motors' share of the U.S. retail car market in 1986 was 11.4%, up from 11.3% the prior year. Worldwide factory unit sales climbed 2% to 2,198,415 in 1986 from 2,157,373 units in 1985.

Two of the company's three marketing units posted gains in U.S. car sales in 1986. The Dodge division reported U.S. car sales of 525,462 units in 1986, up 7.5%. Plymouth reported U.S. car sales of 427,070 units, up 12.2%. Chrysler unit car sales of 356,460 were down 5.2%.

The Dodge Aries outsold all other models in the Dodge lineup, posting U.S. sales of 108,051 in 1986, down 7.1%. The Plymouth Reliant, which like the Aries is an aging product in the Chrysler line, led Plymouth-brand sales. Reliant sales were 130,043, down 6.3%. The Fifth Avenue topped Chrysler-brand models with 106,897 in sales, down 2%.

In 1987, the company will conclude what it calls an 18-month "blizzard" of new product launches. Chrysler is putting a heavier emphasis on trucks and moving to a more upscale, richer product mix in its car line.

Chrysler corporate advertising for the 1987 model year featured Chairman Lee Iacocca touting the barrage of new products as proof the company isn't resting on its laurels. The company also tried to establish more distinct identities for its brands, both with advertising and with a restructuring into a brand marketing setup.

Dodge, the designated "performance" division, got a new ad theme line, "Setting new standards of performance." The lead TV spot for the new Shadow shows an aggressive-looking junkyard dog that wanders into an abandoned factory, where he witnesses the transformation of an old Dodge Dart into a Shadow.

Plymouth brand advertising built on "The pride is back, born in America" positioning introduced a year earlier, featuring the Kenny Rogers-sung theme music.

Chrysler brand advertising emphasized luxury, technology and performance under the theme, "Driving to be the best." For the 1987 model year, Chrysler dropped ad spokesman Ricardo Montalban after 13 years, but later announced he would be back in 1988 model ads.

Two key products introduced in early 1987 were the Chrysler LeBaron coupe and Chrysler LeBaron convertible, both aimed at the upscale, luxury market.

Designed as image-boosters, the LeBaron models are exclusive to the Chrysler brand and are evidence of the company's continuing effort to refine its brand marketing strategy and differentiate Chrysler, Plymouth and Dodge products.

Chrysler's position as a luxury brand marketer will be further reinforced in the fall of 1987 when the company introduces its large front-wheel-drive luxury cars. The 1988 Chrysler New Yorker and Chrysler New Yorker Landau are full-size sedans which will compete in the traditional luxury car market. Dodge will carry a version called the Dodge Dynasty.

Chrysler in 1987 also introduced new versions of its popular Dodge Caravan and Plymouth Voyager minivans. Designed to help the automaker retain its lead in the minivan market, the Dodge Grand Caravan and Plymouth Grand Voyager are 14.6 inches longer than previous models.

Chrysler also added to its truck lineup with the introduction of the mid-size Dodge Dakota pickup, the company's first new domestically built pickup since 1972.

In keeping with the designation of Dodge as the performance division, the new Dodge Daytona was positioned as the lead image vehicle for the entire product line.

Also introduced as part of the product barrage were the Dodge Shadow and Plymouth Sundance. The sporty compacts debuted in mid-1986.

Still to come before the end of 1987 is the Chrysler TC by Maserati, a limited-volume, two-seat luxury coupe developed by Chrysler and Italian automaker Officine Alfieri Maserati SpA.

Chrysler in September 1987 will also resume production of its Dodge Omni America and Plymouth Horizon America models which anchor the bottom end of the product line. Sales of the Horizon America models climbed 82% in the eight-month period following their May 1986 introduction, compared to the same period in 1985. Chrysler's share of the subcompact segment rose from 5.3% to 8.5% during that period.

Like its domestic competitors, Chrysler relied on deep-discount consumer loans and rebate programs to lure customers in the fall of 1986 and through much of 1987. Incentives became so widespread that Chrysler applied them to its pivotal launch of the LeBaron coupe, offering a $500 cash rebate or low financing rates.

The company blamed the cost of subsidizing the incentives in citing reasons for a 24% drop in net income in the first quarter of 1987, compared to the previous year.

Chrysler moved to hold its position as the warranty leader among high-volume automakers by announcing in February 1987 a seven-year, 70,000-mile powertrain warranty and a seven-year, 100-000-mile warranty against rust-through on its U.S.-built retail cars and trucks. The company used Mr. Iacocca as pitchman for the warranty coverage in national TV commercials.

Mr. Iacocca also spearheaded the public relations campaign launched in the wake of a federal indictment of the company and two of its executives on odometer tampering charges in June 1987. He maintained that Chrysler had acted legally but admitted making a mistake in failing to notify customers that vehicle odometers were disconnected during overnight quality testing programs. That practice has been discontinued.

Mr. Iacocca gained the greatest publicity in recent months, however, for the acquisition of American Motors Corp. Chrysler says two chief reasons for the buyout were acquisition of the Jeep brand name and AMC's ultra-modern assembly plant in Ontario, Canada.

The AMC takeover followed a spate of corporate moves. In June 1986, Chrysler announced the sale of its 12.5% equity in French automaker Peugeot S.A. That announcement came less than a week after Chrysler said it would increase its stake in Italian automaker Maserati SpA from 3.5% to 51% by 1995. Chrysler further refined its niche marketing strategy by announcing in April 1987 its purchase of the Italian exotic-car maker Lamborghini.

In 1987, the company also moved to expand its international presence. In March, Chrysler announced it would re-enter the European market by the end of the year. The automaker expects initially

to export 5,000 vehicles annually to Europe.

Models targeted for export are the Chrysler LeBaron turbo coupe and convertible, Dodge Lancer ES, Dodge Shadow ES, Plymouth Voyager and Dodge Daytona Shelby Z.

In July, Chrysler Motors signed agreements with First Automotive Works of Changchun, China, to provide the Chinese manufacturer with the technology, machinery and equipment to build Chrysler engines.

Chrysler 2.2 and 2.5-liter four-cylinder engines will be built at a new plant in Changchun, beginning in the second half of 1989.

In June 1987, Chrysler Corp. agreed to buy Electrospace Systems, a Texas-based defense electronics contractor for $367 million. The Electrospace Systems business will be teamed with Chrysler's Gulfstream Aerospace Corp., which makes executive jets.

In May 1987, Chrysler Motors announced its component business operation division would become a subsidiary called Acustar Inc., one of the largest automotive parts suppliers in the U.S.

In February 1987, Chairman-CEO Iacocca signed an agreement to continue in that post for four years. The contract contains a provision which would keep him at the helm for an optional fifth year. The new agreement will carry Mr. Iacocca, who will be 63 in October 1987, past the normal retirement age of 65.

Clorox Co. RANK **95**

Oakland, Calif.

($ in millions)

Worldwide	1986	1985	% chg
Sales	1,126	1,090	3.3
Net income	105	96	9.4
U.S. advertising	90	107	(15.9)

While continuing to lessen its dependence upon liquid chlorine bleach through an aggressive new products program, Clorox Co. nevertheless decreased its total ad spending by 16% in 1986.

The Oakland-based household products marketer's diversification drive seems to be paying off. Five years ago bleach sales accounted for 50% of total earnings; today, 35% to 40% of the company's pretax earnings come from bleach.

Clorox continues to support liquid chlorine bleach with heavy spending, measured at $9 million in 1986, down 3% from 1985, according BAR/LNA.

Seeking to boost its industry-leading food stores sales of $630 million for Clorox, the company began shipping its premium-priced Fresh Scent Clorox liquid bleach in January 1986. Clorox promotes the bleach-that-doesn't-smell-like-a-bleach with TV commercials around the theme "Goodness, it smells so good." Additional spots backing both regular liquid chlorine and Fresh Scent play up both products' cleaning abilities. Fresh Scent's packaging resembles that of Clorox's traditional liquid bleach, but its cap and diamond insignia are different colors.

Spending and market share for bleach-containing Tackle, which hit regional markets in a big way in 1985 with measured spending of $9.1 million according to BAR/LNA, fell off in 1986 and 1987. Spending for the cleaner disinfectant dropped to $800,000 in 1986, and its share for the year ended June 19, 1987 fell to 7.8% of the all-purpose liquid cleaner market, a considerable drop from the prior level.

Industry sources say Tackle's dollar volume dropped 31.8% during the period; its unit volume dropped 32.5%. The company did not market test the herbal-scented product, which shipped nationally in February 1986.

At present, Clorox continues to test Act, a concentrated laundry detergent in a pre-measured "action pak" in Boise and Omaha following earlier tests in Dallas, Oklahoma City and Atlanta.

Marketing powerhouse Procter & Gamble, formerly Clorox's parent, reacted to Act's introduction, coming out with a similar new product called Cheer Power Pouches. At present, Cheer Power Pouches are still in test in Atlanta and Denver. Industry observers say P&G is waiting to see what Clorox's next move will be with Act.

In September 1986, Clorox began testing a new heavy-duty abrasive liquid cleanser called Strike. It is currently available in Phoenix and Seattle. At the same time P&G began testing a soft abrasive cleanser under its Mr. Clean brand initially in Dallas-Fort Worth; later, it was introduced nationally.

Clorox began examining further expansion into the laundry detergent market when it began testing Wave, a heavy-duty detergent containing enzymes and a color-safe bleach. In a Charleston, S.C. test, TV and print support positions Wave as a "super detergent" containing protein stain-fighters and color-safe bleach. When Wave failed to perform well in two attempts at test marketing, Clorox gave up on the product. Wave competed against Vibrant, a P&G brand.

Clorox continues to update existing brands to keep abreast of changing consumer preferences. To this end, it introduced a new, improved grease-cutting formula for its Formula 409 cleaner. Formula 409 itself received measured spending of $5.1 million, down 28%.

In early 1986 Clorox began a national rollout of a liquid version of its Clorox 2 all-fabric bleach, backed by modest spending in network and spot TV plus print. Analysts say it so far has gained a 14% share of the all-fabric bleach category.

Among other household products, Clorox spent $3.9 million in measured media on Liquid-Plumr, the same as in 1985, and $5.9 million on Soft Scrub Cleanser, down 17%.

Clorox introduced K.C. Masterpiece barbecue sauce nationally through its Kingsford division early in 1987. Clorox uses the barbecue-sauce developer, Dr. Richard Davis, in print ads. Prior to the acquisition, five-flavor K.C. Masterpiece was marketed only in the Midwest. Kingsford-brand measured spending of $6 million was virtually even with 1985.

In January 1987, Clorox acquired Deer Park Spring Water Co., a Lodi, N.J.-based bottled water company with distribution in selected eastern markets. It was its second entry in the field. Earlier, Clorox purchased Aspen Water Co., Tampa, Fla.

Clorox's biggest food category is Hidden Valley Ranch products, which includes dips, dressings and sauces. Measured spending on the line dropped 27% to $8.1 million.

Although the company's architectural coatings business (paints and stains) contributed 10% of total sales, the business is only marginally profitable. Four years in the making, beginning with Clorox's purchase in 1981 of Olympic and Carver Tripp paints and stains from Comerco Inc. and followed by the 1983 acquisition of marketing rights to Lucite from Du Pont, the business continues to record lackluster results.

Financial analysts say the Olympic stain division shows some signs of improvement, but that Lucite continues to perform poorly. Lucite received $3.6 million in measured media, the same as in 1985. Jay Freedman, an analyst with Kidder, Peabody, New York, predicts the coming year will be a pivotal time in which the company may have to consider divestiture if the division's performance doesn't improve.

Among the new products Clorox introduced nationally during fiscal 1987 were Olympic deck stain and Lucite premium latex paint.

As planned, Clorox divested itself of its Emil Villa's The Original Hick'ry Pit restaurant division after deciding it didn't fit into the company's long-range plans. The company sold the chain in October 1986 to an investor group headed by Mike Kwiatkowski, who was president during Clorox's tenure as owner.

In December 1985, Clorox assumed a leadership role, asking the TV networks to begin accepting stand-alone 20-second commercials, a move that would further erode the 30-second spot as the TV standard. At present, Clorox is continuing to press its case to the networks, but has yet to accomplish its goal.

Clorox has been at the forefront of industry opposition to the State of Florida's 5% sales tax on advertising. Clorox President-Chief Operating Officer John Collins has publicly opposed the tax, as has public affairs chief David Goodman in his role as a board member of the American Advertising Federation, the Assn. of National Advertisers and other trade associations. Clorox pulled spot TV buys for Clorox liquid bleach from Florida but didn't block the Sunshine State out of its network buys.

In April 1987, Henkel KGaA, the German giant consumer products marketer that competes against P&G around the world, increased its financial stake in Clorox. It announced its intention to boost its percentage from 23% of outstanding shares of Clorox's common stock to as much as 30%. Henkel also holds a subordinated note convertible into about 1.7% of additional Clorox common stock. Both companies say the move was not a prelude to a takeover. U.S. analysts say the announcement reflects the Duesseldorf-based company's satisfaction with Clorox and with favorable currency fluctuations.

Coca-Cola Co. took a major step in firming up its major domestic markets in 1986 by buying several of its major bottlers and then spinning them off into a separate publicly held company, Coca-Cola Enterprises Inc., of which Coca-Cola retained a 49% interest.

Fulcrums of Coca-Cola Enterprises are JLT Corp., Coca-Cola's biggest bottler, and the bottling operations of Beatrice Cos., bought by Coca-Cola Co. for an aggregate $2.4 billion in mid-1986. Several other Coca-Cola Co.-owned bottlers were then merged with the two to form Enterprises in September 1986. The spinoff company went public in a $1.18 billion offering in November.

The capital-intensive company that carbonates the concentrate, bottles it and sells it to stores has a strong presence in many of the attractive growth markets, particularly in the South and on the West Coast via the former Beatrice unit.

The move in one sense was made out of necessity, because both of the big bottlers forming the base of Enterprises came up for sale during 1986. Purchasing the operations kept them in the Coke fold in its heated battle with PepsiCo, which owns bottlers representing about 35% of its volume.

But efficiencies of scale already are being accrued by Enterprises, which has been buying up additional bottlers abutting areas controlled by its own units.

Coca-Cola's battle with PepsiCo—the so-called Cola War—collided in the fast food market in 1986 and early this year. In October, Wendy's International Inc. switched from serving Pepsi-Cola to Coca-Cola Classic in its company-owned stores, while Burger King Corp. decided earlier this year to remain in the Pepsi camp even though the company had announced it was flirting with the idea of switching.

The battle was not insignificant. An estimated 19% of Pepsi's soft-drink sales come from food chains, while about one-third of Coca-Cola's business comes from restaurants, according to industry analysts.

Overall, both Coca-Cola Co. and PepsiCo improved market share. "It was a year in which the big got bigger at the expense of the little guys," says Lee D. Wilder, first-VP and soft-drink analyst at the Robinson-Humphrey Co. Inc. However, neither got as big as it wanted. Coca-Cola was stopped from buying Dr Pepper Co. and PepsiCo from gaining Seven-Up Co. by the Federal Trade Commission, noting the proposed mergers would substantially reduce competition in the U.S. soft drink market.

According to *Beverage Industry*, a trade journal, industry leader Coca-Cola Co. increased its overall soft-drink market share to 39.8% in 1986, up from 38.6% in 1985. Second place PepsiCo also improved its overall soft-drink share to 30.7% from 29.8%.

In the head-to-head war of individual brands, Coca-Cola Classic overtook Pepsi to reclaim first place in 1986 after the 1985 "New Coke-Old Coke" disaster, which had allowed Pepsi to slip into the lead.

In 1986, the first full year of Coke Classic, the brand scored a 19.1% market share compared with 14.2% in 1985. Pepsi-Cola actually dropped in market share from 18.9% in 1985 to 18.6% despite case growth of 2.4%. But the year's big loser was the so-called reformulated Coke. Despite Coca-Cola's claim that new Coke would be the company's second most successful brand introduction (Diet Coke was first), new Coke ended the year dropping from a 15% share in 1985 for a No. 3 rating, to 2.4% and a ninth-place finish in 1986.

Coca-Cola had its strongest market year in the diet soft drink area. Coke's lineup of diet products (Diet Coke, Caffeine Free Diet Coke, Diet Sprite, Tab, Diet Cherry Coke, Caffeine Free Tab and Fresca) held 42.4% of the total low-calorie market with 684.4 million cases sold. PepsiCo diet products (Diet Pepsi, Sugar Free Pepsi, Diet Slice, Pepsi Free and Pepsi Light) were second with a 31% aggregate share based on 503 million cases sold.

But *Beverage Industry*, also estimated that Coca-Cola was the only leading soft-drink company with falling advertising expenditures during 1986. Coca-Cola's estimated soft-drink measured advertising dropped from $158.3 million in 1985 to $151.8 million in 1986, a decline of about 4%. Pepsi turned up the advertising heat with expenditures rising 11.5% to $130.1 million.

Ms. Wilder noted that the drop in measured dollars spent could reflect increasing use of barter advertising available to the company through its television programming companies. "I think they do not intend to have dramatically fewer advertisements before the public, but they want more carefully managed dollar expenditures," she says.

New Coca-Cola did score big in 1986 with the Max Headroom commercials that ranked first among all commercials in audience recall, according to the Video Storyboard Tests Inc.'s annual viewer survey. Video Storyboard estimates Coca-Cola spent about $48.3 million in 1986 for the Max Headroom spots. Measured on a cost-efficiency rating, the company paid about $12.07 to be noticed per 1,000 viewers.

Rival Pepsi fell in the poll, but scored better on its cost efficiency. Recall of Pepsi's 1986 ads featuring Don Johnson and Michael J. Fox ranked only fifth among viewers, while the company's 1985 spot with Lionel Ritchie ranked first. Still, the company scored a cost efficiency of $10.92 per thousand.

Coca-Cola's foray into entertainment continues to be troubled. In the second quarter, the company said it would write off more than $25 million to cover the costs of the Dustin Hoffman-Warren Beatty movie megaflop, "Ishtar."

But revenues from Coke's television syndications, including "Wheel of Fortune" and "Jeopardy," were good enough to boost overall entertainment sector revenues by more than 28% in 1986. The company does not report its TV and motion picture revenues separately.

The foods division lost ground in 1986 and underwent a management shake-up.

With sales off by nearly one percent in 1986, Coke replaced Eugene V. Amoroso as president of the Foods Division with Harry E. Teasley Jr.

Ms. Wilder says the move makes 1987 "a clean-house type of year. I would expect to see more and more aggressive exploiting of their brand name advantage in lines like Minute Maid." She says the company may also move strongly into the frozen desserts business.

Colgate-Palmolive Co. strengthened its global strategy with new products, heavy research spending and a worldwide agency consolidation during 1986. The company also started up an entrepreneurial venture to test new "niche" products and continued a longtime plan to divest itself of businesses unrelated to its core segments of household products, personal care, healthcare and specialty marketing.

The company consolidated its agency business and moved $100 million in billings from Ted Bates (now Backer Spielvogel Bates), New York, to Young & Rubicam, New York, and Foote, Cone & Belding, New York. Y&R now has about $150 million in Colgate billings; FCB has $125 million. The consolidation came at least partly because of a conflict resulting from Saatchi & Saatchi PLC's acquisition of Bates. Saatchi handles Colgate rival Procter & Gamble. Colgate continues to reaffirm its quest for creative excellence, and a number of its commercials have won honors in recent award competitions.

Engineering a new segment in dishwashing liquid, Colgate introduced in June 1986 the first automatic dishwashing liquid available on a national basis, Palmolive Automatic. In January, the company rolled out a lemon fragrance line extension.

In its continuing battle against Procter & Gamble's leader Crest, Colgate introduced nationally Colgate Tartar Control toothpaste and gel in September 1986. Another major new product in the Colgate portfolio was a lemon-lime extension of Palmolive dishwashing liquid.

Reformulated products included Irish Spring Deodorant Soap, now with skin conditioners, rolled out in September 1986; Fab laundry detergent with advanced softening systems, introduced in December 1986; and Dynamo 2 heavy duty liquid laundry detergent.

On October 5, Colgate begins shipping Fab 1 Shot, a single-dose washer-to-dryer packet. Colgate is the first company out nationally with a unitized dose laundry product.

While Colgate continues to divest companies unrelated to its businesses, it is still venturing into new markets and continues to acquire companies that complement existing businesses. Under the newly formed Colgate Venture Co., a group charged with brainstorming new product ideas that take Colgate into new niche areas, Colgate tested Maniac, a new teen fragrance line; the Cleaning Dimensions, cleaning stores that also sell Colgate products; Teledisc music; and Fresh FeLiners, a new odor-absorbent liner for cat litter boxes. In September, Colgate is expected to introduce New Again, a blood stain remover to be sold in the feminine hygiene departments of mass-market stores.

Colgate this year also created a new product group that is testing Fabuloso all-purpose cleaner directed at the Hispanic market. The company also increased its R&D investment to 2% of 1986 sales, up from 1% of annual sales in 1982.

In divestitures, Colgate's Kendall healthcare subsidiary sold off three businesses in 1986: Curity baby apparel group, sold to Gerber Products Co.; Kendall's Industrial Fabrics, sold to American Fiber and Finishing; and MedaSonics Inc., sold to Settsu Paperboard Manufacturing Co. Colgate's Knoxville, Tenn.-based Bike Athletic sporting goods business was sold to Kazmaier Associates Inc.

Colgate's divestiture program realized $232 million in proceeds, which was used to reduce outstanding debt. The divestiture program also reduced manufacturing and administrative costs, and 250 positions were eliminated.

In acquisitions, Colgate purchased the $50 million home healthcare lines of Jung Corp., Cincinnati, makers of elastic support hose, orthopedic braces and medical equipment marketed under the Futuro and Rampon names. Colgate's Princess House specialty marketing subsidiary purchased Fiesta, a U.K. company that markets crystal, china and giftware through at-home parties.

Colgate-U.S. is acquiring the liquid soap businesses of Minnetonka. Product lines include Softsoap, the country's long-term leading liquid soap brand, Sesame Street children's bath products and Village Bath adult bath products.

Colgate's Kendall-McGaw Laboratories is purchasing Quest Medical Inc., Dallas-based marketers of electronic intravenous devices, for $13.5 million.

Colgate's global account consolidation at Y&R and FCB resulted in some international successes. In the U.K., the company relaunched Soft & Gentle deodorant targeting teens, and backed it with a TV spot set to rock star Cyndi Lauper's "Girls Just Wanna Have Fun" via Y&R. In the summer of '86, it took the No. 1 rank in the U.K. A humorous spot via FCB helped catapult Ajax liquid all-purpose cleaner to the No. 1 spot in the U.K. And in Italy, Colgate relaunched Dinamo (Dynamo) detergent with fabric softener with a humorous Y&R-inspired spot which helped to double brand share.

Colgate's big ad splash in '86 was support given the national roll-out of Palmolive Liquid automatic dishwasher detergent. Colgate backed the launch with a $30 million ad-promotion budget via Y&R. The product, Colgate's first in the $550 million automatic-dishwasher detergent market, claims an 18% share and market leadership in the liquid segment. P&G's Cascade powder remains the market leader overall with an estimated 42% share, and P&G is adding a liquid version. Lever Bros. holds a 23% share with its Sunlight and All powder brands, and it began testing liquid Sunlight earlier this year.

During the year, however, Colgate lost momentum in the toothpaste segment. In early 1985, Colgate toothpaste was on the verge of toppling P&G's Crest, perennial leader in the $1 billion dentifrice category. But P&G rolled out Crest Tartar Control. That product has helped strengthen P&G's overall Crest brand share from 30% in 1985 to 39% in 1986. Colgate's share dropped from 28% to 23%. But Colgate then retaliated with a $30 million ad budget via Y&R for Colgate Tartar Control toothpaste and gel. In April, the company broke network TV ads challenging Crest's superiority claims. The ad blitz, backed initially at an annual rate of $125 million, cited independent studies showing that Colgate was more effective than Crest.

A global launch of Colgate Tartar Control is generating sales at a $200 million annual rate, according to Colgate.

Others in the category are also making comparative scientific claims, and the Food & Drug Administration is mulling whether to reclassify tartar and plaque-removal toothpastes from cosmetic to therapeutic. If so, companies would have to seek time-consuming new drug status.

Colgate's measured spending declined 8.2% to $87.3 million, and the decline showed a shift away from TV toward magazine advertising. Colgate cut spot TV by 19.7% to $13.4 million and sliced network TV spending by 12% to $57.1 million. Magazine spending jumped 78% to $12 million.

Slight spending declines generally appeared across the board of Colgate's brand portfolio. As expected, the biggest spending increases were for reformulated products and line extensions. Spending for Colgate toothpaste and gel was hiked 52% to $28.3 million, an increase primarily in support of tartar control. Palmolive dishwashing liquid saw an ad increase of 13% to $7.6 million because of the lemon-lime extension.

Colgate's worldwide sales increased 10% to $4.9 billion. Colgate attributed the gain to new products, stronger European currencies and the 1985 acquisition of the McGaw intravenous solutions business, now part of its Kendall unit. Income from continuing operations increased 5.8% to $177.5 million.

Colgate's largest businesses showed increases in sales, and the company says total operating profit from its business segments rose 10% to $362 million. The largest division—household and personal care products—increased sales 8% to $3.67 billion. Colgate's healthcare businesses' sales increased 22% to $994.9 million. Only sales in specialty marketing remained essentially unchanged—up 2% to $314.5 million.

Beer business	1,085	1,078	0.6
Other business	230	203	13.2

Adolph Coors Co. entered only one new state (Michigan) during 1986, but growth in established markets enabled the nation's fifth largest brewer to increase sales during the year.

Growth hasn't been difficult for Coors, which has been rapidly expanding from its Colorado base since the early 1970s. During 1986, Coors boosted its barrelage by 3.4% to 15.2 million barrels, while its total domestic and imported beer sales were up 2.5%.

Coors' market share grew to 8.4% in 1986, compared with 8.2% in 1985, according to Emanuel Goldman, partner at Montgomery Securities, San Francisco. Coors' ranking was carried by the nation's fourth most popular brew in total barrelage, Coors premium beer, with a 4.3% market share (4.8% in 1985), and by Coors Light, the sixth most popular beer, with a market share of 4% (3.4% in 1985). To become the nation's fourth largest brewer, Coors must move past G. Heileman Brewing Co., whose 8.8% market share in 1986 was based on 16.2 million barrels, the same as in 1985.

The company's future growth will be aided by its Shenandoah Brewery, near Elkton, Va., which began shipping Coors and Coors Light in April 1987.

Mr. Goldman projects Coors barrelage will increase 3% in 1987 to 15.7 million. "When it comes to brewing beer, historically they've been among the best," Mr. Goldman says.

In the first quarter of 1987, the company pushed Coors and Coors Light into New York and New Jersey, a market that consumes 17 million barrels of domestic and imported beer. Coors' nationwide coverage will be complete in 1990 when it plans to penetrate Indiana, Pennsylvania and Delaware.

The brewer attributes 1986's barrelage increase to growth in southeastern states, California and Texas, as well as the entry into Michigan.

New York/New Jersey, however, will be a tougher market to crack, analysts say. The market is dominated by Anheuser-Busch, whose Budweiser is No. 1. Miller Brewing Co.'s High Life and Lite are No. 2 and No. 3. And the experts predict problems due to Coors' scrapes in the past with organized labor, which has vowed to fight its New York and New Jersey expansion. This "is a real issue," one analyst says. However, on August 19, 1987, the AFL-CIO called off its national boycot of Coors.

But Coors is putting $25 million in advertising behind its efforts to win those markets. "New Jersey sales are well ahead of the targeted market share, which is well into the teens," says Terry Nauslar, director of international expansion and sales development. In Upstate New York, Coors had targeted a 6% to 7% market share, which it is now exceeding. In metro New York, the brewer's share pulls in at about 8% to 10%, Mr. Nauslar says.

Coors also is banking heavily on pushing its products outside the U.S. to continue growth. Part of that effort is guided by the April 1987 entry of Coors into the Japanese market via Asahi Breweries Ltd. Coors has captured the No. 2 American beer spot in that market behind Anheuser-Busch.

In October 1985, Coors began distributing Coors and Coors Light in Canada through a license agreement with Molson Brewery Ltd. In 1986, these two brands captured more than 5% of the 20 million-barrel Canadian beer market, and Coors Light ranks as the No. 2 Canadian-American beer.

In the U.S., Coors continues to strengthen its ethnic markets. Sales in the Hispanic market continued to hold steady at about 9% during 1986, the same percentage as in 1985.

In a move to strengthen its sales and marketing arm, Coors restructured management responsibilities within the brewing division. Gary Naifeh was promoted to VP-brand management, Gary Truitt was named VP-sales and Robert Klugman, VP-international, development and marketing services. Frank Spinosa, previously the VP-sales, resigned.

Coors is continuing its "Coors is the One" campaign, a low-key series featuring actor Mark Harmon. TV dominates Coors' media spending, accounting for 85% of total measured spending.

Coors Light continues to perform well, increasing sales 20% in 1986. Its sixth place ranking in total barrels is up from the seventh spot in 1985. In 1986, Coors Light commanded 16% of the U.S. domestic light beer market, compared with 1985's share of 15%, according to Beer Marketer's Institute. Market leader Miller Lite held a 43.7% share in 1986.

In the first quarter of 1987, Coors claims Coors Light moved up to the No. 5 spot in barrelage among all beers, replacing Stroh Brewery's Old Milwaukee.

Coors is continuing with its "Silver Bullet Bar" campaign created by Foote, Cone & Belding, Chicago. In July 1987, the company began featuring celebrities such as Carlos Palomino, former world welterweight champion, and Siegfried and Roy, two magicians who demonstrate their power of illusion when they transport the Silver Bullet Bar to the middle of a desert with seven white tigers sitting around the bar. The brewer also boosted measured advertising for its Light beer by 60% to $30.6 million in 1986.

Coors Light is also targeting the women's market with a new campaign that claims, "You don't have to be a man to appreciate a great beer." Evans/Bartholomew Pollock Norman, Denver, handles. According to market research, women buy 17% of the beer sold in the U.S., a market estimated at $6.5 billion.

Coors' market expansion efforts also include the national rollout of its Winterfest Beer, which in 1986 was only available in Colorado. Beginning in November, the heavier-bodied brew will be available in 45 states. Marketing efforts will focus on public relations via a campaign developed by Foote, Cone & Belding, Chicago.

In the first half of 1987, market expansion continues to be the force behind Coors Extra Gold beer, a heavier premium positioned against A-B's Budweiser; George Killian's Irish Red Ale, positioned to compete with imports; and Herman Joseph's Original Draft, the brewer's super premium beer, positioned against A-B's Michelob and Miller's Genuine Draft.

Coverage for Extra Gold, tagged "No Beer's as Bold as Coors' Extra Gold," in advertising from Tatham-Laird & Kudner, Chicago, was extended from five Western states to 14 in April 1987. Killian's Red Ale is now available in 34 states and the District of Columbia, and Herman Joseph's is in 23 states.

Coors, which has not introduced a new beverage product since the demise of its malt-based Colorado Chiller in 1985, says it is still interested in the cooler market, but has no plans to introduce any new product soon.

Cosmair Inc.

RANK **69**

New York

($ in millions)

Worldwide	1986	1985	% chg
Sales	725	700	3.6
U.S. advertising	120	122	(1.4)

Cosmair Inc.'s advertising budget dropped back slightly in 1986 to 1984 levels as the company selectively cut spending on some mass-market haircare and cosmetics products.

Privately held Cosmair, the U.S. licensee for L'Oreal and Lancome, is 62% owned by Nestle SA, with the balance of ownership split between L'Oreal interests. Although Cosmair does not publicly report sales or earnings, industry observers believe its profit margins, like the rest of the industry's, have been under pressure and that this squeeze prompted the normally aggressive marketer to curb spending.

The third largest beauty company was alone in holding spending below prior year levels. Competitor Estee Lauder Inc. increased its measured spending 6.4% to $49.8 million, while Avon boosted measured spending 11.4% to $28.3 million. Revlon's spending exploded 29.3% to $75 million, the real increase being disguised by the inclusion of Max Factor, Almay and Halston, which were gained through acquisition.

In unmeasured media, where cosmetics companies traditionally spend heavily on promotional activities, gift-with-purchase and demonstrations, Cosmair cut less than $500,000 from its 1985 budget, which sources say is attributable to a desire to ensure sell-through in a difficult business climate, particularly in the fragrance market where industry sales dropped 3% in 1986.

Of the media used by Cosmair, spot TV showed the largest increase, growing 45% to $14.8 million. The spot increases can be traced mainly to spending backing the upscale Polo and Drakkar Noir men's fragrances as well as the Lancome cosmetics lines sold largely in department stores that may be more effectively served by the target marketing spot offers. Network cable also rose 46.6% to $1 million as Cosmair continued to promote its Studio line of hair styling products aimed at music video fans and advertised on MTV: Music Television. Magazine advertising dropped 4.7% to $24.4 million, and network TV spending fell 11.6% to $37.2 million.

Cosmair's business is served by four primary divisions: Lancome, L'Oreal, Biotherm and designer and retail fragrances.

The single greatest budget for one line in 1986 went to Lancome cosmetics, which received $12.8 million in measured media. Lancome's sales rose more than 20% to $240 million-plus last year, according to industry sources who estimate its market share at more than 11%, placing it No. 3 behind Estee Lauder and Clinique brands in department store sales. In early 1987, Lancome was one of more than a dozen brands that the Food & Drug Administration asked to change its claims or seek registration as a drug. In general, the brands got into hot water by claiming they increase cell renewal. At presstime, the matter had not been resolved.

L'Oreal Preference hair color attracted spending of $10.2 million, down 19% from 1985 levels when Preference was repackaged and reintroduced. By comparison, Bristol-Myers's Clairol doubled spending on its Ultress hair coloring to more than $11 million.

While the Preference reintroduction helped boost hair color sales between 15% in supermarkets and 30% in drug stores, in 1986 total increases in L'Oreal sales of hair color fell back to 5% in food stores, according to Diana Temple, VP, Salomon Brothers. Clairol posted 5% gains in these stores.

Salomon Brothers estimates L'Oreal's hair color market share at 26.6% and archrival Clairol's at 63.7%. Chain drug sources, however, say that L'Oreal's share is somewhat higher in drug stores and Clairol's a bit lower. To further boost Preference, L'Oreal hired actress/model Cybill Shepherd in 1986 as its endorser. By pitting the star of the popular ABC series, "Moonlighting," against Clairol's Ultress spokeswoman Linda Evans, L'Oreal hopes to improve its position in the $500 million hair coloring market.

L'Oreal also introduced a temporary coloring product, called Zazu, in vivid colors. The product is aimed at young consumers. Retailers, however, say the product would have performed better if it had been sold in the hair care department instead of the cosmetics section of stores. The product was reportedly pegged for a $10 million promotion budget but instead received just more than $1 million in support.

Avantage, a semipermanent hair coloring introduced by L'Oreal in 1985, received $3.25 million in support in 1986 as L'Oreal continues to try to reach consumers now using Loving Care by Clairol.

In sales of styling aids, L'Oreal, which pioneered the mousse category in this country with Free Hold, remained the leader with a 13%-plus share through both Free Hold and its new Studio Line. However, that share was down from 15.5% in 1985, in part because of a decline in mousse sales in general. In 1985, according to industry estimates, mousses accounted for 75% of the $183 million volume for hair styling aids in food and drug stores. By 1986, however, mousse sales took no more than 69% of the styling aids business, now estimated at $199 million. Meanwhile, styling gels' share of the business rose by four percentage points to 26%. Trailing L'Oreal in the mousse market are Helene Curtis with a 7.3% share for Suave and 5.4% for Finesse, Alberto-Culver Co. with 12.3% for Alberto Mousse, Sassoon with 4.6% and Revlon's Flex with 7%.

In sales of mass market cosmetics, L'Oreal ranked fourth in drug and food stores in three outside audits where competitors such as Maybelline, Revlon and Noxell dominated. Its Visuelle makeup maintained about a 3% share of market, unchanged from 1985, far below Noxell's 52% share in facial makeup, Maybelline's 22%, Revlon's 6% and Max Factor's 7%.

L'Oreal spent $9 million on nail color promotion, where its share moved ahead 1 point to 7%. Its share also advanced a point in lip color to 7.5%. Still, there were rumblings in the marketplace that L'Oreal was experiencing some problems. In one survey of selected retailers published by Goldman Sachs it was noted that Maybelline moved up to the No. 3 spot in makeup while L'Oreal dropped to No. 4, concluding that the "brand may be losing momentum."

Management has acknowledged that there are some areas it will seek to strengthen, notably mascara and eyeshadows. In early 1987, L'Oreal announced the introduction of Lash Out, a lash-extending mascara, and new eyeshadows under the Couleur Couleur and Couleurelle names. The shadows are priced lower than previous eye color from L'Oreal, which had sought the high end in pricing the product against the competition.

In total mass market fragrances sales, Cosmair is ranked sixth in sales through chain drug stores, following Revlon, Unilever NV's Matchabelli, Squibb Corp.'s Charles of the Ritz, Pfizer Inc.'s Coty and Beecham Group PLC's Jovan. However, in 1986 Cosmair's Vanderbilt fragrance was once again the single best-selling fragrance in drug stores. Still, last year it became evident that Vanderbilt may have hit the peak of its lifecycle. While sales topped $70 million, Vanderbilt lost share to Primo by Parfums de Coeur. Primo is a so-called knock-off, or copycat, of Giorgio.

To protect its mass market fragrance position, earlier this year Cosmair introduced a second Gloria Vanderbilt scent called Glorious. While the fragrance has been well received, retail reports indicate the brand has not had the quick success of Vanderbilt. In mass market men's fragrances, Cosmair's Chaps, a Ralph

How much did the nation's biggest advertiser spend on each of its brands?

Turn to LNA for answers.
See page 143

Lauren brand, remains strong.

During last year, Cosmair also decided to nix plans for a Norma Kamali scent. It fought hard to keep the rights to the brand name Notorious, a fragrance that it may introduce next year under the Ralph Lauren banner. Cosmair won a suit brought by Edison Bros., St. Louis, challenging Cosmair's rights to the name. Edison had wanted to sell the name to Faberge.

In early 1987, the company experienced two major management changes. President Jean Levy resigned and was succeeded by Guy Peyrelongue. And Arnold Zimmerman, former head of L'Oreal hair care, left to join Revlon as head of its cosmetics group.

Strange boxfellows?

Chevrolet linked three new-vehicle introductions in 1986 in a tie-in with Procter & Gamble; the campaign was touted as the biggest cross-promotional effort ever. Chevrolet gave away 750 vehicles worth $9 million in the promotion, in which paper keys were placed inside 200 million boxes of seven P&G products. Consumers had to match up keys with dealers, who say the tie-in failed to produce significant numbers of buyers despite drawing increased showroom traffic.

CPC International began a restructuring program last year designed to increase its presence in the U.S. market, expand existing food product lines, slough off non-food operations and raise the value of its stock.

Worldwide grocery product sales, which account for two-thirds of total CPC sales, grew 10% to $2.77 billion, and operating income rose to $347 million, an increase of over 12% compared to 1985 (7.6% excluding a $13.5 million special charge). Best Foods, CPC's grocery products division in North America, however, recorded operating income about even with 1985, a result of heavy marketing spending aimed at maintaining existing product franchises.

According to John McMillin, an analyst with Prudential Bache Securities Inc., Hellmann's Best Foods Light Mayonnaise products have led CPC's "extremely successful marketing turnaround." Although available in just 32% of the U.S. in 1986, the new product contributed to Hellmann's Best Foods Mayonnaises' all-time high share—nearly 50%—in the $700 million mayonnaise market. The light product was rolled out nationwide this year.

However, when ranked within the spoonable salad dressing category, CPC's mayonnaise, at under 30% of the market, ranks second to Kraft's Miracle Whip sandwich spread and salad dressing brands, which together own 48% of the $1 billion market.

Mazola Corn Oil, 75 years old in 1986, is one year older than Hellmann's Mayonnaise, which was introduced to the U.S. in 1912 by Richard Hellmann. Mazola oil made a lower volume gain in 1986—5%, compared to a 13% gain in 1985. It holds a 17% share of the vegetable oil market. Procter & Gamble's Crisco is No. 1 at 22%; Beatrice Cos.' Hunt-Wesson Foods' Wesson oil is a close second with 21%. Mazola is the No. 1 corn oil in the U.S.

Combined sales of margarine and corn oil for CPC topped $740 million in 1986, 5% below 1985 levels. More than 50 new products and line extensions are added to Knorr soups, sauces, bouillons, seasonings and mixes annually,the company says. Yet Knorr is being outmaneuvered in the dry soup mix market in the U.S. by Campbell Soup Co. and Lipton, says Mr. McMillin of Prudential Bache.

Worldwide sales of bread spreads and cheese products, which include Skippy, Mazola and Nucoa margarines, increased 6% to $310 million, despite an overall flat market. A sweeter version of Skippy was introduced in the southern U.S., where it has been favorably received, says CPC. The brand ranks second with a 22% share of market—ahead of Beatrice's Peter Pan (14%) but behind Procter & Gamble's Jif (27%). Mazola and Nucoa margarines pull in 2% of a market dominated by Kraft (Parkay), Lever Bros. (Shedd, Imperial, Promise) and RJR Nabisco (Fleischmann's, Blue Bonnet).

CPC's aggressive new marketing attitude is evident in the national rollout of its Thomas' English muffins, as well as in the acquisition of Arnold Foods. Arnold does $230 million in sales annually, offering the Levys, Brick Oven, Brownberry and Devonsheer brands. CPC also acquired Old London, another specialty baker, which reports $18 million in annual sales. Together, both acquisitions should "provide the company with a lot of opportunity to build and expand as a baker of premium quality foods," says Bill Parker, a spokesman. Thomas' English muffins are now available in over 70% of the country; other products are Toast-r-Cakes and Sahara pita bread. S.B. Thomas showed an 8% sales increase and volume growth of 4% in 1986.

Mueller's, CPC's chief pasta business with a 15.6% share of the pasta market, is the largest single pasta brand in the U.S. A new side dish called Salad Bar Pasta and three new pasta shapes were introduced last year, with volumes up 2% in an intensely competitive market. For example, Borden Inc. bought up regional brands in order to distribute its Creamette product in 48 markets. Borden's, with five brands, accounts for 15% of the pasta field; Hershey Foods Corp. has 17% with six brands. Combined sales of bakery and pasta products for CPC were almost $260 million, an increase of 5% over 1985, exclusive of Arnold's and Old London sales.

Other CPC products such as Argo and Kingsford starches, Karo syrup and Niagara spray starch are leaders in their markets.

Total measured advertising of CPC's leading brands increased 4.9% to $46.7 million in 11 monitored media. Spot TV expenditures rose 17% to $13.8 million; network TV increased 5% to $16 million; magazine spending rose 5% to $11.3 million. Ad expenditures for Best Foods and Hellmann's mayonnaise decreased 6% to $10.8 million in 1986, with $1.6 million allotted to the new light products.

Spending on Mueller's pasta products fell 18% to $1.4 million and was split almost evenly between spot TV and magazines as opposed to 1985's exclusive spending on spot TV.

CPC increased spending on Mazola oil by 22% to $5.5 million, maintaining about 70% of the dollars in network TV. Spending on Mazola margarine was increased 24%, but the budget remained insignificant. Expenditures on Skippy peanut butter declined 3% to $7.7 million, reflecting the flat market; the bulk of dollars went to spot TV.

Because of its national rollout, advertising for Thomas' English Muffins was increased 37% to $7.1 million, with 96% of that going to spot TV. The company switched from promoting Toast-r-Cakes to Toast-r-Cookies in 1986.

Increased commitment to promoting Knorr products in the U.S. is evident in the 27% increase in expenditures, all in magazines, to $3.8 million in 1986. CPC spent $600,000 promoting Arnold's bread and Brownberry bread and croutons on spot TV, a good beginning for its late-1986 acquisition. Spending on Karo syrups increased 33%, due to promotion of Golden Griddle Pancake Syrup in magazines. Spending on Rit dyes and rust remover products rose 2% to $901,000.

This month the company plans to close a previously announced sale of its European corn wet-milling operation, a commodity-based venture. The sale is part of a company plan to concentrate future growth in the U.S. and grocery products businesses.

A substantial part of the proceeds will go to reduce debt assumed with the acquisition last year of Greenwich, Conn.-based Arnold Foods Co. and Old London specialty bakery businesses and debt incurred with its stock repurchase program. So far the company has repurchased some 16 million (20%) of its outstanding common stock for $1.3 billion following a takeover scare last year from Revlon's Ronald Perelman.

U.S. advertising	105	100	5.0
Division sales	**1986**	**1985**	**% chg**
Passenger	4,921	4,132	19.1
Cargo	280	240	16.7
Other	116	88	31.8

Any doubt about Atlanta-based Delta Air Lines's course in the deregulated skies was erased in 1986 with the acquisition of Western Airlines, Los Angeles. The $860 million deal, announced in December 1986, made Delta the nation's fourth largest air carrier and strengthened Delta's presence in the western U.S.

The acquisition along with greater passenger counts helped rebuild Delta's fiscal returns, which had dipped dramatically in 1986. Sales and earnings, down 4.8% and 81.8%, respectively in fiscal 1986 from 1985, rebounded to $4.92 billion, up 19.1%, and $280 million, up from only $47 million in fiscal 1987 ended June 30. Western's influence showed up in Delta's fourth quarter, pushing profit to $58.8 million, up from $22.2 million, and revenues to $1.57 billion, up 41%.

By purchasing Los Angeles-based Western, the nation's ninth largest carrier, serving the western U.S. and Pacific, Delta forged a close fit with its strengths in the eastern U.S. and Atlantic routes. When the deal was completed on April 1, 1987, Delta incorporated all of Western's operations under the Delta name, and agency work under its agency, BDA/BBDO, Atlanta.

AD AGE's estimates Delta's total spending on advertising rose 5%. Delta's measured spending for the seven BAR/LNA media in 1986 increased to $28 million, up 6% over 1985. The largest share, $22 million, was for Delta's passenger service, 60% of that in spot TV and 20% in cable, according to BAR/LNA. Delta continues to rely on the "Delta gets you there" theme. Delta's big spending push came in national newspaper advertising (not one of the BAR/LNA measurements), up 30.4% to $22.3 million. Delta's figures also included $6 million in measured media for the merged Western in 1986, up 10%. Restating to exclude Western, Delta's seven-media total fell 17% on a year-to-year basis.

Delta also had $22.9 million in measured newspaper spending, monitored by Media Records, up 30% over 1985. Rising newspaper spending reflects greater use of discount fares, which industrywide are used by 92% of all air travelers. Discounting and promotion also shows up in measured spot radio, up 27% to $21.7 million in 1986.

The Delta-Western merger created a fleet of 360 aircraft serving 153 cities worldwide, projected to carry 52 million passengers and a billion pounds of cargo annually. Combined market share, based on enplanements at all U.S. airports through March 1987 is 13.46%, second only to Houston-based Texas Air.

Texas Air had combined market share of 21.25% for its Eastern and Continental Airlines divisions, the latter including People Express and New York Air, both of which were merged into Continental in 1986. Next largest is United Airlines, with 13.21% share, and American Airlines, with 11.56%, according to Salomon Bros., New York.

The merged operations provide the greatest benefits for Delta's expanding system in the western U.S. In addition to its base hub in Atlanta, where Delta has a 53% share, Delta has made dramatic improvements in Cincinnati, where its share grew from 47% at the close of 1986 to 68% on the merger. In Los Angeles, Western's primary hub, Delta's market share for the same period jumped to second place at 16% from fifth at 4%. Delta is challenged in Los Angeles by No. 1 United Airlines, with 18.5%. The most dramatic change was Salt Lake City, where Delta dominates with 74% share. Its pre-merger share was 2%.

In July 1987, Delta named R.W. Allen as chairman-ceo, Hollis L. Harris as president-chief operating officer, and Rex McClelland as senior vp-operations, all taking effect last month when David C. Garrett Jr. retired as chairman-ceo. Mr. Allen was Delta's president-chief operating officer; Mr. Harris, senior VP-operations; and Mr. McClelland, VP-passenger service.

Consumer prods	130	123	6.2

Walt Disney Co. continues to spend heavily on advertising as it totes its theme park concept to the outskirts of Paris and continues to build its motion picture production division.

In its third year under the management team led by former Paramount President Michael D. Eisner, Disney is in the process of building another record year—revenues and net income for both the third quarter and the nine months ending June 30, 1987 were the highest in the company's history.

In the third quarter of fiscal 1987 Disney reported earnings of $128.4 million, up 61%, and sales of $819.4 million, up 26%. In the nine month period, earnings were $309.4 million, up 86%, and revenues were $2.34 billion, up 34%.

Growth from theme parks, spurred by higher ticket prices and heavy advertising, was largely responsible for the strong year-to-year growth.

Theme parks and resorts—Disneyland in California, Walt Disney World and Epcot Center in Florida and Tokyo Disneyland—turned in record revenues during fiscal 1986. Disney's U.S. theme park attendance soared 8% in 1986—2% at Disneyland which celebrated its 30th anniversary in 1985, and almost 11% at Disney World, which began celebrating its 15th anniversary in October 1986.

Disney's high growth rate is the exception among theme parks, which in 1987 are not expected to grow (in attendance) more than 1%, according to the International Assn. of Amusement Parks and Attractions, Alexandria, Va.

Disney spent $26.4 million advertising U.S. theme parks in seven measured media in 1986, or 38% of its $68.9 million measured total, according to BAR/LNA. The theme park spending total was up 28% over 1985 levels reported by BAR/LNA. Disney World and Epcot Center accounted for $18.5 million of the 1986 total and Disneyland for $7.9 million. Most of the spending was in spot TV.

Disney will open a fourth theme park in France, 20 miles east of Paris, in 1991. A $300 million attraction-cum-film studio will open in 1988 adjacent to Disney World.

Persistent rumors that Epcot may be sold to a limited partnership with Disney retaining the leasehold and contracting for fees to run it remain "possibilities, but no more than that," says Erwin Okun, VP corporate communications. The deal is still in the conceptual stage.

A shopping and entertainment complex planned for a 40-acre site in Burbank is the project of Disney Development Co., which also is developing 28 acres at Walt Disney World and is reported to be considering a partnership with James Rouse's Enterprise Development Co. for a mixed-use entertainment center. "We've made no decision on a concept nor a decision on where to locate (such a center)," Mr. Okun says.

Disney's major real estate development division, Florida-based Arvida Disney Corp., acquired in a merger in 1984, was sold in 1987 to JMB Realty Corp., Chicago, for approximately $400 million. The company's decision to sell the residential, resort and business property development company was motivated by the desire to concentrate on entertainment and leisure divisions.

Filmed entertainment, the second largest of Disney's four major divisions, reported revenue and operating income growth of 60% and 53%, respectively. The division traces its good showing in part to Touchstone Picture's "Down and Out in Beverly Hills" (which has grossed more than $60 million so far) and "Ruthless People" (with $90 million-plus box office). Other highlights in the division included higher TV revenues generated from network programming and foreign syndication sales, higher home video cassette sales of Walt Disney and Touchstone products and an increase in the subscriber base and penetration of the Disney Channel.

Disney Productions, which in 1986 was in its second year of operation, was No. 1 in average box office gross for all titles and among industry leaders in overall box office results. It plans to release 15 films a year by 1988.

Measured advertising for Disney's filmed entertainment division in 1986 totaled $22.4 million, up 58.9%. The heaviest concentration of advertising was in newspapers, particularly for long-running successful films, and spot TV, which is heavily used to open films. There were four more films released in 1986 than the previous year, a fact that accounted largely for the ad boost.

Last summer, Disney premiered its 26th animated feature, "The Great Mouse Detective," which grossed $15.2 million. The reissues of "Sleeping Beauty" ($15.2 million in box office) and "The Lady and the Tramp" ($31.2 million) kept Disney's traditional fare on the screens.

The re-release in 1987 of the 50-year-old "Snow White and the Seven Dwarfs" grossed nearly $20 million in its first 10 days. Touchstone's 1987 films so far include "Outrageous Fortune" and "Tin Men."

At the company's video division, last year's stars were "Sleeping Beauty," with sales of almost 1 million units, and "Down and Out in Beverly Hills," No. 1 on *Billboard*'s video industry rental charts. During 1986, Disney created a two-tiered video marketing strategy involving rentals of popular adult movies and sales of the children's products ("Pinocchio" and "Sleeping Beauty") at lower prices and at more retail outlets—up to 60,000, including mass merchandisers, department, toy and convenience stores in addition to video specialty stores. The Christmas 1986 "Bring Disney Home for Good" marketing campaign broke industry records; the company shipped more than 4 million units.

Disney's Buena Vista TV, a New York subsidiary, entered the domestic TV syndication market with four new shows in 1986: "Disney Magic-I" and "Wonderful World of Disney" (both using existing film and TV products), "Siskel and Ebert at the Movies" and "Today's Business" (pulled in April 1987 because of slow advertiser response).

The company's return to network TV in 1985 with "The Golden Girls" on NBC netted Disney 15 Emmy nominations, plus a spot among the ten top-rated programs. Other offerings are the "Disney Sunday Movie" on ABC and "The Adventures of the Gummi Bears" on NBC. Disney's other Saturday morning entry, "The Wuzzles," airs on ABC.

In pay TV, the Disney studio entered into an agreement with Showtime/The Movie Channel Inc. in which the two services will have exclusive pay-TV rights to Touchstone's entire slate of theatrical features over the next five years.

The Disney Channel ended 1986 with 3.18 million subscribers on 4,300 systems, a significant boost from 2.55 million subscribers on 3,100 systems at the end of 1985. The channel's success stems in part from generating increased subscriptions among households without children and converting the prime time lineup to a structured weekly grid format promoting viewer loyalty. Beginning in December 1986 the channel also committed to a full 24-hour schedule.

Subject to FCC approval—"and we don't expect any complications," says Mr. Okun—Disney has purchased its first TV station, KHJ-TV in Los Angeles for $320 million. Seller was RKO General Inc., a New York subsidiary of Gencorp Inc., Akron, Ohio.

Operating income at Disney Consumer Products was up 29% on a 6% growth in sales, primarily because of strong demand for Disney apparel, toys and publications. The division controls some 1,600 licenses governing the manufacture of more than 8,000 products in 50 countries. Upgrading product quality was a major goal in 1986. Lorus, a subsidiary of Seiko, was licensed to manufacture watch products. Hasbro is producing standard character toys in three categories for the European market.

Of two new product programs, "Totally Minnie" received the big U.S. launch with music videos, a parade at Disneyland and a show at Walt Disney World. More than 100 licensees were involved in manufacturing items in connection with the "Snow White" re-release this year.

Disney comic books returned to the U.S. market in spring of 1986; by the end of the year, they accounted for sales of about 9 million copies. The 24-page, 200-item Walt Disney Family Gift Catalog reached 1.5 million customers in October, 1986.

Dow Chemical Co. has seen the future, and it is plastics—in its more advanced chemicals as well as its growing consumer and pharmaceutical businesses.

Dollars tell the plastics story at Dow, the second biggest U.S. chemical producer exceeded in size only by E.I. du Pont de Nemours.

"Plastics derived from petroleum were not practical when oil was $25 a barrel, but there was a resurgence when prices dropped to the $19 to $20 range. Also, engineered plastics selling for $10 to $12 a pound are the trend rather than common 59 cents-a-pound plastic. It's the more developed type that Dow is pursuing," says James Wilbur, investment analyst at Smith Barney, New York, who notes Dow is now moving into polycarbonates which are used, for example, in compact discs and automotive structures.

This past year marked the first full year Dow has benefited from the restructuring begun nine years ago. The goal was to transform Dow from a Goliath rolling out 85% of its output in basic commodity chemicals and plastics to a more varied producer of basics and specialty products. In 1986, Dow reached that goal, splitting sales 50/50 for basics and specialties. Dow's 1986 was solid for total sales, up 6% over 1985. Neither year includes feedstock resales, a new reporting policy.

For 1987, Dow's performance has been setting records. Its first-quarter 1987 results were the highest yet for a Dow first quarter; its second quarter, ended June 30, 1987, was the best of any three-month period in Dow history.

Dow Corporate Advertising Manager Richard F. Dalton reports 1986 total Dow ad spending at $304 million worldwide, up 18.8% from 1985. Included in that figure are Dow's media advertising, totaling $83 million, advanced 27.6% from the previous year; sales promotion at $215 million, 16% ahead of 1985, and public relations, $6 million both years.

ADVERTISING AGE figures from media counts and estimates show a total of $119.5 million for 1986 Dow Chemical advertising in the U.S., up 13.7%.

Mr. Dalton says the company, is emphasizing value-added products, as a basic strategy. Dow's goal in its ad-spending approach now is focused spending, which is finding the most promising, higher volume markets and concentrating ad dollars in those areas.

In 1986, Dow ad expenditures rose 202% to $21.1 million for its new pharmaceutical segment, including both prescription and over-the-counter drugs. A big share of that (3.6 million) was the new orange flavored methylcellulose bulk laxative, Citrucel, prime competitor of Procter & Gamble's Metamucil (formerly G.D. Searle).

Cepacol received $3.6 million, up 167%. Cepastat lozenges got $987,800, up 40%. Novahistine cough remedy pulled $493,700, up 6%.

In the household products area, measured media expenditures for the wrap products, including Ziploc bags, Saran Wrap and Handi Wrap, increased 13% for 1986, climbing to $27 million. Saran Wrap spending climbed 66%, to $3.8 million; the big Ziploc budget increased 7%, advancing to $19.1 million, and Handi-Wrap was up 11%, to $4.1 million.

At the same time, the household cleaners, brought to Dow with the 1985 Texize acquisition from Morton Thiokol, were down 20% in ad backing, falling to $27.6 million. A big ad loser was Spray 'n Wash laundry stain remover which dropped 58.3% to $2.6 million in 1986. The biggest single-product backing in this category was from Vivid, a color-safe laundry bleach, which got $6.8 million, down 6.3%. Fantastik all-purpose household cleaner was off 19%, falling to $4.1 million. One gainer was Dow Bathroom Cleaner which rose 4% to $3.1 million.

Network TV was the medium most favored by Dow in 1986, taking 61% of the total 11-media budget, the same as in 1985. Spot TV claimed 1[illegible]%, down from 13.5% in 1985. Dow Chemical's corporate image campaign, "Dow lets you do great things," drew $12.1 million, nearly double the $6.2 million spent in 1985, the first year of the campaign. The series aims to show how Dow contributes to the lives of people going into medical or agricultural careers. Some critics have faulted the spots as being too saccharine.

The leading division in Dow's Consumer Specialties division was pharmaceuticals, reporting $934 million in sales, up 32%. Pharmaceuticals were split into two groups during 1986—Merrell Dow Pharmaceutical U.S., which markets many prescription drugs, and Lakeside Pharmaceuticals, the non-prescription unit that handles some over-the-counter products. Both handle the smoking cessation chewing gum, Nicorette, and allergy preparations such as Teldane, Triludan and the non-sedating Seldane antihistamines.

Analysts believe Dow needs to improve its channels of pharmaceutical distribution, which is a major reason it bid for A.H. Robins in 1986. Its offer was rejected. "Dow also needs more products represented by A.H. Robins. Dow does not have enough products for a vigorous over-the-counter program," says analyst, Mr. Wilbur.

The product getting the most press at Dow is the resealable inner plastic bag now keeping the crunch in General Foods' Post brand cereals. Trademarked ZIP-PAK, it is a milky-colored polyethylene Ziploc bag that Post rolled out nationally in July 1987 in its Post Natural Bran Flakes. Post Natural Raisin Bran is moving to ZIP-PAK this September, with Post Fruit 'n Fibre to follow.

With 60% of the reclosable plastic bag market, Dow has an established franchise in food bags. First Brands' Glad-Lock (Union Carbide) has 23%, and other marketers claim the 17% balance. Ziploc also is No. 1 in plastic sandwich bags. But in the whole plastic food storage market, lockable and twist-tie, Ziploc is second, with a 20% share. Mobil Baggies are No. 1 at 35% and Glad is third at 18%.

The Industrial Specialties Group developed Drytech, an aqueous fluid absorbent used in disposable diaper fill; CHIPLOC bags, which are electrostatic shielding and dissipative transparent Ziploc-style bags for packaging semiconductor devices and assemblies; and Pelastan Mold-a-Pak, packing material.

Plastics Group Services division has offered two new plastic materials: Magnum, with applications in automotives, electronics and housewares; and Pulse, a rugged blend for automotive production. Also from Plastics Group is Aspun, a felted non-woven fiber plastic fabric used in making such products as disposable diapers, surgical gowns and masks, shoes and feminine hygiene products. It is the first use of polyethylene resin—the same base material as Ziploc—to make a non-woven fabric.

A major change in Dow Chemical Co. leadership will come this November when Paul F. Oreffice, turns over the ceo position to Frank P. Popoff who succeeded Mr. Oreffice as president earlier this year and carries the dual responsibility of president/chief operating officer. Mr. Oreffice remains as chairman.

Seeking growth through acquisition, corporate streamlining, new product introduction and joint ventures, E. I. du Pont de Nemours & Co., the giant chemical and energy company, kept its ad budget in check, holding estimated expenditures to $113 million, virtually even with 1985.

The company reorganized its businesses serving the medical products, electronics and imaging markets—areas where Du Pont sees high growth potential. Products serving the automotive market were consolidated into the company's Corporate Automotive Development Center near Detroit.

The company's advertising activities also came under review. Du Pont completed a reassessment of its agency relationships, shifting some business to small, regional shops from its established agencies.

Benefiting from the shift (which has largely been at the expense of N W Ayer) have been Ketchum Advertising, Philadelphia, which picked up new electronics assignments and several other projects; Young & Rubicam, which won a $500,000 industrial fiber assignment, and Ackerman, Hood & McQueen, Oklahoma City, winner of a $2 million assignment for fishing-line products. A Wilmington, Del., shop, Reese, Tomases & Ellick, handles special projects for Du Pont.

Du Pont funneled $12.7 million, its largest expenditure for a product line, into general promotion for carpet fibers, a category that did not exist in 1985. This is the reason Du Pont's measured media expenditures charted by BAR/LNA rose to $61.2 million in 1986, 9.1% over 1985.

In the BAR/LNA breakdown of brand spending in seven media measured by the media service, Du Pont fibers—Antron, Dacron, Lycra, nylon, Orlon—pulled expenditures of more than $2 million each, virtually all in magazines.

Antron fibers, used in products ranging from carpets and chairs to swimwear, drew $4.4 million, down 38% from 1985. Dacron fibers, advertised largely as the material used in clothing, much of it designer-oriented (Bill Blass, Givenchy), received $2.4 million, up 10%.

Lycra attracted $4.8 million, up 50%, to advertise its use in apparel ranging from clothing designed by Geoffrey Beene and Givenchy to items bearing such brand names as Maidenform, Levis and No Nonsense.

Nylon, used mainly by leading brand manufacturers of undergarments, got $3.3 million, down 10.8%.

Aside from fiber advertising, Du Pont continued strong support for Teflon stain repellent, $5.4 million, up 17.4%. Spending, however, declined 44.9% to $3.8 million, both for Silverstone coating and for the Du Pont Silverstone tagline appearing on Regal and Sunbeam cookware.

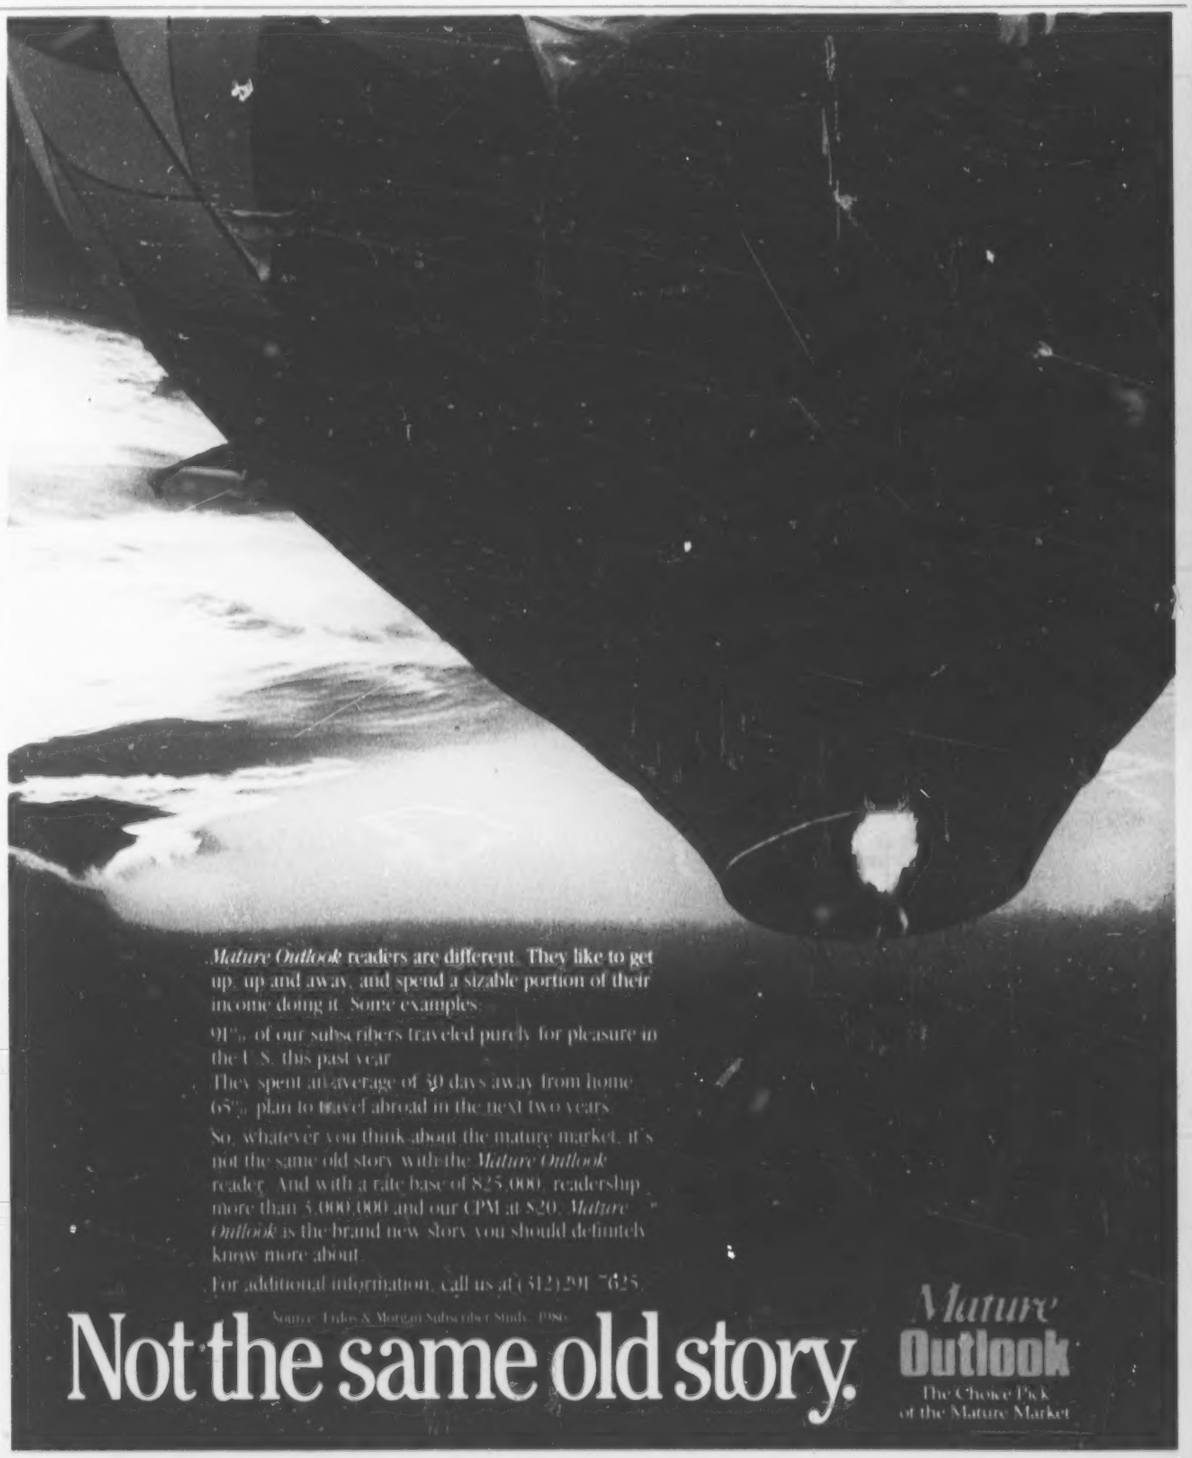
Although overall sales declined, Du Pont was able to increase its earnings by 37.6% to $1.54 billion. Sales, primarily affected by lower oil prices and the loss in the value of the dollar, declined 7.9% to $27.15 billion. U.S. operations account for 69% of total worldwide sales.

During 1986, Du Pont completed six major acquisitions for a total purchase price of $1.18 billion, the largest being $425 million paid for the American Critical Care unit of Baxter Travenol Laboratories Inc. The acquisition moves Du Pont into the top 15 pharmaceutical companies in hospital sales.

In a move toward more consumer-focused and industry-aligned marketing, Du Pont's $1.2 billion healthcare business was consolidated by merging medical X-ray products with other medical diagnostic, research and therapeutic businesses.

Renamed Du Pont Critical Care, the new unit strengthens the company's position in the hospital market with its line of acute-care products. Brevibloc, a beta blocker developed by Critical Care, was approved by the Food & Drug Administration for marketing. The drug is expected to find use to moderate abnormal heart activity in critical care situations.

The division's chemistry analyzer products include Analyst, for use in physicians' offices and small clinics, and Dimension, for use in high-volume testing. Du Pont also produces a line of research and blood screening products associated with AIDS testing.



Mature Outlook readers are different. They like to get up, up and away, and spend a sizable portion of their income doing it. Some examples:
91% of our subscribers traveled purely for pleasure in the U.S. this past year.
They spent an average of 30 days away from home.
65% plan to travel abroad in the next two years.
So, whatever you think about the mature market, it's not the same old story with the *Mature Outlook* reader. And with a rate base of 825,000, readership more than 5,000,000 and our CPM at $20, *Mature Outlook* is the brand new story you should definitely know more about.
For additional information, call us at (312) 291-7625.
Source: Lakes & Morgan Subscriber Study, 1986.
Not the same old story.
Mature Outlook
The Choice Pick of the Mature Market

In other acquisitions, Inland Steel Coal Co. was purchased for $106 million; Sierra Coal Co., a subsidiary of Utah International Inc., was acquired for $49 million; Tau Laboratories Inc., a manufacturer of photomask products used in the production of printed circuits, was acquired through a $43 million stock swap of Du Pont common shares.

The company also acquired the U.S. crop-protection assets of Shell Agricultural Chemical Co. and the assets of Ford Motor Co.'s North American automotive paint operations.

In May 1987 the company sold its high-density polyethylene business to Cain Chemical Inc., a Houston-based subsidiary of the Sterling Group, for about $517 million. High-density polyethylene primarily is used to make coatings for wires and cables.

Its acquisition of Ford Motor Co.'s North American automotive paint operations enabled the company to sell automotive subassemblies to General Motors. From the polymers division, a new thermoplastic, Arylon, was introduced for use in automotive body parts and other industrial and consumer products.

Specialty aramid fibers such as Kevlar and Nomex, as well as Tyvek spunbond olefin, benefited from new end-use applications. Kevlar is now used as a replacement for asbestos in automotive brakes, clutches, gaskets and sealants. Tyvek, commonly used for overnight courier envelopes, is now used for air infiltration barriers to improve home insulation.

Eastman Kodak Co. closed 1986 with flat domestic photo sales and higher advertising and selling costs, factors related largely to its forced withdrawal from the instant camera business and heavy expenditures related to launching its new line of battery products.

Despite these developments, massive workforce reductions, inventory write-downs and sizable writeoffs, Kodak closed 1986 with growth in earnings of 12.7% and sales of 8.6%. Gains were attributed to strong international sales related to the weakness of the dollar and introduction of some 60 new products.

Product diversification included Kodak's return to 35mm photography after a 15-year absence. The company introduced two VR 35 cameras in January, then added two more less-expensive models in June. The first introductions came just weeks after Kodak had lost a patent infringement case to Polaroid; the ruling barred Kodak from manufacturing and selling instant photographic equipment. A financial settlement of that case still is pending.

The 35mm cameras were supported by part of the company's $20 million U.S. camera advertising through Young & Rubicam, which took the business from J. Walter Thompson USA. JWT kept the $30 million film, paper and photofinishing accounts and benefited from Kodak's February decision to drop McCann-Erickson Worldwide by taking over the company's Far East accounts.

In late May, Kodak got into the highly charged battery market as it introduced the Ultralife line, the first mass consumer 9-volt lithium battery, and a new line of alkaline batteries, Supralife. Supralife is manufactured by Japan's Matsushita Battery Industrial Co. Kodak is selling its Ultralife at a 70% premium above alkaline batteries because of its extended life, reportedly 10 years compared to the normal two-to-three years.

The roughly $20 million JWT ad campaign supporting the gold-topped Kodak battery line generated a lot of sparks through its comparisons with rival Duracell's copper-topped line. JWT's "Why go for the copper when you can go for the gold?" tagline ran into Ogilvy & Mather's response for Duracell (Kraft Inc.): "Duracell batteries last up to 20% longer than Kodak Supralife. Nice try, guys."

Still, by January of this year, Kodak's batteries had taken 5% of the $2.5 billion U.S. market, some of it at Duracell's expense. Duracell and Eveready (Ralston Purina) each hold a 45% share of the market, which is expected to grow at about 10% a year.

On the film and photofinishing fronts, where it had been losing ground to chief competitor Fuji, Kodak introduced its VR-G films, which it claims offer better color saturation. Still, many observers saw the move as merely an attempt to play catch-up to Fuji, which had beaten it to introduction of a 400-speed, and later a 1600-speed, color-print film. The faster the speed of the film, the less light is needed to shoot pictures.

Although Kodak developed a comparable 400-speed film last year, because of production problems it has announced it would begin deliveries some time this fall, according to Eugene Glazer, technology analyst for Dean Witter Reynolds Inc. Kodak hasn't yet developed a competitor for the 1600-speed film.

Where it virtually controlled the color film market 15 years before, Kodak's share has fallen to 82% now. However, that share is in a rapidly growing market, particularly on the amateur side, and there are more players.

While it had put Kodak on the defensive for film development, Fuji also had been making inroads into the photofinishing market. But the tide has begun to change. Kodak won away the photofinishing work for ColorCraft Inc. from Fuji, representing some $150 million in annual sales, according to an E.F. Hutton estimate. The company also won a similar contract with Guardian, another major photo finisher, Mr. Glazer says.

Kodak also shut out possible competition when in 1986 it bought Texas-based Fox Photo Inc. for about $95.5 million. Fox, which industry experts say is the largest consumer of Kodak color photographic paper, operates 20 photo labs and 240 minilabs in 23 states. Hutton says the acquisition adds about $200 million in sales to Kodak. However, analysts say they expect Kodak to spin off Fox's retail business, which operates on a lower profit margin.

Kodak seems to be de-emphasizing 8mm film without saying so. "Kodak seems to be putting no major effort behind 8mm," says Mr. Glazer. In fact, Kodak has not mounted a national ad campaign to support the format that both it and Sony had been pushing. Kodak is aiming more at the commercial and industrial ends of electronic imaging rather than the consumer market, believes Mr. Glazer, saying "they're finding out what most of us knew—it's not as profitable . . . as they had hoped."

On the other hand, he suspects that Sony will continue its efforts on behalf of the small format and could develop products such as a personal VCR, much like its Walkman stereo and its Watchman personal TV. Additionally, other major video companies are pegging their hopes on two new VHS formats—VHS-C, a shorter piece of the same size tape that can play in a VHS format videotape recorder by means of an adapter, and the yet-to-be-introduced Super VHS-C, which will produce ultra-high quality but will require new equipment to operate.

WHY BE A LITTLE FISH IN A BIG POND?

AUTO SALES ARE IN OVERDRIVE IN YUMA-EL CENTRO.

Yuma-El Centro outspends Cincinnati, the 28th-ranked HH ADI in the United States, for Automotive Dealer sales-per-household. In just five years, Total Retail Sales have zoomed up 49%, outperforming the entire United States sales increase average. And by 1989, Effective Buying Income is expected to increase 63%, boosting buying power even higher and proving that Yuma-El Centro is a market that's revved up and ready to buy.

KYEL-TV DOMINATES THE MARKET.

We're the #1-rated station sign-on to sign-off. We've got the facts, figures and programming, including the #1 news, to help drive up your sales in the Southwest's powerful new market.

Mass merch.	969	1,058	(8.4)
Supermarket	2,046	1,814	12.8
Other	523	422	24.0

Federated Department Stores completed its multi-year divisional consolidation program early in 1987 with the merger of its Houston-based Foley's Department Store and Dallas-based Sanger Harris divisions.

This was the fifth merger for Federated units in as many year. "The mergers are a way of making operations more efficient and allowing us some administrative cost savings so that we can improve other parts of the business that mean more to customers," notes a Federated spokesman.

Federated has no current plans for further consolidations. "Our philosophy, particularly in the department store segment, is to concentrate on improving locations that we already have," the spokesman said, adding that the focus now is maximizing productivity.

To a lesser extent, Federated is expanding into new regional markets in addition to filling in existing markets. For example, Filene's Basement, based in Boston, is opening stores late this year in several outlying markets in Massachusetts and Upstate New York.

In June, Federated Lazarus' division completed the acquisition of the 12-store Block's Inc. chain, which was a subsidiary of Allied Department Stores. Block's stores in Indiana, Ohio and Michigan will operate under the Lazarus name. With the acquisitions, the Lazarus chain, which now has 46 stores, enters the Grand Rapids, Mich., market and strengthens its presence in Springfield, Ohio, and in Indianapolis and other parts of Indiana.

The California-based Ralph's supermarket division continues to undergo considerable revamping. In the past year, the chain has closed 18 small stores and opened the same number of larger stores including 14 Ralph's Giant Stores, which carry nearly double the merchandise of a standard supermarket. Nine stores also were remodeled and the distribution center was updated and expanded. Total capital spending in Ralph's was $158.6 million in 1986.

Measured seven-media spending at Ralph's was $5.8 million with a very heavy concentration in spot TV, up slightly over 1985.

In March 1987, Federated appointed Norman S. Matthews as president and chief operating officer—positions which have been vacant since 1982. Allen I. Questrom, chairman of the Bullock's division in Los Angeles, also became a Federated VP. Howard Goldfeder continues as chairman-ceo.

The company completed its planned divestiture of major shopping center properties in 1986 with the sale of its interest in two major regional shopping centers—Hulen Ridge Mall in Fort Worth and Hickory Ridge Mall in Memphis.

Federated now operates 645 stores including 238 department stores, 76 mass merchandising outlets, 205 specialty stores and 126 grocery stores. For the first-half of 1987, Federated reported earnings of $80.2 million, down 2% from $81.9 million in the year-earlier period. Sales rose 7.5% to $4.9 billion.

Federated's measured spending in calendar 1986 was $38.8 million, up from $31.4 million in 1985, according to BAR/LNA.

Federated reported advertising costs of $321.3 million for the fiscal year ended Jan. 31, 1987, up from $303.3 million in 1986. The figure includes all direct advertising expenses including media, production and direct payroll, a spokesman says.

Federated continued to expand its MainStreet and Filene's Basement division in 1986, and The Children's Place has concentrated efforts on solidifying its presence in existing markets. Together, these divisions opened 22 new locations in eight new markets in 1986.

MainStreet, a moderately priced softgoods department store chain, which will have 20 stores this fall in the Chicago and Detroit areas, will expand to 29 stores by the end of 1988 with entries in the Minneapolis-St. Paul and Fort Wayne markets.

MainStreet switched its $3 million ad account to Bayer, Bess, Vanderwarker & Flynn in Chicago from W.B. Doner in Detroit in May. W.B. Doner, however, has acquired Filene's Basement broadcast account. The work was previously handled in-house.

The Bloomingdale's division passed $1 billion in sales for the first time in 1986. A new store was opened in Boca Raton, and construction is under way for a new store on Michigan Avenue in Chicago, which will open next fall. Plans also are under way for a Minneapolis store in 1989. Two pilot Bloomies Express stores were launched at Kennedy International Airport in New York to reach international travelers.

Abraham & Straus opened a new store in Valley Stream on Long Island in 1986. A&S also has announced plans to build a new mid-town Manhattan unit, which is scheduled to open in October 1988. A&S previously announced it was pulling out of the Pennsylvania market and it will close the second of its two stores there within the next several months.

For the first time since the days of the Model T, Ford Motor Co.'s earnings in 1986 gunned down those of archrival General Motors Corp. When the dust cleared, the final score was: Ford $3.3 billion, GM $2.9 billion.

This year, the No. 2 domestic automaker in units isn't resting on its laurels. During the first half of 1987, Ford already has posted profits of nearly $3 billion, which exceeds the combined profits of GM, Chrysler Corp. and American Motors. Some analysts predict Ford will earn a record $4.5 billion this year.

That's assuming, however, that Ford hasn't become the victim of a crippling strike by the United Auto Workers union. Both Ford's and GM's contracts with the UAW were to expire on Sept. 14. The UAW announced in late August it would strike Ford if a breakthrough is not reached in negotiations by the deadline. Worker job security is a major issue in the talks.

The year has been one of high drama at the automaker's top agency. In July 1987, Ford shifted $100 million worth of non-U.S. advertising from J. Walter Thompson Co. Ford gave nine European accounts to Ogilvy & Mather and Ford of Canada to Young & Rubicam. As of late summer, Ford also was reviewing its ad business in Brazil, Mexico, Argentina and Venezuela—worth another estimated $14 million to JWT.

The automaker insisted the moves were not a result of the earlier acquisition of JWT Group by London's WPP Group, adding that it would keep its estimated $260 million U.S. account at JWT.

Ford also was busy in the past year making acquisitions and forming joint ventures with other auto companies. In October 1986, Ford made a bid to buy the financially ailing Italian automaker, Alfa Romeo. That bid lost out, however, to Fiat. In November, Ford and Volkswagen agreed to combine their automotive and credit operations in Brazil and Argentina into one concern, called Autolatina.

In April 1987, Ford bought PMI Mortgage Insurance Co., a subsidiary of Allstate Insurance Cos. And in May, Ford and Japan's Nissan Motor Co. announced they would team up to produce new vehicles, first among them a minivan. Ford already is involved in a joint venture with Mazda that involves the production of cars at the Flat Rock, Mich., plant operated by Mazda Motor Mfg. (USA) Corp.

Ford Motor Co. sold 2,080,822 cars in the U.S. last year, up only 0.07%. This is attributed in part to the company's philosophy of keeping production tight. In recent years, Ford has made only as many cars as it felt it could sell, slashing production capacity to reduce overhead costs and keep low the inventory of cars on dealers' lots. While maximizing per-unit profits, the strategy probably cost the company sales at a time when low-finance rate incentive wars were drawing droves

Source: Broadcast Advertisers Reports as reported by Leading National Advertisers
Note: Dollars are in thousands

of customers into dealer showrooms.

It also cost a small slice of market share. Ford's share of the U.S. car market in 1986 was about 18.2%, down from 18.8% in 1985 but still better than the 16.3% share the company had in 1981.

Ford division sold 1,397,141 units in 1986, an increase of 0.8% over 1985; Lincoln-Mercury division sold 491,782 Mercury models, a decrease of 5.5%, and 177,584 Lincolns, an increase of 7.5%. Ford also sold 14,315 Merkur XR4Ti models in 1986—an increase of 59.5%—perhaps indicating that the German-built car finally is overcoming its ugly-duckling image and is gaining consumer acceptance in this country. In spring 1987, Merkur dealers got a second model, the Scorpio, for their showrooms.

Ford had a banner year in trucks in 1986, finishing No. 1 with a 29.3% market share for all light-duty trucks vs. 27.8% in 1985. The company sold 1,381,438 light-duty trucks, an increase of 8.6%. Chevrolet was second in the category at 26.5%, down from 28.8% in the prior year as its unit volume dropped 4% to 1,247,595. For the fifth straight year, Ford's F-Series pickup truck was the best-selling vehicle—car or truck—in the U.S., with 544,969 units sold.

How is Ford doing it? How is it managing to outpace the domestic competition in profits, maintain its share of an ever-shrinking market and dole out whopping profit-sharing checks to its workers?

Auto analysts generally cite the cost-cutting measures Ford has taken over the last six years. The automaker rebounded from heavy losses in the early '80s by closing plants, laying off thousands of employees and virtually revamping its product line. Ford says it has reduced its annual costs by $5 billion since 1980.

And now its efforts are paying off. Ford execs give the same answer, but add that it's Ford's push to be known as a maker of quality automobiles that has taken the company to the front of the pack.

Quality has been a catchword in Ford corporate and divisional advertising for some time, from the "Quality is Job One" campaign of the early '80s to the present-day "best-built American cars and trucks" theme. Last year, the "best-built" campaign drew fire from Chrysler chairman Lee Iacocca, who claimed a Chrysler survey of 1986 domestic vehicles put his company ahead of GM and Ford—a claim that Chrysler touted in its advertising. Mr. Iacocca demanded that Ford withdraw the "best-built" claim from its ads.

Ford stood behind its survey data and took the case to the national advertising division of the Council of Better Business Bureaus, which in April 1987 found Chrysler's ads to be "inaccurate" because Chrysler was claiming top-quality cars based on a survey that included trucks.

Chrysler agreed to discontinue the ads in June, after another survey provided "no clear-cut results," as a spokesman put it. Ford, meanwhile, broke network TV spots and ads in *USA Today* and the *Wall Street Journal*, heralding the results of its own survey that said Ford ranks highest in quality among U.S. automakers for the seventh consecutive year.

In the meantime, the Big Three automakers traded barbs over warranty coverage. GM fired the first shot in January 1987 by introducing a six-year/60,000-mile powertrain warranty and six-year/100,000-mile corrosion coverage. Ford soon matched that, and in a classic case of one-upmanship, Chrysler came out with its seven-year/70,000-mile warranty and a claim of being "better."

But the big story of the past year has been the ultra-low finance rates marketed by U.S. automakers. GM, stuck with a huge inventory of 1986-model cars on the eve of 1987-model introductions last fall, started things off with 2.9% annual percentage rate financing, dubbed "The Big One." Chrysler followed with 2.4%; Ford matched GM's offer (even though its inventories were comparatively low), and American Motors announced 0.0% financing.

A number of critics said incentives weren't good for the auto industry in the long run, because consumers would become so addicted they wouldn't buy without them.

To an extent, the critics' words have proved true. Ever since "The Big One," incentives have hung around in one form or another. And in August 1987, GM announced "The Big One is Back" in the form of 1.9% financing on some models; Ford and Chrysler followed in kind.

On the product side, Ford Motor Co. bolstered its lineup this year with three new cars: the subcompact Ford Festiva, compact Mercury Tracer and mid-size Merkur Scorpio. All three models are built outside the U.S. and represent part of the automaker's cost-cutting strategy to reduce capacity here. The rest of Ford's lineup consists mainly of carryover models with facelifts here and there.

Ford division ads continued the long-running "Have you driven a Ford . . . lately?" themeline. And when the Thunderbird Turbo Coupe won the 1987 *Motor Trend* Car of the Year Award, ads boasted that Ford was the first auto company to win two years in a row (the Taurus won in 1986).

Ford division is marketing the Korean-built 1988 Festiva as a "new kind of Ford" to keep it from cannibalizing sales of the Escort subcompact, the No. 2-selling car in the U.S. last year with unit sales of 402,181, down 4.4%. Festiva targets consumers who are younger, better-educated and have higher incomes than the typical Escort buyer. Ford projects sales of 35,000 units this year and 50,000 annually afterward.

The new model, for which a multimedia ad campaign broke April 20 on the West Coast, bears the "Festiva" nameplate in hopes that customers might associate it with the Ford Fiesta, which has achieved a cult status of sorts in the U.S., according to Ford officials.

Lincoln-Mercury division dropped two models, the Capri and the Lynx, from its lineup for 1987. Lincoln ads retained the "What a luxury car should be" tagline. Ads for Lincoln Town Car once again ridiculed GM for having look-alike luxury models. In a follow-up "Valet" TV spot, a parking attendant has trouble telling the difference between Buick, Oldsmobile and Cadillac models. Town Car sales in 1986 jumped 13.2% over 1985.

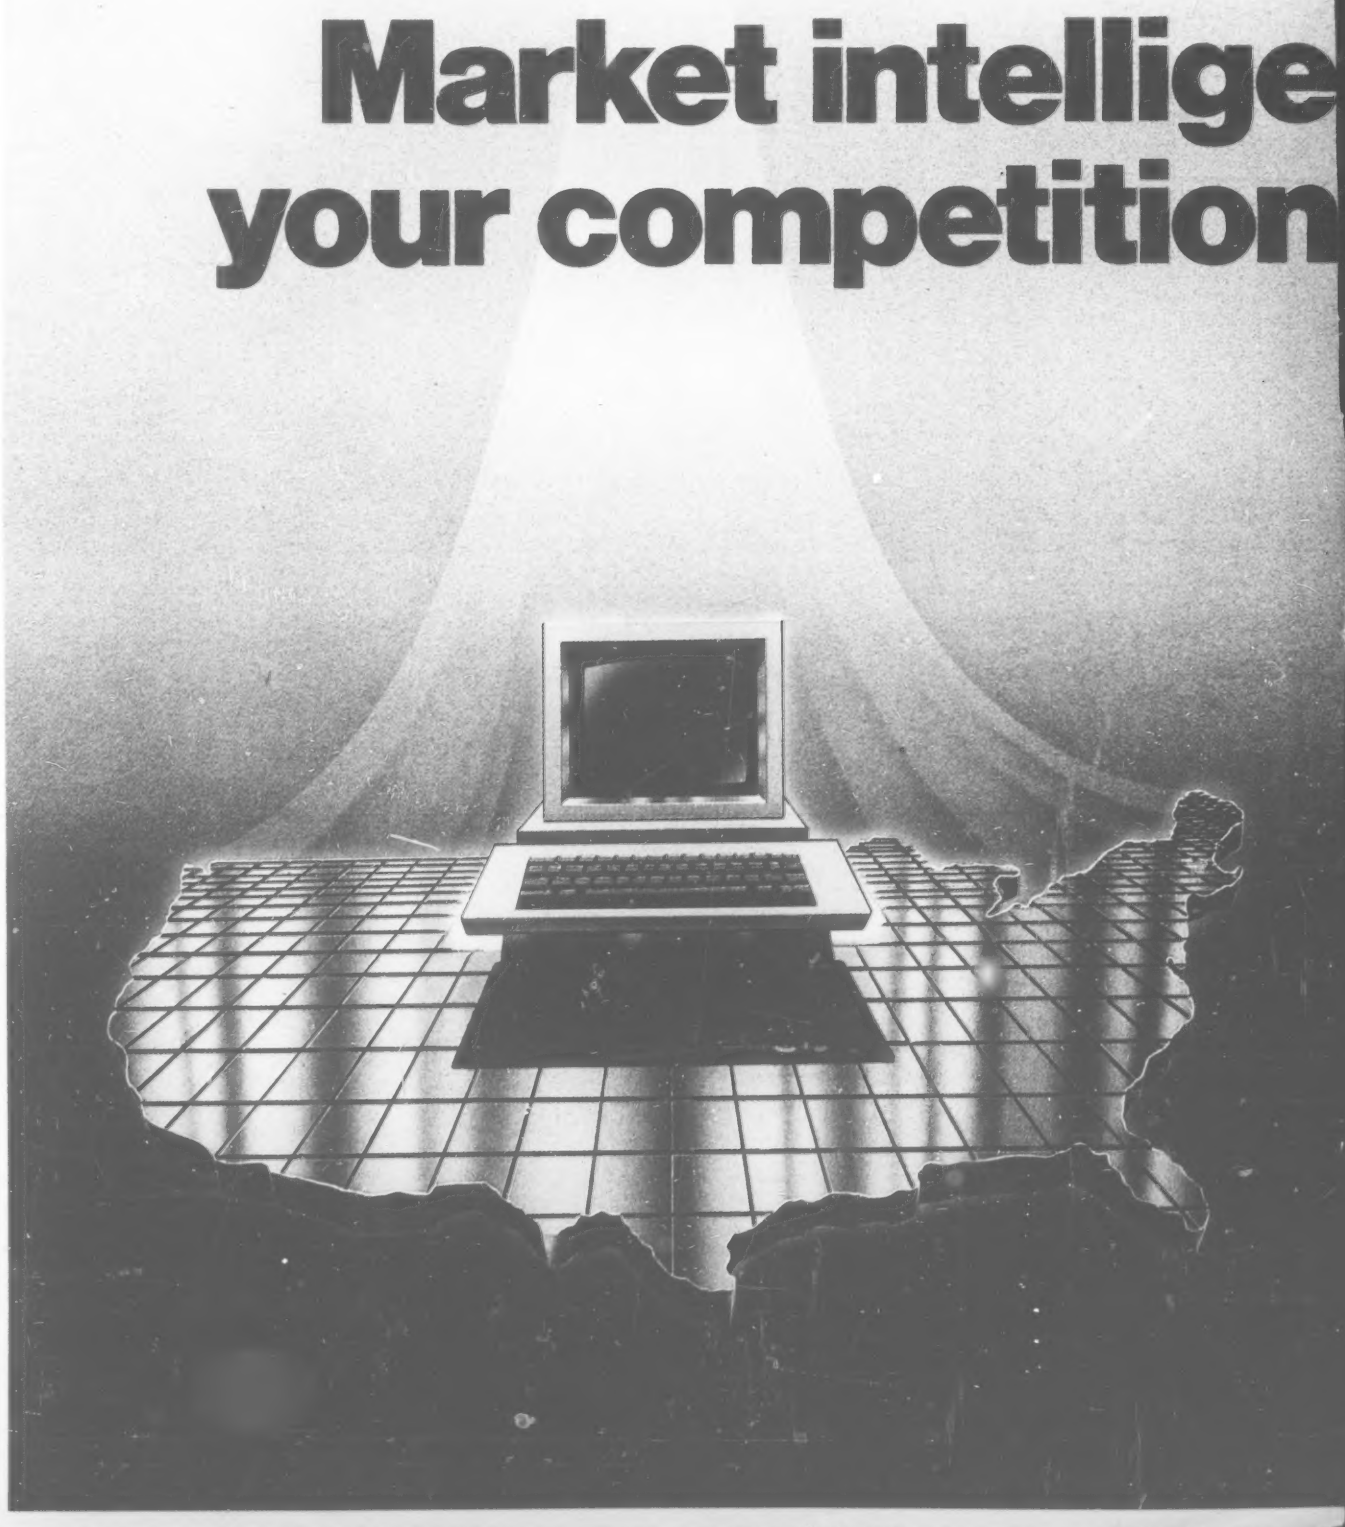
Mercury-brand ads still contained "The shape you want to be in" tagline but featured the rock 'n' roll hits of Rod Stewart in an attempt to woo women and young buyers. "You're in My Heart" and "Do You Think I'm Sexy?" were used in TV and radio spots for the overall brand; "Tonight's the Night" was used for Sable and "Passion" for Cougar. Women were featured prominently in the TV spots, with "You're in My Heart" playing as a tribute. The Rod Stewart campaign was dropped quietly earlier this year.

L-M budgeted an estimated $38 million—the division's biggest-ever advertising blitz—to launch the Tracer subcompact, which is built by Ford in Mexico and based on a design by Ford's Japanese partner, Mazda Motor Corp. The campaign, which represented about 30% of L-M's total 1987 ad spending, was also the first L-M launch to make use of radio. TV got 62% of the Tracer ad budget, print 29% and radio 9%.

The $7,926 Tracer, which replaced the Mercury Lynx, was positioned as an "upscale" compact to disassociate it with other low-price imports. Ads stressed the car's "68 standard features" via a "friendship" theme. The Mercury tagline, "The shape you want to be in," was retained, but the Tracer campaign added, "Because the best friends are the ones that go out of their way for you." The 1987 sales target for Tracer is 40,000 units, eventually reaching 80,000.

Lincoln-Mercury budgeted nearly $20 million—some 15% of its total 1987 ad budget—to launch the German-built Scorpio, even though first-year projected sales are only 5,000-7,000 units. Launch ads for the $23,000-plus sedan focused on the car's German origins and its comfort: "Now you can have your Black Forest cake . . . and enjoy it too," read one ad spread. The Merkur theme, "Advancing the art of driving," was retained in both print and TV advertising. L-M division spent 70% of its Scorpio budget on print and direct mail.

Market intellige
your competition



In the future, Ford is expected to revive the Capri name in the form of an Australian-built 2-plus-2 sports roadster. Also, sources inside Ford whisper that the rear-wheel-drive Mustang will be around through the 1991 model year. A front-wheel-drive car—the one to be produced at Mazda's Michigan plant—will be called Probe, a name borrowed from a long line of Ford aerodynamic concept cars, and will be available in the second quarter of 1988.

In personnel changes, Edsel B. Ford II was moved from general marketing manager of Lincoln-Mercury division to general sales manager, after Thomas Mignanelli left the company to become VP-marketing for Nissan Motor Corp. in USA. Mr. Ford was succeeded by DeWayne Lancaster, from national market representation manager. Succeeding Mr. Lancaster was Theodore Goellner, from Western regional manager.

In addition, Jack J. Telnack, who has been celebrated as Ford's aerodynamic design guru, was promoted and given a more succinct job title. Instead of chief design executive, North American Design, Ford North American Automotive Operations, his business card now reads, simply, VP-design. Mr. Telnack succeeded Donald F. Kopka, who retired in June after nearly 30 years with Ford Motor Co.

nce to outsmart From SAMI®. Now.

At this moment, your battle for market share and shelf space is more brutal than ever. That's why you'll welcome this news about the innovative market intelligence services SAMI has readied for your counter-attack.

These services combine state-of-the-art technology, extensive data retrieval, verified findings and research ingenuity to deliver formidable food, non-food and HBA marketing weapons:

• **SAMSCAN®** now details retail sales of food stores in 26 markets, *plus* extensive causal data and consumer purchases by 12,500 households in geographically dispersed markets. Purchase behavior is tracked with scanner cards and in-home wands to provide the industry's most complete coverage of household purchasing. By year end, SAMSCAN will deliver 35 markets accounting for 66% ACV.

• **FEATUREFAX™**, a vital new service, tightens your control over your trade expenditures and indicates how your trade dollars can be made more productive. The service does more than report the incidence of retail feature advertising in 100 metro areas comprising all 54 SAMI marketing areas. Our exclusive system also weights each ad based on prominence and probable incremental volume, which is adjusted by the market's size, retailer's share of market and the category development index (CDI). This gives you a more accurate gauge of ad impact on volume and share changes.

FeatureFax also uses SAMI's complete UPC dictionary to precisely match feature data with specific item movement data from SAMSCAN's store scanner or SAMI warehouse withdrawal data. All this is delivered at less cost than similar services.

• **COUPONFAX™**, another new service, manages your coupon expenditures. It tracks coupons in all major vehicles (FSI, ROP, direct mail, magazines) in the same 100 metro areas. Instead of relying on national norms, our unique forecasting model yields more precise estimates of actual redemption rates for all coupon events in a category. This means you can now receive more accurate estimates of coupon dollar spending.

• **SAMI** warehouse withdrawal reports, detailing product movement for over 104,000 food, drug and mass merchandising stores in 54 markets accounting for 88% ACV, provide the census-level data base that enables us to benchmark our other services and verify their data before release to you. SAMI alone has this verification prowess.

Further, because warehouse withdrawal and SAMSCAN are designed to be compatible and complementary, with common market definitions, they provide integrated regional data. That leads to actionable market level sales and marketing decisions.

Each of the above services is available individually to you, with 4-week reports and up to 3¼ years of back data. Weekly reports are available on request.

Further, since all SAMI services have compatible data bases, you can build one on another, and obtain the synergistic benefits of more market intelligence. Then, when you are ready for it, we will integrate all services into a total decision support system tailored to your specific needs.

Enter DecisionMaster™

• **DECISIONMASTER** consolidates and interrelates all the marketing intelligence you require on your brand, competition and category...as much as 250,000 pages...on a single compact disc. This decision support system embodies pragmatic programming and ingenious computerization to give you fingertip control of your national, regional and local markets.

SAMI supplies the optical disc reader for your PC and delivers a new disc every 4 weeks, so with minimum effort and no delay you can determine exactly what happened in 54 markets and why. Advanced decision support programming gives you the answers to over 200 commonly asked questions about your brand, competition and category. You also get answers to "what if..." questions and thereby shape your own competitive moves.

We've made certain the disc has ample unused capacity because SAMI is constantly adding services as your needs expand.

SAMI now offers you all the above and much more to outsmart your competition. For further intelligence, contact your SAMI representative or call Robert McCann at (212) 522-5785.

E&J Gallo Winery RANK **71**

Modesto, Calif.

($ in millions)

Worldwide	1986	1985	% chg
Sales	N/A	N/A	N/A
U.S. advertising	117	63	85.8

Just in case any competitors were contemplating a serious challenge, the world's largest winery, E. & J. Gallo, set them straight in 1986 by dramatically doubling its marketing budget to $117 million.

Gallo's marketing in 1986 was ruled by the cooler wars and its long-term effort to upgrade its wine quality image, primarily through spending on varietals, brandy and sparkling wines.

Industry analysts estimate Gallo's revenues were up 10% to about $750 million, almost all sales coming from the U.S.

Spending on Bartles & Jaymes wine cooler doubled to $34 million in 1986. Gallo not only made a strong showing in the quantity of its ads but in the quality as well. The Bartles & Jaymes network TV campaign, supplemented in print and with point-of-sale materials in bars and stores, won the first Best of Show granted at the New York's Andy Awards.

Bartles & Jaymes comfortably sailed to the No. 1 position with about a 22.9% share, replacing category originator California Cooler in the top spot as the Brown-Forman Corp. product dropped to No. 2 with a 17.5% share. Joseph E. Seagram Co., with about a 13% share, outspent B&J by an estimated $6 million, and it is now "outpacing" Bartles & Jaymes in specific markets, says Michael Moaba, managing editor of *Impact*, a wine and spirits industry newsletter published by M. Shanken Communications.

"Nobody has yet yielded to Gallo's tremendous clout," says Mr. Moaba. "They are spending money, hoping coolers will continue to grow dramatically and the volume games will make it worthwhile in the future," he says. Other market analysts aren't as optimistic. "The unit return on coolers is negligible," says one wine industry expert. "They would have to generate tremendous volume, and I don't think it's there." Coolers accounted for one-fourth of all wine products consumed in 1986.

One fallout from the cooler wars is a reduction in sales of low-end table wines, which feeds into Gallo's current marketing push to stress quality. The company is increasing marketing support for varietals and other upscale and high profit premium lines. For example, spending for Andre, the nation's No. 1 champagne, rose 22% to $5.7 million.

Gallo's premium wine spending, which more than doubled to $34 million in 1986, centered on its "All the Best" ads from Hal Riney & Partners, San Francisco.

Some observers believe Gallo, which purchases a large portion of the grapes produced in Sonoma County, may soon launch a coastal varietal which would move the whole line upscale. "Gallo participates in all segments of the wine business, and it wants to be No. 1 in every segment. The only place it is not currently seeking to be No. 1 is in the premium wine segment," says Jon Fredrickson, president of Gomberg-Fredrickson Associates, San Francisco, a wine industry consultancy.

The only categories where ad spending dropped was in generic wines, down from $4 million in 1985 to $70,000 in 1986. Ad support for the low-end Carlo Rossi wines also declined 1% to $2.4 million in 1986.

Gallo increased spending on brandy tenfold to $6.2 million in an effort to move its brandy upscale. In the past two years, Gallo has taken the top spot in the $600 million brandy market. Its share in 1986 was 50%. Gallo drew some adfire from Fromm & Sichel's Christian Brothers, the longtime brandy leader.

Partly as a result of brandy spending, Gallo sharply increased its outdoor advertising, from $66,000 in 1985 to $896,000 in 1986. The bulk of this year's Gallo ad budget hike found its way into broadcast, with network TV doubling to $66 million and spot TV increasing fivefold to $5.3 million. Spot radio spending was up from a mere $59,000 in 1985 to $722,000 in 1986.

Gallo does most of its media buying in-house, with smaller amounts placed by Hal Riney & Partners, its agency for creative.

During 1986, Ernest and Julio consented to one of their few interviews—a cover story in *Fortune*. The subsequent story was termed "vicious" by the family and resulted in the yanking of $650,000 in ads from parent Time Inc. Other media stories focused on a pending lawsuit by Ernest and Julio against brother Joseph for trademark infringement for marketing cheeses under the Joseph Gallo label.

Analysts say that as long as wine master, Julio, and marketing master, Ernest, run the company, there is little chance Gallo's No. 1 position in the market will be challenged. Some observers believe the increased ad spending and the upscale marketing emphasis might indicate new management is beginning to assert some power.

General Electric Co., which spent heavily on new acquisitions in 1986, including $6.4 billion for RCA Corp. and $600 million for an 80% interest in Kidder, Peabody & Co., is spinning off "non-performing" units. In the process, GE cut back its U.S. advertising an estimated 5% to $354.3 million in 1986 from 1985.

Divestitures will affect total ad spending at GE even further in 1987. GE, for example, spent $29 million in 1986 in measured media alone for products in its consumer electronics division, according to BAR/LNA. That division was sold in July 1987 to French government-owned Thomson SA, a consumer and defense electronics giant with sales of about $10 billion.

Terms of the trade involved Thomson paying GE between $500 million and $1 billion in cash for the consumer electronics business and turning over to GE its CRG medical equipment business. GE is already a leader in the worldwide medical equipment business, with revenues of $1.6 billion in 1986. GE's consumer electronics business sales of $3.5 billion in 1986 barely broke even. The division had not met GE's profitability goals set for it two years ago.

The sale now leaves highly diverse GE with major operations in aircraft engines, power systems, heavy industry, aerospace, major appliances, technical products and services, financial services and NBC.

The major appliance business maintained its No. 1 position among U.S. manufacturers with revenues up 14% from 1985. Introduced this year were the Space Center 27 electronic refrigerator and a new line of built-in appliances called Monogram, aimed at upscale consumers who want to build dream kitchens. In addition, GE introduced ranges to accompany the new GE gas range line. GE's major appliances and RCA's consumer service unit business had combined their operations.

GE measured media spending on its major appliances grew 154% to $14.2 million in 1986, an expenditure that did not include spending of $6.4 million on GE refrigerators/freezers, up 12%, or an expenditure of $4.6 million for the GE washer, up from only $200,000 in 1985, according to BAR/LNA.

GE lightbulbs received the second largest media expenditure in 1986 of $15.1 million, up 15.3% from 1985, according to BAR/LNA, which monitored NBC Network spending at $26.5 million, down 5% from 1986.

For the second straight year, National Broadcasting Co. retained its No. 1 spot among the TV networks in prime-time ratings, with a 17.8 rating and a 28 share for the 30-week, 1986-87 season ending in April 1987, according to A.C. Nielsen Co. CBS was a distant second with a 15.8 rating/25 share, and Capital Cities/ABC Network was third at 14.1/22. Each rating point is 1% of the 87.4 TV households in the U.S., while a share equals 1% of those TV sets turned on during prime time. The Nielsen ratings also indicate the erosion in viewership of network TV continues. The decline began about 10 years ago.

Carrying the NBC banner were such offerings as "The Cosby Show," " Family Ties," "The Golden Girls" and "Night Court." They attracted an average audience of 27 million households a week. "The Cosby Show," the season's highest-rated program, drew a 34.9 rating and 53 share. Revenues at NBC TV for 1986 were $1.82 billion and operating profits were $203 million. In early 1987, NBC bought WTVJ-TV, the CBS affiliate in the nation's 14th largest TV market, Miami, from Kohlberg Kravis Roberts & Co. for $270 million, bringing the company's total number of stations to six and giving NBC 22.4% of the U.S. population (25% is maximum by law). NBC, which already had an affiliate in the market in WSVN-TV, will switch that affiliation.

NBC Radio Networks, a weak sister to the TV network, was sold to Westwood One, which owns Mutual Broadcasting System, for $50 million and a 6% financial stake in Westwood. As part of the agreement, NBC News will continue to supply news reports to NBC Radio Network affiliates, although the programs will be sold and produced by Westwood. NBC had insisted in the sale that its NBC News identity remain intact. Also included in the buy was NBC Radio Entertainment, a program syndication company. The radio network, which consists of NBC Radio Network, Talknet and the youth-oriented Source, was expected to lose $7 million this year, according to communications industry analysts.

The radio networks will boost Westwood One's share of the radio network business from 16% to 27%, placing it No. 2 to ABC's seven radio networks, which hold 36% of the business.

GE also is expected to sell several owned-and-operated NBC FM radio stations. Grandfathered protection had allowed NBC to operate AM/FM combos in three markets where it owned TV stations —New York, Chicago and Washington—although that protection is voided with the sale of grandfathered properties. However, the FCC is considering rules that would allow a company owning a VHF TV station to co-own an AM stand-alone station in the same market.

Acquisitions spurred growth in 1986 at GE Financial Services. GEFS acquired an 80% stake for $600 million for the Wall Street securities firm, Kidder, Peabody. Kidder joins General Electric Credit Corp. (GECC) and Employers Reinsurance Corp. (ERC) to form three participants in the financial services market.

The RCA purchase along with good returns from GE financial services helped boost second-quarter 1987 earnings 16% to $720 million and sales to $9.56 billion, up 23%, although the prior year period only included one month of RCA ownership. For the first half of 1987, earnings rose 16% to $1.34 billion, on sales of $17.88 billion, up 31%.

Restaurants	1,250	1,051	18.9
Specialty retail	490	474	3.4

After finishing a two-year corporate reshaping, General Mills stormed back in 1986 with double-digit sales and profit increases in its consumer foods and restaurant divisions. In mid-1986, the Minneapolis-based company completed its streamlining when it sold its furniture group, which included the Pennsylvania House and Kittinger furniture operations.

Specialty retailing revenues rose only 3.4%, but continuing operations shot up 28% after General Mills sold four of six businesses in the group. Remaining are Talbots women's apparel and Eddie Bauer outdoor and sports apparel chains.

General Mills' workforce of 65,000 will shrink 6% in the next year through attrition and scaling back, a spokesman says. Even General Mills' matronly Betty Crocker got an early 1986 makeover. Corporate reshaping enabled the company to concentrate on consumer foods, which provided 66.5% of General Mills' fiscal 1987 sales.

The only major changes in the management team were the naming in mid-1986 of Sally Frame and Michael Rayden as presidents of the Talbots and Eddie Bauer units, respectively, and VPs of General Mills.

General Mills is planning to invest $800 million to build a state-of-the-art cereal plant, open new Red Lobster Inns and Olive Garden restaurants and double the number of Talbots stores.

Sales and net profits rose 15.4% and 22.7%, respectively, in fiscal 1987 (ending May 31), prompting Chairman-CEO H. Brewster Atwater Jr. to call General Mills a "Company of Champions"—a variation on the company's famous "Breakfast of Champions" slogan for Wheaties cereal. General Mills announced a two-for-one stock split in September 1986 after first-quarter food and restaurant sales zoomed substantially from 1985.

From 1986 and through August, General Mills aggressively churned out new cereal, fruit snacks and Betty Crocker mix and specialty products. In July, General Mills declared war on Quaker Oats' dominance in the $498 million hot cereal category by introducing Total Oatmeal in one-minute and instant varieties. Saatchi & Saatchi DFS Compton, New York, handles the $24 million Total account, designed as a long-term onslaught on Quaker's 68% share in the category.

The No. 2 marketer of ready-to-eat cereals, General Mills maintained its 24.1% dollar share in the $5.2 billion market last year, up from 23.7%. No. 1 Kellogg Co., Battle Creek, Mich. claimed 42%, up from 41.6%. In pound volume, Kellogg Co. gobbled up 42.6% of the market compared to General Mills' 21.2%, according to John C. Maxwell Jr. of Furman, Selz, Mager, Dietz & Birney, New York.

Volume and sales shares of Big G's top four cereals—Cheerios, Honey Nut Cheerios, Total and Wheaties—slipped in 1986. But 1986 introductions of three new cereals, plus three more this year, helped boost sales. Three new cereals, Clusters, Oatmeal Raisin Crisp and Raisin Nut Bran, are targeted to adults, a burgeoning niche coveted by General Mills and Kellogg. The other new cereals, Circus Fun, Ice Cream Cones and Rocky Road, are presweetened children's fare. Helping to boost sales of nine Big G cereals was an early 1987 "Wheel of Fortune" Sweepstakes featuring letter-turner Vanna White in network TV ads and couponed free-standing inserts via S&S DFS Compton, New York.

General Mills' top-selling Cheerios slipped from a 5.2% share in 1985 to a 5.1% share of dollar sales in 1986. In poundage, it dropped from a 5% share to 4.9% share. Its ranking among individual cereals remained No. 3 in poundage and No. 2 in dollar volume for both years. Kellogg's Corn Flakes leads in poundage with a 6.6% share compared with a 4.5% dollar share. Kellogg's Frosted Flakes, No. 2 in poundage at 6%, is No. 1 in dollar sales at 5.7%. Cheerios and Honey Nut Cheerios (No. 9 in poundage, with 2.9% of poundage, and No. 7 in dollar sales) were the only General Mills cereals in the top 10.

Even with Olympic gymnastic phenomenon Mary Lou Retton on the Wheaties box, market share for the 63-year-old brand dropped 15% and sales dipped $3.8 million to $20.6 million in 1986.

Cereal consumption jumped 14% in Canada during fiscal 1987, with General Mills introductions of Cinnamon Toast Crunch, Fibre 1 and reformulated
